	<p>Skills * Programming Languages: Python (pandas, numpy, scipy, scikit-learn, matplotlib), Sql, Java, JavaScript/JQuery. * Machine learning: Regression, SVM, Naïve Bayes, KNN, Random Forest, Decision Trees, Boosting techniques, Cluster Analysis, Word Embedding, Sentiment Analysis, Natural Language processing, Dimensionality reduction, Topic Modelling (LDA, NMF), PCA & Neural Nets. * Database Visualizations: Mysql,SqlServer, Cassandra, Hbase, ElasticSearch D3.js, DC.js, Plotly, kibana, matplotlib, ggplot, Tableau. * Others: Regular Expression, HTML, CSS, Angular 6, Logstash, Kafka, Python Flask, Git, Docker, computer vision - Open CV and understanding of Deep learning.</p> <p>Education Details</p>	

Data Science Assurance Associate

Data Science Assurance Associate - Ernst & Young LLP

Skill Details

JAVASCRIPT- Experience - 24 months

jQuery- Experience - 24 months

Python- Experience - 24 months

Company - Ernst & Young LLP

Description - Fraud Investigations and Dispute Services Assurance

TECHNOLOGY ASSISTED REVIEW

TAR (Technology Assisted Review) assists in accelerating the review process and run analytics and generate reports.

- * Core member of a team helped in developing automated review platform tool from scratch for assisting E discovery domain, this tool implements predictive coding and topic modelling by automating reviews, resulting in reduced labor costs and time spent during the lawyers review.

- * Understand the end to end flow of the solution, doing research and development for classification models, predictive analysis and mining of the information present in text data. Worked on analyzing the outputs and precision monitoring for the entire tool.

- * TAR assists in predictive coding, topic modelling from the evidence by following EY standards. Developed the classifier models in order to identify "red flags" and fraud-related issues.

Tools & Technologies: Python, scikit-learn, tfidf, word2vec, doc2vec, cosine similarity, Naïve Bayes, LDA, NMF for topic modelling, Vader and text blob for sentiment analysis. Matplotlib, Tableau dashboard for reporting.

MULTIPLE DATA SCIENCE AND ANALYTIC PROJECTS (USA CLIENTS)

TEXT ANALYTICS - MOTOR VEHICLE CUSTOMER REVIEW DATA *

Received customer feedback survey data for past one year. Performed sentiment (Positive, Negative & Neutral) and time series analysis on customer comments across all 4 categories.

- * Created heat map of terms by survey category based on frequency of words
- * Extracted Positive and Negative words across all the Survey categories and plotted Word cloud.

- * Created customized tableau dashboards for effective reporting and visualizations.

CHATBOT * Developed a user friendly chatbot for one of our Products which handle simple questions about hours of operation, reservation options and so on.

- * This chat bot serves entire product related questions. Giving overview of tool via QA platform and also give recommendation responses so that user question to build chain of relevant answer.

- * This too has intelligence to build the pipeline of questions as per user requirement and asks the relevant /recommended questions.

Tools & Technologies: Python, Natural language processing, NLTK, spacy, topic modelling, Sentiment analysis, Word Embedding, scikit-learn, JavaScript/JQuery,SqlServer

INFORMATION GOVERNANCE

Organizations to make informed decisions about all of the information they store. The integrated Information Governance portfolio synthesizes intelligence across unstructured data sources and facilitates action to ensure organizations are best positioned to counter information risk.

- * Scan data from multiple sources of formats and parse different file formats, extract Meta data information, push results for indexing elastic search and created customized, interactive dashboards using kibana.

- * Performing ROT Analysis on the data which give information of data which helps identify content that is either Redundant, Outdated, or Trivial.

- * Performing full-text search analysis on elastic search with predefined methods which can tag as (PII) personally identifiable information (social security numbers, addresses, names, etc.) which frequently targeted during cyber-attacks.

	FRAUD ANALYTIC PLATFORM Fraud Analytics and investigative platform to review all red flag cases. FAP is a Fraud Analytics and investigative platform with inbuilt case manager and suite of Analytics for various ERP systems.
	* It can be used by clients to interrogate their Accounting systems for identifying the anomalies which can be indicators of fraud by running advanced analytics
Data Science	Tools & Technologies: HTML, JavaScript, SqlServer, JQuery, CSS, Bootstrap, Node.js, D3.js, DC.js Education Details May 2013 to May 2017 B.E UIT-RGPV Data Scientist
	 Data Scientist - Matelabs Skill Details Python- Experience - Less than 1 year months Statsmodels- Experience - 12 months AWS- Experience - Less than 1 year months Machine learning- Experience - Less than 1 year months Sklearn- Experience - Less than 1 year months Scipy- Experience - Less than 1 year months Keras- Experience - Less than 1 year months Company Details company - Matelabs description - ML Platform for business professionals, dummies and enthusiasts. 60/A Koramangala 5th block, Achievements/Tasks behind sukh sagar, Bengaluru, India Developed and deployed auto preprocessing steps of machine learning mainly missing value treatment, outlier detection, encoding, scaling, feature selection and dimensionality reduction. Data Science	company - Matelabs description -

F

D

â€¢ Train LSTM models on words.

Technical Environment: Python.

Industry: Finance

Service Area: Financial Services - BI development Project Name: SWIFT

Consultant: 8 months.

The project was to develop an analytics infrastructure on top of SAP S/4, it would user to view

financial reports to respective departments. Reporting also included forecasting expenses.

Role: I was leading the offshore team.

Key Responsibilities:

â€¢ Design & Develop data models for reporting.

â€¢ Develop ETL for data flow

â€¢ Validate various reports.

Technical Environment: SAP HANA, Tableau, SAP AO.

Industry: Healthcare Analytics

Service Area: Life Sciences - Product development Project Name: Clinical

Healthcare System

Consultant: 2 months.

The project was to develop an analytics infrastructure on top of Argus, it would allow users to query faster and provide advance analytics capabilities.

Role: I was involved from design to deploy phase, performed a lot of data restructuring and built models for insights.

Key Responsibilities:

â€¢ Design & Develop data models for reporting.

â€¢ Develop and deploy analytical models.

â€¢ Validate various reports.

Technical Environment: Data Modelling, SAP HANA, Tableau, NLP.

Industry: FMCG

Service Area: Trade & Promotion

Project Name: Consumption Based Planning for Flowers Foods Consultant; 8 months.

The project involved setting up of CRM and CBP modules.

Role: I was involved in key data decomposition activities and setting up the base for future year forecast. Over the course of the project I developed various models and carried out key performance improvements.

Key Responsibilities:

â€¢ Design & Develop HANA models for decomposition.

â€¢ Develop data flow for forecast.

â€¢ Developed various views for reporting of Customer/Sales/Funds.

â€¢ Validate various reports in BOBJ.

Technical Environment: Data Modelling, SAP HANA, BOBJ, Time Series Forecasting.

Internal Initiative Industry: FMCG

Customer Segmentation and RFM analysis Consultant; 3 months.

The initiative involved setting up of HANA-Python interface and advance analytics on Python. Over the course I had successfully segmented data into five core segments using K-means and carried out RFM analysis in Python. Also developed algorithm to categorize any new customer under the defined buckets.

Technical Environment: Anaconda3, Python3.6, HANA SPS12

Industry: Telecom Invoice state detection Consultant; 1 months.

The initiative was to reduce the manual effort in verifying closed and open invoices manually, it involved development to a decision tree to classify open/closed invoices.

This enabled effort reduction by 60%.

Technical Environment: R, SAP PAL, SAP HANA SPS12

Accenture Experience

Industry: Analytics - Cross Industry

In Process Analytics for SAP Senior Developer; 19 months.

Accenture Solutions Pvt. Ltd., India

The project involved development of SAP analytics tool - In Process Analytics (IPA) . My role was to develop database objects and data models to provide operational insights to clients.

Role: I have developed various Finance related KPIs and spearheaded various deployments.

Introduced SAP Predictive analytics to reduce development time and reuse functionalities for KPIs and prepared production planning reports.

Key Responsibilities:

- â€¢ Involved in information gather phase.
- â€¢ Designed and implemented SAP HANA data modelling using Attribute View, Analytic View, and Calculation View.
- â€¢ Developed various KPI's individually using complex SQL scripts in Calculation views.
- â€¢ Created procedures in HANA Database.
- â€¢ Took ownership and developed Dashboard functionality.
- â€¢ Involved in building data processing algorithms to be executed in R server for cluster analysis.

Technical Environment: R, SAP HANA, T-SQL.

Industry: Cross Industry

Accenture Testing Accelerator for SAP Database Developer; 21 months.

Accenture Solutions Pvt. Ltd., India

Role: I have taken care of all development activities for the ATAS tool and have also completed various deployments of the product.

Apart from these activities I was also actively involved in maintenance of the database servers
(Production & Quality)

Key Responsibilities:

- â€¢ Analyzing business requirements, understanding the scope, getting requirements clarified
- interacting with business and further transform all requirements to generate attribute mapping documents and reviewing mapping specification documentation
- â€¢ Create / Update database objects like tables, views, stored procedures, function, and packages
- â€¢ Monitored SQL Server Error Logs and Application Logs through SQL Server Agent
- â€¢ Prepared Data Flow Diagrams, Entity Relationship Diagrams using UML
- â€¢ Responsible for Designing, developing and Normalization of database tables
- â€¢ Experience in performance tuning using SQL profiler.
- â€¢ Involved in QA, UAT, knowledge transfer and support activities

Technical Environment: SQL Server 2008/2014, Visual Studio 2010, Windows Server, Performance Monitor, SQL Server Profiler, C#, PL-SQL, T-SQL.

Versatile, high-energy professional targeting challenging assignments in Machine

PROFILE SUMMARY

â¤ An IT professional with knowledge and experience of 2 years in Wipro Technologies in Machine

Learning, Deep Learning, Data Science, Python, Software Development.

â¤ Skilled in managing end-to-end development and software products / projects from inception, requirement

specs, planning, designing, implementation, configuration and documentation.

â¤ Knowledge on Python , Machine Learning, Deep Learning, data Science, Algorithms, Neural Network,

NLP, GCP.

â¤ Knowledge on Python Libraries like Numpy, Pandas, Seaborn , Matplotlib, Cufflinks.

â¤ Knowledge on different algorithms in Machine learning like KNN, Decision Tree, Bias variance Trade off,

Support vector Machine(SVM),Logistic Regression, Neural networks.

â¤ Have knowledge on unsupervised, Supervised and reinforcement data.

â¤ Programming experience in relational platforms like MySQL,Oracle.

â¤ Have knowledge on Some programming language like C++,Java.

â¤ Experience in cloud based environment like Google Cloud.

â¤ Working on different Operating System like Linux, Ubuntu, Windows.

â¤ Good interpersonal and communication skills.

â¤ Problem solving skills with the ability to think laterally, and to think with a medium term and long term

perspective

â¤ Flexibility and an open attitude to change.

â¤ Ability to create, define and own frameworks with a strong emphasis on code reusability.

TECHNICAL SKILLS

Programming Languages Python, C

Libraries Seaborn, Numpy, Pandas, Cufflinks, Matplotlib

Algorithms

KNN, Decision Tree, Linear regression, Logistic Regression, Neural

Networks, K means clustering,

Tensorflow, SVM

Databases SQL, Oracle

Operating Systems Linux, Window

Development Environments NetBeans, Notebooks, Sublime

Ticketing tools Service Now, Remedy

Education

UG Education:

B.Tech (Computer Science) from Rayat and Bahra Institute of Engineering and Biotechnology passed with 78.4%in 2016.

Schooling:

XII in 2012 from Moti Ram Arya Sr. Secondary School(Passed with 78.4%)

X in 2010 from Valley Public School (Passed with 9.4 CGPA)

WORK EXPERINCE

Title : Wipro Neural Intelligence Platform

Team Size : 5

Brief: Wiproâs Neural Intelligence Platform harnesses the power of automation and artificial intelligence technologiesânatural language processing (NLP), cognitive, machine learning, and analytics. The platform comprises three layers: a data engagement platform that can easily access and manage multiple structured and unstructured data sources; an âtent assessment and reasoningâ engine that includes sentiment and predictive analytics; and a deep machine learning engine that can sense, act, and learn over time. The project entailed automating responses to user queries at the earliest. The Monster Bot using the power of Deep Machine Learning, NLP to handle such queries. User can see the how their queries can be answered quickly like allL1 activities can be eliminated.

Entity Extractor -> This involves text extraction and NLP for fetching out important information from the text like dates, names, places, contact numbers etc. This involves Regex, Bluemix NLU apiâs and machine learning using

Tensor flow for further learning of new entities.

Classifier ->This involves the classifications of classes, training of dataset and predicting the output using the SKLearn classifier (MNB, SVM, SGD as Classifier) and SGD for the optimization to map the user queries with the best suited response and make the system efficient.

NER: A Deep Learning NER Model is trained to extract the entities from the text. Entities like Roles, Skills,

Organizations can be extracted from raw text. RNN(LSTM) Bidirectional model is trained for extracting such entities using Keras TensorFlow framework.

OTHER PROJECTS

Title : Diabetes Detection

Brief : Developed the software which can detect whether the person is suffering from Diabetes or not and got the third prize in it.

TRAINING AND CERTIFICATIONS

Title: Python Training, Machine Learning, Data Science, Deep Learning

Organization: Udemy, Coursera (Machine Learning, Deep Learning)

Personal Profile

Fatherâs Name :Mr. Tirlok Aggarwal

Language Known : English & Hindi

Marital Status :Single

Date of Birth(Gender):1993-12-20(YYYY-MM-DD) (F)

company - Wipro

description - Developing programs in Python.

format and have to find the pattern form it.

â Data Visualization and Data insights Hadoop Eco System, Hive, PySpark, QlikSense

The goal of this project is to build a Business Solutions to a Internet Service Provider Company, like handling data which is generated per day basis, for that we have to visualize that data and find the usage pattern form it and have a generate a reports.

â Image Based Fraud Detection Microsoft Face API, PySpark, Open CV

The main goal of project is Recognize similarity for a face to given Database images. Face recognition is the recognizing a special face from set of different faces. Face is extracted and then compared with the database Image if that Image recognized then the person already applied for loan from somewhere else and now hiding his or her identity, this is how we are going to prevent the frauds in the initial stage itself.

â Churn Analysis for Internet Service Provider R, Python, Machine Learning, Hadoop

The objective is to identify the customer who is likely to churn in a given period of time; we have to pretend the customer giving incentive offers.

â Sentiment Analysis Python, NLP, Apache Spark service in IBM Bluemix. This project is highly emphasis on tweets from Twitter data were taken for mobile networks service provider to do a sentiment analysis and analyze whether the expressed opinion was positive, negative or neutral, capture the emotions of the tweets and comparative analysis.

Quantifiable Results:

â Mentored 7-12 Data Science Enthusiast each year that have all since gone on to graduate school in Data Science and Business Analytics.

â Reviewed and evaluated 20-40 Research Papers on Data Science for one of the largest Data Science Conference called Data Science Congress by Aegis School of Business Mumbai.

â Heading a solution providing organization called Data Science Delivered into Aegis school of Data Science Mumbai and managed 4-5 live projects using Data Science techniques.

â Working for some social cause with the help of Data Science for Social Goods Committee, where our team developed a product called "Let's find a missing Child" for helping society.

Company - THEMATHCOMPANY

Description - I am currently working with a Casino based operator(name not to be disclosed) in Macau. I need to segment the customers who visit their property based on the value the patrons bring into the company. Basically prove that the segmentation can be done in much better way than the current system which they have with proper numbers to back it up. Henceforth they can implement target marketing strategy to attract their customers who add value to the business.

Description - The project involved analysing historic deals and coming with insights to optimize future deals.

Role: Was given raw data, carried out end to end analysis and presented insights to client.

Key Responsibilities:

â€¢ Extract data from client systems across geographies.

â€¢ Understand and build reports in tableau. Infer meaningful insights to optimize prices and find out process blockades.

Technical Environment: R, Tableau.

Industry: Cross Industry

Service Area: Cross Industry - Products

Project Name: Handwriting recognition

Consultant: 3 months.

The project involved taking handwritten images and converting them to digital text images by object detection and sentence creation.

Role: I was developing sentence correction functionality.

Key Responsibilities:

â€¢ Gather data large enough to capture all English words

â€¢ Train LSTM models on words.

Technical Environment: Python.

Industry: Finance

Service Area: Financial Services - BI development Project Name: SWIFT

Consultant: 8 months.

The project was to develop an analytics infrastructure on top of SAP S/4, it would user to view

In Process Analytics for SAP Senior Developer; 19 months.

Accenture Solutions Pvt. Ltd., India

The project involved development of SAP analytics tool - In Process Analytics (IPA) . My role was to develop database objects and data models to provide operational insights to clients.

Role: I have developed various Finance related KPIs and spearheaded various deployments.

Introduced SAP Predictive analytics to reduce development time and reuse functionalities for KPIs and prepared production planning reports.

Key Responsibilities:

â€¢ Involved in information gather phase.

â€¢ Designed and implemented SAP HANA data modelling using Attribute View, Analytic View, and Calculation View.

â€¢ Developed various KPI's individually using complex SQL scripts in Calculation views.

â€¢ Created procedures in HANA Database.

â€¢ Took ownership and developed Dashboard functionality.

â€¢ Involved in building data processing algorithms to be executed in R server for cluster analysis.

Technical Environment: R, SAP HANA, T-SQL.

Industry: Cross Industry

Accenture Testing Accelerator for SAP Database Developer; 21 months.

Accenture Solutions Pvt. Ltd., India

Role: I have taken care of all development activities for the ATAS tool and have also completed

various deployments of the product.

Apart from these activities I was also actively involved in maintenance of the database servers

(Production & Quality)

Key Responsibilities:

â€¢ Analyzing business requirements, understanding the scope, getting requirements clarified

interacting with business and further transform all requirements to generate attribute

mapping documents and reviewing mapping specification documentation

â€¢ Create / Update database objects like tables, views, stored procedures, function, and packages

â€¢ Monitored SQL Server Error Logs and Application Logs through SQL Server Agent

â€¢ Prepared Data Flow Diagrams, Entity Relationship Diagrams using UML

â€¢ Responsible for Designing, developing and Normalization of database tables

â€¢ Experience in performance tuning using SQL profiler.

â€¢ Involved in QA, UAT, knowledge transfer and support activities

Technical Environment: SQL Server 2008/2014, Visual Studio 2010,

Windows Server, Performance

Monitor, SQL Server Profiler, C#, PL-SQL, T-SQL.

VVersatile, high-energy professional targeting challenging assignments in Machine

PROFILE SUMMARY

â A An IT professional with knowledge and experience of 2 years in Wipro Technologies in Machine Learning, Deep Learning, Data Science, Python, Software Development.

â Skilled in managing end-to-end development and software products / projects from inception, requirement specs, planning, designing, implementation, configuration and documentation.

â Knowledge on Python , Machine Learning, Deep Learning, data Science, Algorithms, Neural Network, NLP, GCP.

â Knowledge on Python Libraries like Numpy, Pandas, Seaborn , Matplotlib, Cufflinks.

â Knowledge on different algorithms in Machine learning like KNN, Decision Tree, Bias variance Trade off, Support vector Machine(SVM),Logistic Regression, Neural networks.

â Have knowledge on unsupervised, Supervised and reinforcement data.

â Programming experience in relational platforms like MySQL,Oracle.

â Have knowledge on Some programming language like C++,Java.

â Experience in cloud based environment like Google Cloud.

â Working on different Operating System like Linux, Ubuntu, Windows.

â Good interpersonal and communication skills.

â Problem solving skills with the ability to think laterally, and to think with a medium term and long term perspective

â Flexibility and an open attitude to change.

â Ability to create, define and own frameworks with a strong emphasis on code reusability.

TECHNICAL SKILLS

Programming Languages Python, C
Libraries Seaborn, Numpy, Pandas, Cufflinks, Matplotlib
Algorithms
KNN, Decision Tree, Linear regression, Logistic Regression, Neural Networks, K means clustering,
Tensorflow, SVM
Databases SQL, Oracle
Operating Systems Linux, Window
Development Environments NetBeans, Notebooks, Sublime
Ticketing tools Service Now, Remedy
Education
UG Education:
B.Tech (Computer Science) from Rayat and Bahra Institute of Engineering and Biotechnology passed with 78.4% in 2016.
Schooling:
XII in 2012 from Moti Ram Arya Sr. Secondary School(Passed with 78.4%)
X in 2010 from Valley Public School (Passed with 9.4 CGPA)

WORK EXPERIENCE

Title : Wipro Neural Intelligence Platform
Team Size : 5
Brief: Wipro's Neural Intelligence Platform harnesses the power of automation and artificial intelligence technologies—natural language processing (NLP), cognitive, machine learning, and analytics. The platform comprises three layers: a data engagement platform that can easily access and manage multiple structured and unstructured data sources; an intent assessment and reasoning engine that includes sentiment and predictive analytics; and a deep machine learning engine that can sense, act, and learn over time. The project entailed automating responses to user queries at the earliest. The Monster Bot using the power of Deep Machine Learning, NLP to handle such queries. User can see the how their queries can be answered quickly like all L1 activities can be eliminated.

Entity Extractor -> This involves text extraction and NLP for fetching out important information from the text like dates, names, places, contact numbers etc. This involves Regex, Bluemix NLU api's and machine learning using

Tensor flow for further learning of new entities.

Classifier ->This involves the classifications of classes, training of dataset and predicting the output using the SKLearn classifier (MNB, SVM, SGD as Classifier) and SGD for the optimization to map the user queries with the best suited response and make the system efficient.

NER: A Deep Learning NER Model is trained to extract the entities from the text. Entities like Roles, Skills, Organizations can be extracted from raw text. RNN(LSTM) Bidirectional model is trained for extracting such entities using Keras TensorFlow framework.

OTHER PROJECTS

Title : Diabetes Detection

Brief : Developed the software which can detect whether the person is suffering from Diabetes or not and got the third prize in it.

TRAINING AND CERTIFICATIONS

Title: Python Training, Machine Learning, Data Science, Deep Learning

Organization: Udemy, Coursera (Machine Learning, Deep Learning)

Personal Profile

Fatherâs Name :Mr. Tirlok Aggarwal

Language Known : English & Hindi

Marital Status :Single

Date of Birth(Gender):1993-12-20(YYYY-MM-DD) (F)

company - Wipro

description - Developing programs in Python.

description - Mostly working on industry project for providing solution along with Teaching Appointments: Teach undergraduate and graduate-level courses in Spark and Machine Learning as an adjunct faculty member at Aegis School of Data Science, Mumbai (2017 to Present)

company - Aegis school of Data & Business

description - Data Science Intern, Nov 2015 to Jan 2016

Furnish executive leadership team with insights, analytics, reports and recommendations enabling effective strategic planning across all business units, distribution channels and product lines.

â Chat Bot using AWS LEX and Tensor flow Python
The goal of project creates a chat bot for an academic institution or university to handle queries related courses offered by that institute. The objective of this task is to reduce human efforts as well as reduce man made errors. Even by this companies handle their client 24x7. In this case companies are academic institutions and clients are participants or students.

â Web scraping using Selenium web driver Python

The task is to scrap the data from the online messaging portal in a text format and have to find the pattern form it.

â Data Visualization and Data insights Hadoop Eco System, Hive, PySpark, QlikSense

The goal of this project is to build a Business Solutions to a Internet Service Provider Company, like handling data which is generated per day basis, for that we have to visualize that data and find the usage pattern form it and have a generate a reports.

â Image Based Fraud Detection Microsoft Face API, PySpark, Open CV

The main goal of project is Recognize similarity for a face to given Database images. Face recognition is the recognizing a special face from set of different faces. Face is extracted and then compared with the database

Image if that Image recognized then the person already applied for loan from somewhere else and now hiding his or her identity, this is how we are going to prevent the frauds in the initial stage itself.

â Churn Analysis for Internet Service Provider R, Python, Machine Learning, Hadoop

The objective is to identify the customer who is likely to churn in a given period of time; we have to pretend the customer giving incentive offers.

â Sentiment Analysis Python, NLP, Apache Spark service in IBM Bluemix.

This project is highly emphasis on tweets from Twitter data were taken for mobile networks service provider to do a sentiment analysis and analyze whether the expressed opinion was positive, negative or neutral, capture the emotions of the tweets and comparative analysis.

Quantifiable Results:

â Mentored 7-12 Data Science Enthusiast each year that have all since gone on to graduate school in Data Science and Business Analytics.

â Reviewed and evaluated 20-40 Research Papers on Data Science for one of the largest Data Science Conference called Data Science Congress by Aegis School of Business Mumbai.

â Heading a solution providing organization called Data Science Delivered into Aegis school of Data Science Mumbai and managed 4-5 live projects using Data Science techniques.

â Working for some social cause with the help of Data Science for Social Goods Committee, where our team developed a product called "Let's find a missing Child" for helping society.

TECHNOLOGY ASSISTED REVIEW

TAR (Technology Assisted Review) assists in accelerating the review process and run analytics and generate reports.

* Core member of a team helped in developing automated review platform tool from scratch for assisting E discovery domain, this tool implements predictive coding and topic modelling by automating reviews, resulting in reduced labor costs and time spent during the lawyers review.

* Understand the end to end flow of the solution, doing research and development for classification models, predictive analysis and mining of the information present in text data. Worked on analyzing the outputs and precision monitoring for the entire tool.

* TAR assists in predictive coding, topic modelling from the evidence by following EY standards. Developed the classifier models in order to identify "red flags" and fraud-related issues.

Tools & Technologies: Python, scikit-learn, tfidf, word2vec, doc2vec, cosine similarity, NaÃ¯ve Bayes, LDA, NMF for topic modelling, Vader and text blob for sentiment analysis. Matplot lib, Tableau dashboard for reporting.

MULTIPLE DATA SCIENCE AND ANALYTIC PROJECTS (USA CLIENTS) TEXT ANALYTICS - MOTOR VEHICLE CUSTOMER REVIEW DATA *

Received customer feedback survey data for past one year. Performed sentiment (Positive, Negative & Neutral) and time series analysis on customer comments across all 4 categories.

* Created heat map of terms by survey category based on frequency of words * Extracted Positive and Negative words across all the Survey categories and plotted Word cloud.

* Created customized tableau dashboards for effective reporting and visualizations.

CHATBOT * Developed a user friendly chatbot for one of our Products which handle simple questions about hours of operation, reservation options and so on.

* This chat bot serves entire product related questions. Giving overview of tool via QA platform and also give recommendation responses so that user question to build chain of relevant answer.

* This too has intelligence to build the pipeline of questions as per user requirement and asks the relevant /recommended questions.

Tools & Technologies: Python, Natural language processing, NLTK, spacy, topic modelling, Sentiment analysis, Word Embedding, scikit-learn, JavaScript/JQuery, SqlServer

INFORMATION GOVERNANCE

Organizations to make informed decisions about all of the information they store. The integrated Information Governance portfolio synthesizes intelligence across unstructured data sources and facilitates action to ensure organizations are best positioned to counter information risk.

* Scan data from multiple sources of formats and parse different file formats, extract Meta data information, push results for indexing elastic search and created customized, interactive dashboards using kibana.

* Preforming ROT Analysis on the data which give information of data which helps identify content that is either Redundant, Outdated, or Trivial.

* Preforming full-text search analysis on elastic search with predefined methods which can tag as (PII) personally identifiable information (social security numbers, addresses, names, etc.) which frequently targeted during cyber-attacks.

Tools & Technologies: Python, Flask, Elastic Search, Kibana

FRAUD ANALYTIC PLATFORM

Fraud Analytics and investigative platform to review all red flag cases. FAP is a Fraud Analytics and investigative platform with inbuilt case manager and suite of Analytics for various ERP systems.

* It can be used by clients to interrogate their Accounting systems for identifying the anomalies which can be indicators of fraud by running advanced analytics

Tools & Technologies: HTML, JavaScript, SqlServer, JQuery, CSS, Bootstrap, Node.js, D3.js, DC.js

Description - The project involved analysing historic deals and coming with insights to optimize future deals.

Role: Was given raw data, carried out end to end analysis and presented insights to client.

Key Responsibilities:

â€¢ Extract data from client systems across geographies.

â€¢ Understand and build reports in tableau. Infer meaningful insights to optimize prices and find out process blockades.

Technical Environment: R, Tableau.

Industry: Cross Industry

Service Area: Cross Industry - Products

Project Name: Handwriting recognition

Consultant: 3 months.

The project involved taking handwritten images and converting them to digital text images by object detection and sentence creation.

Role: I was developing sentence correction functionality.

Key Responsibilities:

â€¢ Gather data large enough to capture all English words

â€¢ Train LSTM models on words.

Technical Environment: Python.

Industry: Finance

Service Area: Financial Services - BI development Project Name: SWIFT

Consultant: 8 months.

The project was to develop an analytics infrastructure on top of SAP S/4, it would user to view

financial reports to respective departments. Reporting also included forecasting expenses.

Role: I was leading the offshore team.

Key Responsibilities:

â€¢ Design & Develop data models for reporting.

â€¢ Develop ETL for data flow

â€¢ Validate various reports.

Technical Environment: SAP HANA, Tableau, SAP AO.

Industry: Healthcare Analytics

Service Area: Life Sciences - Product development Project Name: Clinical

Healthcare System

Consultant: 2 months.

The project was to develop an analytics infrastructure on top of Argus, it would allow users to query faster and provide advance analytics capabilities.

Role: I was involved from design to deploy phase, performed a lot of data restructuring and built

models for insights.

Key Responsibilities:

â€¢ Design & Develop data models for reporting.

â€¢ Develop and deploy analytical models.

â€¢ Validate various reports.

Technical Environment: Data Modelling, SAP HANA, Tableau, NLP.

Industry: FMCG

Service Area: Trade & Promotion

Project Name: Consumption Based Planning for Flowers Foods Consultant; 8 months.

The project involved setting up of CRM and CBP modules.

Role: I was involved in key data decomposition activities and setting up the base for future year

forecast. Over the course of the project I developed various models and carried out key performance improvements.

Key Responsibilities:

â€¢ Design & Develop HANA models for decomposition.

â€¢ Develop data flow for forecast.

â€¢ Developed various views for reporting of Customer/Sales/Funds.

â€¢ Validate various reports in BOBJ.

Technical Environment: Data Modelling, SAP HANA, BOBJ, Time Series Forecasting.

Internal Initiative Industry: FMCG

Customer Segmentation and RFM analysis Consultant; 3 months.

The initiative involved setting up of HANA-Python interface and advance analytics on Python. Over the course I had successfully segmented data into five core segments using K-means and carried out RFM analysis in Python. Also developed algorithm to categorize any new customer under the defined buckets.

Technical Environment: Anaconda3, Python3.6, HANA SPS12

Industry: Telecom Invoice state detection Consultant; 1 months.

The initiative was to reduce the manual effort in verifying closed and open invoices manually, it involved development to a decision tree to classify open/closed invoices. This enabled effort reduction by 60%.

Technical Environment: R, SAP PAL, SAP HANA SPS12

Accenture Experience

Industry: Analytics - Cross Industry

In Process Analytics for SAP Senior Developer; 19 months.

Accenture Solutions Pvt. Ltd., India

The project involved development of SAP analytics tool - In Process Analytics (IPA) . My role was to develop database objects and data models to provide operational insights to clients.

Role: I have developed various Finance related KPIs and spearheaded various deployments.

Introduced SAP Predictive analytics to reduce development time and reuse functionalities for KPIs and prepared production planning reports.

Key Responsibilities:

â€¢ Involved in information gather phase.

â€¢ Designed and implemented SAP HANA data modelling using Attribute View, Analytic View, and Calculation View.

â€¢ Developed various KPI's individually using complex SQL scripts in Calculation views.

â€¢ Created procedures in HANA Database.

â€¢ Took ownership and developed Dashboard functionality.

â€¢ Involved in building data processing algorithms to be executed in R server for cluster analysis.

Technical Environment: R, SAP HANA, T-SQL.

Industry: Cross Industry

Accenture Testing Accelerator for SAP Database Developer; 21 months.

Accenture Solutions Pvt. Ltd., India

Role: I have taken care of all development activities for the ATAS tool and have also completed

various deployments of the product.

Apart from these activities I was also actively involved in maintenance of the database servers

(Production & Quality)

Key Responsibilities:

â€¢ Analyzing business requirements, understanding the scope, getting requirements clarified

interacting with business and further transform all requirements to generate attribute

mapping documents and reviewing mapping specification documentation

â€¢ Create / Update database objects like tables, views, stored procedures, function, and packages

â€¢ Monitored SQL Server Error Logs and Application Logs through SQL Server Agent

â€¢ Prepared Data Flow Diagrams, Entity Relationship Diagrams using UML

â€¢ Responsible for Designing, developing and Normalization of database tables

â€¢ Experience in performance tuning using SQL profiler.

â€¢ Involved in QA, UAT, knowledge transfer and support activities

Technical Environment: SQL Server 2008/2014, Visual Studio 2010,

Windows Server, Performance

Monitor, SQL Server Profiler, C#, PL-SQL, T-SQL.

VVersatile, high-energy professional targeting challenging assignments in Machine

PROFILE SUMMARY

â A An IT professional with knowledge and experience of 2 years in Wipro Technologies in Machine Learning, Deep Learning, Data Science, Python, Software Development.

â Skilled in managing end-to-end development and software products / projects from inception, requirement specs, planning, designing, implementation, configuration and documentation.

â Knowledge on Python , Machine Learning, Deep Learning, data Science, Algorithms, Neural Network, NLP, GCP.

â Knowledge on Python Libraries like Numpy, Pandas, Seaborn , Matplotlib, Cufflinks.

â Knowledge on different algorithms in Machine learning like KNN, Decision Tree, Bias variance Trade off, Support vector Machine(SVM),Logistic Regression, Neural networks.

â Have knowledge on unsupervised, Supervised and reinforcement data.

â Programming experience in relational platforms like MySQL,Oracle.

â Have knowledge on Some programming language like C++,Java.

â Experience in cloud based environment like Google Cloud.

â Working on different Operating System like Linux, Ubuntu, Windows.

â Good interpersonal and communication skills.

â Problem solving skills with the ability to think laterally, and to think with a medium term and long term perspective

â Flexibility and an open attitude to change.

â Ability to create, define and own frameworks with a strong emphasis on code reusability.

TECHNICAL SKILLS

Programming Languages Python, C
Libraries Seaborn, Numpy, Pandas, Cufflinks, Matplotlib
Algorithms
KNN, Decision Tree, Linear regression, Logistic Regression, Neural Networks, K means clustering,
Tensorflow, SVM
Databases SQL, Oracle
Operating Systems Linux, Window
Development Environments NetBeans, Notebooks, Sublime
Ticketing tools Service Now, Remedy
Education
UG Education:
B.Tech (Computer Science) from Rayat and Bahra Institute of Engineering and Biotechnology passed with 78.4% in 2016.
Schooling:
XII in 2012 from Moti Ram Arya Sr. Secondary School(Passed with 78.4%)
X in 2010 from Valley Public School (Passed with 9.4 CGPA)

WORK EXPERIENCE

Title : Wipro Neural Intelligence Platform
Team Size : 5
Brief: Wipro's Neural Intelligence Platform harnesses the power of automation and artificial intelligence technologies—natural language processing (NLP), cognitive, machine learning, and analytics. The platform comprises three layers: a data engagement platform that can easily access and manage multiple structured and unstructured data sources; an intent assessment and reasoning engine that includes sentiment and predictive analytics; and a deep machine learning engine that can sense, act, and learn over time. The project entailed automating responses to user queries at the earliest. The Monster Bot using the power of Deep Machine Learning, NLP to handle such queries. User can see the how their queries can be answered quickly like all L1 activities can be eliminated.

Entity Extractor -> This involves text extraction and NLP for fetching out important information from the text like dates, names, places, contact numbers etc. This involves Regex, Bluemix NLU api's and machine learning using

Tensor flow for further learning of new entities.

Classifier ->This involves the classifications of classes, training of dataset and predicting the output using the SKLearn classifier (MNB, SVM, SGD as Classifier) and SGD for the optimization to map the user queries with the best suited response and make the system efficient.

NER: A Deep Learning NER Model is trained to extract the entities from the text. Entities like Roles, Skills, Organizations can be extracted from raw text. RNN(LSTM) Bidirectional model is trained for extracting such entities using Keras TensorFlow framework.

OTHER PROJECTS

Title : Diabetes Detection

Brief : Developed the software which can detect whether the person is suffering from Diabetes or not and got the third prize in it.

TRAINING AND CERTIFICATIONS

Title: Python Training, Machine Learning, Data Science, Deep Learning
Organization: Udemy, Coursera (Machine Learning, Deep Learning)

Personal Profile

Fatherâs Name :Mr. Tirlok Aggarwal

Language Known : English & Hindi

Marital Status :Single

Date of Birth(Gender):1993-12-20(YYYY-MM-DD) (F)

description - Mostly working on industry project for providing solution along with Teaching Appointments: Teach undergraduate and graduate-level courses in Spark and Machine Learning as an adjunct faculty member at Aegis School of Data Science, Mumbai (2017 to Present)

company - Aegis school of Data & Business

description - Data Science Intern, Nov 2015 to Jan 2016

Furnish executive leadership team with insights, analytics, reports and recommendations enabling effective strategic planning across all business

units, distribution channels and product lines.

â Chat Bot using AWS LEX and Tensor flow Python

The goal of project creates a chat bot for an academic institution or university to handle queries related courses offered by that institute. The objective of this task is to reduce human efforts as well as reduce man made errors. Even by this companies handle their client 24x7. In this case companies are academic institutions and clients are participants or students.

â Web scraping using Selenium web driver Python

The task is to scrap the data from the online messaging portal in a text format and have to find the pattern form it.

â Data Visualization and Data insights Hadoop Eco System, Hive, PySpark, QlikSense

The goal of this project is to build a Business Solutions to a Internet Service Provider Company, like handling data which is generated per day basis, for that we have to visualize that data and find the usage pattern form it and have a generate a reports.

â Image Based Fraud Detection Microsoft Face API, PySpark, Open CV

The main goal of project is Recognize similarity for a face to given Database images. Face recognition is the recognizing a special face from set of different faces.

Face is extracted and then compared with the database Image if that Image recognized then the person already applied for loan from somewhere else and now hiding his or her identity, this is how we are going to prevent the frauds in the initial stage itself.

â Churn Analysis for Internet Service Provider R, Python, Machine Learning, Hadoop

The objective is to identify the customer who is likely to churn in a given period of time; we have to pretend the customer giving incentive offers.

â Sentiment Analysis Python, NLP, Apache Spark service in IBM Bluemix.

This project is highly emphasis on tweets from Twitter data were taken for mobile networks service provider to do a sentiment analysis and analyze whether the expressed opinion was positive, negative or neutral, capture the emotions of the tweets and comparative analysis.

Quantifiable Results:

â Mentored 7-12 Data Science Enthusiast each year that have all since gone on to graduate school in Data Science and Business Analytics.

â Reviewed and evaluated 20-40 Research Papers on Data Science for one of the largest Data Science Conference called Data Science Congress by Aegis School of Business Mumbai.

â Heading a solution providing organization called Data Science Delivered into Aegis school of Data Science Mumbai and managed 4-5 live projects using Data Science techniques.

â Working for some social cause with the help of Data Science for Social Goods Committee, where our team developed a product called "Let's find a missing Child" for helping society.

TECHNOLOGY ASSISTED REVIEW

TAR (Technology Assisted Review) assists in accelerating the review process and run analytics and generate reports.

* Core member of a team helped in developing automated review platform tool from scratch for assisting E discovery domain, this tool implements predictive coding and topic modelling by automating reviews, resulting in reduced labor costs and time spent during the lawyers review.

* Understand the end to end flow of the solution, doing research and development for classification models, predictive analysis and mining of the information present in text data. Worked on analyzing the outputs and

precision monitoring for the entire tool.

- * TAR assists in predictive coding, topic modelling from the evidence by following EY standards. Developed the classifier models in order to identify "red flags" and fraud-related issues.

Tools & Technologies: Python, scikit-learn, tfidf, word2vec, doc2vec, cosine similarity, Naïve Bayes, LDA, NMF for topic modelling, Vader and text blob for sentiment analysis. Matplot lib, Tableau dashboard for reporting.

MULTIPLE DATA SCIENCE AND ANALYTIC PROJECTS (USA CLIENTS)

TEXT ANALYTICS - MOTOR VEHICLE CUSTOMER REVIEW DATA *

Received customer feedback survey data for past one year. Performed sentiment (Positive, Negative & Neutral) and time series analysis on customer comments across all 4 categories.

- * Created heat map of terms by survey category based on frequency of words
- * Extracted Positive and Negative words across all the Survey categories and plotted Word cloud.

* Created customized tableau dashboards for effective reporting and visualizations.

CHATBOT * Developed a user friendly chatbot for one of our Products which handle simple questions about hours of operation, reservation options and so on.

* This chat bot serves entire product related questions. Giving overview of tool via QA platform and also give recommendation responses so that user question to build chain of relevant answer.

* This too has intelligence to build the pipeline of questions as per user requirement and asks the relevant /recommended questions.

Tools & Technologies: Python, Natural language processing, NLTK, spacy, topic modelling, Sentiment analysis, Word Embedding, scikit-learn, JavaScript/JQuery, SqlServer

INFORMATION GOVERNANCE

Organizations to make informed decisions about all of the information they store. The integrated Information Governance portfolio synthesizes intelligence across unstructured data sources and facilitates action to ensure organizations are best positioned to counter information risk.

- * Scan data from multiple sources of formats and parse different file formats, extract Meta data information, push results for indexing elastic search and created customized, interactive dashboards using kibana.
- * Preforming ROT Analysis on the data which give information of data which helps identify content that is either Redundant, Outdated, or Trivial.
- * Preforming full-text search analysis on elastic search with predefined methods which can tag as (PII) personally identifiable information (social security numbers, addresses, names, etc.) which frequently targeted during cyber-attacks.

Tools & Technologies: Python, Flask, Elastic Search, Kibana

FRAUD ANALYTIC PLATFORM

Fraud Analytics and investigative platform to review all red flag cases. FAP is a Fraud Analytics and investigative platform with inbuilt case manager and suite of Analytics for various ERP systems.

- * It can be used by clients to interrogate their Accounting systems for identifying the anomalies which can be indicators of fraud by running advanced analytics

Tools & Technologies: HTML, JavaScript, SqlServer, JQuery, CSS, Bootstrap, Node.js, D3.js, DC.js

Company - Deloitte USI

Description - The project involved analysing historic deals and coming with insights to optimize future deals.

Role: Was given raw data, carried out end to end analysis and presented insights to client.

Key Responsibilities:

â€¢ Extract data from client systems across geographies.

â€¢ Understand and build reports in tableau. Infer meaningful insights to optimize prices and find out process blockades.

Technical Environment: R, Tableau.

Industry: Cross Industry

Service Area: Cross Industry - Products

Project Name: Handwriting recognition

Consultant: 3 months.

The project involved taking handwritten images and converting them to digital text images by object detection and sentence creation.

Role: I was developing sentence correction functionality.

Key Responsibilities:

â€¢ Gather data large enough to capture all English words

â€¢ Train LSTM models on words.

Technical Environment: Python.

Industry: Finance

Service Area: Financial Services - BI development Project Name: SWIFT

Consultant: 8 months.

The project was to develop an analytics infrastructure on top of SAP S/4, it would user to view

financial reports to respective departments. Reporting also included forecasting expenses.

Role: I was leading the offshore team.

Key Responsibilities:

â€¢ Design & Develop data models for reporting.

â€¢ Develop ETL for data flow

â€¢ Validate various reports.

Technical Environment: SAP HANA, Tableau, SAP AO.

Industry: Healthcare Analytics

Service Area: Life Sciences - Product development Project Name: Clinical

Healthcare System

Consultant: 2 months.

The project was to develop an analytics infrastructure on top of Argus, it would allow users to query faster and provide advance analytics capabilities.

Role: I was involved from design to deploy phase, performed a lot of data restructuring and built

models for insights.

Key Responsibilities:

â€¢ Design & Develop data models for reporting.

â€¢ Develop and deploy analytical models.

â€¢ Validate various reports.

Technical Environment: Data Modelling, SAP HANA, Tableau, NLP.

Industry: FMCG

Service Area: Trade & Promotion

Project Name: Consumption Based Planning for Flowers Foods Consultant; 8 months.

The project involved setting up of CRM and CBP modules.

Role: I was involved in key data decomposition activities and setting up the base for future year

forecast. Over the course of the project I developed various models and carried out key

performance improvements.

Key Responsibilities:

â€¢ Design & Develop HANA models for decomposition.

â€¢ Develop data flow for forecast.

â€¢ Developed various views for reporting of Customer/Sales/Funds.

â€¢ Validate various reports in BOBJ.

Technical Environment: Data Modelling, SAP HANA, BOBJ, Time Series Forecasting.

Internal Initiative Industry: FMCG

Customer Segmentation and RFM analysis Consultant; 3 months.

The initiative involved setting up of HANA-Python interface and advance analytics on Python. Over the course I had successfully segmented data into five core segments using K-means and carried out RFM analysis in Python. Also developed algorithm to categorize any new customer under the defined buckets.

Technical Environment: Anaconda3, Python3.6, HANA SPS12

Industry: Telecom Invoice state detection Consultant; 1 months.

The initiative was to reduce the manual effort in verifying closed and open invoices manually, it involved development to a decision tree to classify open/closed invoices. This enabled effort reduction by 60%.

Technical Environment: R, SAP PAL, SAP HANA SPS12

Accenture Experience

Industry: Analytics - Cross Industry

In Process Analytics for SAP Senior Developer; 19 months.

Accenture Solutions Pvt. Ltd., India

The project involved development of SAP analytics tool - In Process Analytics (IPA) . My role was to develop database objects and data models to provide operational insights to clients.

Role: I have developed various Finance related KPIs and spearheaded various deployments.

Introduced SAP Predictive analytics to reduce development time and reuse functionalities for KPIs and prepared production planning reports.

Key Responsibilities:

â€¢ Involved in information gather phase.

â€¢ Designed and implemented SAP HANA data modelling using Attribute View, Analytic View, and Calculation View.

â€¢ Developed various KPI's individually using complex SQL scripts in Calculation views.

â€¢ Created procedures in HANA Database.

â€¢ Took ownership and developed Dashboard functionality.

â€¢ Involved in building data processing algorithms to be executed in R server for cluster analysis.

Technical Environment: R, SAP HANA, T-SQL.

Industry: Cross Industry

Accenture Testing Accelerator for SAP Database Developer; 21 months.

Accenture Solutions Pvt. Ltd., India

Role: I have taken care of all development activities for the ATAS tool and have also completed

various deployments of the product.

Apart from these activities I was also actively involved in maintenance of the database servers

(Production & Quality)

Key Responsibilities:

â€¢ Analyzing business requirements, understanding the scope, getting requirements clarified

interacting with business and further transform all requirements to generate attribute

mapping documents and reviewing mapping specification documentation

â€¢ Create / Update database objects like tables, views, stored procedures, function, and packages

â€¢ Monitored SQL Server Error Logs and Application Logs through SQL Server Agent

â€¢ Prepared Data Flow Diagrams, Entity Relationship Diagrams using UML

â€¢ Responsible for Designing, developing and Normalization of database tables

â€¢ Experience in performance tuning using SQL profiler.

â€¢ Involved in QA, UAT, knowledge transfer and support activities

Technical Environment: SQL Server 2008/2014, Visual Studio 2010,

Windows Server, Performance

Monitor, SQL Server Profiler, C#, PL-SQL, T-SQL.

WORK EXPERIENCE

Title : Wipro Neural Intelligence Platform
Team Size : 5
Brief: Wipro's Neural Intelligence Platform harnesses the power of automation and artificial intelligence technologies—natural language processing (NLP), cognitive, machine learning, and analytics. The platform comprises three layers: a data engagement platform that can easily access and manage multiple structured and unstructured data sources; an intent assessment and reasoning engine that includes sentiment and predictive analytics; and a deep machine learning engine that can sense, act, and learn over time. The project entailed automating responses to user queries at the earliest. The Monster Bot using the power of Deep Machine Learning, NLP to handle such queries. User can see the how their queries can be answered quickly like all L1 activities can be eliminated.

Entity Extractor -> This involves text extraction and NLP for fetching out important information from the text like dates, names, places, contact numbers etc. This involves Regex, Bluemix NLU api's and machine learning using

Tensor flow for further learning of new entities.

Classifier ->This involves the classifications of classes, training of dataset and predicting the output using the SKLearn classifier (MNB, SVM, SGD as Classifier) and SGD for the optimization to map the user queries with the best suited response and make the system efficient.

NER: A Deep Learning NER Model is trained to extract the entities from the text. Entities like Roles, Skills, Organizations can be extracted from raw text. RNN(LSTM) Bidirectional model is trained for extracting such entities using Keras TensorFlow framework.

OTHER PROJECTS

Title : Diabetes Detection

Brief : Developed the software which can detect whether the person is suffering from Diabetes or not and got the third prize in it.

technologiesânatural language processing (NLP), cognitive, machine learning, and analytics. The platform comprises three layers: a data engagement platform that can easily access and manage multiple structured and unstructured data sources; an âintent assessment and reasoningâ engine that includes sentiment and predictive analytics; and a deep machine learning engine that can sense, act, and learn over time. The project entailed automating responses to user queries at the earliest. The Monster Bot using the power of Deep Machine Learning,

NLP to handle such queries. User can see the how their queries can be answered quickly like allL1 activities can be eliminated.

Entity Extractor -> This involves text extraction and NLP for fetching out important information from the text like

dates, names, places, contact numbers etc. This involves Regex, Bluemix NLU apiâs and machine learning using Tensor flow for further learning of new entities.

Classifier ->This involves the classifications of classes, training of dataset and predicting the output using the SKLearn classifier (MNB, SVM, SGD as Classifier) and SGD for the optimization to map the user queries with the best suited response and make the system efficient.

NER: A Deep Learning NER Model is trained to extract the entities from the text. Entities like Roles, Skills,

Organizations can be extracted from raw text. RNN(LSTM) Bidirectional model is trained for extracting such entities using Keras TensorFlow framework.

company - Wipro Technologies

description - An IT professional with knowledge and experience of 2 years in Wipro Technologies in Machine Learning, Deep Learning, Data Science, Python, Software Development.

â Skilled in managing end-to-end development and software products / projects from inception, requirement specs, planning, designing, implementation, configuration and documentation.

â Knowledge on Python , Machine Learning, Deep Learning, data Science, Algorithms, Neural Network,

NLP, GCP.

â Knowledge on Python Libraries like Numpy, Pandas, Seaborn , Matplotlib, Cufflinks.

â Knowledge on different algorithms in Machine learning like KNN, Decision Tree, Bias variance Trade off,

Support vector Machine(SVM),Logistic Regression, Neural networks.

â Have knowledge on unsupervised, Supervised and reinforcement data.

â Programming experience in relational platforms like MySQL,Oracle.

â Have knowledge on Some programming language like C++,Java.

Data
Science

â¤ Experience in cloud based environment like Google Cloud.
â¤ Working on different Operating System like Linux, Ubuntu, Windows.
â¤ Good interpersonal and communication skills.
â¤ Problem solving skills with the ability to think laterally, and to think with a medium term and long term perspective
â¤ Flexibility and an open attitude to change.
â¤ Ability to create, define and own frameworks with a strong emphasis on code reusability
Personal Skills â¢ Ability to quickly grasp technical aspects and willingness to learn â¢ High energy levels & Result oriented. Education Details

B

I have six month experience in Data Science. Key Skills: - Experience in Machine Learning, Deep Learning, NLP, Python, SQL, Web Scraping Good knowledge in computer subjects and ability to update

Skill Details

Experience in Machine Learning, Deep Learning, NLP, Python, SQL, Web Crawling, HTML,CSS.- Exprience - Less than 1 year monthsCompany

Details

company - RNT.AI Technology Solution

description - Text classification using Machine learning Algorithms with python.

Practical knowledge of Deep learning algorithms such as Â Recurrent Neural Networks(RNN).

Develop custom data models and algorithms to apply to dataset

Experience with Python packages like Pandas, Scikit-learn, Tensor Flow, Numpy, Matplotlib, NLTK.

Comfort with SQL, Â MYSQL

Sentiment analysis.

Â Apply leave Dataset using classification technique like Tf--idf , LSA with cosine similarity using Machine learning Algorithms.

Web crawling using Selenium web driver and Beautiful Soup with python.

company - Life Insurance Corporation of India Bhopal

description - Â½Â Explaining policy features and the benefits

company - Aegis school of Data Science & Business

description - Mostly working on industry project for providing solution along with Teaching Appointments: Teach undergraduate and graduate-level courses in Spark and Machine Learning as an adjunct faculty member at Aegis School of Data Science, Mumbai (2017 to Present)

company - Aegis school of Data & Business

description - Data Science Intern, Nov 2015 to Jan 2016

Furnish executive leadership team with insights, analytics, reports and recommendations enabling effective strategic planning across all business units, distribution channels and product lines.

â Chat Bot using AWS LEX and Tensor flow Python
The goal of project creates a chat bot for an academic institution or university to handle queries related courses offered by that institute. The objective of this task is to reduce human efforts as well as reduce man made errors. Even by this companies handle their client 24x7. In this case companies are academic institutions and clients are participants or students.

â Web scraping using Selenium web driver Python

The task is to scrap the data from the online messaging portal in a text format and have to find the pattern form it.

â Data Visualization and Data insights Hadoop Eco System, Hive, PySpark, QlikSense

The goal of this project is to build a Business Solutions to a Internet Service Provider Company, like handling data which is generated per day basis, for that we have to visualize that data and find the usage pattern form it and have a generate a reports.

â Image Based Fraud Detection Microsoft Face API, PySpark, Open CV

The main goal of project is Recognize similarity for a face to given Database images. Face recognition is the recognizing a special face from set of different faces. Face is extracted and then compared with the database Image if that Image recognized then the person already applied for loan from somewhere else and now hiding his or her identity, this is how we are going to prevent the frauds in the initial stage itself.

â Churn Analysis for Internet Service Provider R, Python, Machine Learning, Hadoop

The objective is to identify the customer who is likely to churn in a given period of time; we have to pretend the customer giving incentive offers.

â Sentiment Analysis Python, NLP, Apache Spark service in IBM Bluemix.

This project is highly emphasis on tweets from Twitter data were taken for mobile networks service provider to do a sentiment analysis and analyze whether the expressed opinion was positive, negative or neutral, capture the emotions of the tweets and comparative analysis.

Quantifiable Results:

â Mentored 7-12 Data Science Enthusiast each year that have all since gone on to graduate school in Data Science and Business Analytics.

â Reviewed and evaluated 20-40 Research Papers on Data Science for one of the largest Data Science Conference called Data Science Congress by Aegis School of Business Mumbai.

â Heading a solution providing organization called Data Science Delivered into Aegis school of Data Science Mumbai and managed 4-5 live projects using Data Science techniques.

â Working for some social cause with the help of Data Science for Social Goods Committee, where our team developed a product called "Let's find a missing Child" for helping society.

company - Trust Systems and Software

description - Projects worked on:

1. TrustBank-CBS

Project Description: TrustBank-CBS is a core banking solution by Trust Systems.

Roles and Responsibility:

â Renovated complete UI to make it more modern, user-friendly, maintainable and optimised for bank use.

â Shared the UI structure and guidelines to be incorporated, with development team of around 50 members.

â Achieved the target of project completion in given time frame.

â Made required graphics for the project in photoshop

2. Loan Bazar (Loan Appraisal)

Project Description: Loan Bazar is a MVC-based application dedicated to creating and managing

loan applications. The goal of this application is to streamline the process of loan application and integrate with existing CBS.

Roles and Responsibility

â Designed and developed modern and responsive UI of entire application and achieved the target in given time frame.

â Made required graphics for the project in photoshop

3. Capital Security Bond Application

Project Description: Capital Security Bond Application is a MVC based

application which provided an online platform to purchase gold bond

Roles and Responsibility:

â Designed and developed modern and responsive UI of entire application and achieved the target in given time frame.

â Made required graphics for the project in photoshop

4. SoftGST

Project Description: SoftGST (Web Based Application) is an ASP application to every tax

payers and its vendors for generating the GSTR returns on the basis of sales / purchase

data, additionally the application can do the reconciliation of GSTR 2 A with purchase register.

Roles and Responsibility:

â Designed and developed the UI of Dashboard.

5. Trust Analytica:

Project Description: Trust Analyтика is the mobile web app that shows bank asset, liability, income, expenses.

Roles and Responsibility:

â Designed and developed the landing page of the application.

â Supported the developers in UI implementation

description - Internship Program: At e-sense IT Solution pvt.ltd. Nagpur as a

Web Designing and Development.

* Presented in Project Competition in Innovesta 15 of Priyadarshini Indira Gandhi College of Engineering, Nagpur.

* Presented in National Level Paper Presentation in TECH-WAVE 2015 of S.R.M.C.E., Nagpur.

company - e-sense IT Solution pvt.ltd

description - Key Result Areas:

* Designed websites solutions by studying information needs, conferring with users, and studying systems flow, data usage, and work processes.

* Understood process requirements and provided use cases for business, functional & technical requirements.

* Interacted with users for requirement gathering, prepared functional specifications and low-level design documents.

* Participated in the Software Development Life cycle (SDLC) and Agile methodology right from requirement analysis,

* Performed detailed design of modules along with their implementation, and documentation integrated software modules

Developed by other team members.

Highlights:

* Developed various modules as per customer requirement and identified and fixed number of bugs related to code, Database connectivity, UI Defects and so on.

* Analyzed and modified existing codes to incorporate a number of changes in the application / user requirements, wrote new codes as required.

* Coded, implemented and integrated complex programs using technologies such as HTML5, CSS3, JavaScript, jQuery, bootstrap.

* Having good command on Graphics designing with effective ideas.

PROJECTS

* www.nitka.com, Nagpur united corporation (admin), Mintmetrix.com, Tagline videos (admin), Smartbadge (admin): -

In all projects I have used technologies like HTML5, CSS3, Bootstrap, JavaScript, jQuery and text editor as sublime text.

* www.shreekiaspack.co.in, www.3staragroproducts.com, www.luckystationery.co.in: - used technologies like HTML5, CSS3, Bootstrap, javascript and text editor as notepad++.

* Design various Logos, Brochures, Advertising Banners, Visiting Cards, Pamphlet, Hoardings etc.

B.E. FINAL YEAR PROJECT

* Major Project: -

Title: WEB BASED DISEASE DIAGNOSIS EXPERT SYSTEM.

Duration: 1 Year

Description: In this project we provide a website in which doctor gives online consultation for particular disease. System gives better suggestions for any health problems.

* Mini Project Development-

* SHOPPING MANAGEMENT SYSTEM Developed in C++.

company - CNC Web World

description - Internship Program: At e-sense IT Solution pvt.ltd. Nagpur as a Web Designing and Development.

* Presented in Project Competition in Innovesta 15 of Priyadarshini Indira Gandhi College of Engineering, Nagpur.

* Presented in National Level Paper Presentation in TECH-WAVE 2015 of S.R.M.C.E., Nagpur.

company - e-sense IT Solution pvt.ltd

description - Key Result Areas:

* Designed websites solutions by studying information needs, conferring with users, and studying systems flow, data usage, and work processes.

* Understood process requirements and provided use cases for business, functional & technical requirements.

* Interacted with users for requirement gathering, prepared functional

specifications and low-level design documents.

- * Participated in the Software Development Life cycle (SDLC) and Agile methodology right from requirement analysis,
- * Performed detailed design of modules along with their implementation, and documentation integrated software modules
- Developed by other team members.

Highlights:

- * Developed various modules as per customer requirement and identified and fixed number of bugs related to code, Database connectivity, UI Defects and so on.
- * Analyzed and modified existing codes to incorporate a number of changes in the application / user requirements, wrote new codes as required.
- * Coded, implemented and integrated complex programs using technologies such as HTML5, CSS3, JavaScript, jQuery, bootstrap.
- * Having good command on Graphics designing with effective ideas.

PROJECTS

* www.nitka.com, Nagpur united corporation (admin), Mintmetrix.com, Tagline videos (admin), Smartbadge (admin): -

In all projects I have used technologies like HTML5, CSS3, Bootstrap, JavaScript, jQuery and text editor as sublime text.

* www.shreekiaspack.co.in, www.3staragroproducts.com, www.luckystationery.co.in: - used technologies like HTML5, CSS3, Bootstrap, javascript and text editor as notepad++.

* Design various Logos, Brochures, Advertising Banners, Visiting Cards, Pamphlet, Hoardings etc.

B.E. FINAL YEAR PROJECT

* Major Project: -

Title: WEB BASED DISEASE DIAGNOSIS EXPERT SYSTEM.

Duration: 1 Year

Description: In this project we provide a website in which doctor gives online consultation for particular disease. System gives better suggestions for any health problems.

* Mini Project Development-

* SHOPPING MANAGEMENT SYSTEM Developed in C++.

Company - Trust Systems and Software

description - Projects worked on:

1. TrustBank-CBS

Project Description: TrustBank-CBS is a core banking solution by Trust Systems.

Roles and Responsibility:

â Renovated complete UI to make it more modern, user-friendly, maintainable and optimised for bank use.

â Shared the UI structure and guidelines to be incorporated, with development team of around 50 members.

â Achieved the target of project completion in given time frame.
â Made required graphics for the project in photoshop

2. Loan Bazar (Loan Appraisal)

Project Description: Loan Bazar is a MVC-based application dedicated to creating and managing loan applications. The goal of this application is to streamline the process of loan application and integrate with existing CBS.

Roles and Responsibility

- â Designed and developed modern and responsive UI of entire application and achieved the target in given time frame.
- â Made required graphics for the project in photoshop

3. Capital Security Bond Application

Project Description: Capital Security Bond Application is a MVC based application which provided an online platform to purchase gold bond

Roles and Responsibility:

- â Designed and developed modern and responsive UI of entire application and achieved the target in given time frame.
- â Made required graphics for the project in photoshop

4. SoftGST

Project Description: SoftGST (Web Based Application) is an ASP application to every tax payers and its vendors for generating the GSTR returns on the basis of sales / purchase data, additionally the application can do the reconciliation of GSTR 2 A with purchase register.

Roles and Responsibility:

- â Designed and developed the UI of Dashboard.

5. Trust Analytica:

Project Description: Trust Analytica is the mobile web app that shows bank asset, liability, income, expenses.

Roles and Responsibility:

- â Designed and developed the landing page of the application.
- â Supported the developers in UI implementation

6. Website's:

Project Name:

company - Exposys Pvt. Ltd
description - Pune. Augest 2017 to till date

Project Details:

Project-I: Pragat Bharat System

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX.

Database Used: My SQL.

Team size: 1

Position: Software Developer

Synopsis: This project aim is specially design for people. It is used to collect information to diifernt sector.

Project-II: Go Ayur System

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX.

Database Used: My SQL.

Team size: 2

Position: Software Developer

Synopsis: Go Ayurveda Panchakarma center is one of most traditionally well established, professional and innovative providers of Classical Ayurvedic Health services and Kerala Panchakarma therapies.

Project-III: Vitsanindia System

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX,
JAVA SCRIFT.

Database Used: My SQL.

Team size: 2

Position: Software Developer

Synopsis: Online Shooping through app. This app is user friendly because there is a option for change language. User can to find different categories products as there choice.

Project-IV: MahabaleshwarTours

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX,
JAVA SCRIFT.

Database Used: My SQL.

Team size: 1

Position: Software Developer

Synopsis: In this system is to provide Online Registration, Tour Package Information, Ticket Booking, Online Payment and Searching Facility for Customer and also Generate Different types of Report.

Project-V: Cityspaceindia

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX,
JAVA SCRIFT.

Database Used: My SQL.

Team size: 1

Position: Software Developer

Synopsis: Service provider website we provide different categories.

Project-VI: Fruitsbuddy

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX,
JAVA SCRIFT.

Database Used: My SQL.

Team size: 1

Position: Software Developer

Synopsis: Fruitbuddy is to manage the details of fruits, Customer, Order, Transaction, Payment. It manages all the information about fruits, Stocks, Payment. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the fruits, Customer, Stocks, Order.

Project-VII: Totalcinee

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX,
JAVA SCRIFT.

Database Used: My SQL.

Team size: 1

Position: Software Developer

Synopsis: Real Estate web application has been created for helping you to sell properties through web based user interface. Visitors on your website can view particular desired products using search engine facility.

Project-VIII: Golchha

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX,
JAVA SCRIFT.

Database Used: My SQL.

Team size: 1

Position: Software Developer
Synopsis: Service provider website we provide different categories.

- * Developed various modules as per customer requirement and identified

and fixed number of bugs related to code, Database connectivity, UI Defects and so on.

- * Analyzed and modified existing codes to incorporate a number of changes in the application / user requirements, wrote new codes as required.
- * Coded, implemented and integrated complex programs using technologies such as HTML5, CSS3, JavaScript, jQuery, bootstrap.
- * Having good command on Graphics designing with effective ideas.

PROJECTS

* www.nitka.com, Nagpur united corporation (admin), Mintmetrix.com, Tagline videos (admin), Smartbadge (admin): -

In all projects I have used technologies like HTML5, CSS3, Bootstrap, JavaScript, jQuery and text editor as sublime text.

* www.shreekiaspack.co.in, www.3staragroproducts.com, www.luckystationery.co.in: - used technologies like HTML5, CSS3, Bootstrap, javascript and text editor as notepad++.

* Design various Logos, Brochures, Advertising Banners, Visiting Cards, Pamphlet, Hoardings etc.

B.E. FINAL YEAR PROJECT

* Major Project: -

Title: WEB BASED DISEASE DIAGNOSIS EXPERT SYSTEM.

Duration: 1 Year

Description: In this project we provide a website in which doctor gives online consultation for particular disease. System gives better suggestions for any health problems.

* Mini Project Development-

* SHOPPING MANAGEMENT SYSTEM Developed in C++.

Company Details

company - Trust Systems and Software

description - Projects worked on:

1. TrustBank-CBS

Project Description: TrustBank-CBS is a core banking solution by Trust Systems.

Roles and Responsibility:

â Renovated complete UI to make it more modern, user-friendly, maintainable and optimised for bank use.

â Shared the UI structure and guidelines to be incorporated, with development team of around 50 members.

â Achieved the target of project completion in given time frame.

â Made required graphics for the project in photoshop

2. Loan Bazar (Loan Appraisal)

Project Description: Loan Bazar is a MVC-based application dedicated to creating and managing

loan applications. The goal of this application is to streamline the process of loan application and integrate with existing CBS.

Roles and Responsibility

â Designed and developed modern and responsive UI of entire application and achieved the target in given time frame.
â Made required graphics for the project in photoshop
3. Capital Security Bond Application
Project Description: Capital Security Bond Application is a MVC based application which provided an online platform to purchase gold bond
Roles and Responsibility:
â Designed and developed modern and responsive UI of entire application and achieved the target in given time frame.
â Made required graphics for the project in photoshop

4. SoftGST

Project Description: SoftGST (Web Based Application) is an ASP application to every tax payers and its vendors for generating the GSTR returns on the basis of sales / purchase data, additionally the application can do the reconciliation of GSTR 2 A with purchase register.
Roles and Responsibility:
â Designed and developed the UI of Dashboard.

5. Trust Analytica:

Project Description: Trust Analytica is the mobile web app that shows bank asset, liability, income, expenses.

Roles and Responsibility:

- â Designed and developed the landing page of the application.
- â Supported the developers in UI implementation

Operating Systems: Windows.

company - Exposys Pvt. Ltd

description - Pune. August 2017 to till date

Project Details:

Project-I: Pragat Bharat System

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX.

Database Used: My SQL.

Team size: 1
Position: Software Developer
Synopsis: This project aim is specially design for people. It is used to collect information to diifernt sector.

Project-II: Go Ayur System
Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX.
Database Used: My SQL.
Team size: 2
Position: Software Developer
Synopsis: Go Ayurveda Panchakarma center is one of most traditionally well established, professional and innovative providers of Classical Ayurvedic Health services and Kerala Panchakarma therapies.

Project-III: Vitsanindia System
Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPRT.
Database Used: My SQL.
Team size: 2
Position: Software Developer
Synopsis: Online Shooping through app. This app is user friendly because there is a option for change language. User can to find different categories products as there choice.

Project-IV: MahabaleshwarTours
Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPRT.
Database Used: My SQL.
Team size: 1
Position: Software Developer
Synopsis: In this system is to provide Online Registration, Tour Package Information, Ticket Booking, Online Payment and Searching Facility for Customer and also Generate Different types of Report.

Project-V: Cityspaceindia
Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPRT.
Database Used: My SQL.
Team size: 1
Position: Software Developer
Synopsis: Service provider website we provide different categories.

Project-VI: Fruitsbuddy
Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPRT.
Database Used: My SQL.
Team size: 1
Position: Software Developer
Synopsis: Fruitbuddy is to manage the details of fruits, Customer, Order, Transaction, Payment. It manages all the information about fruits, Stocks, Payment. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the fruits, Customer, Stocks, Order.

Project-VII: Totalcitech
Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPRT.
Database Used: My SQL.
Team size: 1
Position: Software Developer
Synopsis: Real Estate web application has been created for helping you to sell properties through web based user interface. Visitors on your website can view particular desired products using search engine facility.

Project-VIII: Golchha
Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPRT.
Database Used: My SQL.
Team size: 1
Position: Software Developer
Synopsis: Service provider website we provide different categories
Technical Skills Web Technologies: Angular JS, HTML5, CSS3, SASS, Bootstrap, Jquery, Javascript. Software: Brackets, Visual Studio, Photoshop, Visual Studio Code Education Details

Web Development: HTML5, CSS3, Bootstrap, PHP, Ajax, Jquery, JavaScript.
Database: MySQL.
Development Tools: Notepad++, Sublime Text2.
Framework: Codeigniter.
Server: Apache tomcat, Xampp Control Panel.
Operating Systems: Windows.
company - Exposys Pvt. Ltd
description - Pune. Augest 2017 to till date

Project Details:
Project-I: Pragat Bharat System
Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX.
Database Used: My SQL.
Team size: 1
Position: Software Developer
Synopsis: This project aim is specially design for people. It is used to collect information to differnt sector.

Project-II: Go Ayur System
Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX.
Database Used: My SQL.
Team size: 2
Position: Software Developer
Synopsis: Go Ayurveda Panchakarma center is one of most traditionally well

established, professional and innovative providers of Classical Ayurvedic Health services and Kerala Panchakarma therapies.

Project-III: Vitsanindia System

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT.

Database Used: My SQL.

Team size: 2

Position: Software Developer

Synopsis: Online Shopping through app. This app is user friendly because there is an option for change language. User can find different categories products as their choice.

Project-IV: MahabaleshwarTours

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT.

Database Used: My SQL.

Team size: 1

Position: Software Developer

Synopsis: In this system is to provide Online Registration, Tour Package Information, Ticket Booking, Online Payment and Searching Facility for Customer and also Generate Different types of Report.

Project-V: Cityspaceindia

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT.

Database Used: My SQL.

Team size: 1

Position: Software Developer

Synopsis: Service provider website we provide different categories.

Project-VI: Fruitsbuddy

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT.

Database Used: My SQL.

Team size: 1

Position: Software Developer

Synopsis: Fruitbuddy is to manage the details of fruits, Customer, Order, Transaction, Payment. It manages all the information about fruits, Stocks, Payment. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the fruits, Customer, Stocks, Order.

Project-VII: Totalcritee

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT.

Database Used: My SQL.

Team size: 1

Position: Software Developer

Synopsis: Real Estate web application has been created for helping you to sell properties through web based user interface. Visitors on your website can view particular desired products using search engine facility.

Project-VIII: Golchha

Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT.

Database Used: My SQL.

Team size: 1

Position: Software Developer

Synopsis: Service provider website we provide different categories.

description - Projects worked on:

1. TrustBank-CBS
Project Description: TrustBank-CBS is a core banking solution by Trust Systems.
Roles and Responsibility:
â Renovated complete UI to make it more modern, user-friendly, maintainable and optimised for bank use.
â Shared the UI structure and guidelines to be incorporated, with development team of around 50 members.
â Achieved the target of project completion in given time frame.
â Made required graphics for the project in photoshop

2. Loan Bazar (Loan Appraisal)
Project Description: Loan Bazar is a MVC-based application dedicated to creating and managing loan applications. The goal of this application is to streamline the process of loan application and integrate with existing CBS.
Roles and Responsibility:
â Designed and developed modern and responsive UI of entire application and achieved the target in given time frame.
â Made required graphics for the project in photoshop

3. Capital Security Bond Application
Project Description: Capital Security Bond Application is a MVC based application which provided an online platform to purchase gold bond
Roles and Responsibility:
â Designed and developed modern and responsive UI of entire application and achieved the target in given time frame.
â Made required graphics for the project in photoshop

4. SoftGST
Project Description: SoftGST (Web Based Application) is an ASP application to every tax payers and its vendors for generating the GSTR returns on the basis of sales / purchase data, additionally the application can do the reconciliation of GSTR 2 A with purchase register.
Roles and Responsibility:
â Designed and developed the UI of Dashboard.

5. Trust Analytica:
Project Description: Trust Analytica is the mobile web app that shows bank asset, liability, income, expenses.
Roles and Responsibility:
â Designed and developed the landing page of the application.
â Supported the developers in UI implementation

- * Presented in Project Competition in Innovesta 15 of Priyadarshini Indira Gandhi College of Engineering, Nagpur.
- * Presented in National Level Paper Presentation in TECH-WAVE 2015 of S.R.M.C.E., Nagpur.

company - e-sense IT Solution pvt.ltd
description - Key Result Areas:

- * Designed websites solutions by studying information needs, conferring with users, and studying systems flow, data usage, and work processes.
- * Understood process requirements and provided use cases for business, functional & technical requirements.
- * Interacted with users for requirement gathering, prepared functional specifications and low-level design documents.
- * Participated in the Software Development Life cycle (SDLC) and Agile methodology right from requirement analysis,
- * Performed detailed design of modules along with their implementation, and documentation integrated software modules

Developed by other team members.

Highlights:

- * Developed various modules as per customer requirement and identified and fixed number of bugs related to code, Database connectivity, UI Defects and so on.
- * Analyzed and modified existing codes to incorporate a number of changes in the application / user requirements, wrote new codes as required.
- * Coded, implemented and integrated complex programs using technologies such as HTML5, CSS3, JavaScript, jQuery, bootstrap.
- * Having good command on Graphics designing with effective ideas.

PROJECTS

* www.nitka.com, Nagpur united corporation (admin), Mintmetrix.com,

Tagline videos (admin), Smartbadge (admin): -
In all projects I have used technologies like HTML5, CSS3, Bootstrap,
JavaScript, jQuery and text editor as sublime text.

* www.shreekiaspack.co.in, www.3staragroproducts.com,
www.luckystationery.co.in: - used technologies like HTML5, CSS3,
Bootstrap, javascript and text editor as notepad++.

* Design various Logos, Brochures, Advertising Banners, Visiting Cards,
Pamphlet, Hoardings etc.

B.E. FINAL YEAR PROJECT

* Major Project: -

Title: WEB BASED DISEASE DIAGNOSIS EXPERT SYSTEM.

Duration: 1 Year

Description: In this project we provide a website in which doctor gives online consultation for particular disease. System gives better suggestions for any health problems.

* Mini Project Development-

* SHOPPING MANAGEMENT SYSTEM Developed in C++.

Web Designing	A
------------------	---

Costing â¢ Review and receive the RFQs for company products and solutions.

â¢ Estimation of Pneumatic Automation Products & Projects, valves, linear & rotary actuator and field equipment, Piping, Fabricated equipment's etc.

â¢ Plotting enquiries to vendors for critical bought out items.

â¢ Continuous follow up with vendors for quotations.

â¢ Applying thumb rule or standard practice of design while estimating for achieving accuracy with less time.

â¢ Analyzing & evaluating estimated cost and actual cost of the jobs already manufactured in past to arrive at a realistic cost estimates.

â¢ Maintaining databanks of all quotations for readily available to others also.

Coordinating with Instrumentation & electrical dept. for costing.

â¢ Handling estimation department while submitting offers on time. Visit to site for site projects, if required. Co-ordination with Purchase and process departments. Attending Customer Enquiries meeting. Development of vendors.

â¢ Preparation of statement enquiries pending for estimation/ under

progress â¢ Understand the client's concern / pain area / requirement, Offer most suitable & optimized the tailor made or predesigned Chemtronics solution with techno-commercial proposal which should be technically feasible & commercially viable.

â¢ Assign work to Jr. Proposal executives/Engineers â¢ Guide & Coordinate with design, CAD, sales, marketing, project & commercial department.

Role & Responsibilities: - Engg. Procurement & Purchase, Vendor Development & Supply Chain.

â¢ Procurement of Steel/Raw Material & semi-finish Products Based on Projects requirement.

â¢ Continuous improvement in negotiation process & Cost saving opportunities.

â¢ Turn round time improvement & new vendor development Contract Management & Tenders.

â¢ To achieve target savings against budget and/or last purchase rates & develop new vendors. & Obtaining quotation and finalization.

â¢ Research and evaluate potential vendors and suppliers, Request quotes and do technical comparisons of Prices, also maintain good relationships with vendors and suppliers.

â¢ Examine and review products and supplies to ensure quality & digitize procurement processes.

â¢ Track incoming & future purchasing plans, Projects inventory, delivery arrival time, and note actual arrival time Organize and update database of suppliers, delivery times, invoices, and quantity of supplies.

â¢ Collaborate with financial team members on contracts, invoicing, and other financial matters

â¢ Finding out the suppliers for buying various materials from products finders as well as from internet Source.

â¢ Create RFQ for materials for projects, departments, for project materials, equipment's and services.

â¢ Review Vendor evaluation & Vendor registration from Supply time & quality of products.

company - Proposal & Estimation

description - M/s Duncan Engineering Ltd, Pune, Ranjangaon MIDC

Role & Responsibilities:- â¢ Project execution, Vendor development, supply chain Management, interacting with Vendors to ensure timely action of order & negotiating with the vendor.

â¢ Work directly with customer to understand their process and develop the best solution For their requirement, lead proposal engineering team & technical support to customer.

â¢ Work with sales team to professionally represent the company at a customer, gather Data and ask the right question to define a project.

â¢ Work with our engineers and designer to develop and quote cost effective solution. Cost estimation, preparing proposal & quotation base on Technical specification of Customer requirement & identify production process and machines/brought out Item requirements. & co-ordinate with customer to understand exact requirements.

â¢ Identification of critical problem & work out Proper solution in specified time frames.

â¢ Production design-new manufacturing process - new product development. Developing

Customized manufacturing solutions. (Steel, Power & Cement, petrochemical sector.)

â¢ Executing cost saving techniques/ measures and modifications to achieve

Substantial Reduction in O & M expenditures and work within the budget

Maintaining fruitful Relationships with existing customers.
company - Rotex Engineers & Manufacturing Pvt. Ltd
description - Nov 2015 - June 2016 Rotex Engineers & Manufacturing Pvt.
Ltd Dombivali MIDC, Kaylan.

Role & Responsibilities:-

- â€¢ To Manage & enhance the activity related to proposal of pneumatics/fabrication projects & products.
- â€¢ Project execution, Vendor development, supply chain Management, interacting with vendors to ensure Timely action of order & Negotiating with the vendor.
- â€¢ Production design-new manufacturing process - new product development. Developing Customized manufacturing solutions. (Steel, Power & Cement petrochemical sector.)
- â€¢ Preparation of technical data sheets as per tender specification.
- â€¢ Calculate price structure and analyze cost proposals.
- â€¢ Monitoring progress throughout the job & comparing it with the schedule of work.
- â€¢ Maintaining fruitful relationships with existing customers
- â€¢ Review Vendor evaluation & Vendor registration from Supply time & quality of products.
- â€¢ Examine and review products and supplies to ensure quality.

company - Design & Proposal Engineering
description - M/s Schrader Duncan Ltd, Pune, Ranjangaon MIDC

Role & Responsibilities:-

- â€¢ Project execution, Vendor development, supply chain Management, interacting with Vendors to ensure timely action of order & negotiating with the vendor.
- â€¢ Design or modify Mechanical assemblies, hydraulic/pneumatic assemblies, Fabricated assy
- Along with layouts/schematics and/or detailed drawings as per specification.
- â€¢ Generate electrical or mechanical product specifications, standard operating procedures, maintenance manuals & Doing basic mechanical design, if required.
- â€¢ Participate in growth & developing innovative solutions with design & development, sales & marketing team.
- â€¢ Define, coordinate, perform and generate engineering test reports & engineering analysis.
- â€¢ In Co-Ordination with production manager implement and assure that all manufacturing processes are being followed according to process Flow in relevant Departments.
- â€¢ Maintain records of Non-Conformity (NC) raised during internal audits and close the same with corrective actions.

company - Push Engineering Pvt Ltd

description - Currently I am working as mechanical design engineer in Push engineering Pvt Ltd. All types of ice making plant are designed and manufactured in our company. Design includes design of pressure vessel ,condenser, conveyor with the help of 3d modelling software. Also BOM Preparation of material.ERP System.

company - Central Water and Power Research Station

description - Pune)

(Govt. of India)

1 year experience as a Research assistant of R&D Department of mechanical workshop at Central Water and Power Research Station, Khadakwasla, Pune (Govt. of india)

â€¢ Experiences different project of generation of sea waves in laboratory useful for design of port and harbor structures of Mumbai, Chennai, Goa and foreign countries like Japan, Bangladesh etc.

â€¢ Wave generated by wave maker comes under mechanical workshop. Wave generated with the help of hydraulic as well as pneumatic system and also by regular wave generator.

â€¢ I experiences sea wave generation by hydraulic system. Experiences design of hydraulic system includes design of servo actuator, axial piston pump and electric motor under supervision and guidance by 'Scientist 'B' at CWPRS.

â€¢ **SOFTWARES SKILLS**

â€¢ Autocad

â€¢ Catia V5

â€¢ MS office

â€¢ ProE

â€¢ **EXTRA CURRICULAR ACTIVITY**

â€¢ Organize a National level Technical event in Mechanical Student Association (MESA)

â€¢ Coordinator of MESA as a treasurer.

â€¢ Attending 3d printing workshop in college.

â€¢ Work readiness training conducted by NASSCOM foundation and Global Talent Track in college.

â€¢ Life Skills training conducted by NASSCOM foundation and Global Talent Track in college.

â€¢ **PERSONAL ATTRIBUTES**

â€¢ Positive Attitude

Mechanical â€¢ Quick Learner
Engineer â€¢ Team Leader

company - Mechanical Engineering

description - Role & Responsibilities: - Application Engineering / Pre Sales & Inside Sales â¢ Provide applications support to inside sales personnel and outside sales channels, Provide product selection and materials of construction technical recommendations.

â¢ Participate in the necessary training activities to establish technical competency & also Participate in Field Service trips as directed by Top Mgmt.

â¢ Assist Brand Managers and/or Product Managers as needed.

â¢ Takes active role as support for the Projects Quotations team, being responsible for the technical part of project quotation including selection, sizing and costing of Pneumatic Automation Products, valves, linear & rotary actuator and field Fabrication & equipment on the basis of the customer's data sheets and Engineering Drawing.

â¢ Travel as required to support the field sales channel and to promote Company products and services.

â¢ Perform detailed reviews of customer specifications, providing comments, clarifications and alternatives to customer requirements.

â¢ Sizing and selection of valves, actuators and prepare cost effective techno-commercial quotations, solutions as per customers technical requirements.

â¢ Coordinate with other technical departments as required, in order to minimize technical and cost risk.

â¢ Sending quotations accurately and on-time, including all technical and commercial as per customer documentation requests. Participate in the customer negotiation process, including commercial and technical negotiations.

â¢ Follow up of quotations to close the order also Follow up for payment collection.

â¢ Perform PO reviews to ensure that all critical elements are correct and

take up to Senior Top managements and customer in case of any discrepancies, and get PO amendment if required.

â€¢ Create the order transfer file for submission to the factory in accordance with PO. Support factory for any post order activities & after sales service where necessary to develop and maintain good customer service.

Role & Responsibilities: - Proposal/Estimation Engineering & Products Costing
â€¢ Review and receive the RFQs for company products and solutions.

â€¢ Estimation of Pneumatic Automation Products & Projects, valves, linear & rotary actuator and field equipment, Piping, Fabricated equipment's etc.

â€¢ Plotting enquiries to vendors for critical bought out items.

â€¢ Continuous follow up with vendors for quotations.

â€¢ Applying thumb rule or standard practice of design while estimating for achieving accuracy with less time.

â€¢ Analyzing & evaluating estimated cost and actual cost of the jobs already manufactured in past to arrive at a realistic cost estimates.

â€¢ Maintaining databanks of all quotations for readily available to others also.

Coordinating with Instrumentation & electrical dept. for costing.

â€¢ Handling estimation department while submitting offers on time. Visit to site for site projects, if required. Co-ordination with Purchase and process departments. Attending Customer Enquiries meeting. Development of vendors.

â€¢ Preparation of statement enquiries pending for estimation/ under progress
â€¢ Understand the client's concern / pain area / requirement, Offer most suitable & optimized the tailor made or predesigned Chemtronics solution with techno-commercial proposal which should be technically feasible & commercially viable.

â€¢ Assign work to Jr. Proposal executives/Engineers â€¢ Guide & Coordinate with design, CAD, sales, marketing, project & commercial department.

Role & Responsibilities: - Engg. Procurement & Purchase, Vendor Development & Supply Chain.

â€¢ Procurement of Steel/Raw Material & semi-finish Products Based on Projects requirement.

â€¢ Continuous improvement in negotiation process & Cost saving opportunities.

â€¢ Turn round time improvement & new vendor development Contract Management & Tenders.

â€¢ To achieve target savings against budget and/or last purchase rates & develop new vendors. & Obtaining quotation and finalization.

â€¢ Research and evaluate potential vendors and suppliers, Request quotes and do technical comparisons of Prices, also maintain good relationships with vendors and suppliers.

â€¢ Examine and review products and supplies to ensure quality & digitize procurement processes.

â€¢ Track incoming & future purchasing plans, Projects inventory, delivery arrival time, and note actual arrival time Organize and update database of suppliers, delivery times, invoices, and quantity of supplies.

â€¢ Collaborate with financial team members on contracts, invoicing, and other financial matters

â€¢ Finding out the suppliers for buying various materials from products finders as well as from internet Source.

â€¢ Create RFQ for materials for projects, departments, for project materials, equipment's and services.

â€¢ Review Vendor evaluation & Vendor registration from Supply time & quality of products.

company - Proposal & Estimation

description - M/s Duncan Engineering Ltd, Pune, Ranjangaon MIDC

Role & Responsibilities:- â€¢ Project execution, Vendor development, supply chain Management, interacting with Vendors to ensure timely action of order & negotiating with the vendor.

â€¢ Work directly with customer to understand their process and develop the best solution For their requirement, lead proposal engineering team & technical support to customer.

â€¢ Work with sales team to professionally represent the company at a customer, gather Data and ask the right question to define a project.

â€¢ Work with our engineers and designer to develop and quote cost effective solution. Cost estimation, preparing proposal & quotation base on Technical specification of Customer requirement & identify production process and machines/brought out Item requirements. & co-ordinate with customer to understand exact requirements.

â€¢ Identification of critical problem & work out Proper solution in specified time frames.

â€¢ Production design-new manufacturing process - new product development. Developing

Customized manufacturing solutions. (Steel, Power & Cement, petrochemical sector.)

â€¢ Executing cost saving techniques/ measures and modifications to achieve

Substantial Reduction in O & M expenditures and work within the budget

Maintaining fruitful Relationships with existing customers.

company - Rotex Engineers & Manufacturing Pvt. Ltd

description - Nov 2015 - June 2016 Rotex Engineers & Manufacturing Pvt. Ltd Dombivali MIDC, Kaylan.

Role & Responsibilities:- â€¢ To Manage & enhance the activity related to proposal of pneumatics/fabrication projects & products.

â€¢ Project execution, Vendor development, supply chain Management, interacting with vendors to ensure Timely action of order & Negotiating with the vendor.

â€¢ Production design-new manufacturing process - new product development. Developing

Customized manufacturing solutions. (Steel, Power & Cement petrochemical sector.)

â€¢ Preparation of technical data sheets as per tender specification.

â€¢ Calculate price structure and analyze cost proposals.

â€¢ Monitoring progress throughout the job & comparing it with the schedule of work.

â€¢ Maintaining fruitful relationships with existing customers â€¢ Review Vendor evaluation & Vendor registration from Supply time & quality of products.

â€¢ Examine and review products and supplies to ensure quality.

company - Design & Proposal Engineering

description - M/s Schrader Duncan Ltd, Pune, Ranjangaon MIDC

Role & Responsibilities:- â€¢ Project execution, Vendor development, supply chain Management, interacting with

Vendors to ensure timely action of order & negotiating with the vendor.

â€¢ Design or modify Mechanical assemblies, hydraulic/pneumatic assemblies, Fabricated assy

Along with layouts/schematics and/or detailed drawings as per specification.

â€¢ Generate electrical or mechanical product specifications, standard operating procedures, maintenance manuals & Doing basic mechanical design, if required.

â€¢ Participate in growth & developing innovative solutions with design & development, sales & marketing team.

â€¢ Define, coordinate, perform and generate engineering test reports & engineering analysis.

â€¢ In Co-Ordination with production manager implement and assure that all manufacturing processes are being followed according to process Flow in relevant Departments.

â€¢ Maintain records of Non-Conformity (NC) raised during internal audits and close the same with corrective actions.

â€¢ Maintain records of obsolete documents and remain in touch with all HODs.

â€¢ Maintain ISO documents pertaining to ISO9001-2015 and bring awareness among employees.

â€¢ Coordinate & communicate with channel partners, O.E.M.s, dealers, consultants & end customers for Design & offer technically feasible.

â€¢ Carry Out internal audit as per audit plan and schedule, maintain the record of controlled drawings.

company - Fabrication Field-Hoist, Goods Lifts

Sr. Executive-Mechanical Engineering- Automation & Projects Consultant -
Mechanical Engineering

Skill Details

Microsoft Office -Word ,Excel,Auto cad,Micro station J ERP 3d Modeling software- Exprience - 120 months
Company Details
company - Mechanical Engineering
description - Role & Responsibilities: - Application Engineering / Pre Sales & Inside Sales â¢ Provide applications support to inside sales personnel and outside sales channels, Provide product selection and materials of construction technical recommendations.
â¢ Participate in the necessary training activities to establish technical competency & also Participate in Field Service trips as directed by Top Mgmt.
â¢ Assist Brand Managers and/or Product Managers as needed.
â¢ Takes active role as support for the Projects Quotations team, being responsible for the technical part of project quotation including selection, sizing and costing of Pneumatic Automation Products, valves, linear & rotary actuator and field Fabrication & equipment on the basis of the customer's data sheets and Engineering Drawing.
â¢ Travel as required to support the field sales channel and to promote Company products and services.
â¢ Perform detailed reviews of customer specifications, providing comments, clarifications and alternatives to customer requirements.
â¢ Sizing and selection of valves, actuators and prepare cost effective techno-commercial quotations, solutions as per customers technical requirements.
â¢ Coordinate with other technical departments as required, in order to minimize technical and cost risk.
â¢ Sending quotations accurately and on-time, including all technical and commercial as per customer documentation requests. Participate in the customer negotiation process, including commercial and technical negotiations.
â¢ Follow up of quotations to close the order also Follow up for payment collection.
â¢ Perform PO reviews to ensure that all critical elements are correct and take up to Senior Top managements and customer in case of any

discrepancies, and get PO amendment if required.

â€¢ Create the order transfer file for submission to the factory in accordance with PO. Support factory for any post order activities & after sales service where necessary to develop and maintain good customer service.

Role & Responsibilities: - Proposal/Estimation Engineering & Products

Costing â€¢ Review and receive the RFQs for company products and solutions.

â€¢ Estimation of Pneumatic Automation Products & Projects, valves, linear & rotary actuator and field equipment, Piping, Fabricated equipment's etc.

â€¢ Plotting enquiries to vendors for critical bought out items.

â€¢ Continuous follow up with vendors for quotations.

â€¢ Applying thumb rule or standard practice of design while estimating for achieving accuracy with less time.

â€¢ Analyzing & evaluating estimated cost and actual cost of the jobs already manufactured in past to arrive at a realistic cost estimates.

â€¢ Maintaining databanks of all quotations for readily available to others also.

Coordinating with Instrumentation & electrical dept. for costing.

â€¢ Handling estimation department while submitting offers on time. Visit to site for site projects, if required. Co-ordination with Purchase and process departments. Attending Customer Enquiries meeting. Development of vendors.

â€¢ Preparation of statement enquiries pending for estimation/ under progress â€¢ Understand the client's concern / pain area / requirement, Offer most suitable & optimized the tailor made or predesigned Chemtronics solution with techno-commercial proposal which should be technically feasible & commercially viable.

â€¢ Assign work to Jr. Proposal executives/Engineers â€¢ Guide & Coordinate with design, CAD, sales, marketing, project & commercial department.

Role & Responsibilities: - Engg. Procurement & Purchase, Vendor Development & Supply Chain.

â€¢ Procurement of Steel/Raw Material & semi-finish Products Based on Projects requirement.

â€¢ Continuous improvement in negotiation process & Cost saving opportunities.

â€¢ Turn round time improvement & new vendor development Contract Management & Tenders.

â€¢ To achieve target savings against budget and/or last purchase rates & develop new vendors. & Obtaining quotation and finalization.

â€¢ Research and evaluate potential vendors and suppliers, Request quotes and do technical comparisons of Prices, also maintain good relationships with vendors and suppliers.

â€¢ Examine and review products and supplies to ensure quality & digitize procurement processes.

â€¢ Track incoming & future purchasing plans, Projects inventory, delivery arrival time, and note actual arrival time Organize and update database of suppliers, delivery times, invoices, and quantity of supplies.

â€¢ Collaborate with financial team members on contracts, invoicing, and other financial matters

â€¢ Finding out the suppliers for buying various materials from products finders as well as from internet Source.

â€¢ Create RFQ for materials for projects, departments, for project materials, equipment's and services.

â€¢ Review Vendor evaluation & Vendor registration from Supply time & quality of products.

company - Proposal & Estimation

description - M/s Duncan Engineering Ltd, Pune, Ranjangaon MIDC

Role & Responsibilities:- â€¢ Project execution, Vendor development, supply chain Management, interacting with Vendors to ensure timely action of order & negotiating with the vendor.

â€¢ Work directly with customer to understand their process and develop the best solution For their requirement, lead proposal engineering team & technical support to customer.

â€¢ Work with sales team to professionally represent the company at a customer, gather Data and ask the right question to define a project.

â€¢ Work with our engineers and designer to develop and quote cost effective solution. Cost estimation, preparing proposal & quotation base on Technical specification of Customer requirement & identify production process and machines/brought out Item requirements. & co-ordinate with customer to understand exact requirements.

â€¢ Identification of critical problem & work out Proper solution in specified time frames.

â€¢ Production design-new manufacturing process - new product development. Developing

Customized manufacturing solutions. (Steel, Power & Cement, petrochemical sector.)

â¢ Executing cost saving techniques/ measures and modifications to achieve

Substantial Reduction in O & M expenditures and work within the budget

Maintaining fruitful Relationships with existing customers.

company - Rotex Engineers & Manufacturing Pvt. Ltd
description - Nov 2015 - June 2016 Rotex Engineers & Manufacturing Pvt. Ltd Dombivali MIDC, Kaylan.

Role & Responsibilities:- â¢ To Manage & enhance the activity related to proposal of pneumatics/fabrication projects & products.

â¢ Project execution, Vendor development, supply chain Management, interacting with vendors to ensure Timely action of order & Negotiating with the vendor.

â¢ Production design-new manufacturing process - new product development. Developing

Customized manufacturing solutions. (Steel, Power & Cement petrochemical sector.) â¢ Preparation of technical data sheets as per tender specification.

â¢ Calculate price structure and analyze cost proposals.

â¢ Monitoring progress throughout the job & comparing it with the schedule of work.

â¢ Maintaining fruitful relationships with existing customers â¢ Review Vendor evaluation & Vendor registration from Supply time & quality of products.

â¢ Examine and review products and supplies to ensure quality.

company - Design & Proposal Engineering

description - M/s Schrader Duncan Ltd, Pune, Ranjangaon MIDC

Role & Responsibilities:- â¢ Project execution, Vendor development, supply chain Management, interacting with

Vendors to ensure timely action of order & negotiating with the vendor.

â¢ Design or modify Mechanical assemblies, hydraulic/pneumatic assemblies, Fabricated assy

Along with layouts/schematics and/or detailed drawings as per specification.

â¢ Generate electrical or mechanical product specifications, standard operating procedures, maintenance manuals & Doing basic mechanical design, if required.

â¢ Participate in growth & developing innovative solutions with design & development, sales & marketing team.

â¢ Define, coordinate, perform and generate engineering test reports & engineering analysis.

â¢ In Co-Ordination with production manager implement and assure that all manufacturing processes are being followed according to process Flow in relevant Departments.

â¢ Maintain records of Non-Conformity (NC) raised during internal audits and close the same with corrective actions.

â¢ Maintain records of obsolete documents and remain in touch with all HODs.

â¢ Maintain ISO documents pertaining to ISO9001-2015 and bring awareness among employees.

â¢ Coordinate & communicate with channel partners, O.E.M.s, dealers, consultants & end customers for Design & offer technically feasible.

â¢ Carry Out internal audit as per audit plan and schedule, maintain the record of controlled drawings.

company - Fabrication Field-Hoist, Goods Lifts

description - JOIST- O- MECH Engg. Pvt. Ltd, Rabale MIDC, Thane

Role & Responsibilities:- â¢ Detailing of drawing, Preparations of BOM & raw material inspection.

â¢ Prototype manufacturing (3d modeling)

company - Fabrication Field

description -

company - MUKAND LTD, Kurla

Mechanical Engineer description - Role & Responsibilities:- â¢ Raw material inspection, Preparations of Gauge for inspection, marking on housing for machining, checking surface finishing

SKILLS: **â€¢** Knowledge of software / computer: Auto CAD (Included Diploma Academic Syllabus) **â€¢** MSCIT **â€¢** CNC Programming (Fanuc Series) - milling
STRENGTHS: **â€¢** Strong Dedication towards work. **â€¢** Quick Learner. **â€¢** Positive thinking and self-confidence. **â€¢** Honest, discipline and hardworking. INDUSTRIAL EXPERIENCE: **â€¢** 10 Day's Industrial Training at Nagpur agro Components, Hingna Road, Nagpur. **â€¢** 10 Day's Industrial Training at METAL FAB High-tech Pvt. Ltd, Hingna Road, Nagpur. Company Details

company - Push Engineering Pvt Ltd

description - Currently I am working as mechanical design engineer in Push engineering Pvt Ltd. All types of ice making plant are designed and manufactured in our company. Design includes design of pressure vessel ,condenser, conveyor with the help of 3d modelling software. Also BOM Preparation of material.ERP System.

company - Central Water and Power Research Station

description - Pune)

(Govt. of India)

1 year experience as a Research assistant of R&D Department of mechanical workshop at Central Water and Power Research Station, Khadakwasla, Pune (Govt. of india)

â€¢ Experiences different project of generation of sea waves in laboratory useful for design of port and harbor structures of Mumbai, Chennai, Goa and foreign countries like Japan, Bangladesh etc.

â€¢ Wave generated by wave maker comes under mechanical workshop. Wave generated with the help of hydraulic as well as pneumatic system and also by regular wave generator.

â€¢ I experiences sea wave generation by hydraulic system. Experiences design of hydraulic system includes design of servo actuator, axial piston pump and electric motor under supervision and guidance by 'Scientist 'B' at CWPRS.

â€¢ **SOFTWARES SKILLS**

â€¢ Autocad

â€¢ Catia V5

â€¢ MS office

â€¢ ProE

â€¢ **EXTRA CURRICULAR ACTIVITY**

â€¢ Organize a National level Technical event in Mechanical Student Association (MESA)

â€¢ Coordinator of MESA as a treasurer.

â€¢ Attending 3d printing workshop in college.

â€¢ Work readiness training conducted by NASSCOM foundation and Global Talent Track in college.

â€¢ Life Skills training conducted by NASSCOM foundation and Global Talent Track in college.

â€¢ **PERSONAL ATTRIBUTES**

â€¢ Positive Attitude

Mechanical â€¢ Quick Learner
Engineer â€¢ Team Leader

â€¢ Identification of critical problem & work out Proper solution in specified time frames.

â€¢ Production design-new manufacturing process - new product development. Developing

Customized manufacturing solutions. (Steel, Power & Cement, petrochemical sector.)

â¢ Executing cost saving techniques/ measures and modifications to achieve

Substantial Reduction in O & M expenditures and work within the budget

Maintaining fruitful Relationships with existing customers.

company - Rotex Engineers & Manufacturing Pvt. Ltd

description - Nov 2015 - June 2016 Rotex Engineers & Manufacturing Pvt. Ltd Dombivali MIDC, Kaylan.

Role & Responsibilities:- â¢ To Manage & enhance the activity related to proposal of pneumatics/fabrication projects & products.

â¢ Project execution, Vendor development, supply chain Management, interacting with vendors to ensure Timely action of order & Negotiating with the vendor.

â¢ Production design-new manufacturing process - new product development. Developing

Customized manufacturing solutions. (Steel, Power & Cement petrochemical sector.) â¢ Preparation of technical data sheets as per tender specification.

â¢ Calculate price structure and analyze cost proposals.

â¢ Monitoring progress throughout the job & comparing it with the schedule of work.

â¢ Maintaining fruitful relationships with existing customers â¢ Review Vendor evaluation & Vendor registration from Supply time & quality of products.

â¢ Examine and review products and supplies to ensure quality.

company - Design & Proposal Engineering

description - M/s Schrader Duncan Ltd, Pune, Ranjangaon MIDC

Role & Responsibilities:- â¢ Project execution, Vendor development, supply chain Management, interacting with

Vendors to ensure timely action of order & negotiating with the vendor.

â¢ Design or modify Mechanical assemblies, hydraulic/pneumatic assemblies, Fabricated assy

Along with layouts/schematics and/or detailed drawings as per specification.

â¢ Generate electrical or mechanical product specifications, standard operating procedures, maintenance manuals & Doing basic mechanical design, if required.

â¢ Participate in growth & developing innovative solutions with design & development, sales & marketing team.

â¢ Define, coordinate, perform and generate engineering test reports & engineering analysis.

â¢ In Co-Ordination with production manager implement and assure that all manufacturing processes are being followed according to process Flow in relevant Departments.

â¢ Maintain records of Non-Conformity (NC) raised during internal audits and close the same with corrective actions.

â¢ Maintain records of obsolete documents and remain in touch with all HODs.

â¢ Maintain ISO documents pertaining to ISO9001-2015 and bring awareness among employees.

â¢ Coordinate & communicate with channel partners, O.E.M.s, dealers, consultants & end customers for Design & offer technically feasible.

â¢ Carry Out internal audit as per audit plan and schedule, maintain the record of controlled drawings.

company - Push Engineering Pvt Ltd

description - Currently I am working as mechanical design engineer in Push engineering Pvt Ltd. All types of ice making plant are designed and manufactured in our company. Design includes design of pressure vessel ,condenser, conveyor with the help of 3d modelling software. Also BOM Preparation of material.ERP System.

company - Central Water and Power Research Station

description - Pune)

(Govt. of India)

1 year experience as a Research assistant of R&D Department of mechanical workshop at Central Water and Power Research Station, Khadakwasla, Pune (Govt. of india)

â€¢ Experiences different project of generation of sea waves in laboratory useful for design of port and harbor structures of Mumbai, Chennai, Goa and foreign countries like Japan, Bangladesh etc.

â€¢ Wave generated by wave maker comes under mechanical workshop. Wave generated with the help of hydraulic as well as pneumatic system and also by regular wave generator.

â€¢ I experiences sea wave generation by hydraulic system. Experiences design of hydraulic system includes design of servo actuator, axial piston pump and electric motor under supervision and guidance by 'Scientist 'B' at CWPRS.

â€¢ **SOFTWARES SKILLS**

â€¢ Autocad

â€¢ Catia V5

â€¢ MS office

â€¢ ProE

â€¢ **EXTRA CURRICULAR ACTIVITY**

â€¢ Organize a National level Technical event in Mechanical Student Association (MESA)

â€¢ Coordinator of MESA as a treasurer.

â€¢ Attending 3d printing workshop in college.

â€¢ Work readiness training conducted by NASSCOM foundation and Global Talent Track in college.

â€¢ Life Skills training conducted by NASSCOM foundation and Global Talent Track in college.

Company Details
company - Mechanical Engineering
description - Role & Responsibilities: - Application Engineering / Pre Sales & Inside Sales â€¢ Provide applications support to inside sales personnel and outside sales channels, Provide product selection and materials of construction technical recommendations.
â€¢ Participate in the necessary training activities to establish technical competency & also Participate in Field Service trips as directed by Top Mgmt.
â€¢ Assist Brand Managers and/or Product Managers as needed.
â€¢ Takes active role as support for the Projects Quotations team, being responsible for the technical part of project quotation including selection, sizing and costing of Pneumatic Automation Products, valves, linear & rotary actuator and field Fabrication & equipment on the basis of the customer's data sheets and Engineering Drawing.
â€¢ Travel as required to support the field sales channel and to promote Company products and services.
â€¢ Perform detailed reviews of customer specifications, providing comments, clarifications and alternatives to customer requirements.
â€¢ Sizing and selection of valves, actuators and prepare cost effective techno-commercial quotations, solutions as per customers technical requirements.
â€¢ Coordinate with other technical departments as required, in order to minimize technical and cost risk.
â€¢ Sending quotations accurately and on-time, including all technical and commercial as per customer documentation requests. Participate in the customer negotiation process, including commercial and technical negotiations.
â€¢ Follow up of quotations to close the order also Follow up for payment collection.
â€¢ Perform PO reviews to ensure that all critical elements are correct and take up to Senior Top managements and customer in case of any

discrepancies, and get PO amendment if required.

â€¢ Create the order transfer file for submission to the factory in accordance with PO. Support factory for any post order activities & after sales service where necessary to develop and maintain good customer service.

Role & Responsibilities: - Proposal/Estimation Engineering & Products

Costing â€¢ Review and receive the RFQs for company products and solutions.

â€¢ Estimation of Pneumatic Automation Products & Projects, valves, linear & rotary actuator and field equipment, Piping, Fabricated equipment's etc.

â€¢ Plotting enquiries to vendors for critical bought out items.

â€¢ Continuous follow up with vendors for quotations.

â€¢ Applying thumb rule or standard practice of design while estimating for achieving accuracy with less time.

â€¢ Analyzing & evaluating estimated cost and actual cost of the jobs already manufactured in past to arrive at a realistic cost estimates.

â€¢ Maintaining databanks of all quotations for readily available to others also.

Coordinating with Instrumentation & electrical dept. for costing.

â€¢ Handling estimation department while submitting offers on time. Visit to site for site projects, if required. Co-ordination with Purchase and process departments. Attending Customer Enquiries meeting. Development of vendors.

â€¢ Preparation of statement enquiries pending for estimation/ under progress â€¢ Understand the client's concern / pain area / requirement, Offer most suitable & optimized the tailor made or predesigned Chemtronics solution with techno-commercial proposal which should be technically feasible & commercially viable.

â€¢ Assign work to Jr. Proposal executives/Engineers â€¢ Guide & Coordinate with design, CAD, sales, marketing, project & commercial department.

Role & Responsibilities: - Engg. Procurement & Purchase, Vendor

Development & Supply Chain.

â€¢ Procurement of Steel/Raw Material & semi-finish Products Based on Projects requirement.

â€¢ Continuous improvement in negotiation process & Cost saving opportunities.

â€¢ Turn round time improvement & new vendor development Contract Management & Tenders.

â€¢ To achieve target savings against budget and/or last purchase rates & develop new vendors. & Obtaining quotation and finalization.

â€¢ Research and evaluate potential vendors and suppliers, Request quotes and do technical comparisons of Prices, also maintain good relationships with vendors and suppliers.

â€¢ Examine and review products and supplies to ensure quality & digitize procurement processes.

â€¢ Track incoming & future purchasing plans, Projects inventory, delivery arrival time, and note actual arrival time Organize and update database of suppliers, delivery times, invoices, and quantity of supplies.

â€¢ Collaborate with financial team members on contracts, invoicing, and other financial matters

â€¢ Finding out the suppliers for buying various materials from products finders as well as from internet Source.

â€¢ Create RFQ for materials for projects, departments, for project materials, equipment's and services.

â€¢ Review Vendor evaluation & Vendor registration from Supply time & quality of products.

company - Proposal & Estimation

description - M/s Duncan Engineering Ltd, Pune, Ranjangaon MIDC

Role & Responsibilities:- â€¢ Project execution, Vendor development, supply chain Management, interacting with Vendors to ensure timely action of order & negotiating with the vendor.

â€¢ Work directly with customer to understand their process and develop the best solution For their requirement, lead proposal engineering team & technical support to customer.

â€¢ Work with sales team to professionally represent the company at a customer, gather Data and ask the right question to define a project.

â€¢ Work with our engineers and designer to develop and quote cost effective solution. Cost estimation, preparing proposal & quotation base on Technical specification of Customer requirement & identify production process and machines/brought out Item requirements. & co-ordinate with customer to understand exact requirements.

â€¢ Identification of critical problem & work out Proper solution in specified time frames.

â€¢ Production design-new manufacturing process - new product development. Developing

Customized manufacturing solutions. (Steel, Power & Cement, petrochemical sector.)

â€¢ Executing cost saving techniques/ measures and modifications to achieve

Substantial Reduction in O & M expenditures and work within the budget

Maintaining fruitful Relationships with existing customers.

PROJECT DETAILS

#1 Title: GST And Sales Billing Softwares

â¢ Status: Completed

â¢ Duration: 1.5 Months.

â¢ Abstract: This is a Web application made by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is a client's website which is used for Billing. It includes GST Billing, Generate and print invoice. It has five master pages and four common pages. Masters include customer master, item master, uom master, setup master, reason master and common pages like sales order, payments, sales return and invoice.

#2 Title: Dinman News website

â¢ Status: Completed

â¢ Duration: 1 Months.

â¢ Abstract: This is a Website project by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is a clients website. It is used for displaying online video and text news.

#2 Title: Agri Management Website

â¢ Status: Completed

â¢ Duration: 1.5 Months.

â¢ Abstract: This is a Website project by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is used for purchasing and selling vegetables all over india.

company - OmegaSoft Technologies pvt.ltd

description - Company Name: OmegaSoft Technologies pvt.ltd. An ISO certified Company.

Duration: 5 months.

Technology: Java Spring Hibernate, AngularJs, Ajax, KendoUI and BootStrap.

Architecture: MVC Architecture and Service based Programming.

Project Module: Login Registration and Role Assignment, Payments.

INTERNSHIP PROJECT DETAILS

#1 Title: Employment Times

â¢ Status: Completed

â¢ Duration: 4 Months.

â¢ Abstract: This is a Website project using Java, Spring, Hibernate. Angular Js, Ajax and MySQL on back end. It is a client's website which is used for posting of newspapers all over India. It has 12 Modules. In which it has Admin Panel, E-paper Posting, Subscriptions, and many more. It is a very light weight website built by using MVC Architecture and Service based Architecture. We can also post advertisements on website and share the news on Facebook or any other social media directly. It has Payment

Java Developer module and users are able to make payments online through debit or credit card or E-Wallet.

B

SKILLS: - 1) Team leading 2) Self-motivated 3) Hard working â¢ Strengths:

Java Developer - Xoriant Solutions Pvt Ltd

Skill Details

Company Details

company - Xoriant Solutions Pvt Ltd

description - Pune

Period Sept' 2017 to till date

Role Java Developer

Description ResRent is a team responsible for the development of various modules for Hertz. They are responsible for the development of screens in the portfolios they look after, and act as a primary control function; developing webservices to ensure it can be hit by XML and JSON. We build various modules which are inbuilt in Hertz to provide interfaces for end users in their tasks.

Tools Eclipse, TOAD, SoapBox, Postman

Responsibilities - Develop module from Backend to Middleware to Frontend.

- Bugs fixing and proactive developing of enhancements
- Resolve Application incidents within defined UCs & creating different Task ticket as well.
- Debug and provide solution for workflow.
- Resolving DB issues and providing technical support to BAs.
- Keeping track of deployments and effect of same on ongoing jobs
- Contribution towards automation of daily activities and process based organization
- On-time, within-budget delivery meeting customers' quality expectations.
- Maintain knowledge base of domain, known defects and issues, processes and development techniques.

company - Xoriant Solutions Pvt Ltd

description - Strong communication, collaboration & team building skills with proficiency at grasping new technical concepts quickly and utilize the same in a productive manner.

â Experience in development in Web application.

â Resolve project related issues in minimal time.

â Able to communicate effectively with multifunctional teams, programmers and technical staff at all levels.

â Good knowledge of Java, Sql, Ext JS, JSP, XML, Web services.

â Good interpersonal & analytical skills with proven abilities in resolving the complex software issue.

Java developer - Tech Mahindra

Skill Details

JAVA- Exprience - 21 months

MYSQL- Exprience - 21 months

DATABASES- Exprience - 17 months

J2EE- Exprience - 17 months

ANDROID- Exprience - 6 months

Company - Tech Mahindra

Description - Team Size: 5

Environment: Java, Mysql, Shell script.

Webserver: Jenkins.

Description: OR-Formatter is an application which takes the input file as Geneva Modified File GMF from Geneva server and reads the data to generate Bill backup and Bill Invoices for Client customers of BT. These invoices would be sent across to all the clients after billing.

Contribution:

â€¢ Played the role of Java developer involved in applying change request to current modules.

â€¢ Worked on requirement analysis and development for the user stories and also preformed dev unit testing for the user stories.

â€¢ Handled E2E issues and fixing bugs.

â€¢ Prepare required program level and user-level documentation.

Company - Tech Mahindra

Description - Team Size: 5

Environment: Java EJB, Mysql, Shell script.

Webserver: Weblogic12c Server, Jenkins.

Description: STAA is an encapsulation middleware layer, acting as an interface between client's operational support systems and Legacy systems. It transforms the legacy data into various formats such as TLV. Input is in form xml/http to STAA where validations are done and the response is sent to the back end systems where back end systems are CSS and COSMOSS Databases. The business methods deployed as EJBs on WebLogic Server shared across various market facing units of client.

Contribution:

â€¢ Played the role of Java developer involved in creating services using Java/J2EE.

â€¢ Worked on requirement analysis and development for the user stories and also preformed dev unit testing for the user stories.

Java Developer â€¢ Handled E2E issues and fixing bugs.

Java Developer â€¢ Worked in Migration from java 1.6 to java 1.8.

PROJECT DETAILS

#1 Title: GST And Sales Billing Softwares

â¢ Status: Completed

â¢ Duration: 1.5 Months.

â¢ Abstract: This is a Web application made by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is a client's website which is used for Billing. It includes GST Billing, Generate and print invoice. It has five master pages and four common pages. Masters include customer master, item master, uom master, setup master, reason master and common pages like sales order, payments, sales return and invoice.

#2 Title: Dinman News website

â¢ Status: Completed

â¢ Duration: 1 Months.

â¢ Abstract: This is a Website project by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is a clients website. It is used for displaying online video and text news.

#2 Title: Agri Management Website

â¢ Status: Completed

â¢ Duration: 1.5 Months.

â¢ Abstract: This is a Website project by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is used for purchasing and selling vegetables all over india.

company - OmegaSoft Technologies pvt.ltd

description - Company Name: OmegaSoft Technologies pvt.ltd. An ISO certified Company.

Duration: 5 months.

Technology: Java Spring Hibernate, AngularJs, Ajax, KendoUI and BootStrap.

Architecture: MVC Architecture and Service based Programming.

Project Module: Login Registration and Role Assignment, Payments.

INTERNSHIP PROJECT DETAILS

#1 Title: Employment Times

â¢ Status: Completed

â¢ Duration: 4 Months.

â¢ Abstract: This is a Website project using Java, Spring, Hibernate. Angular Js, Ajax and MySQL on back end. It is a client's website which is used for posting of newspapers all over India. It has 12 Modules. In which it has Admin Panel, E-paper Posting, Subscriptions, and many more. It is a very light weight website built by using MVC Architecture and Service based Architecture. We can also post advertisements on website and share the news on Facebook or any other social media directly. It has Payment module and users are able to make payments online through debit or credit card or E-Wallet.

Java Developer - Xoriant Solutions Pvt Ltd

Skill Details

Company Details

company - Xoriant Solutions Pvt Ltd

description - Pune

Period Sept' 2017 to till date

Role Java Developer

Description ResRent is a team responsible for the development of various modules for Hertz. They are responsible for the development of screens in the portfolios they look after, and act as a primary control function; developing webservices to ensure it can be hit by XML and JSON. We build various modules which are inbuilt in Hertz to provide interfaces for end users in their tasks.

Tools Eclipse, TOAD, SoapBox, Postman

Responsibilities - Develop module from Backend to Middleware to Frontend.

- Bugs fixing and proactive developing of enhancements
- Resolve Application incidents within defined UCs & creating different Task ticket as well.
- Debug and provide solution for workflow.
- Resolving DB issues and providing technical support to BAs.
- Keeping track of deployments and effect of same on ongoing jobs
- Contribution towards automation of daily activities and process based organization
- On-time, within-budget delivery meeting customers' quality expectations.
- Maintain knowledge base of domain, known defects and issues, processes and development techniques.

company - Xoriant Solutions Pvt Ltd

description - Strong communication, collaboration & team building skills with proficiency at grasping new technical concepts quickly and utilize the same in a productive manner.

â Experience in development in Web application.

â Resolve project related issues in minimal time.

â Able to communicate effectively with multifunctional teams, programmers and technical staff at all levels.

â Good knowledge of Java, Sql, Ext JS, JSP, XML, Web services.

â Good interpersonal & analytical skills with proven abilities in resolving the

Java complex
Developer software issue.

Java developer - Tech Mahindra

Skill Details

JAVA- Exprience - 21 months

MYSQL- Exprience - 21 months

DATABASES- Exprience - 17 months

J2EE- Exprience - 17 months

ANDROID- Exprience - 6 months

Company - Tech Mahindra

Description - Team Size: 5

Environment: Java, Mysql, Shell script.

Webserver: Jenkins.

Description: OR-Formatter is an application which takes the input file as Geneva Modified File GMF from Geneva server and reads the data to generate Bill backup and Bill Invoices for Client customers of BT. These invoices would be sent across to all the clients after billing.

Contribution:

â€¢ Played the role of Java developer involved in applying change request to current modules.

â€¢ Worked on requirement analysis and development for the user stories and also preformed dev unit testing for the user stories.

â€¢ Handled E2E issues and fixing bugs.

â€¢ Prepare required program level and user-level documentation.

Company - Tech Mahindra

Description - Team Size: 5

Environment: Java EJB, Mysql, Shell script.

Webserver: Weblogic12c Server, Jenkins.

Description: STAA is an encapsulation middleware layer, acting as an interface between client's operational support systems and Legacy systems. It transforms the legacy data into various formats such as TLV. Input is in form xml/http to STAA where validations are done and the response is sent to the back end systems where back end systems are CSS and COSMOSS Databases. The business methods deployed as EJBs on WebLogic Server shared across various market facing units of client.

Contribution:

â€¢ Played the role of Java developer involved in creating services using Java/J2EE.

â€¢ Worked on requirement analysis and development for the user stories and also preformed dev unit testing for the user stories.

Java Developer â€¢ Handled E2E issues and fixing bugs.
Java Developer â€¢ Worked in Migration from java 1.6 to java 1.8.

Java Developer - Xoriant Solutions Pvt Ltd

Skill Details

Company Details

company - Xoriant Solutions Pvt Ltd

description - Pune

Period Sept' 2017 to till date

Role Java Developer

Description ResRent is a team responsible for the development of various modules for Hertz. They are responsible for the development of screens in the portfolios they look after, and act as a primary control function; developing webservices to ensure it can be hit by XML and JSON. We build various modules which are inbuilt in Hertz to provide interfaces for end users in their tasks.

Tools Eclipse, TOAD, SoapBox, Postman

Responsibilities - Develop module from Backend to Middleware to Frontend.

- Bugs fixing and proactive developing of enhancements
- Resolve Application incidents within defined UCs & creating different Task ticket as well.
- Debug and provide solution for workflow.
- Resolving DB issues and providing technical support to BAs.
- Keeping track of deployments and effect of same on ongoing jobs
- Contribution towards automation of daily activities and process based organization
- On-time, within-budget delivery meeting customers' quality expectations.
- Maintain knowledge base of domain, known defects and issues, processes and development techniques.

company - Xoriant Solutions Pvt Ltd

description - Strong communication, collaboration & team building skills with proficiency at grasping new technical concepts quickly and utilize the same in a productive manner.

â Experience in development in Web application.

â Resolve project related issues in minimal time.

â Able to communicate effectively with multifunctional teams, programmers and technical staff at all levels.

â Good knowledge of Java, Sql, Ext JS, JSP, XML, Web services.

â Good interpersonal & analytical skills with proven abilities in resolving the complex software issue.

Java developer - Tech Mahindra

Skill Details

JAVA- Exprience - 21 months

MYSQL- Exprience - 21 months

DATABASES- Exprience - 17 months

J2EE- Exprience - 17 months

ANDROID- Exprience - 6 months

Company - Tech Mahindra

Description - Team Size: 5

Environment: Java, Mysql, Shell script.

Webserver: Jenkins.

Description: OR-Formatter is an application which takes the input file as Geneva Modified File GMF from Geneva server and reads the data to generate Bill backup and Bill Invoices for Client customers of BT. These invoices would be sent across to all the clients after billing.

Contribution:

â€¢ Played the role of Java developer involved in applying change request to current modules.

â€¢ Worked on requirement analysis and development for the user stories and also preformed dev unit testing for the user stories.

â€¢ Handled E2E issues and fixing bugs.

â€¢ Prepare required program level and user-level documentation.

Company - Tech Mahindra

Description - Team Size: 5

Environment: Java EJB, Mysql, Shell script.

Webserver: Weblogic12c Server, Jenkins.

Description: STAA is an encapsulation middleware layer, acting as an interface between client's operational support systems and Legacy systems. It transforms the legacy data into various formats such as TLV. Input is in form xml/http to STAA where validations are done and the response is sent to the back end systems where back end systems are CSS and COSMOSS Databases. The business methods deployed as EJBs on WebLogic Server shared across various market facing units of client.

Contribution:

â€¢ Played the role of Java developer involved in creating services using Java/J2EE.

â€¢ Worked on requirement analysis and development for the user stories and also preformed dev unit testing for the user stories.

â€¢ Handled E2E issues and fixing bugs.

â€¢ Worked in Migration from java 1.6 to java 1.8.

PROJECT DETAILS

#1 Title: GST And Sales Billing Softwares

â¢ Status: Completed

â¢ Duration: 1.5 Months.

â¢ Abstract: This is a Web application made by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is a client's website which is used for Billing. It includes GST Billing, Generate and print invoice. It has five master pages and four common pages. Masters include customer master, item master, uom master, setup master, reason master and common pages like sales order, payments, sales return and invoice.

#2 Title: Dinman News website

â¢ Status: Completed

â¢ Duration: 1 Months.

â¢ Abstract: This is a Website project by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is a clients website. It is used for displaying online video and text news.

#2 Title: Agri Management Website

â¢ Status: Completed

â¢ Duration: 1.5 Months.

â¢ Abstract: This is a Website project by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is used for purchasing and selling vegetables all over india.

company - OmegaSoft Technologies pvt.ltd

description - Company Name: OmegaSoft Technologies pvt.ltd. An ISO certified Company.

Duration: 5 months.

Technology: Java Spring Hibernate, AngularJs, Ajax, KendoUI and BootStrap.

Architecture: MVC Architecture and Service based Programming.

Project Module: Login Registration and Role Assignment, Payments.

INTERNSHIP PROJECT DETAILS

#1 Title: Employment Times

â¢ Status: Completed

â¢ Duration: 4 Months.

â¢ Abstract: This is a Website project using Java, Spring, Hibernate. Angular Js, Ajax and MySQL on back end. It is a client's website which is used for posting of newspapers all over India. It has 12 Modules. In which it has Admin Panel, E-paper Posting, Subscriptions, and many more. It is a very light weight website built by using MVC Architecture and Service based Architecture. We can also post advertisements on website and share the news on Facebook or any other social media directly. It has Payment

Java Developer module and users are able to make payments online through debit or credit card or E-Wallet.

PROJECT DETAILS

#1 Title: GST And Sales Billing Softwares

â¢ Status: Completed

â¢ Duration: 1.5 Months.

â¢ Abstract: This is a Web application made by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is a client's website which is used for Billing. It includes GST Billing, Generate and print invoice. It has five master pages and four common pages. Masters include customer master, item master, uom master, setup master, reason master and common pages like sales order, payments, sales return and invoice.

#2 Title: Dinman News website

â¢ Status: Completed

â¢ Duration: 1 Months.

â¢ Abstract: This is a Website project by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is a clients website. It is used for displaying online video and text news.

#2 Title: Agri Management Website

â¢ Status: Completed

â¢ Duration: 1.5 Months.

â¢ Abstract: This is a Website project by using Java (Servlet and JSP), JavaScript, Jquery, Ajax, and MySQL on back end. It is used for purchasing and selling vegetables all over india.

company - OmegaSoft Technologies pvt.ltd

description - Company Name: OmegaSoft Technologies pvt.ltd. An ISO certified Company.

Duration: 5 months.

Technology: Java Spring Hibernate, AngularJs, Ajax, KendoUI and BootStrap.

Architecture: MVC Architecture and Service based Programming.

Project Module: Login Registration and Role Assignment, Payments.

INTERNSHIP PROJECT DETAILS

#1 Title: Employment Times

â¢ Status: Completed

â¢ Duration: 4 Months.

â¢ Abstract: This is a Website project using Java, Spring, Hibernate. Angular Js, Ajax and MySQL on back end. It is a client's website which is used for posting of newspapers all over India. It has 12 Modules. In which it has Admin Panel, E-paper Posting, Subscriptions, and many more. It is a very light weight website built by using MVC Architecture and Service based Architecture. We can also post advertisements on website and share the news on Facebook or any other social media directly. It has Payment

Java Developer module and users are able to make payments online through debit or credit card or E-Wallet.

company - Xoriant Solutions Pvt Ltd

description - Pune

Period Sept' 2017 to till date

Role Java Developer

Description ResRent is a team responsible for the development of various modules for Hertz. They are responsible for the development of screens in the portfolios they look after, and act as a primary control function; developing webservices to ensure it can be hit by XML and JSON. We build various modules which are inbuilt in Hertz to provide interfaces for end users in their tasks.

Tools Eclipse, TOAD, SoapBox, Postman

Responsibilities - Develop module from Backend to Middleware to Frontend.

- Bugs fixing and proactive developing of enhancements
- Resolve Application incidents within defined UCs & creating different Task ticket as well.
- Debug and provide solution for workflow.
- Resolving DB issues and providing technical support to BAs.
- Keeping track of deployments and effect of same on ongoing jobs
- Contribution towards automation of daily activities and process based organization
- On-time, within-budget delivery meeting customers' quality expectations.
- Maintain knowledge base of domain, known defects and issues, processes and development techniques.

company - Xoriant Solutions Pvt Ltd

description - Strong communication, collaboration & team building skills with proficiency at grasping new technical concepts quickly and utilize the same in a productive manner.

- â Experience in development in Web application.
- â Resolve project related issues in minimal time.
- â Able to communicate effectively with multifunctional teams, programmers and technical staff at all levels.
- â Good knowledge of Java, Sql, Ext JS, JSP, XML, Web services.
- â Good interpersonal & analytical skills with proven abilities in resolving the

Java Developer complex software issue.

ANDROID- Exprience - 6 months

Company - Tech Mahindra

Description - Team Size: 5

Environment: Java, Mysql, Shell script.

Webserver: Jenkins.

Description: OR-Formatter is an application which takes the input file as Geneva Modified File GMF from Geneva server and reads the data to generate Bill backup and Bill Invoices for Client customers of BT. These invoices would be sent across to all the clients after billing.

Contribution:

â€¢ Played the role of Java developer involved in applying change request to current modules.

â€¢ Worked on requirement analysis and development for the user stories and also preformed dev unit testing for the user stories.

â€¢ Handled E2E issues and fixing bugs.

â€¢ Prepare required program level and user-level documentation.

Company - Tech Mahindra

Description - Team Size: 5

Environment: Java EJB, Mysql, Shell script.

Webserver: Weblogic12c Server, Jenkins.

Description: STAA is an encapsulation middleware layer, acting as an interface between client's operational support systems and Legacy systems. It transforms the legacy data into various formats such as TLV. Input is in form xml/http to STAA where validations are done and the response is sent to the back end systems where back end systems are CSS and COSMOSS Databases. The business methods deployed as EJBs on WebLogic Server shared across various market facing units of client.

Contribution:

â€¢ Played the role of Java developer involved in creating services using Java/J2EE.

â€¢ Worked on requirement analysis and development for the user stories and also preformed dev unit testing for the user stories.

Java Developer â€¢ Handled E2E issues and fixing bugs.
Java Developer â€¢ Worked in Migration from java 1.6 to java 1.8.

company - Eduavenir IT Solution

description - Project: M.B.M.S.

M.B.M.S. - is an Inventory management application that allows user to manage inventory details of different warehouses, having different products located at various locations and help extract what goods have been procured, sold or returned by customers. It generates automated invoices along with customized reports. It also manages customer complaint and resolution system implementation along with automated MIS on

monthly basis. Sales and forecasting is also developed on MIS System and the streamlining of process of warehousing and dispatch along with online proof of delivery management system (POD documentation) is generated.

Responsibilities:

- â€¢ Participate in requirement gathering discussion with client to understand the flow of business processes
- â€¢ Analyze the requirements and determine the core processes, develop Process Documentation and ensure to stay up-to-date in conjunction with on-going changes
- â€¢ Participate in process flow analysis and preparing BRD, SRS.
- â€¢ Coordinating with developers, designers & operations teams for various nuances of the project, communicate the stakeholder requirements from requirement /enhancement to implementation and finally deliver the same within estimated timeframe.
- â€¢ Support UAT by reviewing test cases, manage version control of documents, software builds.
- â€¢ Coordinate with the stakeholders for UAT sign off and coordinate internally for production movement till Go live stage of the application.
- â€¢ Provide demo and training to internal and end user using PowerPoint presentation.
- â€¢ Resolving project functional & technical issues during UAT.
- â€¢ Prioritizing the Production bugs and resolving the same within the estimated timeframe.
- â€¢ Preparing Project Status Report and Production Bugs Status to all the stakeholders.
- â€¢ Promoting and Networking for online trading platform.
- â€¢ Designing query sheet for obtaining and comparison of quotes from various vendors.
- â€¢ Development of product codes / material codes for inventory management (Master Data Management)

company - CAPGEMINI Head Office

description - Type: Mobile and Device Testing. Duration: January 2014 - August 2014

Follet - An application which takes an electronic request from the user for the books he requires from a particular follet store. This detailed information about books that will include the name of the book, its price, the date of the transaction and the parties involved which will then be sent to follet stores. User then creates a request for one or more books for a given date. This request is then processed further and user gets a mail of the date when he will be provided with that book.

Responsibilities:

- â€¢ Understanding the needs and business requirements.
- â€¢ Preparing BRD, SRS by eliciting all the requirements from the client and SMEs
- â€¢ Understanding the dependency of the modules in the system
- â€¢ Preparation of test plan for Unit level and Integration level.
- â€¢ Preparation and execution of test cases.
- â€¢ Defect tracking, Issue Resolution, Risk Monitoring, Status Tracking, Reporting and Follow-up.
- â€¢ Preparation of Test Completion report.

company - CAPGEMINI Head Office

description -

company - CAPGEMINI Head Office

description - Humana is a health care insurance project of U.S. which deals with supplying various medicines to citizens as per the doctor's reference and patient's insurance policy. This application keeps track of all the medicines user has consumed in the past and generates a patient history. A citizen is given a drug only after the doctor's reference so the doctor's information is also linked with the patient's history.

Responsibilities:

- â€¢ Understanding the requirements and getting clarifications from client.
- â€¢ Involved in writing test cases based on test scenarios and execute them.
- â€¢ Ensuring Test Coverage using Requirement Traceability Matrix (RTM)
- â€¢ Preparation of Test Completion report.

company - CAPGEMINI Head Office

description - Testing Trends WQR (World Quality Report) is an application which allows the users to take a survey on different methods and technologies used for testing. Users can choose to answer any type of questions under three different categories. Users have a facility to search, view and export the data to excel. Also, users get daily and weekly reports through email about the new trends in testing implemented around the globe. Testing Trends WQR app is available on Android and IOS platforms.

Responsibilities:

- â€¢ Understanding the requirements and getting clarifications from client.
- â€¢ Writing test cases based on test scenarios and executed them.
- â€¢ Performing different types of testing such as Functional, Integration, System, and UAT.

Analyst

â€¢ Defect resolution and maintenance of the application.
TECHNOLOGICAL SKILLS â€¢ Knowledge of Computers on the Windows platform. â€¢ Fluency in MS-Office Applications such as Excel, Word, PowerPoint, etc. â€¢ HTML, JAVA, PHP ATTRIBUTES â€¢ Hardworking towards achieving the Goal â€¢ Good communication skills â€¢ Quick learner â€¢ Good interpersonal relation

company - Eduavenir IT Solution

description - Project: M.B.M.S

M.B.M.S. - is an Inventory management application that allows user to manage inventory details of different warehouses, having different products located at various locations and help extract what goods have been procured, sold or returned by customers. It generates automated invoices along with customized reports. It also manages customer complaint and resolution system implementation along with automated MIS on monthly basis. Sales and forecasting is also developed on MIS System and the streamlining of process of warehousing and dispatch along with online proof of delivery management system (POD documentation) is generated.

Responsibilities:

- â€¢ Participate in requirement gathering discussion with client to understand the flow of business processes
- â€¢ Analyze the requirements and determine the core processes, develop Process Documentation and ensure to stay up-to-date in conjunction with on-going changes
- â€¢ Participate in process flow analysis and preparing BRD, SRS.
- â€¢ Coordinating with developers, designers & operations teams for various nuances of the project, communicate the stakeholder requirements from requirement /enhancement to implementation and finally deliver the same within estimated timeframe.
- â€¢ Support UAT by reviewing test cases, manage version control of documents, software builds.
- â€¢ Coordinate with the stakeholders for UAT sign off and coordinate internally for production movement till GoLive stage of the application.
- â€¢ Provide demo and training to internal and end user using PowerPoint presentation.
- â€¢ Resolving project functional &technical issues during UAT.
- â€¢ Prioritizing the Production bugs and resolving the same within the estimated timeframe.
- â€¢ Preparing Project Status Report and Production Bugs Status to all the stakeholders.
- â€¢ Promoting and Networking for online trading platform.
- â€¢ Designing query sheet for obtaining and comparison of quotes from various vendors.
- â€¢ Development of product codes / material codes for inventory management (Master Data Management)

company - CAPGEMINI Head Office
 description - Type: Mobile and Device Testing. Duration: January 2014 - August 2014

Follet - An application which takes an electronic request from the user for the books he requires from a particular follet store. This detailed information about books that will include the name of the book, its price, the date of the transaction and the parties involved which will then be sent to follet stores. User then creates a request for one or more books for a given date. This request is then processed further and user gets a mail of the date when he will be provided with that book.

Responsibilities:

- â€¢ Understanding the needs and business requirements.
- â€¢ Preparing BRD, SRS by eliciting all the requirements from the client and SMEs
- â€¢ Understanding the dependency of the modules in the system
- â€¢ Preparation of test plan for Unit level and Integration level.

â€¢ Preparation and execution of test cases.

- â€¢ Defect tracking, Issue Resolution, Risk Monitoring, Status Tracking, Reporting and Follow-up.

â€¢ Preparation of Test Completion report.

company - CAPGEMINI Head Office

description -

company - CAPGEMINI Head Office

description - Humana is a health care insurance project of U.S. which deals with supplying various medicines to citizens as per the doctor's reference and patient's insurance policy. This application keeps track of all the medicines user has consumed in the past and generates a patient history. A citizen is given a drug only after the doctor's reference so the doctor's information is also linked with the patient's history.

Responsibilities:

- â€¢ Understanding the requirements and getting clarifications from client.

- â€¢ Involved in writing test cases based on test scenarios and execute them.
- â€¢ Ensuring Test Coverage using Requirement Traceability Matrix (RTM)
- â€¢ Preparation of Test Completion report.

company - CAPGEMINI Head Office

description - Testing Trends WQR (World Quality Report) is an application which allows the users to take a survey on different methods and technologies used for testing. Users can choose to answer any type of questions under three different categories. Users have a facility to search, view and export the data to excel. Also, users get daily and weekly reports through email about the new trends in testing implemented around the globe. Testing Trends WQR app is available on Android and IOS platforms.

Responsibilities:

- â€¢ Understanding the requirements and getting clarifications from client.

- â€¢ Writing test cases based on test scenarios and executed them.

- â€¢ Performing different types of testing such as Functional, Integration, System, and UAT.

- â€¢ Defect resolution and maintenance of the application.

- â€¢ Support UAT by reviewing test cases, manage version control of documents, software builds.
- â€¢ Coordinate with the stakeholders for UAT sign off and coordinate internally for production movement till GoLive stage of the application.
- â€¢ Provide demo and training to internal and end user using PowerPoint presentation.
- â€¢ Resolving project functional &technical issues during UAT.
- â€¢ Prioritizing the Production bugs and resolving the same within the estimated timeframe.
- â€¢ Preparing Project Status Report and Production Bugs Status to all the stakeholders.
- â€¢ Promoting and Networking for online trading platform.
- â€¢ Designing query sheet for obtaining and comparison of quotes from various vendors.
- â€¢ Development of product codes / material codes for inventory management (Master Data Management)

company - CAPGEMINI Head Office
description - Type: Mobile and Device Testing. Duration: January 2014 - August 2014

Follet - An application which takes an electronic request from the user for the books he requires from a particular follet store. This detailed information about books that will include the name of the book, its price, the date of the transaction and the parties involved which will then be sent to follet stores. User then creates a request for one or more books for a given date. This request is then processed further and user gets a mail of the date when he will be provided with that book.

Responsibilities:

- â€¢ Understanding the needs and business requirements.
- â€¢ Preparing BRD, SRS by eliciting all the requirements from the client and SMEs
- â€¢ Understanding the dependency of the modules in the system
- â€¢ Preparation of test plan for Unit level and Integration level.

- â€¢ Preparation and execution of test cases.
- â€¢ Defect tracking, Issue Resolution, Risk Monitoring, Status Tracking, Reporting and Follow-up.

- â€¢ Preparation of Test Completion report.

company - CAPGEMINI Head Office
description -

company - CAPGEMINI Head Office

description - Humana is a health care insurance project of U.S. which deals with supplying various medicines to citizens as per the doctor's reference and patient's insurance policy. This application keeps track of all the medicines user has consumed in the past and generates a patient history. A citizen is given a drug only after the doctor's reference so the doctor's information is also linked with the patient's history.

Responsibilities:

- â€¢ Understanding the requirements and getting clarifications from client.

- â€¢ Involved in writing test cases based on test scenarios and execute them.
- â€¢ Ensuring Test Coverage using Requirement Traceability Matrix (RTM)
- â€¢ Preparation of Test Completion report.

company - CAPGEMINI Head Office

description - Testing Trends WQR (World Quality Report) is an application which allows the users to take a survey on different methods and technologies used for testing. Users can choose to answer any type of questions under three different categories. Users have a facility to search, view and export the data to excel. Also, users get daily and weekly reports through email about the new trends in testing implemented around the globe. Testing Trends WQR app is available on Android and IOS platforms.

Responsibilities:

- â€¢ Understanding the requirements and getting clarifications from client.

- â€¢ Writing test cases based on test scenarios and executed them.

- â€¢ Performing different types of testing such as Functional, Integration, System, and UAT.

- â€¢ Defect resolution and maintenance of the application.

company - Accenture
description - Company Accenture, Pune
Environment SAP BO 4.2, IDT, HANA views
Role SAP BO Developer and HANA developer

Description:

This Project aims to provide reporting solution for Swiss business users. The universe supports analyzing customer funds purchase order patterns and order lifecycle reporting.

The purpose of reports is to provide an end-to-end view of the entire sales order transaction, and to track the investment orders in various funds, including the status of orders, order types along with the gross value and net value to be generated from these orders.

Roles & Responsibilities:

- â€¢ Analyzed user requirements and sorted the best possible ways of optimizing performance of universe.
- â€¢ CV and generated views development in HANA studio
- â€¢ Handling day to day activities involved in development of Business Objects as per the client requirements.
- â€¢ Worked as a team member with backend counterpart to understand the Business Requirements.
- â€¢ Developing and maintaining universes.
- â€¢ Raised OSS tickets to SAP for issues and implemented suggestion/workaround in development.
- â€¢ Fixed webi issues reported by users.
- â€¢ Created BIAR file and promoted to higher environments by change request.
- â€¢ Project handover to team and documentation for reference.

Project 2:

Project Name Nestle
Client Nestle Globe
Company Tech Mahindra Pvt. Ltd. Bangalore
Environment SAP BO 4.2, IDT, HANA views
Role SAP BO Developer and HANA developer

Description:

This Project aims to provide reporting solution for Global business users. The Globe Integrated Order (IO), Billing Detail and Order Detail universes combines orders, deliveries, shipment and billing documents at the order item level.

The universe supports analyzing customer order patterns and order lifecycle reporting.

The purpose of reports on this universe is to provide an end-to-end view of the entire sales order transaction, and to track the sales orders in various ways, including the status of orders, order types along with the gross value and net value to be generated from these orders.

Roles & Responsibilities:

- â€¢ Analyzed user requirements and sorted the best possible ways of optimizing performance of universe.
- â€¢ CV and generated views development in HANA studio
- â€¢ Handling day to day activities involved in development of Business Objects as per the client requirements.
- â€¢ Worked as a team member with backend counterpart to understand the Business Requirements.
- â€¢ Developing and maintaining universes.
- â€¢ Raised OSS tickets to SAP for issues and implemented suggestion/workaround in development.
- â€¢ Implemented Union pruning in concept in universe to optimize performance by partition selection in HANA views by passing value to prompt.
- â€¢ Fixed webi issues reported by users.
- â€¢ Created BIAR file and promoted to higher environments by change request.
- â€¢ Project handover to team and documentation for reference.

Project 3:

Project Name Nestle
Client Nestle TCT
Company Tech Mahindra Pvt. Ltd. Bangalore
Environment SAP BO XI 4.2, Design Studio 1.6 SP6 & Bex Queries
Role SAP BO Developer

Description:

The Project was developed to show delay in Nestle freight orders by hours on cross tab, bar chart, geo map due to weather conditions.

Basic Source for the data was BW Bex queries and the top of these Queries dashboard was designed.

This main user audience was transport control tower members to analyze and take decision to send consignments via other modes of transport due to weather conditions to avoid delay and reduce expenditure.

Roles & Responsibilities:

- â¢ Involved with users to understand the Business Requirements and implement feature in a generic way.
- â¢ Suggested best visualization components in dashboard to use.
- â¢ Analyzing user requirements and finding the best possible ways of representing the data.
- â¢ Bug Fixes and feature enhancement in application.

Project 4:

Project Name Nestle

Client Nestle BA

Company Tech Mahindra Pvt. Ltd. Bangalore

Environment SAP BO 4.2, Design Studio 1.6 & Bex Queries

Role SAP BO Developer

Description:

The Project "Nestle BA Catalogue Reporting" for Nestle is basically to provide Dashboard in Design studio with the information of all the reports used within Nestle.

And this dashboard is been used by all the users of Nestle within different region of globe.

Basic Source for the data was BW Bex Queries and the top of these Queries Dashboard was designed.

This main purpose of the project was to help users to understand about usage of different reports on portal and to help them to take decision for decommissioning of a report.

Roles & Responsibilities:

- â¢ Involved with customer to understand the Business Requirements in order to present the data in a meaningful manner and suggested component selection to visualize data in most effectively.
- â¢ Analyzing user requirements and finding the best possible ways of representing the data.
- â¢ Changes in BW query according to requirement
- â¢ Interacting with client team for requirement gathering and analysis.
- â¢ Implemented ideas in bex and design studio app to optimize performance with help of successful POC.

Project 5:

Project Name Warner Bros

Client Marvin Pictures, US

Company CapGemini Pvt. Ltd. Bangalore

Tools Teradata DB, SAP BO 4.1 Webi, IDT, CMC, Query builder, HPSM ticketing tool

Role SAP BO Developer

Description:

The purpose of the project is tracking of DVD and comic sale worldwide.

The Application will be used by End Users to analyze their sales Information and to help them in taking decision for their Business Growth.

Sales reports in webi were based on universe. Teradata tables were source to universe.

Worked as shared resource for CMC activities and webi/universe issues tickets.

Roles & Responsibilities:

- â¢ Working as a team member to understand the Business Requirements.
- â¢ Performed CMC activities like user & user group creation, providing access to objects and folders. Created folders for reports, connection, universes and provided user security, connection pointing to universe.
- â¢ Worked on issue related to connection, universe objects and webi reports enhancements.

- â€¢ Raised OSS messages to SAP to seek solution related to BO tool and limitations.
- â€¢ Worked on webi report, universe defects and enhancements.
- â€¢ Meeting with users to understand issue, suggest best solution and ETA.
- â€¢ Worked on query builder to find BO objects metadata for investigation.
- â€¢ Created of BIAR format using promotion management.

Project 6:

Project Name Nordea
 Client Nordea Bank, Sweden
 Company CapGemini Pvt. Ltd. Bangalore
 Environment SAP BO 4.1, IDT, Webi, Teradata
 Role SAP BO Developer

Description:

The Project report Analytics for Nordea aims to provide clear analysis of personal, company accounts in bank around the world. In all regions reports have data related to users and their account type.

Webi reports based on universe based on Teradata DB financial tables.

This project mainly tracks firm's Sales with respect to different criteria's like customer wise sales for different categories. It helps various end Users to analyze their sales related information and to help in their business growth and make precise decisions.

Roles & Responsibilities:

- â€¢ Involved in activities to understand the Business Requirements.
- â€¢ Analyzing user requirements and finding the best possible ways of representing the data.
- â€¢ Designing and developing interactive webi reports as per client's dynamic requirements.
- â€¢ Developed webi reports having blocks, graphs and linked report with summary report.
- â€¢ After development performing unit test activities and presentation to users.
- â€¢ Implementation of Business Object i.e. Webi from one Environment to another using BIAR File.
- â€¢ Fixed issues in webi reports related to data and report formatting and made changes in report requested by users in MAT.
- â€¢ Prepared RDD for reports and performed unit testing.
- â€¢ Provided KT to users and supports teams.

 SAP HANA Developer

SAP HANA Developer - Schlumberger

Skill Details

SAP HANA- Exprience - 60 months

SAP BO- Exprience - 36 months

Company Details

company - Schlumberger

description - Schlumberger is the world's leading provider of technology for reservoir characterization, drilling, production, and processing to the oil and gas industry. Working in more than 85 countries.

Role-SAP HANA Developer

Team Size: 12

Duration: Feb 2017 to Till Date

Responsibilities:

Working on Suit on HANA and Native HANA Systems.

Working on end to end implementation for Release 2.3 and 2.4.

Developing HANA Information Models Calculation Views, Table Functions, Procedures.

Actively involved in cutover activities, Dry Runs Production Go live and Post Production Go Live and resolving issues.

Worked on HANA functionalities like Currency Conversions and analyzing the Planviz for performance related issues etc.

Worked on to bring the Tables in SAP HANA Landing zone using SDA.

Working on to resolve the performance issues in HANA views by applying filter, joins etc.

Interacting with the Business and functional team members, based on the discussion Creating Design Documents, Technical Specification and Test

Documents.

Successfully implemented the Release 2.2 and 2.3 for US, Ecuador and Canada.

Successfully completed the Self-service project for Finance Domain and created Reports in Analysis of office.

Working on to create the Power BI Reports.

Working on to resolve production defects and Incidents by using HPALM and Remedy Tools.

Working on to resolve the issues in an existing HANA Views.

Working on to promote the Objects in different environment by using Charm/Solomon.

Working on to enhance the performance of the HANA views by using PLANVIZ.

Worked on to create the BO Reports for Vendor Master.

2. Aero Space Design/Honeywell

company - Fujitsu Consulting India

description - Responsibilities:

â€¢ HANA Data Model Development and Modification of Existing Models.

â€¢ Providing estimation to create the data model based on business Request.

â€¢ Creating Views- Attribute, Analytical and Calculation Views base on business requirement â€¢ Creation of Design document and Technical design document.

â€¢ Brought the data into HANA Landing zone using SLT and SDA.

â€¢ Handled complex performance issues.

â€¢ Worked SAP Landscape transformation for data replication from source DB to HANA DB â€¢ Solved SIT tickets on HANA Information Model.

â€¢ Developing HANA Information Models Calculation Views, Table Functions, Procedures.

â€¢ Modifying existing models to include tables, columns etc. necessary to complete the requirement.

â€¢ Configuring business objects to fetch data from HANA.

â€¢ Editing, Modifying exiting reports to fetch data from HANA as per the requirement.

company - Accenture

description - Company Accenture, Pune

Environment SAP BO 4.2, IDT, HANA views

Role SAP BO Developer and HANA developer

Description:

This Project aims to provide reporting solution for Swiss business users. The universe supports analyzing customer funds purchase order patterns and order lifecycle reporting.

The purpose of reports is to provide an end-to-end view of the entire sales order transaction, and to track the investment orders in various funds, including the status of orders, order types along with the gross value and net value to be generated from these orders.

Roles & Responsibilities:

- â€¢ Analyzed user requirements and sorted the best possible ways of optimizing performance of universe.

- â€¢ CV and generated views development in HANA studio

- â€¢ Handling day to day activities involved in development of Business Objects as per the client requirements.

- â€¢ Worked as a team member with backend counterpart to understand the Business Requirements.

- â€¢ Developing and maintaining universes.

- â€¢ Raised OSS tickets to SAP for issues and implemented suggestion/workaround in development.

- â€¢ Fixed webi issues reported by users.

- â€¢ Created BIAR file and promoted to higher environments by change request.

- â€¢ Project handover to team and documentation for reference.

Project 2:

Project Name Nestle

Client Nestle Globe

Company Tech Mahindra Pvt. Ltd. Bangalore

Environment SAP BO 4.2, IDT, HANA views

Role SAP BO Developer and HANA developer

Description:

This Project aims to provide reporting solution for Global business users.

The Globe Integrated Order (IO), Billing Detail and Order Detail universes combines orders, deliveries, shipment and billing documents at the order item level.

The universe supports analyzing customer order patterns and order lifecycle reporting.

The purpose of reports on this universe is to provide an end-to-end view of the entire sales order transaction, and to track the sales orders in various ways, including the status of orders, order types along with the gross value and net value to be generated from these orders.

Roles & Responsibilities:

- â€¢ Analyzed user requirements and sorted the best possible ways of optimizing performance of universe.

- â€¢ CV and generated views development in HANA studio

- â€¢ Handling day to day activities involved in development of Business Objects as per the client requirements.

- â€¢ Worked as a team member with backend counterpart to understand the Business Requirements.

- â€¢ Developing and maintaining universes.

- â€¢ Raised OSS tickets to SAP for issues and implemented suggestion/workaround in development.

- â€¢ Implemented Union pruning in concept in universe to optimize performance by partition selection in HANA views by passing value to

- prompt.
â¢ Fixed webi issues reported by users.
â¢ Created BIAR file and promoted to higher environments by change request.
â¢ Project handover to team and documentation for reference.

Project 3:

Project Name Nestle
Client Nestle TCT
Company Tech Mahindra Pvt. Ltd. Bangalore
Environment SAP BO XI 4.2, Design Studio 1.6 SP6 & Bex Queries
Role SAP BO Developer

Description:

The Project was developed to show delay in Nestle freight orders by hours on cross tab, bar chart, geo map due to weather conditions.

Basic Source for the data was BW Bex queries and the top of these Queries dashboard was designed.

This main user audience was transport control tower members to analyze and take decision to send consignments via other modes of transport due to weather conditions to avoid delay and reduce expenditure.

Roles & Responsibilities:

- â¢ Involved with users to understand the Business Requirements and implement feature in a generic way.
- â¢ Suggested best visualization components in dashboard to use.
- â¢ Analyzing user requirements and finding the best possible ways of representing the data.
- â¢ Bug Fixes and feature enhancement in application.

Project 4:

Project Name Nestle
Client Nestle BA
Company Tech Mahindra Pvt. Ltd. Bangalore
Environment SAP BO 4.2, Design Studio 1.6 & Bex Queries
Role SAP BO Developer

Description:

The Project "Nestle BA Catalogue Reporting" for Nestle is basically to provide Dashboard in Design studio with the information of all the reports used within Nestle.

And this dashboard is been used by all the users of Nestle within different region of globe.

Basic Source for the data was BW Bex Queries and the top of these Queries Dashboard was designed.

This main purpose of the project was to help users to understand about usage of different reports on portal and to help them to take decision for decommissioning of a report.

Roles & Responsibilities:

- â¢ Involved with customer to understand the Business Requirements in order to present the data in a meaningful manner and suggested component selection to visualize data in most effectively.
- â¢ Analyzing user requirements and finding the best possible ways of representing the data.
- â¢ Changes in BW query according to requirement
- â¢ Interacting with client team for requirement gathering and analysis.
- â¢ Implemented ideas in bex and design studio app to optimize performance with help of successful POC.

Project 5:

Project Name Warner Bros
Client Marvin Pictures, US
Company CapGemini Pvt. Ltd. Bangalore
Tools Teradata DB, SAP BO 4.1 Webi, IDT, CMC, Query builder, HPSM ticketing tool
Role SAP BO Developer

Description:

The purpose of the project is tracking of DVD and comic sale worldwide. The Application will be used by End Users to analyze their sales Information and to help them in taking decision for their Business Growth.

Sales reports in webi were based on universe. Teradata tables were source to universe.

Worked as shared resource for CMC activities and webi/universe issues tickets.

Roles & Responsibilities:

- â¢ Working as a team member to understand the Business Requirements.
- â¢ Performed CMC activities like user & user group creation, providing access to objects and folders. Created folders for reports, connection, universes and provided user security, connection pointing to universe.
- â¢ Worked on issue related to connection, universe objects and webi reports enhancements.
- â¢ Raised OSS messages to SAP to seek solution related to BO tool and limitations.
- â¢ Worked on webi report, universe defects and enhancements.
- â¢ Meeting with users to understand issue, suggest best solution and ETA.
- â¢ Worked on query builder to find BO objects metadata for investigation.
- â¢ Created of BIAR format using promotion management.

Project 6:

Project Name Nordea

Client Nordea Bank, Sweden

Company CapGemini Pvt. Ltd. Bangalore

Environment SAP BO 4.1, IDT, Webi, Teradata

Role SAP BO Developer

Description:

The Project report Analytics for Nordea aims to provide clear analysis of personal, company accounts in bank around the world. In all regions reports have data related to users and their account type.

Webi reports based on universe based on Teradata DB financial tables.

This project mainly tracks firm's Sales with respect to different criteria's like customer wise sales for different categories. It helps various end Users to analyze their sales related information and to help in their business growth and make precise decisions.

Roles & Responsibilities:

- â¢ Involved in activities to understand the Business Requirements.
- â¢ Analyzing user requirements and finding the best possible ways of representing the data.
- â¢ Designing and developing interactive webi reports as per client's dynamic requirements.
- â¢ Developed webi reports having blocks, graphs and linked report with summary report.
- â¢ After development performing unit test activities and presentation to users.
- â¢ Implementation of Business Object i.e. Webi from one Environment to another using BIAR File.
- â¢ Fixed issues in webi reports related to data and report formatting and made changes in report requested by users in MAT.
- â¢ Prepared RDD for reports and performed unit testing.

description - Company Accenture, Pune
Environment SAP BO 4.2, IDT, HANA views
Role SAP BO Developer and HANA developer

Description:

This Project aims to provide reporting solution for Swiss business users. The universe supports analyzing customer funds purchase order patterns and order lifecycle reporting.

The purpose of reports is to provide an end-to-end view of the entire sales order transaction, and to track the investment orders in various funds, including the status of orders, order types along with the gross value and net value to be generated from these orders.

Roles & Responsibilities:

- â€¢ Analyzed user requirements and sorted the best possible ways of optimizing performance of universe.
- â€¢ CV and generated views development in HANA studio
- â€¢ Handling day to day activities involved in development of Business Objects as per the client requirements.
- â€¢ Worked as a team member with backend counterpart to understand the Business Requirements.
- â€¢ Developing and maintaining universes.
- â€¢ Raised OSS tickets to SAP for issues and implemented suggestion/workaround in development.
- â€¢ Fixed webi issues reported by users.
- â€¢ Created BIAR file and promoted to higher environments by change request.
- â€¢ Project handover to team and documentation for reference.

Project 2:

Project Name Nestle
Client Nestle Globe
Company Tech Mahindra Pvt. Ltd. Bangalore
Environment SAP BO 4.2, IDT, HANA views
Role SAP BO Developer and HANA developer

Description:

This Project aims to provide reporting solution for Global business users. The Globe Integrated Order (IO), Billing Detail and Order Detail universes combines orders, deliveries, shipment and billing documents at the order item level.

The universe supports analyzing customer order patterns and order lifecycle reporting.

The purpose of reports on this universe is to provide an end-to-end view of the entire sales order transaction, and to track the sales orders in various ways, including the status of orders, order types along with the gross value and net value to be generated from these orders.

Roles & Responsibilities:

- â€¢ Analyzed user requirements and sorted the best possible ways of optimizing performance of universe.
- â€¢ CV and generated views development in HANA studio
- â€¢ Handling day to day activities involved in development of Business Objects as per the client requirements.
- â€¢ Worked as a team member with backend counterpart to understand the Business Requirements.
- â€¢ Developing and maintaining universes.
- â€¢ Raised OSS tickets to SAP for issues and implemented suggestion/workaround in development.
- â€¢ Implemented Union pruning in concept in universe to optimize performance by partition selection in HANA views by passing value to

- prompt.
â¢ Fixed webi issues reported by users.
â¢ Created BIAR file and promoted to higher environments by change request.
â¢ Project handover to team and documentation for reference.

Project 3:

Project Name Nestle
Client Nestle TCT
Company Tech Mahindra Pvt. Ltd. Bangalore
Environment SAP BO XI 4.2, Design Studio 1.6 SP6 & Bex Queries
Role SAP BO Developer

Description:

The Project was developed to show delay in Nestle freight orders by hours on cross tab, bar chart, geo map due to weather conditions.

Basic Source for the data was BW Bex queries and the top of these Queries dashboard was designed.

This main user audience was transport control tower members to analyze and take decision to send consignments via other modes of transport due to weather conditions to avoid delay and reduce expenditure.

Roles & Responsibilities:

- â¢ Involved with users to understand the Business Requirements and implement feature in a generic way.
- â¢ Suggested best visualization components in dashboard to use.
- â¢ Analyzing user requirements and finding the best possible ways of representing the data.
- â¢ Bug Fixes and feature enhancement in application.

Project 4:

Project Name Nestle
Client Nestle BA
Company Tech Mahindra Pvt. Ltd. Bangalore
Environment SAP BO 4.2, Design Studio 1.6 & Bex Queries
Role SAP BO Developer

Description:

The Project "Nestle BA Catalogue Reporting" for Nestle is basically to provide Dashboard in Design studio with the information of all the reports used within Nestle.

And this dashboard is been used by all the users of Nestle within different region of globe.

Basic Source for the data was BW Bex Queries and the top of these Queries Dashboard was designed.

This main purpose of the project was to help users to understand about usage of different reports on portal and to help them to take decision for decommissioning of a report.

Roles & Responsibilities:

- â¢ Involved with customer to understand the Business Requirements in order to present the data in a meaningful manner and suggested component selection to visualize data in most effectively.
- â¢ Analyzing user requirements and finding the best possible ways of representing the data.
- â¢ Changes in BW query according to requirement
- â¢ Interacting with client team for requirement gathering and analysis.
- â¢ Implemented ideas in bex and design studio app to optimize performance with help of successful POC.

Project 5:

Project Name Warner Bros
Client Marvin Pictures, US
Company CapGemini Pvt. Ltd. Bangalore
Tools Teradata DB, SAP BO 4.1 Webi, IDT, CMC, Query builder, HPSM ticketing tool
Role SAP BO Developer

Description:

The purpose of the project is tracking of DVD and comic sale worldwide. The Application will be used by End Users to analyze their sales Information and to help them in taking decision for their Business Growth.

Sales reports in webi were based on universe. Teradata tables were source to universe.

Worked as shared resource for CMC activities and webi/universe issues tickets.

Roles & Responsibilities:

- â¢ Working as a team member to understand the Business Requirements.
- â¢ Performed CMC activities like user & user group creation, providing access to objects and folders. Created folders for reports, connection, universes and provided user security, connection pointing to universe.
- â¢ Worked on issue related to connection, universe objects and webi reports enhancements.
- â¢ Raised OSS messages to SAP to seek solution related to BO tool and limitations.
- â¢ Worked on webi report, universe defects and enhancements.
- â¢ Meeting with users to understand issue, suggest best solution and ETA.
- â¢ Worked on query builder to find BO objects metadata for investigation.
- â¢ Created of BIAR format using promotion management.

Project 6:

Project Name Nordea

Client Nordea Bank, Sweden

Company CapGemini Pvt. Ltd. Bangalore

Environment SAP BO 4.1, IDT, Webi, Teradata

Role SAP BO Developer

Description:

The Project report Analytics for Nordea aims to provide clear analysis of personal, company accounts in bank around the world. In all regions reports have data related to users and their account type.

Webi reports based on universe based on Teradata DB financial tables.

This project mainly tracks firm's Sales with respect to different criteria's like customer wise sales for different categories. It helps various end Users to analyze their sales related information and to help in their business growth and make precise decisions.

Roles & Responsibilities:

- â¢ Involved in activities to understand the Business Requirements.
- â¢ Analyzing user requirements and finding the best possible ways of representing the data.
- â¢ Designing and developing interactive webi reports as per client's dynamic requirements.
- â¢ Developed webi reports having blocks, graphs and linked report with summary report.
- â¢ After development performing unit test activities and presentation to users.
- â¢ Implementation of Business Object i.e. Webi from one Environment to another using BIAR File.
- â¢ Fixed issues in webi reports related to data and report formatting and made changes in report requested by users in MAT.
- â¢ Prepared RDD for reports and performed unit testing.
- â¢ Provided KT to users and supports teams.

SAP HANA Developer - Schlumberger

Skill Details

SAP HANA- Exprience - 60 months

SAP BO- Exprience - 36 months

Company Details

company - Schlumberger

description - Schlumberger is the world's leading provider of technology for reservoir characterization, drilling, production, and processing to the oil and gas industry. Working in more than 85 countries.

Role-SAP HANA Developer

Team Size: 12

Duration: Feb 2017 to Till Date

Responsibilities:

Working on Suit on HANA and Native HANA Systems.
Working on end to end implementation for Release 2.3 and 2.4.
Developing HANA Information Models Calculation Views, Table Functions, Procedures.
Actively involved in cutover activities, Dry Runs Production Go live and Post Production Go Live and resolving issues.

Worked on HANA functionalities like Currency Conversions and analyzing the Planviz for performance related issues etc.

Worked on to bring the Tables in SAP HANA Landing zone using SDA.

Working on to resolve the performance issues in HANA views by applying filter, joins etc.

Interacting with the Business and functional team members, based on the discussion Creating Design Documents, Technical Specification and Test Documents.

Successfully implemented the Release 2.2 and 2.3 for US, Ecuador and Canada.

Successfully completed the Self-service project for Finance Domain and created Reports in Analysis of office.

Working on to create the Power BI Reports.

Working on to resolve production defects and Incidents by using HPALM and Remedy Tools.

Working on to resolve the issues in an existing HANA Views.

Working on to promote the Objects in different environment by using Charm/Solomon.

Working on to enhance the performance of the HANA views by using PLANVIZ.

Worked on to create the BO Reports for Vendor Master.

2. Aero Space Design/Honeywell company - Fujitsu Consulting India

description - Responsibilities:

â€¢ HANA Data Model Development and Modification of Existing Models.

â€¢ Providing estimation to create the data model based on business Request.

â€¢ Creating Views- Attribute, Analytical and Calculation Views base on business requirement â€¢ Creation of Design document and Technical design document.

â€¢ Brought the data into HANA Landing zone using SLT and SDA.

â€¢ Handled complex performance issues.

â€¢ Worked SAP Landscape transformation for data replication from source DB to HANA DB â€¢ Solved SIT tickets on HANA Information Model.

â€¢ Developing HANA Information Models Calculation Views, Table Functions, Procedures.

â€¢ Modifying existing models to include tables, columns etc. necessary to complete the requirement.

â€¢ Configuring business objects to fetch data from HANA.

â€¢ Editing, Modifying exiting reports to fetch data from HANA as per the requirement.

3. Mc Donald

Company- Fujitsu Consulting India

Client- MC Donald

Role-SAP BO Developer

Team Size: 3

Duration: July2013to June2014

Responsibilities:

â€¢ Providing estimation to create the Universe and Webi Reports based on business request.

â€¢ Worked on creating the Universes on top of SAP HANA and BW Resources.

â€¢ Worked on creating the Complex Reports in webi.

â€¢ Worked on providing the Row level and Folder level security.

â€¢ Worked on Scheduling the Reports.

Actively involved in cutover activities, Dry Runs Production Go live and Post Production Go Live and resolving issues.

Worked on HANA functionalities like Currency Conversions and analyzing the Planviz for performance related issues etc.

Worked on to bring the Tables in SAP HANA Landing zone using SDA.

Working on to resolve the performance issues in HANA views by applying filter, joins etc.

Interacting with the Business and functional team members, based on the discussion Creating Design Documents, Technical Specification and Test Documents.

Successfully implemented the Release 2.2 and 2.3 for US, Ecuador and Canada.

Successfully completed the Self-service project for Finance Domain and created Reports in Analysis of office.

Working on to create the Power BI Reports.

Working on to resolve production defects and Incidents by using HPALM and Remedy Tools.

Working on to resolve the issues in an existing HANA Views.

Working on to promote the Objects in different environment by using Charm/Solomon.

Working on to enhance the performance of the HANA views by using PLANVIZ.

Worked on to create the BO Reports for Vendor Master.

2. Aero Space Design/Honeywell

company - Fujitsu Consulting India

description - Responsibilities:

â€¢ HANA Data Model Development and Modification of Existing Models.

â€¢ Providing estimation to create the data model based on business Request.

â€¢ Creating Views- Attribute, Analytical and Calculation Views base on business requirement â€¢ Creation of Design document and Technical design document.

â€¢ Brought the data into HANA Landing zone using SLT and SDA.

â€¢ Handled complex performance issues.

â€¢ Worked SAP Landscape transformation for data replication from source DB to HANA DB â€¢ Solved SIT tickets on HANA Information Model.

â€¢ Developing HANA Information Models Calculation Views, Table Functions, Procedures.

â€¢ Modifying existing models to include tables, columns etc. necessary to complete the requirement.

â€¢ Configuring business objects to fetch data from HANA.

â€¢ Editing, Modifying exiting reports to fetch data from HANA as per the requirement.

3. Mc Donald

Company- Fujitsu Consulting India

Client- MC Donald

Role-SAP BO Developer

Team Size: 3

Duration: July2013to June2014

Responsibilities:

â€¢ Providing estimation to create the Universe and Webi Reports based on business request.

â€¢ Worked on creating the Universes on top of SAP HANA and BW Resources.

â€¢ Worked on creating the Complex Reports in webi.

â€¢ Worked on providing the Row level and Folder level security.

â€¢ Worked on Scheduling the Reports.

Software Testing & Automation Engineer - Tech Mahindra

Skill Details

Company Details

company - Tech Mahindra

description - India

Duration Oct 2017- Till Date

Project Description

BT Group plc (trading as BT and formerly British Telecom) is a British multinational telecommunications holding company with head offices in London, United Kingdom. I worked for Air Logistics Program under the banner of British Telecom. This project handles all the web applications to carry out the whole logistics operation over United Kingdom through various airlines.

Roles & Responsibilities

- â€¢ Design and develop framework for the Test scenarios and Test cases.

- â€¢ Developing automation test scripts on the existing application
- â€¢ Executing Test Cases for every new release..

- â€¢ Involved in running test cases and logging defects through the HPQC tool.

- â€¢ Involved in formulating test Summary Report.

- â€¢ Conduct Internal Test Case Peer Reviews.

- â€¢ Participated in Daily Scrum Meetings.

- â€¢ Participated in weekly status meetings with the team, developers to discuss open issues and communicating with onsite team.

company - Tech Mahindra Pvt. Ltd Pune, Tech Mahindra

description - is an Indian multinational company with around 115, 000 Employees spread across 90 countries globally.

Total Experience: 2 Years 7 Months

Automation and Electrical engineer

Automation and Electrical Engineer - SMEC AUTOMATION PVT. LTD
Skill Details

Company Details

company - SMEC AUTOMATION PVT. LTD

description --18, Supply, installation, testing and commissioning of water level sensor and valve actuators for water tanks at BARC hospital Anushaktinagar, Trombay and BARC facility at Kalyan.

â¢ Implemented of academy projects like Automatically tank filling with relay and float sensor level control, bottle filling on conveyor belt motion, and waste material crashing then separated on conveyor belt motion with PLC controlling.

Role of Automation and Instrumentation Engineer (Marine and Industrial Automation):

- â¢ Re-calibration of field Instruments like control valve actuators, sensors and transmitters for pneumatic and electrical.
- â¢ Research and developing on new automated system.
- â¢ Level, flow and temperature process control with PID of various brands (Nippon, Selec etc.)
- â¢ PLC panel wiring, DOL and Star delta control wiring of 3 phase induction motor.
- â¢ Panel testing IP knowledge.
- â¢ Control Panel quality check and assurance.
- â¢ Electrical Single Line Diagram (SLD) and power wiring diagram.

Internship experience:

company - SMEC AUTOMATION PVT. LTD

description - Company Profile

SMEC Automation provides specialized technical consulting services and custom engineered products to the marine, energy and offshore industries applying advanced methods and technologies. SMEC Automation is one of India's leading manufacturers of automation and monitoring equipment for ocean-going vessels especially in Marine Boiler and Main Engine Control, IGG (Inert Gas Generator) and Alarm System.

Project:

company - SMEC AUTOMATION PVT. LTD

description - Completed Internship of Instrumentation and Calibrations in SMEC Automation Pvt. Ltd. for 6 months duration from 8th June 2016 to 30th November 2016.

TECHNICAL QUALIFICATION:

- â¢ Underwent Post Graduate Diploma in Industrial Calibration and Instrumentation and Post Graduate Diploma in Industrial Automation in duration of 3 months each with hands on practical exposure to Industrial Automation Tools like PLC, PAC, SCADA, HMI, INTERFACING, DRIVES, MCC PANEL and VFD.
- â¢ Successful in the examination as Post Graduation Diploma in Industrial Automation and Post Graduation Diploma in Industrial Instrumentation with TUV Rheinland Certified Qualification on 07-11-2016.

TECHNICAL SKILLS:

- â¢ Calculation and selection of cable, switchgear and protection.
- â¢ Expertise in PLC Hardware like AB, Schneider, Siemens, Omron, Delta, ABB and GE-Fanuc. Knowledge on control relay logic and ladder logic.
- â¢ Having good knowledge in designing and interfacing PLC with SCADA such as Intouch, Vijeo-Citect, WinCC, iFix and Factory TalkView. Real time data acquisition from OPC (Kepware), HMI & interfacing.
- â¢ Handling VFD for motor control (Schneider-Electric ALTIVAR 28 Series)
- â¢ Calibration of Pressure gauge, Temperature gauge, Control Valve, Level or Flow measurements and control, Druck Injector, Smart DP transmitter using HART COMMUNICATOR. Piping and Instrumentation Diagram, Hand Tools, Tubes and Pipe fitting, Cable and Cable Glanding.
- â¢ Have basic knowledge of "HONEYWELL DCS C-300" and its programming.
- â¢ Completed 5 days Robotic workshop (KUKA KR 16) at Atharva College of Engineering.
- â¢ Training of 2 weeks at RK Electricals.

COMPUTER SKILLS:

- â¢ Electrical designing software: basic AutoCAD and EPLAN.
- â¢ PLC Software: Rockwell, Twido-suite, Step7-Microwin SP2, Unity Pro XL, CX-Programmer, WPL Software, Codesys and Versa Pro. Designing software: Wonderware, CitectScada7.4, Proficy HMI SCADA/iFIX and FactoryTalk View.
- â¢ Successfully completed Spoken Tutorial program on "C", "C++" and "JAVA" Programming individually conducted by IIT-BOMBAY.
- â¢ Completed 5 days basic course for "Basic Of Mac OS" at Atharva College of Engineering. Completed Python Workshop conducted by CodeStrike of 1 day in '15 at Atharva College of Engineering.
- â¢ Operating System: Windows, Mac.

TECHNICAL SKILLS Automation Testing â¢ Selenium WebDriver, TestNG.
Testing Framework â¢ TestNG, Data Driven, Page Object model.
Applications & Tools â¢ Eclipse, Postman Building Tool Version Control
Continuous Integration â¢ Maven â¢ SVN â¢ Jenkins Database â¢ SQL
Languages â¢ SQL, Java, C++ Scripting Languages â¢ HTML, JavaScript
Operating System â¢ Windows Domain â¢ Insurance, ERP, E-Commerce

PROJECTS
Project #1
Project SWB-EBS_Support
Role Java Developer
Description
Inventory Operation System provides with a way to manage the inventories which are conducted on a day to day basis. It is used by account owners and district offices to manage their inventory cycles, plan their events, schedule their stores and people, enter employee time sheets and approve customer invoicing. In addition, it provides several tools which assist the users in completing a profitable inventory, while satisfying the needs of their customers.

Responsibilities

Environment

- â¢ Accounts/Customers/Stores
- â¢ Cycles
- â¢ Planning/Scheduling/Rescheduling/Splits
- â¢ Time Collection
- â¢ Invoicing
- â¢ Closing the week Use of bulk updates- bulk inserts. Updates to be performed based on primary

â¢ Java 1.6, Ice faces 1.8.2, Ibatis 2.0, Jboss Seam, EJB 2.0, HTML

Project #2
Project INTELLIGEN_FOR MOBILEAPP_DEV_KAUAPC
Role Java Developer
Description
Inventory Management for a retailer project is to develop Inventory Management System (IMS), accessible on Android, for retailers to track their outstanding inventory, cost of inventory, sales by day and thus empower retailer to better manage their business.

Responsibilities

- â¢ Cost of Inventory
- â¢ Inventory Management System
- â¢ Time Management
- â¢ Machine Learning Platforms

Environment â¢ Java 1.6, Core Java 6.0, JSF 2.0, Rich Faces 4.1, Spring 3.2, Restful Web service using Jersey API

Project #3
Project Loan LeLo Automation
Role Software Test Engineer
Description
Loan LeLo Offers for the selected loan from multiple banks. Customer can select particular loan offer and will have to fill the details in the form and will get registered. Email will be sent to his registered email id with login id and password.

Responsibilities

- â¢ Development of Page Object Model Framework for Automation Testing.
- â¢ Development of Automation Test Script using Selenium WebDriver & TestNG in JAVA.
- â¢ Execution of Selenium Test cases and Reporting defects.
- â¢ Debugging & Executing Automation test script using Selenium Web Driver.
- â¢ Involved in Functional & Regression Testing.
- â¢ Worked on Jenkins for Continuous Integration Requirements.
- â¢ Reviewed Test Reports and Prepared Summary Reports.

Environment â¢ Selenium Web Driver, Java, Eclipse, TestNG, SQL

Project #4

Project DDSM Automation

Role Software Test Engineer

Description

The objective of this project is to automate a system for ZZ server. ZZ server that is Data Divider team has a manual system to enter a customer details & its user details. DDSM system have multiple roles. Each role have set of permissions.

Responsibilities

- â¢ Responsible for Integration Testing, Functional Testing, System Testing.
- â¢ Creating automation test cases for existing POM Framework using Selenium Web Driver.
- â¢ Enhanced Test cases using Java programming features and TestNG Annotations.
- â¢ Debugging & Executing Automation test script using Selenium Web Driver.
- â¢ Followed Data driven approach: Reading the data from Excel file
- â¢ Worked on Jenkins for Continuous Integration (CI) Requirements.
- â¢ Involved in Regression Testing, API Testing.
- â¢ Preparation of weekly and monthly status reports.

Automation Testing

Environment â¢ Selenium Web Driver, Java, Eclipse, HTML, TestNG, SQL, B Postman
SKILLS Agile Methodology Scrum, Kanban, Extreme Programming(XP), Test-driven development (TDD) and Feature Driven development(FDD)

Company Details

company - Leading Industrial Automation

description - Responsibilities:

- â¢ Test Rockwell Automation embedded systems such as Logix Designer, Factory Talk, RSLinx Classic, Control Flash, Compare Tool, I/O modules and Profiles.

- â¢ Coordinate with Onsite and Offshore QA leads to design and develop test strategy and test plan.

- â¢ Document test plan and test cases base on product Requirement Document and functional specification. Discussed and explained the requirement to QA team.

- â¢ Work in Scrum base Agile Methodology and Test Driven development environment with frequent changing requirements and lots of challenges.

- â¢ Document and Published Program Increment Objectives, Program Increment planning report, Feature Epics, Backlog and Stories.

- â¢ Conduct and Participated in Program Increment Planning, Backlog Grooming, Sprint Planning, Daily Stand Ups, Sprint Review and Retrospective.

â€¢ Perform Automation testing tasks such as Design, Create, Maintain, Execute and peer review test scripts using Test Automation Framework(TAF)

â€¢ Develop and Execute System integration and GUI integration test using C++.

â€¢ Interact with Business Analysts and Software Developers for bug review and participated in QA meetings.

â€¢ Work closely with development and engineering department to ensure proper resolution of bugs.

â€¢ Proactively came up with innovative methods to improve software quality, test coverage, efficiency and regression coverage.

â€¢ Created and Maintained testing documents such as High Level Requirement, Test strategy report, Test plan, Test cases, Test execution results, Bug report, Quality Metrics, Traceability Matrix and Testing Summary Reports.

Environment: Logix Designer, Factory Talk, RSLinx Classic, ControlFlash, CompareTool, I/O modules, Profiles, Test Automation Framework(TAF), C++, Python, Selenium, Clear Case, Clear Quest, UFT, Collaborative Lifecycle Management, and Version-one.

company - GE-Healthcare

description - Responsibilities:

â€¢ Validated GE CT scanners based on FDA compliances and regulations.

â€¢ Interacted with Clinical experts, Business Analysts and Development architect for creation of test strategy and test plan.

â€¢ Coordinated with the Offshore QA and Onsite QA team to work on design and develop of test strategies and requirement traceability matrix.

â€¢ Designed, Created and executed manual test cases base on product requirement documents.

â€¢ Increased productivity by initiating use of automation tools like DICOM and QTP.

â€¢ Trained and guided GE team on automation test creation and execution using QTP.

â€¢ Performed testing types such as functional, integration, performance and regression and Provide test reports to management.

â€¢ Involved in release support, test bed creation & testing throughout release process.

Environment: Agile, Test-driven development (TDD), DICOM, HL7, Image reconstruction, Windows, Linux, SQL, C, Python, QTP, HTML, XML, QTP, VBScripts and QC

company - Patni-GE-Healthcare PACS

description - Responsibilities:

â€¢ Validated GE PACS application and tested web application defined for Administration, Authentication and Archiving of DICOM images.

â€¢ Involved in the creation of Automation framework by using Hybrid and BPT approach.

â€¢ Responsible for creation of Test Bed and Golden Data using DCMTK.

â€¢ Prepared the Test Scenarios, Test plan, Test cases and Automation Scripts for Integration, System and End-to-End testing on all applications.

â€¢ Designed and developed User defined and Generic functions with well-versed VB scripting.

â€¢ Descriptive programming in scripting dynamic objects and reusable actions in defining scenario flows in UFT/QTP.

â€¢ Reviewed the QTP Scripts developed by the team members.

â€¢ Supported the QA/SIT and Regression testing team for environmental issues and Interact with other downstream environment system team for the clarifications.

Environment: Agile, Test-driven development (TDD), GE PACS, DICOM, HL7, Image reconstruction, Image Construction, Windows, Linux, SQL, C, Python, Selenium, QTP, HTML, XML, QTP, JavaScript, VBScripts and QC

company - HDFC Bank Limited

description - Responsibilities:

â€¢ Reviewed Business requirements, design documents and prepared test cases for assigned project releases.

â€¢ Performed testing types such as API, functional, integration, System, performance, regression, security and network. Provide test reports to management.

â€¢ Involved in integration testing for release of new functionality.

â€¢ Testing critical bug's fixes and co-ordinate with developer in fixing these critical bugs.

â€¢ Involved in backend database testing in oracle and Microsoft SQL.

â€¢ Involved in release support, test bed setup & testing throughout release process.

â€¢ Automation of test flow's using automated tools QTP 10.

Environment: Windows, Linux, SQL, C, Python, QTP, HTML, XML, QTP, JavaScript, VBScripts and QC

company - Vistaar Systems Limited

description - Responsibilities:

â€¢ Referred Business requirements documents, Use case documents and

Design documents provided by client and developer for creation of Manual and Automation test cases.

Involved in Analysis, Design, Creation, Execution and Debugging of automation scripts using automation tools like Rational Robot, QTP and Shell scripting.

Testing critical bug's fixes and co-ordinate with developer in fixing these critical bugs.

Involved in Installation of build, Maintaining test bed, Smoke and Sanitary testing, Regression testing, Performance testing and Database testing using Rational Robot, QTP and Shell scripting.

Environment: Windows, Linux, SQL, Rational Robot V2002 and QTP V 9.2. E

Technical Skills Summary I have completed "CORPORATE TRAINING in Manual and Automation Testing" at Source-Code Technology, Pune. Good knowledge in Functional Testing, Integration Testing and System Testing. Good Exposure in writing Functional and Integration Scenarios. Good understanding of writing of test cases including test case design technique.

Good understanding Build and release. Good knowledge on Ad hoc and smoke testing. Excellent understanding of usability, reliability and exploratory testing. Excellent knowledge of Globalization and Compatibility Testing. Excellent Understand of STLC. Good knowledge of regression and retesting. Excellent knowledge on Defect tracking and Defect Life Cycle. Good Knowledge on Test plan and Traceability Matrix. Internship Project Project Name: Resume Extractor Duration: 6 months Role: Manual And Automation Testing Environment: Jdbc, Servlets, Jsp, Technologies: Web based Application, MS Access2007 The project involved development of a web application. Resume extractor provides the technology to analyze mass volume of data to detect resume in data covered which company have into valuable information. This project is company site's based on recruitment process. Strengths Able to work in a team System and Operational Analysis Good Communication Skills Active learning and critical thinking Good interpersonal skills, willing to take challenges and more responsibilities. Ability to learn new technologies with minimal time period. Project & Contribution
Tech Mahindra

Project Title: Payment Gateway Jio Money
Role: Automation Tester
Responsibility: * Analyzing the manual test cases to create automation scripts.
* Working on Redwood tool for Automation.
* Maintained regression pack as per the project requirement.
* Performed API testing.
* Created Automation scripts for API testing.
* Enhancing framework to support cross functionality testing * Execute test cases and evaluate test results for both manual and automated testing.
* Maintaining the scripts as per the requirement.

- * Adding new automated tests to improve automated test coverage for both functional and regression.
- * Performed automation testing, analyzing test results, and report defect into the bug tracking system and drive issues to resolution.
- * Preparation of test data with different test conditions to ensure coverage of business rules.
- * Performed Sanity, Ad hoc and Regression testing.
- * Participated in defect triage meetings with developers to validate the severity of the bug and responsible for tracking of the bug life cycle.
- * Worked with development team to ensure testing issues are resolved.

Project Description

JIO MONEY- Jio Payment Gateway provides the Facility to Merchants and Users to enable to pay through the JIO MONEY. Features include:
Purchase, Bill Payment, load Money, short cash purchase, Pay to Merchant and Pay to User etc.

Inscripts

Project Title: CometChat
Role: Automation Tester
Responsibility:
Created automation framework with bug report using page object and data driven framework with automated email test scripts
Handling QA tickets, Coordinate with the development team

Project Description

CometChat is the chat solution for your site/app which will help you grow your customer base exponentially, drastically increase the time spent by users. The CometChat has several useful features like one on one chat, group chat, audio/video call, screen sharing, Games, real time chat translation, Mobile apps and desktop messenger.

Project Title: Web tracker

Role: Sr. Software Tester
Responsibility:
Creation Test Scenarios, Test Script and Test Case
Execution of Test Case
Ad-Hoc Manual Testing
Regression Testing
Automation Testing, Test Scripts using tools such as Selenium WebDriver 2.0

Project Description

Accomplishment Web Tracker aims to provide time sheet facility to its customers. Release contains the following features which are related to employee time tracking, task assignments, tracker submission, reminders, approvals & its notifications.

Hayaan InfoTech

Project Title: Real Estate Agent Website
Role: Sr. Software Tester
Responsibility:
Creation Test Scenarios and Test Case
Execution of Test Case
Smoke Testing
Black Box Testing
Ad-Hoc Manual Testing
Regression Testing

Project Description

This project has WEB page graphical HTML representation of a neighborhood made up of different types of houses and apartments. There are several sales people around the country, who are all responsible for selling the houses and apartments through Web Site. This Web Site help user to Purchase or Request for any Estate Property.

Project Title: E-commerce Website

Role: Software Tester
Responsibility:
Creation Test Scenarios and Test Case
Execution of Test Case
Ad-Hoc Manual Testing
Smoke Testing
Black Box Testing
Regression Testing

Project Description

This project includes Order Processing, Invoice Generated and Printing, Packaging Slip, Order Payment, Return material Authorization, Label Sheet Printing. The Order Processing of that application is very big. There are 3 main entities which are involved in the Order Processing Customer, Sales Person, and Admin.

Project Title: Enquiry to Invoice System

Role: Software Tester

Responsibility:

Creation Test Scenarios and Test Case

Execution of Test Case

Smoke Testing

Black Box Testing

Ad-Hoc Manual Testing

Regression Testing

Project Description

This application is browser-based application to reduce investment in hardware and software. The proposed system contains following module, which offers database management and reporting of various activity of company. This application comprise of following module Inquiry and Estimation, Quotation & Negotiation, Purchase Order System, Delivery System, MIS Reports.

company - Leading Industrial Automation

description - Responsibilities:

â€¢ Test Rockwell Automation embedded systems such as Logix Designer, Factory Talk, RSLinx Classic, Control Flash, Compare Tool, I/O modules and Profiles.

â€¢ Coordinate with Onsite and Offshore QA leads to design and develop test strategy and test plan.

â€¢ Document test plan and test cases base on product Requirement Document and functional specification. Discussed and explained the requirement to QA team.

â€¢ Work in Scrum base Agile Methodology and Test Driven development environment with frequent changing requirements and lots of challenges.

â€¢ Document and Published Program Increment Objectives, Program Increment planning report, Feature Epics, Backlog and Stories.

â€¢ Conduct and Participated in Program Increment Planning, Backlog Grooming, Sprint Planning, Daily Stand Ups, Sprint Review and Retrospective.

â€¢ Perform Automation testing tasks such as Design, Create, Maintain, Execute and peer review test scripts using Test Automation Framework(TAF)

â€¢ Develop and Execute System integration and GUI integration test using C++.

â€¢ Interact with Business Analysts and Software Developers for bug review and participated in QA meetings.

â€¢ Work closely with development and engineering department to ensure proper resolution of bugs.

â€¢ Proactively came up with innovative methods to improve software quality, test coverage, efficiency and regression coverage.

â€¢ Created and Maintained testing documents such as High Level Requirement, Test strategy report, Test plan, Test cases, Test execution results, Bug report, Quality Metrics, Traceability Matrix and Testing Summary Reports.

Environment: Logix Designer, Factory Talk, RSLinx Classic, ControlFlash, CompareTool, I/O modules, Profiles, Test Automation Framework(TAF), C++, Python, Selenium, Clear Case, Clear Quest, UFT, Collaborative Lifecycle Management, and Version-one.

company - GE-Healthcare

description - Responsibilities:

â€¢ Validated GE CT scanners based on FDA compliances and regulations.

â€¢ Interacted with Clinical experts, Business Analysts and Development architect for creation of test strategy and test plan.

â€¢ Coordinated with the Offshore QA and Onsite QA team to work on design and develop of test strategies and requirement traceability matrix.

â€¢ Designed, Created and executed manual test cases base on product requirement documents.

â€¢ Increased productivity by initiating use of automation tools like DICOM and QTP.

â€¢ Trained and guided GE team on automation test creation and execution using QTP.

â€¢ Performed testing types such as functional, integration, performance and regression and Provide test reports to management.

â€¢ Involved in release support, test bed creation & testing throughout release process.

Environment: Agile, Test-driven development (TDD), DICOM, HL7, Image reconstruction, Windows, Linux, SQL, C, Python, QTP, HTML, XML, QTP, VBScripts and QC

company - Patni-GE-Healthcare PACS

description - Responsibilities:

â€¢ Validated GE PACS application and tested web application defined for Administration, Authentication and Archiving of DICOM images.

â€¢ Involved in the creation of Automation framework by using Hybrid and BPT approach.

â€¢ Responsible for creation of Test Bed and Golden Data using DCMTK.

â€¢ Prepared the Test Scenarios, Test plan, Test cases and Automation Scripts for Integration, System and End-to-End testing on all applications.

â€¢ Designed and developed User defined and Generic functions with well-versed VB scripting.

â€¢ Descriptive programming in scripting dynamic objects and reusable

actions in defining scenario flows in UFT/QTP.

â¢ Reviewed the QTP Scripts developed by the team members.

â¢ Supported the QA/SIT and Regression testing team for environmental issues and Interact with other downstream environment system team for the clarifications.

Software Testing & Automation Engineer - Tech Mahindra

Skill Details

Company Details

company - Tech Mahindra

description - India

Duration Oct 2017- Till Date

Project Description

BT Group plc (trading as BT and formerly British Telecom) is a British multinational telecommunications holding company with head offices in London, United Kingdom. I worked for Air Logistics Program under the banner of British Telecom. This project handles all the web applications to carry out the whole logistics operation over United Kingdom through various airlines.

Roles & Responsibilities

- â€¢ Design and develop framework for the Test scenarios and Test cases.

- â€¢ Developing automation test scripts on the existing application
 - â€¢ Executing Test Cases for every new release..

- â€¢ Involved in running test cases and logging defects through the HPQC tool.

- â€¢ Involved in formulating test Summary Report.

- â€¢ Conduct Internal Test Case Peer Reviews.

- â€¢ Participated in Daily Scrum Meetings.

- â€¢ Participated in weekly status meetings with the team, developers to discuss open issues and communicating with onsite team.

company - Tech Mahindra Pvt. Ltd Pune, Tech Mahindra

description - is an Indian multinational company with around 115, 000 Employees spread across 90 countries globally.

Total Experience: 2 Years 7 Months

Organization Designation Duration

company - Tech Mahindra

description - Project Description

AT&T Inc. is an American multinational conglomerate holding company headquartered at Whitacre Tower in Downtown Dallas, Texas. During my serving as software engineer at AT&T, I have worked for CSI-CAM (Common Service Interface) team which is responsible for running of AT&T's centralised solution hub web application called myatt.com.

Roles & Responsibilities

- â€¢ Design, develop and maintaining Automation Test Scripts and Test cases using Selenium WebDriver and several desktop window automating tool such as Sikuli and AutoIT.

- â€¢ Executing Test Cases and check the working functionality of the existing application.

- â€¢ Involved in tracking/managing test life cycle and logging defects using JIRA and HPQC/ALM.

- â€¢ Involved in formulating test Summary Report.

- â€¢ Conduct Internal Test Case Peer Reviews.

- â€¢ Participated in Daily Scrum Meetings.

- â€¢ Participated in weekly status meetings with the team, developers to discuss open issues and communicating with onsite team.

Automation Testing
company - Tech Mahindra Pvt. Ltd Pune, Tech Mahindra

January 2011 to January 2016 Mumbai, Maharashtra MUMBAI UNIVERSITY

Bachelor of Electronics Engineering Electronics Engineering Mumbai, Maharashtra Atharva College of Engineering at Malad
Automation and Electrical engineer

Automation and Electrical Engineer - SMEC AUTOMATION PVT. LTD
Skill Details

Company Details

company - SMEC AUTOMATION PVT. LTD

description --18, Supply, installation, testing and commissioning of water level sensor and valve actuators for water tanks at BARC hospital Anushaktinagar, Trombay and BARC facility at Kalyan.

â¢ Implemented of academy projects like Automatically tank filling with relay and float sensor level control, bottle filling on conveyor belt motion, and waste material crashing then separated on conveyor belt motion with PLC controlling.

Role of Automation and Instrumentation Engineer (Marine and Industrial Automation):

- â¢ Re-calibration of field Instruments like control valve actuators, sensors and transmitters for pneumatic and electrical.
- â¢ Research and developing on new automated system.
- â¢ Level, flow and temperature process control with PID of various brands (Nippon, Selec etc.)
- â¢ PLC panel wiring, DOL and Star delta control wiring of 3 phase induction motor.
- â¢ Panel testing IP knowledge.
- â¢ Control Panel quality check and assurance.
- â¢ Electrical Single Line Diagram (SLD) and power wiring diagram.

Internship experience:

company - SMEC AUTOMATION PVT. LTD

description - Company Profile

SMEC Automation provides specialized technical consulting services and custom engineered products to the marine, energy and offshore industries applying advanced methods and technologies. SMEC Automation is one of India's leading manufacturers of automation and monitoring equipment for ocean-going vessels especially in Marine Boiler and Main Engine Control, IGG (Inert Gas Generator) and Alarm System.

Project:

company - SMEC AUTOMATION PVT. LTD

description - Completed Internship of Instrumentation and Calibrations in SMEC Automation Pvt. Ltd. for 6 months duration from 8th June 2016 to 30th November 2016.

TECHNICAL QUALIFICATION:

- â¢ Underwent Post Graduate Diploma in Industrial Calibration and Instrumentation and Post Graduate Diploma in Industrial Automation in duration of 3 months each with hands on practical exposure to Industrial Automation Tools like PLC, PAC, SCADA, HMI, INTERFACING, DRIVES, MCC PANEL and VFD.
- â¢ Successful in the examination as Post Graduation Diploma in Industrial Automation and Post Graduation Diploma in Industrial Instrumentation with TUV Rheinland Certified Qualification on 07-11-2016.

TECHNICAL SKILLS:

- â¢ Calculation and selection of cable, switchgear and protection.
- â¢ Expertise in PLC Hardware like AB, Schneider, Siemens, Omron, Delta, ABB and GE-Fanuc. Knowledge on control relay logic and ladder logic.
- â¢ Having good knowledge in designing and interfacing PLC with SCADA such as Intouch, Vijeo-Citect, WinCC, iFix and Factory TalkView. Real time data acquisition from OPC (Kepware), HMI & interfacing.
- â¢ Handling VFD for motor control (Schneider-Electric ALTIVAR 28 Series)
- â¢ Calibration of Pressure gauge, Temperature gauge, Control Valve, Level or Flow measurements and control, Druck Injector, Smart DP transmitter using HART COMMUNICATOR. Piping and Instrumentation Diagram, Hand Tools, Tubes and Pipe fitting, Cable and Cable Glanding.
- â¢ Have basic knowledge of "HONEYWELL DCS C-300" and its programming.
- â¢ Completed 5 days Robotic workshop (KUKA KR 16) at Atharva College of Engineering.
- â¢ Training of 2 weeks at RK Electricals.

COMPUTER SKILLS:

- â¢ Electrical designing software: basic AutoCAD and EPLAN.
- â¢ PLC Software: Rockwell, Twido-suite, Step7-Microwin SP2, Unity Pro XL, CX-Programmer, WPL Software, Codesys and Versa Pro. Designing software: Wonderware, CitectScada7.4, Proficy HMI SCADA/iFIX and FactoryTalk View.
- â¢ Successfully completed Spoken Tutorial program on "C", "C++" and "JAVA" Programming individually conducted by IIT-BOMBAY.
- â¢ Completed 5 days basic course for "Basic Of Mac OS" at Atharva College of Engineering. Completed Python Workshop conducted by CodeStrike of 1 day in '15 at Atharva College of Engineering.
- â¢ Operating System: Windows, Mac.

TECHNICAL SKILLS Automation Testing â¢ Selenium WebDriver, TestNG.
Testing Framework â¢ TestNG, Data Driven, Page Object model.
Applications & Tools â¢ Eclipse, Postman Building Tool Version Control
Continuous Integration â¢ Maven â¢ SVN â¢ Jenkins Database â¢ SQL
Languages â¢ SQL, Java, C++ Scripting Languages â¢ HTML, JavaScript
Operating System â¢ Windows Domain â¢ Insurance, ERP, E-Commerce

description -
company - Phoenix Microsystem Pvt.Ltd.
description - Organization Role
Phoenix Microsystems Pvt.Ltd. Jr. Java Developer

PROJECTS
Project #1
Project SWB-EBS_Support
Role Java Developer
Description
Inventory Operation System provides with a way to manage the inventories which are conducted on a day to day basis. It is used by account owners and district offices to manage their inventory cycles, plan their events, schedule their stores and people, enter employee time sheets and approve customer invoicing. In addition, it provides several tools which assist the users in completing a profitable inventory, while satisfying the needs of their customers.

Responsibilities
Environment
â¢ Accounts/Customers/Stores
â¢ Cycles
â¢ Planning/Scheduling/Rescheduling/Splits
â¢ Time Collection
â¢ Invoicing
â¢ Closing the week Use of bulk updates- bulk inserts. Updates to be performed based on primary
â¢ Java 1.6, Ice faces 1.8.2, Ibatis 2.0, Jboss Seam, EJB 2.0, HTML

Project #2
Project INTELLIGEN_FOR MOBILEAPP_DEV_KAUAPC
Role Java Developer
Description
Inventory Management for a retailer project is to develop Inventory Management System (IMS), accessible on Android, for retailers to track their outstanding inventory, cost of inventory, sales by day and thus empower retailer to better manage their business.

Responsibilities
â¢ Cost of Inventory
â¢ Inventory Management System
â¢ Time Management
â¢ Machine Learning Platforms
Environment â¢ Java 1.6, Core Java 6.0, JSF 2.0, Rich Faces 4.1, Spring 3.2, Restful Web service using Jersey API

Project #3
Project Loan LeLo Automation
Role Software Test Engineer
Description
Loan LeLo Offers for the selected loan from multiple banks. Customer can select particular loan offer and will have to fill the details in the form and will get registered. Email will be sent to his registered email id with login id and password.

Responsibilities

- â¢ Development of Page Object Model Framework for Automation Testing.
- â¢ Development of Automation Test Script using Selenium WebDriver & TestNG in JAVA.
- â¢ Execution of Selenium Test cases and Reporting defects.
- â¢ Debugging & Executing Automation test script using Selenium Web Driver.
- â¢ Involved in Functional & Regression Testing.
- â¢ Worked on Jenkins for Continuous Integration Requirements.
- â¢ Reviewed Test Reports and Prepared Summary Reports.

Environment â¢ Selenium Web Driver, Java, Eclipse, TestNG, SQL

Project #4

Project DDSM Automation

Role Software Test Engineer

Description

The objective of this project is to automate a system for ZZ server. ZZ server that is Data Divider team has a manual system to enter a customer details & its user details. DDSM system have multiple roles. Each role have set of permissions.

Responsibilities

- â¢ Responsible for Integration Testing, Functional Testing, System Testing.
- â¢ Creating automation test cases for existing POM Framework using Selenium Web Driver.
- â¢ Enhanced Test cases using Java programming features and TestNG Annotations.
- â¢ Debugging & Executing Automation test script using Selenium Web Driver.
- â¢ Followed Data driven approach: Reading the data from Excel file
- â¢ Worked on Jenkins for Continuous Integration (CI) Requirements.
- â¢ Involved in Regression Testing, API Testing.
- â¢ Preparation of weekly and monthly status reports.

Automation Environment â¢ Selenium Web Driver, Java, Eclipse, HTML, TestNG, SQL, Testing Postman D

description - Responsibilities:

- â¢ Test Rockwell Automation embedded systems such as Logix Designer, Factory Talk, RSLinx Classic, Control Flash, Compare Tool, I/O modules and Profiles.

â¢ Coordinate with Onsite and Offshore QA leads to design and develop test strategy and test plan.

â¢ Document test plan and test cases base on product Requirement Document and functional specification. Discussed and explained the requirement to QA team.

â¢ Work in Scrum base Agile Methodology and Test Driven development environment with frequent changing requirements and lots of challenges.

â¢ Document and Published Program Increment Objectives, Program Increment planning report, Feature Epics, Backlog and Stories.

â¢ Conduct and Participated in Program Increment Planning, Backlog Grooming, Sprint Planning, Daily Stand Ups, Sprint Review and

Retrospective.

- â¢ Perform Automation testing tasks such as Design, Create, Maintain, Execute and peer review test scripts using Test Automation Framework(TAF)
- â¢ Develop and Execute System integration and GUI integration test using C++.
- â¢ Interact with Business Analysts and Software Developers for bug review and participated in QA meetings.
- â¢ Work closely with development and engineering department to ensure proper resolution of bugs.

â¢ Proactively came up with innovative methods to improve software quality, test coverage, efficiency and regression coverage.

â¢ Created and Maintained testing documents such as High Level Requirement, Test strategy report, Test plan, Test cases, Test execution results, Bug report, Quality Metrics, Traceability Matrix and Testing Summary Reports.

Environment: Logix Designer, Factory Talk, RSLinx Classic, ControlFlash, CompareTool, I/O modules, Profiles, Test Automation Framework(TAF), C++, Python, Selenium, Clear Case, Clear Quest, UFT, Collaborative Lifecycle Management, and Version-one.

company - GE-Healthcare

description - Responsibilities:

â¢ Validated GE CT scanners based on FDA compliances and regulations.

â¢ Interacted with Clinical experts, Business Analysts and Development architect for creation of test strategy and test plan.

â¢ Coordinated with the Offshore QA and Onsite QA team to work on design and develop of test strategies and requirement traceability matrix.

â¢ Designed, Created and executed manual test cases base on product requirement documents.

â¢ Increased productivity by initiating use of automation tools like DICOM and QTP.

â¢ Trained and guided GE team on automation test creation and execution using QTP.

â¢ Performed testing types such as functional, integration, performance and regression and Provide test reports to management.

â¢ Involved in release support, test bed creation & testing throughout release process.

Environment: Agile, Test-driven development (TDD), DICOM, HL7, Image reconstruction, Windows, Linux, SQL, C, Python, QTP, HTML, XML, QTP, VBScripts and QC

company - Patni-GE-Healthcare PACS

description - Responsibilities:

â¢ Validated GE PACS application and tested web application defined for Administration, Authentication and Archiving of DICOM images.

â¢ Involved in the creation of Automation framework by using Hybrid and BPT approach.

â¢ Responsible for creation of Test Bed and Golden Data using DCMTK.

â¢ Prepared the Test Scenarios, Test plan, Test cases and Automation Scripts for Integration, System and End-to-End testing on all applications.

â¢ Designed and developed User defined and Generic functions with well-versed VB scripting.

â¢ Descriptive programming in scripting dynamic objects and reusable actions in defining scenario flows in UFT/QTP.

â¢ Reviewed the QTP Scripts developed by the team members.

â¢ Supported the QA/SIT and Regression testing team for environmental issues and Interact with other downstream environment system team for the clarifications.

Environment: Agile, Test-driven development (TDD), GE PACS, DICOM, HL7, Image reconstruction, Image Construction, Windows, Linux, SQL, C, Python, Selenium, QTP, HTML, XML, QTP, JavaScript, VBScripts and QC

company - HDFC Bank Limited

description - Responsibilities:

â¢ Reviewed Business requirements, design documents and prepared test cases for assigned project releases.

â¢ Performed testing types such as API, functional, integration, System, performance, regression, security and network. Provide test reports to management.

â¢ Involved in integration testing for release of new functionality.

â¢ Testing critical bug's fixes and co-ordinate with developer in fixing these critical bugs.

â¢ Involved in backend database testing in oracle and Microsoft SQL.

â¢ Involved in release support, test bed setup & testing throughout release process.

â¢ Automation of test flow's using automated tools QTP 10.

Environment: Windows, Linux, SQL, C, Python, QTP, HTML, XML, QTP, JavaScript, VBScripts and QC

company - Vistaar Systems Limited

description - Responsibilities:

â€¢ Referred Business requirements documents, Use case documents and Design documents provided by client and developer for creation of Manual and Automation test cases.

â€¢ Involved in Analysis, Design, Creation, Execution and Debugging of automation scripts using automation tools like Rational Robot, QTP and Shell scripting.

â€¢ Testing critical bug's fixes and co-ordinate with developer in fixing these critical bugs.

â€¢ Involved in Installation of build, Maintaining test bed, Smoke and Sanitary testing, Regression testing, Performance testing and Database testing using Rational Robot, QTP and Shell scripting.

Automation Testing Environment: Windows, Linux, SQL, Rational Robot V2002 and QTP V 9.2. F

Technical Skills Summary I have completed "CORPORATE TRAINING in Manual and Automation Testing" at Source-Code Technology, Pune. â€¢ Manual and Automation Testing â€¢ SELENIUM IDE, TestNG, SELENIUM Grid, JENKINS, Apache POI. â€¢ Good knowledge in SDLC. â€¢ Excellent understanding of White Box Testing and Black Box Testing. â€¢ Good knowledge in Functional Testing, Integration Testing and System Testing. â€¢ Good Exposure in writing Functional and Integration Scenarios. â€¢ Good understanding of writing of test cases including test case design technique.

â€¢ Good understanding Build and release. â€¢ Good knowledge on Ad hoc and smoke testing. â€¢ Excellent understanding of usability, reliability and exploratory testing. â€¢ Excellent knowledge of Globalization and Compatibility Testing. â€¢ Excellent Understand of STLC. â€¢ Good knowledge of regression and retesting. â€¢ Excellent knowledge on Defect tracking and Defect Life Cycle. â€¢ Good Knowledge on Test plan and Traceability Matrix. Internship Project Project Name: Resume Extractor Duration: 6 months Role: Manual And Automation Testing Environment: Jdbc, Servlets, Jsp, Technologies: Web based Application, MS Access2007 The project involved development of a web application. Resume extractor provides the technology to analyze mass volume of data to detect resume in data covered which company have into valuable information. This project is company site's based on recruitment process. Strengths â€¢ Able to work in a team â€¢ System and Operational Analysis â€¢ Good Communication Skills â€¢ Active learning and critical thinking â€¢ Good interpersonal skills, willing to take challenges and more responsibilities. â€¢ Ability to learn new technologies with minimal time period. Project & Contribution
Tech Mahindra

Project Title: Payment Gateway Jio Money
Role: Automation Tester
Responsibility: * Analyzing the manual test cases to create automation scripts.
* Working on Redwood tool for Automation.
* Maintained regression pack as per the project requirement.
* Performed API testing.
* Created Automation scripts for API testing.
* Enhancing framework to support cross functionality testing * Execute test cases and evaluate test results for both manual and automated testing.

- * Maintaining the scripts as per the requirement.
- * Adding new automated tests to improve automated test coverage for both functional and regression.
- * Performed automation testing, analyzing test results, and report defect into the bug tracking system and drive issues to resolution.
- * Preparation of test data with different test conditions to ensure coverage of business rules.
- * Performed Sanity, Ad hoc and Regression testing.
- * Participated in defect triage meetings with developers to validate the severity of the bug and responsible for tracking of the bug life cycle.
- * Worked with development team to ensure testing issues are resolved.

Project Description

JIO MONEY- Jio Payment Gateway provides the Facility to Merchants and Users to enable to pay through the JIO MONEY. Features include:
Purchase, Bill Payment, load Money, short cash purchase, Pay to Merchant and Pay to User etc.

Inscripts

Project Title: CometChat

Role: Automation Tester

Responsibility:

Created automation framework with bug report using page object and data driven framework with automated email test scripts
Handling QA tickets, Coordinate with the development team

Project Description

CometChat is the chat solution for your site/app which will help you grow your customer base exponentially, drastically increase the time spent by users. The CometChat has several useful features like one on one chat, group chat, audio/video call, screen sharing, Games, real time chat translation, Mobile apps and desktop messenger.

Project Title: Web tracker

Role: Sr. Software Tester

Responsibility:

Creation Test Scenarios, Test Script and Test Case

Execution of Test Case

Ad-Hoc Manual Testing

Regression Testing

Automation Testing, Test Scripts using tools such as Selenium WebDriver 2.0

Project Description

Accomplishment Web Tracker aims to provide time sheet facility to its customers. Release contains the following features which are related to employee time tracking, task assignments, tracker submission, reminders, approvals & its notifications.

Hayaan InfoTech

Project Title: Real Estate Agent Website

Role: Sr. Software Tester

Responsibility:

Creation Test Scenarios and Test Case

Execution of Test Case

Smoke Testing

Black Box Testing

Ad-Hoc Manual Testing

Regression Testing

Project Description

This project has WEB page graphical HTML representation of a neighborhood made up of different types of houses and apartments. There are several sales people around the country, who are all responsible for selling the houses and apartments through Web Site. This Web Site help user to Purchase or Request for any Estate Property.

Project Title: E-commerce Website

Role: Software Tester

Responsibility:

Creation Test Scenarios and Test Case

Execution of Test Case

Ad-Hoc Manual Testing

Smoke Testing

Black Box Testing

Regression Testing

Project Description

This project includes Order Processing, Invoice Generated and Printing, Packaging Slip, Order Payment, Return material Authorization, Label Sheet Printing. The Order Processing of that application is very big. There are 3 main entities which are involved in the Order Processing Customer, Sales Person, and Admin.

Project Title: Enquiry to Invoice System

Role: Software Tester

Responsibility:

Creation Test Scenarios and Test Case

Execution of Test Case

Smoke Testing

Black Box Testing

Ad-Hoc Manual Testing

Regression Testing

Project Description

This application is browser-based application to reduce investment in hardware and software. The proposed system contains following module, which offers database management and reporting of various activity of company. This application comprise of following module Inquiry and Estimation, Quotation & Negotiation, Purchase Order System, Delivery System, MIS Reports.

AUTOCAD- Experience - 74 months

ENTERPRISE RESOURCE PLANNING- Experience - 6 months

EPLAN- Experience - 6 months

Company - Osmoflo Engineering Services Pvt. Ltd.

Description - along with project management:

1) Preparation of Electrical Design Basis, Electrical Scope of work, Electrical Technical Specification, Electrical Data Sheet and Electrical Single Line Diagram (SLD) as per Project Standards.

2) Preparation and Review Electrical Drawings layouts like Hazardous Area Classification, Electrical Indoor and Outdoor Lighting Layout, Earthing and Lightning Protection Layout Drawing, Substation Equipment and Trench Layout Drawing Overall Cable Layout Drawing, Bill of Material (BOM) MR for Electrical Equipment and Cable Schedules.

3) Oil and Gas, Water Treatment Plant for Overseas customer at Australia.

Company - M/s VIVID ELECTROMECH PVT. LTD

Description - for Whole Pune region)

Period: 06th June 2017 to 20th Aug 2018.

Nature of Job - Electrical Sales / Marketing / Project Management of HT/LT

Panels, Bus Duct, Voltage Stabilizers for Residential / Commercial /

Industrial Projects:

1) Responsible for Sales and Marketing of all HT/LT Panels, Bus Duct, Voltage Stabilizer in whole Pune Region and overall project management of awarded orders.

2) Having Developed Big customer base in Pune region useful for business development of Residential/Commercial/Industrial Projects.

3) Technical design as well as Commercial Bidding, Negotiation meetings with Customers, Market survey.

4) Authorised Panel Builder for Schneider & System House for Ti Design of L & T.

Company - M/s ADOR WELDING LTD

Description - Period: 17th July 2012 to 30th May 2017.

Nature Of Job - Industrial Electrical Design along with project Operation management:

1) Prepare Electrical Design Basis, Electrical Scope of work, Electrical Technical Specification, Electrical Data Sheet and Electrical Single Line Diagram (SLD) as per Project Standards.

2) Prepare and Review Electrical Drawings layouts like Hazardous Area Classification, Electrical Indoor and Outdoor Lighting Layout, Earthing and Lightning Protection Layout Drawing, Substation Equipment and Trench Layout Drawing Overall Cable Layout Drawing, Bill of Material (BOM) MR for Electrical Equipment and Cable Schedules.

3) Conversant with AutoCAD with 5 years of exp., introductory knowledge of ETAP, with Excellent Verbal / Written Communication.

4) 4+ years of experience with applying NEC, IEC, CSA, IECEx, ATEX, UL, FM, NFPA, and API codes and standards to Electrical Engineering Design.

5) RCA, DFMEA, Part of Design Modification & Innovation Team.

6) Technical Quotation, Technical Query and Technical Bid Evaluation, Co-Ordinate with Clients / Vendors during the Projects.

7) Vendor Development Team lead, Review Vendor Documents, Factory Acceptance Test (FAT), Site Acceptance Test (SAT)

Responsibilities Handled:

1) Project Lead for YIBAL - Petroleum Development of OMAN's project.

Company - M/s PRAKASH INDUSTRIES LTD

Description - Period: 1st Sept 2011 to 6th May 2012.

Responsibilities Handled:

1) Operation & Maintenance of Various Electrical Drives (Related with CFBC Boiler as well as Turbine section)

2) Daily Operation & Routine Maintenance of 132kV AC Switch-yard.

Nature of Job:

1) Electrical Operation & Maintenance of 100 MW Power Plant.

2) Shift In-charge for 3 months

Electrical

Engineering

Certification Courses:

Certified Course in AutoCAD from CADD Centre, JM Road, Pune.

â€¢ Handling Activities in Project: -

â€¢ Preparing project schedules / plans, engineering designs / drawings and technical specifications as per clients' requirements.

â€¢ Review on Process P&ID's for Selection of Instrument to get Energy efficient process with Material Specifications. Approval & modifications of Electrical drawing as per requirement of Process Flow diagrams & General Electrical Standards.

â€¢ Carry out Automation Engineering which includes hardware and software specification, Generate control philosophy for process automation as per P&ID process. Necessary technical documentation, O&M manuals.

â€¢ Calculate the Estimation value of projects for price bidding with clients includes MCC & PLC panel, power & control cabling, trays & earthing material Etc.

â€¢ Selection of Electrical Switchgear for HT, LT, PCC, MCC, APFC Panels, Power & Control cable, Motors, Protection & metering CT & PTs, ACBs, Earthing, lightning, Analog & Digital Instruments.

â€¢ Floating project enquiries & communicate with Vendors, Evaluate Vendor quotes for Technical Alignment.

â€¢ Generate Power distribution SLD drawings as per the load flow, General arrangement drawings for panels, Controllers logic diagrams, Developing of Cable route plan and schedules, Cable Tray layout on AutoCAD tool with detailing.

â€¢ Installation, Commissioning & Troubleshooting of MCC, PLC & LT panels, VFD Drives, Soft-Starters, Programming of Danfoss, Schnider, Vacon, Siemens, ABB Drives.

â€¢ Working experience on Siemens S7-300, 1200, 1500, Et-200S Series & Allen-Bradley RS-Logix5000 PLC.

â€¢ Installation, Calibration & Troubleshooting of field Instruments as Pressure & Temperature Transmitter, Pneumatic valves, Actuators, Modulating valves, Solenoid valve, flow meter & flow switches, Flow Transmitter, Level Transmitter etc. Carry out Loop testing as per control cable schedule, â€¢ Hands on experience in Troubleshooting, Engineering Services and Maintenance & Operation & managing of various electrical power system equipments. Supervising commissioning activities.

â€¢ Handling Mechanical Maintenance & Service activities in operating plant.

company - KISANVEER SUGARS PVT. LTD

description - Handling Activities: -

â€¢ With over 1.5 years of experience worked as Asst. Electrical Engineer from ERECTION FIELD across 22 MW Power Plant for Testing and Commissioning, Electrical Maintenance, Operation, and allied activities.

â€¢ Testing, Commissioning & installation of HT & LT panels, VFD drives & DC drives Panels.

â€¢ Scheduling and planning predictive, preventive maintenance for process plants, and root cause analysis including budgeting and cost control activities.

â€¢ Managing Overhauling and maintenance of LT Motors & DC Shunt Motors, Panel Switchgears, VFDs & soft starters, DG Set with AMF panel & Plant Lighting.

â€¢ Installation, commissioning & Maintenance of Power & Distribution Transformer, ACB, VCB, SF6 Breaker, CT & PT units, FCBC Panels, UPS,

â€¢ Protection system include Microprocessor based relay, Numerical relay with relay co-ordination.

â€¢ Monitoring plans/schedules to start maintenance activities & achieving targets and implementing maintenance systems During Shut down Time.

â€¢ Daily Power monitoring, calculations and reporting on monthly basis.

1) LIBS Braseries, Burkina Faso (Africa) Completed 2) Citrus Processing India, Nanded Completed 3) Carlsberg Group, Myanmar (Yangon) Completed 4) U.B (United Breweries), Mysore. Completed 5) U.B (United Breweries), Hyderabad. Completed 6) Haldiram Foods Pvt. Ltd. Nagpur Completed 7) Tetra-Pak India Pvt. Ltd. Amreli Completed 8) U.B (United Breweries), Rajasthan Completed

â€¢ Handling Activities in Project: -

â€¢ Preparing project schedules / plans, engineering designs / drawings and technical specifications as per clients' requirements.

â€¢ Review on Process P&ID's for Selection of Instrument to get Energy efficient process with Material Specifications. Approval & modifications of Electrical drawing as per requirement of Process Flow diagrams & General Electrical Standards.

â€¢ Carry out Automation Engineering which includes hardware and software specification, Generate control philosophy for process automation as per P&ID process. Necessary technical documentation, O&M manuals.

â€¢ Calculate the Estimation value of projects for price bidding with clients includes MCC & PLC panel, power & control cabling, trays & earthing material Etc.

â€¢ Selection of Electrical Switchgear for HT, LT, PCC, MCC, APFC Panels, Power & Control cable, Motors, Protection & metering CT & PTs, ACBs, Earthing, lightning, Analog & Digital Instruments.

â€¢ Floating project enquiries & communicate with Vendors, Evaluate Vendor quotes for Technical Alignment.

â€¢ Generate Power distribution SLD drawings as per the load flow, General arrangement drawings for panels, Controllers logic diagrams, Developing of Cable route plan and schedules, Cable Tray layout on AutoCAD tool with detailing.

â€¢ Installation, Commissioning & Troubleshooting of MCC, PLC & LT panels, VFD Drives, Soft-Starters, Programming of Danfoss, Schnider, Vacon, Siemens, ABB Drives.

â€¢ Working experience on Siemens S7-300, 1200, 1500, Et-200S Series & Allen-Bradley RS-Logix5000 PLC.

â€¢ Installation, Calibration & Troubleshooting of field Instruments as Pressure & Temperature Transmitter, Pneumatic valves, Actuators, Modulating valves, Solenoid valve, flow meter & flow switches, Flow Transmitter, Level Transmitter etc. Carry out Loop testing as per control cable schedule, â€¢ Hands on experience in Troubleshooting, Engineering Services and Maintenance & Operation & managing of various electrical power system equipments. Supervising commissioning activities.

â€¢ Handling Mechanical Maintenance & Service activities in operating plant.

company - KISANVEER SUGARS PVT. LTD

description - Handling Activities: -

â€¢ With over 1.5 years of experience worked as Asst. Electrical Engineer from ERECTION FIELD across 22 MW Power Plant for Testing and Commissioning, Electrical Maintenance, Operation, and allied activities.

â€¢ Testing, Commissioning & installation of HT & LT panels, VFD drives & DC drives Panels.

â€¢ Scheduling and planning predictive, preventive maintenance for process plants, and root cause analysis including budgeting and cost control activities.

â€¢ Managing Overhauling and maintenance of LT Motors & DC Shunt Motors, Panel Switchgears, VFDs & soft starters, DG Set with AMF panel & Plant Lighting.

â€¢ Installation, commissioning & Maintenance of Power & Distribution Transformer, ACB, VCB, SF6 Breaker, CT & PT units, FCBC Panels, UPS,

â€¢ Protection system include Microprocessor based relay, Numerical relay with relay co-ordination.

â€¢ Monitoring plans/schedules to start maintenance activities & achieving

Electrical targets and implementing maintenance systems During Shut down Time.

Engineeringâ€¢ Daily Power monitoring, calculations and reporting on monthly basis.

Electrical Engineer - R K ELECTRICAL PVT. LTD

Skill Details
Company Details
company - R K ELECTRICAL PVT. LTD
description - Experience:- 1 Year 3 Months

Troubleshooting and Maintenance of following Electrical Equipment:-
All Type of Maintenance of Utility.
Electrical and Mechanical Maintenance.
Two 625 KVA Diesel Generator Set (Kirloskar)
HT/LT Switchgear With Protection System Using Relays and Provision For Interlocking (C&S, Kirloskar)
Handling HT Vacuum & SF6 Circuit Breaker, Transformer Up to 5000 KVA, LT Air circuit Breaker 2000A
Maintenance of STP and WTP Plant.
Maintenance of Air Blower, Actuators, Soft Starter, EOT Crane, Mono Rail, Centrifugal or Vertical Pumps, Hydraulic Machine, Rolling Machine, Lath Machine, Drill Machine, AHU, HVAC, Chiller etc.
Basic knowledge of PLC/SCADA Operation.
Trouble shooting of Switchgear and Control Panel, Pump and Motor
Maintenance of UPS, Battery Charger and Battery Bank
Motor Testing Both HT & LT Up to 450 KW
Monitoring and Controlling the 110V Control Panel and Relays Panel
Involved in Fault Finding & Relay Resetting
Monitoring and Correcting Power Factor
Service and Maintenance of Up to 55 KW Submersible Pump
Maintenance of MCC and PCC Panel
Servicing of Motor and Associated Component and Motor Operated Valve
Problem Solving of Power Contactor, Auxiliary Contactor Relay, CT and PT
Effecting Preventive/Predictive Maintenance Schedules Equipment in Order to Increase the Uptime/ Reliability
Maintenance & Operation in Day to Day Activity
Operation, Preventive Maintenance, Day to Day Breakdown
Maintenance Conventional Maintaining of Log Book and Check List.
33/22kV Main Feeder & 22/11kV Distribution Line Maint. & H.T/L.T S/S Break Down Work.

ELECTRICAL SAFETY (Knowledge of Various Aspect of Safety & Its Application)
Requirement, Familiar With Various Safety Equipment and Tools
Lockout, Tag out of Electrical Switchgear During Work
Issue of Work Permit Line Clearance to Work on Electrical Distribution Network

AUTOCAD- Experience - 74 months

ENTERPRISE RESOURCE PLANNING- Experience - 6 months

EPLAN- Experience - 6 months

Company Details

company - Osmoflo Engineering Services Pvt. Ltd.

Description - along with project management:

1) Preparation of Electrical Design Basis, Electrical Scope of work, Electrical Technical Specification, Electrical Data Sheet and Electrical Single Line Diagram (SLD) as per Project Standards.

2) Preparation and Review Electrical Drawings layouts like Hazardous Area Classification, Electrical Indoor and Outdoor Lighting Layout, Earthing and Lightning Protection Layout Drawing, Substation Equipment and Trench Layout Drawing Overall Cable Layout Drawing, Bill of Material (BOM) MR for Electrical Equipment and Cable Schedules.

3) Oil and Gas, Water Treatment Plant for Overseas customer at Australia.

Company - M/s VIVID ELECTROMECH PVT. LTD

Description - for Whole Pune region)

Period: 06th June 2017 to 20th Aug 2018.

Nature of Job - Electrical Sales / Marketing / Project Management of HT/LT Panels, Bus Duct, Voltage Stabilizers for Residential / Commercial / Industrial Projects:

1) Responsible for Sales and Marketing of all HT/LT Panels, Bus Duct, Voltage Stabilizer in whole Pune Region and overall project management of awarded orders.

2) Having Developed Big customer base in Pune region useful for business development of Residential/Commercial/Industrial Projects.

3) Technical design as well as Commercial Bidding, Negotiation meetings with Customers, Market survey.

4) Authorised Panel Builder for Schneider & System House for Ti Design of L & T.

Company - M/s ADOR WELDING LTD

Description - Period: 17th July 2012 to 30th May 2017.

Nature Of Job - Industrial Electrical Design along with project Operation management:

1) Prepare Electrical Design Basis, Electrical Scope of work, Electrical Technical Specification, Electrical Data Sheet and Electrical Single Line Diagram (SLD) as per Project Standards.

2) Prepare and Review Electrical Drawings layouts like Hazardous Area Classification, Electrical Indoor and Outdoor Lighting Layout, Earthing and Lightning Protection Layout Drawing, Substation Equipment and Trench Layout Drawing Overall Cable Layout Drawing, Bill of Material (BOM) MR for Electrical Equipment and Cable Schedules.

3) Conversant with AutoCAD with 5 years of exp., introductory knowledge of ETAP, with Excellent Verbal / Written Communication.

4) 4+ years of experience with applying NEC, IEC, CSA, IECEX, ATEX, UL, FM, NFPA, and API codes and standards to Electrical Engineering Design.

5) RCA, DFMEA, Part of Design Modification & Innovation Team.

6) Technical Quotation, Technical Query and Technical Bid Evaluation, Co-Ordinate with Clients / Vendors during the Projects.

7) Vendor Development Team lead, Review Vendor Documents, Factory Acceptance Test (FAT), Site Acceptance Test (SAT)

Responsibilities Handled:

1) Project Lead for YIBAL - Petroleum Development of OMAN's project.

Company - M/s PRAKASH INDUSTRIES LTD

Description - Period: 1st Sept 2011 to 6th May 2012.

Responsibilities Handled:

1) Operation & Maintenance of Various Electrical Drives (Related with CFBC Boiler as well as Turbine section)

2) Daily Operation & Routine Maintenance of 132kV AC Switch-yard.

Nature of Job:

1) Electrical Operation & Maintenance of 100 MW Power Plant.
2) Shift In-charge for 3 months
Electrical Engineering Certification Courses:
Certified Course in AutoCAD from CADD Centre, JM Road, Pune.

Operations Manager

Operations Manager

Skill Details

Operations Management- Experience - Less than 1 year months

Company Details

company - BNY Mellon International Operations (India) Pvt. Ltd

description - Organization: BNY Mellon International Operations (India) Pvt.

Ltd.: Sept 2009- till date

BNY Mellon provides a broad range of products and services in the areas of Investment Management, Investment Services and Treasury Services. Our customers are institutions, corporations, and high-net-worth individuals, as well as consultants and advisors who work with them.

Line of Business (LOB): Revenue & Billing Services (R&BS)

Revenue and Billing Services is a Global Center of Excellence that generates invoices and collects fee revenue from Investment Services clients. 218 staff across five locations (Brooklyn, Pittsburgh, Syracuse, Pune, and UK) . Various Businesses supported are Asset Servicing, Corporate Trust, Treasury Services, Broker Dealer Services and Global Collateral Management.

Support U.S., EMEA, and APAC. Regions.

Job Profile: Operations Manager - BNY Mellon International Operations (India) Pvt. Ltd.

Responsible for daily operations of the Billing Department providing services to institutional clients globally. Led a team of professionals responsible for accurate and timely Account setups and Invoice Production on the Billing platforms like Advantage (Fiserv.) & FiRRe (SunGard) . Tasked with improving service, quality and reducing the overall unbilled revenue.

Provide guidance to staff in their professional development plans by facilitating appropriate coaching and feedback.

Other responsibilities include but not limited to audit, business resumption planning, evaluating emerging technologies, fee contract reviews and negotiations with vendors, human resources, hiring, performance management, employee personal development, rewards & recognition programs, and defining the strategic direction of the business unit.

Operations / Service Delivery Management

- â¢ Monitor Client KYC's and Compliance monitoring for Institutional clients.
- â¢ Manage support and train the team in the drafting and reviewing of standard operating procedures to ensure compliance with US and Global regulations for Billing.

- â¢ Assist clients with contract reviews and negotiations.

- â¢ Monitor, analyze and draft metrics reports on a weekly/monthly basis to track progress of compliance efforts to senior management.

- â¢ Coordinate with internal stake holders and draft responses to escalated enquiries and client requests.

- â¢ Participate in the Risk and Control Self Assessments (RCSA) concurrence meetings for the LOB.

- â¢ Form the first Line of Defense as Operations and take accountability for any Operational Risk Events (ORE's)

- â¢ Perform root cause analysis of issues and document them accordingly for incident reporting.

- â¢ Ensure service delivery standards are always met. (Green- SLA/TAT)

- â¢ Monitor employee productivity/efficiency and performance management.

- â¢ Initiate the goal setting exercise for the operations team in the LOB.

- â¢ Provide direction to employees according to established policies and management guidance.

- â¢ Consistently meet the onshore and offshore stake holders to provide real time updates.

- â¢ Organize meetings with functional peer groups to discuss monthly MIS.

- â¢ Actively involved in hiring and resource management for all levels within the department.

- â¢ Oversee the Employee Assistance Program (EAP) for the underperforming employees.

- â¢ End to end Performance management of staff during semiannual and annual appraisals.

- â¢ Established Training and Development as one of the top priority goal for the department and secured senior management funding.

- â¢ Cut new-hire to on- the- job competency from three months to two, by introducing e-learning modules and Brainshark presentations.

- â¢ Encourage the team to understand and communicate the company vision and competitive strategy for driving business. (PLAN TO WIN &PLAY TO WIN)

- â¢ Initiate quarterly Risk and control self-assessments (RCSA) concurrence reviews with all the process stake holders.

Worked as a project manager in BNY Mellon PMO to manage the Transitions of Billing Operations.

The responsibilities included but were not limited to:

- â¢ Understanding expectations, technology, documentation, assessing capacity & skillset
- â¢ Executing transition plan (process timelines, SLAs, Escalation Matrix etc.)
- â¢ Ensuring smooth go live and regular review meetings post transition.
- â¢ Conducted analysis on projects to determine ROI and viability of project undertaking before presenting it to the Senior Operations Directors.
- â¢ Conceptualized and implemented strategy for capturing Project and Program metrics and funneling that information to easy-to understand dashboards.
- â¢ Direct Management oversight for a team of 11 employees, 8 of which were direct reports.
- â¢ Work directly with the Information Technology Architecture team to identify strategic project breakdowns within the program.
- â¢ Ensure complete adherence to project management and Toll gate framework.
- â¢ Ensure users of the Operations team get the required application accesses.
- â¢ Determined lessons learned through post-project reviews and integrated findings into program plan.

Talent Management (team & function)

- â¢ Re-structured Organization design to differentiate roles, develop career paths, easy work rotation
- â¢ Performed skill-gap analysis to identify Training and Development opportunities. Ensured participation and also tracked effectiveness of Training Programs
- â¢ Developed and implemented Function-wide Rewards and Recognitions (R&R) programs.

Projects Completed at HONEYWELL, India:

Project (HONEYWELL) Role Project Highlights
FGP/WPMP
Client: TCO
MAC: MUSTANG/HONEYWELL

Team Lead
System: EPKS DCS + SIS + FGS
Job:-

- â¢ HARDWARE Configuration
- â¢ C-300 Application Development
- â¢ Timely delivery of the deliverable after ensuring quality check.
- â¢ Attending weekly project review meetings (telephonic) with client.

THE PROJECT IS STILL IN STARTING PHASE SO SCOPE OF WORK IS NOT VERY CLEAR.

Grain LNG RTL
Client: CBI / National Grid, UK

Team Lead
Process: LNG Tanker Loading
System: EPKS DCS + SIS + FGS
C-300 Controller = 1 No.
Job:-

- â¢ Planning and Monitoring the below mentioned engineering activities-
- â¢ Design and development of all HARDWARE part as below:-
- â¢ System Cabinet -01 No
- â¢ Marshalling Cabinet - 01 No.
- â¢ Network Cabinet 01 No.
- â¢ System Architecture
- â¢ Heat and Load Calculation
- â¢ BOM
- â¢ Network and Miscellaneous cord schedule
- â¢ Wiring Schedule
- â¢ C-300 Application development monitoring
- â¢ HMI C&E Graphics development monitoring
- â¢ Testing of simple and complex loops using standard methodology along with HMI (Integrated Testing + Test Reports)
- â¢ Focal point for communication with client
- â¢ Timely delivery of the deliverable after ensuring quality check.
- â¢ Attending weekly project review meetings (telephonic) with client

This was a FAST track project completed successfully
 Got Appreciations from client.

AMC TO HPM Migration-MX8800
Client: Thai Oil Public Co. Ltd.

Team Lead
Process: Furnace
System: TPS
HPM Controller = 1 No.
Job:-

- â¢ Planning and Monitoring the below mentioned engineering activities-
- â¢ Loop drawing design using Microsoft VISIO
- â¢ Logic Point building using HPM builder
- â¢ PU Calculation and IO Allocation
- â¢ HPM Database preparation
- â¢ Downloading of points on HPM test system
- â¢ Testing of simple and complex loops using standard methodology
- â¢ Focal

point for communication with client
â¢ Timely delivery of the deliverable after ensuring quality check.
â¢ Attending weekly project review meetings (telephonic) with client

AMC TO HPM Migration-CCR1
Client: Thai Oil Public Co. Ltd.

Team Lead

Projects Completed at HONEYWELL, India:

Project (HONEYWELL) Role Project Highlights

FGP/WPMP

Client: TCO

MAC: MUSTANG/HONEYWELL

Team Lead

System: EPKS DCS + SIS + FGS

Job:- ¢ HARDWARE Configuration ¢ C-300 Application Development ¢

Timely delivery of the deliverable after ensuring quality check.

¢ Attending weekly project review meetings (telephonic) with client.

THE PROJECT IS STILL IN STARTING PHASE SO SCOPE OF WORK IS NOT VERY CLEAR.

Grain LNG RTL

Client: CBI / National Grid, UK

Team Lead

Process: LNG Tanker Loading

System: EPKS DCS + SIS + FGS

C-300 Controller = 1 No.

Job:- ¢ Planning and Monitoring the below mentioned engineering activities- ¢ Design and development of all HARDWARE part as below:- ¢ System Cabinet -01 No ¢ Marshalling Cabinet - 01 No.
 ¢ Network Cabinet 01 No.
 ¢ System Architecture ¢ Heat and Load Calculation ¢ BOM ¢ Network and Miscellaneous cord schedule ¢ Wiring Schedule ¢ C-300 Application development monitoring ¢ HMI C&E Graphics development monitoring ¢ Testing of simple and complex loops using standard methodology along with HMI (Integrated Testing + Test Reports) ¢ Focal point for communication

with client
â€¢ Timely delivery of the deliverable after ensuring quality check.
â€¢ Attending weekly project review meetings (telephonic) with client
This was a FAST track project completed successfully
Got Appreciations from client.

AMC TO HPM Migration-MX8800
Client: Thai Oil Public Co. Ltd.

Team Lead
Process: Furnace
System: TPS
HPM Controller = 1 No.
Job:-
â€¢ Planning and Monitoring the below mentioned engineering activities-
â€¢ Loop drawing design using Microsoft VISIO
â€¢ Logic Point building using HPM builder
â€¢ PU Calculation and IO Allocation
â€¢ HPM Database preparation
â€¢ Downloading of points on HPM test system
â€¢ Testing of simple and complex loops using standard methodology
â€¢ Focal point for communication with client
â€¢ Timely delivery of the deliverable after ensuring quality check.
â€¢ Attending weekly project review meetings (telephonic) with client

AMC TO HPM Migration-CCR1
Client: Thai Oil Public Co. Ltd.

Team Lead
Process: Furnace
System: TPS
HPM Controller = 1 No.
Job:-
â€¢ Planning and Monitoring the below mentioned engineering activities-
â€¢ Loop drawing design using Microsoft VISIO
â€¢ Logic Point building using HPM builder
â€¢ PU Calculation and IO Allocation
â€¢ HPM Database preparation
â€¢ Downloading of points on HPM test system
â€¢ Testing of simple and complex loops using standard methodology
â€¢ Focal point for communication with client
â€¢ Timely delivery of the deliverable after ensuring quality check.
â€¢ Attending weekly project review meetings (telephonic) with client

Utilities and Offsites
Client: ENPPI
End Client: ETHYDCO, EGYPT

Team Lead
Process: Utilities for ETHYLENE plant.

System: Experion R410.2,
Redundant Controllers = 2Nos.
System Cabinets = 4 Nos.
Marshalling Cabinets = 10 Nos.
Redundant Servers = 1 Pair
Experion Backup Restore = 01 No
Process History Database = 01 No.
FDM Server = 01 No.
Engineering Station - DCS = 01 No.
Operating Stations - DCS = 05 No.
Job:-
â€¢ Planning the activities like Hardware Engineering, Software Engineering and HMI development..
â€¢ Responsible for Hardware Engineering for System, Marshalling, Network, Power Distribution Cabinets etc.
â€¢ Preparation of BOM
â€¢ Answering the queries or doubts from Client
â€¢ Attending weekly project status meetings with client through video/audio conference.
â€¢ FAT completed, at Abu Dhabi, successfully.

Control Plant-3/ Control Plant6
Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead
Process: HVAC
System: ML200 R (PLC) + Experion R410.2 (For SCADA only)
Redundant Controllers = 26 Nos.
System/ Marshalling Cabinets = 60 Nos.
Redundant Servers = 2 Pair
FDM Server = 01 No.
Engineering Station - DCS = 02 No.
Operating Stations - DCS = 10 Nos.

Job:- â¢ Monitored the Wiring schematic preparation activity for all 30 PLC control panels (UPS + SYSTEM + MARSHALLING) â¢ Monitored the control panel manufacturing activity for all 30 PLC panels.
â¢ Monitored the internal testing activity of all 30 PLC panels.
â¢ Monitored the FDS document development activity.
â¢ Monitored the FAT document development activity.
â¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.
â¢ Delivered all the deliverables as mentioned above on time.
â¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

NORTH SIDE UTILITY TUNNEL HVAC System.

Client: JBK Controls

Projects Completed at HONEYWELL, India:

Project (HONEYWELL) Role Project Highlights

FGP/WPMP

Client: TCO

MAC: MUSTANG/HONEYWELL

Team Lead

System: EPKS DCS + SIS + FGS

Job:- ¢ HARDWARE Configuration ¢ C-300 Application Development ¢

Timely delivery of the deliverable after ensuring quality check.

¢ Attending weekly project review meetings (telephonic) with client.

THE PROJECT IS STILL IN STARTING PHASE SO SCOPE OF WORK IS NOT VERY CLEAR.

Grain LNG RTL

Client: CBI / National Grid, UK

Team Lead

Process: LNG Tanker Loading

System: EPKS DCS + SIS + FGS

C-300 Controller = 1 No.

Job:- ¢ Planning and Monitoring the below mentioned engineering activities- ¢ Design and development of all HARDWARE part as below:- ¢ System Cabinet -01 No ¢ Marshalling Cabinet - 01 No.

¢ Network Cabinet 01 No.

¢ System Architecture ¢ Heat and Load Calculation ¢ BOM ¢ Network and Miscellaneous cord schedule ¢ Wiring Schedule ¢ C-300 Application development monitoring ¢ HMI C&E Graphics development monitoring ¢ Testing of simple and complex loops using standard methodology along with HMI (Integrated Testing + Test Reports) ¢ Focal point for communication with client ¢ Timely delivery of the deliverable after ensuring quality check.

¢ Attending weekly project review meetings (telephonic) with client

This was a FAST track project completed successfully

Got Appreciations from client.

AMC TO HPM Migration-MX8800

Client: Thai Oil Public Co. Ltd.

Team Lead

Process: Furnace

System: TPS

HPM Controller = 1 No.

Job:- ¢ Planning and Monitoring the below mentioned engineering activities- ¢ Loop drawing design using Microsoft VISIO ¢ Logic Point building using HPM builder ¢ PU Calculation and IO Allocation ¢ HPM Database preparation ¢ Downloading of points on HPM test system ¢ Testing of simple and complex loops using standard methodology ¢ Focal point for communication with client ¢ Timely delivery of the deliverable after ensuring quality check.

¢ Attending weekly project review meetings (telephonic) with client

AMC TO HPM Migration-CCR1

Client: Thai Oil Public Co. Ltd.

Team Lead

Process: Furnace

System: TPS

HPM Controller = 1 No.

Job:- ¢ Planning and Monitoring the below mentioned engineering activities- ¢ Loop drawing design using Microsoft VISIO ¢ Logic Point building using HPM builder ¢ PU Calculation and IO Allocation ¢ HPM Database preparation ¢ Downloading of points on HPM test system ¢ Testing of simple and complex loops using standard methodology ¢ Focal point for communication with client ¢ Timely delivery of the deliverable after ensuring quality check.

¢ Attending weekly project review meetings (telephonic) with client

Utilities and Offsites

Client: ENPPI

End Client: ETHYDCO, EGYPT

Team Lead

Process: Utilities for ETHYLENE plant.

System: Experion R410.2,
Redundant Controllers = 2Nos.
System Cabinets = 4 Nos.
Marshalling Cabinets = 10 Nos.
Redundant Servers = 1 Pair
Experion Backup Restore = 01 No
Process History Database = 01 No.
FDM Server = 01 No.
Engineering Station - DCS = 01 No.
Operating Stations - DCS = 05 No.
Job:- â¢ Planning the activities like Hardware Engineering, Software Engineering and HMI development..
â¢ Responsible for Hardware Engineering for System, Marshalling, Network, Power Distribution Cabinets etc.
â¢ Preparation of BOM â¢ Answering the queries or doubts from Client â¢ Attending weekly project status meetings with client through video/audio conference.
â¢ FAT completed, at Abu Dhabi, successfully.

Control Plant-3/ Control Plant6

Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead

Process: HVAC

System: ML200 R (PLC) + Experion R410.2 (For SCADA only)
Redundant Controllers = 26 Nos.
System/ Marshalling Cabinets = 60 Nos.
Redundant Servers = 2 Pair
FDM Server = 01 No.

Engineering Station - DCS = 02 No.

Operating Stations - DCS = 10 Nos.

Job:- â¢ Monitored the Wiring schematic preparation activity for all 30 PLC control panels (UPS + SYSTEM + MARSHALLING) â¢ Monitored the control panel manufacturing activity for all 30 PLC panels.
â¢ Monitored the internal testing activity of all 30 PLC panels.
â¢ Monitored the FDS document development activity.
â¢ Monitored the FAT document development activity.
â¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.
â¢ Delivered all the deliverables as mentioned above on time.
â¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

NORTH SIDE UTILITY TUNNEL HVAC System.

Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead â¢ Monitored the Wiring schematic preparation activity for all 28 PLC control panels (UPS + SYSTEM + MARSHALLING) â¢ Monitored the control panel manufacturing activity for all 28 PLC panels.
â¢ Monitored the internal testing activity of all 28 PLC panels.
â¢ Monitored the FDS document development activity.
â¢ Monitored the FAT document development activity.
â¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.
â¢ Delivered all the deliverables as mentioned above on time.
â¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

TRUCK MARSHALLING AREA HVAC System.

Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead â¢ Monitored the Wiring schematic preparation activity for all 6 PLC control panels (UPS + SYSTEM + MARSHALLING) â¢ Monitored the control panel manufacturing activity for all 6 PLC panels.
â¢ Monitored the internal testing activity of all 6 PLC panels.
â¢ Monitored the FDS document development activity.
â¢ Monitored the FAT document development activity.
â¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.

â€¢ Delivered all the deliverables as mentioned above on time.
â€¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

Graphics Development
Client: Chevron Oronite.
Singapore.

Team Lead â€¢ Prepared the estimation for GRAPHICS DEVELOPMENT job using EPKS HMIWEB Display Builder.
â€¢ Completed the development activity within schedule with a very proficient team of 3 engineers.
â€¢ Performed the 2nd Level Quality Check for all 66 graphics.
â€¢ Delivered the developed graphics as per the delivery schedule.
â€¢ Very few defects / comments noticed by clients. (which were accepted and implemented)

TGI Modernization
Client: KH Engineering B.V.
End User: Shell Nederland Raffinaderji B.V.
Amsterdam

Team Lead â€¢ Application engineering for Highway Gateway (HG) to EPKS migration based on CMPI database â€¢ Application development for Furnace COIL BALANCING loop â€¢ Flow Compensation logic development â€¢ HMI testing and converting old system HMI scripts to ACE Control Modules â€¢ Performed Quality Check activities by extracting logic parameters

â€¢ Trainings Completed:-
company - FOX CONTROLS

description - â€¢ Strategically planning and analyzing the basic requirements while setting up the technical infrastructure of the project and reviewing all the project proposals.

â€¢ Accountable for PLC and SCADA based application development.

 MAC: MUSTANG/HONEYWELL

Team Lead
 System: EPKS DCS + SIS + FGS
 Job:-

- â€¢ HARDWARE Configuration
- â€¢ C-300 Application Development
- â€¢ Timely delivery of the deliverable after ensuring quality check.
- â€¢ Attending weekly project review meetings (telephonic) with client.

THE PROJECT IS STILL IN STARTING PHASE SO SCOPE OF WORK IS NOT VERY CLEAR.

Grain LNG RTLF
 Client: CBI / National Grid, UK

Team Lead
 Process: LNG Tanker Loading
 System: EPKS DCS + SIS + FGS
 C-300 Controller = 1 No.
 Job:-

- â€¢ Planning and Monitoring the below mentioned engineering activities-
- â€¢ Design and development of all HARDWARE part as below:-
- â€¢ System Cabinet -01 No
- â€¢ Marshalling Cabinet - 01 No.
- â€¢ Network Cabinet 01 No.
- â€¢ System Architecture
- â€¢ Heat and Load Calculation
- â€¢ BOM
- â€¢ Network and Miscellaneous cord schedule
- â€¢ Wiring Schedule
- â€¢ C-300 Application development monitoring
- â€¢ HMI C&E Graphics development monitoring
- â€¢ Testing of simple and complex loops using standard methodology along with HMI (Integrated Testing + Test Reports)
- â€¢ Focal point for communication with client
- â€¢ Timely delivery of the deliverable after ensuring quality check.
- â€¢ Attending weekly project review meetings (telephonic) with client

 This was a FAST track project completed successfully
 Got Appreciations from client.

AMC TO HPM Migration-MX8800
 Client: Thai Oil Public Co. Ltd.

Team Lead
 Process: Furnace
 System: TPS
 HPM Controller = 1 No.
 Job:-

- â€¢ Planning and Monitoring the below mentioned engineering activities-
- â€¢ Loop drawing design using Microsoft VISIO
- â€¢ Logic Point building using HPM builder
- â€¢ PU Calculation and IO Allocation
- â€¢ HPM Database preparation
- â€¢ Downloading of points on HPM test system
- â€¢ Testing of simple and complex loops using standard methodology
- â€¢ Focal point for communication with client
- â€¢ Timely delivery of the deliverable after ensuring quality check.
- â€¢ Attending weekly project review meetings (telephonic) with client

Projects Completed at HONEYWELL, India:

Project (HONEYWELL) Role Project Highlights

FGP/WPMP

Client: TCO

MAC: MUSTANG/HONEYWELL

Team Lead

System: EPKS DCS + SIS + FGS

Job:- ¢ HARDWARE Configuration ¢ C-300 Application Development ¢

Timely delivery of the deliverable after ensuring quality check.

¢ Attending weekly project review meetings (telephonic) with client.

THE PROJECT IS STILL IN STARTING PHASE SO SCOPE OF WORK IS NOT VERY CLEAR.

Grain LNG RTLF

Client: CBI / National Grid, UK

Team Lead

Process: LNG Tanker Loading

System: EPKS DCS + SIS + FGS

C-300 Controller = 1 No.

Job:- ¢ Planning and Monitoring the below mentioned engineering activities- ¢ Design and development of all HARDWARE part as below:- ¢
System Cabinet -01 No ¢ Marshalling Cabinet - 01 No.
¢ Network Cabinet 01 No.

¢ System Architecture ¢ Heat and Load Calculation ¢ BOM ¢ Network and Miscellaneous cord schedule ¢ Wiring Schedule ¢ C-300 Application development monitoring ¢ HMI C&E Graphics development monitoring ¢ Testing of simple and complex loops using standard methodology along with HMI (Integrated Testing + Test Reports) ¢ Focal point for communication with client ¢ Timely delivery of the deliverable after ensuring quality check.
¢ Attending weekly project review meetings (telephonic) with client

This was a FAST track project completed successfully

Got Appreciations from client.

AMC TO HPM Migration-MX8800

Client: Thai Oil Public Co. Ltd.

Team Lead
Process: Furnace
System: TPS
HPM Controller = 1 No.
Job:-

- â¢ Planning and Monitoring the below mentioned engineering activities-
 - â¢ Loop drawing design using Microsoft VISIO
 - â¢ Logic Point building using HPM builder
 - â¢ PU Calculation and IO Allocation
 - â¢ HPM Database preparation
 - â¢ Downloading of points on HPM test system
 - â¢ Testing of simple and complex loops using standard methodology
 - â¢ Focal point for communication with client
 - â¢ Timely delivery of the deliverable after ensuring quality check.
- â¢ Attending weekly project review meetings (telephonic) with client

AMC TO HPM Migration-CCR1
Client: Thai Oil Public Co. Ltd.

Team Lead
Process: Furnace
System: TPS
HPM Controller = 1 No.
Job:-

- â¢ Planning and Monitoring the below mentioned engineering activities-
 - â¢ Loop drawing design using Microsoft VISIO
 - â¢ Logic Point building using HPM builder
 - â¢ PU Calculation and IO Allocation
 - â¢ HPM Database preparation
 - â¢ Downloading of points on HPM test system
 - â¢ Testing of simple and complex loops using standard methodology
 - â¢ Focal point for communication with client
 - â¢ Timely delivery of the deliverable after ensuring quality check.
- â¢ Attending weekly project review meetings (telephonic) with client

Utilities and Offsites
Client: ENPPI
End Client: ETHYDCO, EGYPT

Team Lead
Process: Utilities for ETHYLENE plant.

System: Experion R410.2,
Redundant Controllers = 2Nos.
System Cabinets = 4 Nos.
Marshalling Cabinets = 10 Nos.
Redundant Servers = 1 Pair
Experion Backup Restore = 01 No
Process History Database = 01 No.
FDM Server = 01 No.
Engineering Station - DCS = 01 No.
Operating Stations - DCS = 05 No.
Job:-

- â¢ Planning the activities like Hardware Engineering, Software Engineering and HMI development..
- â¢ Responsible for Hardware Engineering for System, Marshalling, Network, Power Distribution Cabinets etc.
- â¢ Preparation of BOM
- â¢ Answering the queries or doubts from Client
- â¢ Attending weekly project status meetings with client through video/audio conference.
- â¢ FAT completed, at Abu Dhabi, successfully.

Control Plant-3/ Control Plant6
Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead
Process: HVAC
System: ML200 R (PLC) + Experion R410.2 (For SCADA only)
Redundant Controllers = 26 Nos.
System/ Marshalling Cabinets = 60 Nos.
Redundant Servers = 2 Pair
FDM Server = 01 No.
Engineering Station - DCS = 02 No.
Operating Stations - DCS = 10 Nos.
Job:-

- â¢ Monitored the Wiring schematic preparation activity for all 30 PLC control panels (UPS + SYSTEM + MARSHALLING)
- â¢ Monitored the control panel manufacturing activity for all 30 PLC panels.
- â¢ Monitored the internal testing activity of all 30 PLC panels.
- â¢ Monitored the FDS document development activity.
- â¢ Monitored the FAT document development activity.
- â¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.

â€¢ Delivered all the deliverables as mentioned above on time.
â€¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

NORTH SIDE UTILITY TUNNEL HVAC System.

Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead â€¢ Monitored the Wiring schematic preparation activity for all 28 PLC control panels (UPS + SYSTEM + MARSHALLING) â€¢ Monitored the control panel manufacturing activity for all 28 PLC panels.
â€¢ Monitored the internal testing activity of all 28 PLC panels.
â€¢ Monitored the FDS document development activity.
â€¢ Monitored the FAT document development activity.
â€¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.
â€¢ Delivered all the deliverables as mentioned above on time.
â€¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

TRUCK MARSHALLING AREA HVAC System.

Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead â€¢ Monitored the Wiring schematic preparation activity for all 6 PLC control panels (UPS + SYSTEM + MARSHALLING) â€¢ Monitored the control panel manufacturing activity for all 6 PLC panels.
â€¢ Monitored the internal testing activity of all 6 PLC panels.
â€¢ Monitored the FDS document development activity.
â€¢ Monitored the FAT document development activity.
â€¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.
â€¢ Delivered all the deliverables as mentioned above on time.
â€¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

Graphics Development
Client: Chevron Oronite.
Singapore.

Team Lead â€¢ Prepared the estimation for GRAPHICS DEVELOPMENT job using EPKS HMIWEB Display Builder.
â€¢ Completed the development activity within schedule with a very proficient team of 3 engineers.
â€¢ Performed the 2nd Level Quality Check for all 66 graphics.
â€¢ Delivered the developed graphics as per the delivery schedule.
â€¢ Very few defects / comments noticed by clients. (which were accepted and implemented)

TGI Modernization
Client: KH Engineering B.V.
End User: Shell Nederland Raffinaderji B.V.
Amsterdam

Team Lead â€¢ Application engineering for Highway Gateway (HG) to EPKS migration based on CMPI database â€¢ Application development for Furnace COIL BALANCING loop â€¢ Flow Compensation logic development â€¢ HMI testing and converting old system HMI scripts to ACE Control Modules â€¢ Performed Quality Check activities by extracting logic parameters
â€¢ Trainings Completed: -
company - FOX CONTROLS
description - â€¢ Strategically planning and analyzing the basic requirements while setting up the technical infrastructure of the project and reviewing all the project proposals.
â€¢ Accountable for PLC and SCADA based application development.

Projects Completed at HONEYWELL, India:

Project (HONEYWELL) Role Project Highlights

FGP/WPMP

Client: TCO

Team Lead

System: EPKS DCS + SIS + FGS

Job:- â¢ HARDWARE Configuration â¢ C-300 Application Development â¢

Timely delivery of the deliverable after ensuring quality check.

â¢ Attending weekly project review meetings (telephonic) with client.

THE PROJECT IS STILL IN STARTING PHASE SO SCOPE OF WORK IS NOT VERY CLEAR.

Grain LNG RTL

Client: CBI / National Grid, UK

Team Lead

Process: LNG Tanker Loading

System: EPKS DCS + SIS + FGS

C-300 Controller = 1 No.

Job:- â¢ Planning and Monitoring the below mentioned engineering activities- â¢ Design and development of all HARDWARE part as below:- â¡ System Cabinet -01 No â¡ Marshalling Cabinet - 01 No.

â¡ Network Cabinet 01 No.

â¡ System Architecture â¡ Heat and Load Calculation â¡ BOM â¡ Network and Miscellaneous cord schedule â¡ Wiring Schedule â¢ C-300 Application development monitoring â¢ HMI C&E Graphics development monitoring â¢ Testing of simple and complex loops using standard methodology along with HMI (Integrated Testing + Test Reports) â¢ Focal point for communication with client â¢ Timely delivery of the deliverable after ensuring quality check.

â¢ Attending weekly project review meetings (telephonic) with client

This was a FAST track project completed successfully

Got Appreciations from client.

AMC TO HPM Migration-MX8800

Client: Thai Oil Public Co. Ltd.

Team Lead

Process: Furnace

System: TPS

HPM Controller = 1 No.

Job:- â¢ Planning and Monitoring the below mentioned engineering activities- â¢ Loop drawing design using Microsoft VISIO â¢ Logic Point building using HPM builder â¢ PU Calculation and IO Allocation â¢ HPM Database preparation â¢ Downloading of points on HPM test system â¢ Testing of simple and complex loops using standard methodology â¢ Focal point for communication with client â¢ Timely delivery of the deliverable after ensuring quality check.

â¢ Attending weekly project review meetings (telephonic) with client

AMC TO HPM Migration-CCR1

Client: Thai Oil Public Co. Ltd.

Team Lead

Process: Furnace

System: TPS

HPM Controller = 1 No.

Job:- â¢ Planning and Monitoring the below mentioned engineering activities- â¢ Loop drawing design using Microsoft VISIO â¢ Logic Point building using HPM builder â¢ PU Calculation and IO Allocation â¢ HPM Database preparation â¢ Downloading of points on HPM test system â¢ Testing of simple and complex loops using standard methodology â¢ Focal point for communication with client â¢ Timely delivery of the deliverable after ensuring quality check.

â¢ Attending weekly project review meetings (telephonic) with client

Utilities and Offsites

Client: ENPPI

End Client: ETHYDCO, EGYPT

Team Lead

Process: Utilities for ETHYLENE plant.

System: Experion R410.2,

Redundant Controllers = 2Nos.

System Cabinets = 4 Nos.

Marshalling Cabinets = 10 Nos.

Redundant Servers = 1 Pair

Experion Backup Restore = 01 No

Process History Database = 01 No.

FDM Server = 01 No.
Engineering Station - DCS = 01 No.
Operating Stations - DCS = 05 No.
Job:-

- â€¢ Planning the activities like Hardware Engineering, Software Engineering and HMI development..
- â€¢ Responsible for Hardware Engineering for System, Marshalling, Network, Power Distribution Cabinets etc.
- â€¢ Preparation of BOM â€¢ Answering the queries or doubts from Client â€¢ Attending weekly project status meetings with client through video/audio conference.
- â€¢ FAT completed, at Abu Dhabi, successfully.

Control Plant-3/ Control Plant6

Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead
Process: HVAC
System: ML200 R (PLC) + Experion
R410.2 (For SCADA only)
Redundant Controllers = 26 Nos.
System/ Marshalling Cabinets = 60 Nos.
Redundant Servers = 2 Pair
FDM Server = 01 No.
Engineering Station - DCS = 02 No.
Operating Stations - DCS = 10 Nos.
Job:-

- â€¢ Monitored the Wiring schematic preparation activity for all 30 PLC control panels (UPS + SYSTEM + MARSHALLING) â€¢ Monitored the control panel manufacturing activity for all 30 PLC panels.
- â€¢ Monitored the internal testing activity of all 30 PLC panels.
- â€¢ Monitored the FDS document development activity.
- â€¢ Monitored the FAT document development activity.
- â€¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.
- â€¢ Delivered all the deliverables as mentioned above on time.
- â€¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

NORTH SIDE UTILITY TUNNEL HVAC System.

Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead

- â€¢ Monitored the Wiring schematic preparation activity for all 28 PLC control panels (UPS + SYSTEM + MARSHALLING) â€¢ Monitored the control panel manufacturing activity for all 28 PLC panels.

15. Attending estimation review meetings, TBEs, Technical clarification meetings whenever required.

Projects Completed at HONEYWELL, India:

Project (HONEYWELL) Role Project Highlights
FGP/WPMP
Client: TCO
MAC: MUSTANG/HONEYWELL

Team Lead
System: EPKS DCS + SIS + FGS
Job:-

- â¢ HARDWARE Configuration
- â¢ C-300 Application Development
- â¢ Timely delivery of the deliverable after ensuring quality check.
- â¢ Attending weekly project review meetings (telephonic) with client.

THE PROJECT IS STILL IN STARTING PHASE SO SCOPE OF WORK IS NOT VERY CLEAR.

Grain LNG RTLF
Client: CBI / National Grid, UK

Team Lead
Process: LNG Tanker Loading
System: EPKS DCS + SIS + FGS
C-300 Controller = 1 No.
Job:-

- â¢ Planning and Monitoring the below mentioned engineering activities-
- â¢ Design and development of all HARDWARE part as below:-
- â¢ System Cabinet -01 No
- â¢ Marshalling Cabinet - 01 No.
- â¢ Network Cabinet 01 No.
- â¢ System Architecture
- â¢ Heat and Load Calculation
- â¢ BOM
- â¢ Network and Miscellaneous cord schedule
- â¢ Wiring Schedule
- â¢ C-300 Application development monitoring
- â¢ Graphics development monitoring
- â¢ Testing of simple and complex loops using standard methodology along with HMI (Integrated Testing + Test Reports)
- â¢ Focal point for communication with client
- â¢ Timely delivery of the deliverable after ensuring quality check.
- â¢ Attending weekly project review meetings (telephonic) with client

This was a FAST track project completed successfully
 Got Appreciations from client.

AMC TO HPM Migration-MX8800
Client: Thai Oil Public Co. Ltd.

Team Lead
Process: Furnace
System: TPS
HPM Controller = 1 No.
Job:-

- â¢ Planning and Monitoring the below mentioned engineering activities-
- â¢ Loop drawing design using Microsoft VISIO
- â¢ Logic Point building using HPM builder
- â¢ PU Calculation and IO Allocation
- â¢ HPM Database preparation
- â¢ Downloading of points on HPM test system
- â¢ Testing of simple and complex loops using standard methodology
- â¢ Focal

point for communication with client â¢ Timely delivery of the deliverable after ensuring quality check.
â¢ Attending weekly project review meetings (telephonic) with client

AMC TO HPM Migration-CCR1
Client: Thai Oil Public Co. Ltd.

Team Lead
Process: Furnace
System: TPS
HPM Controller = 1 No.
Job:- â¢ Planning and Monitoring the below mentioned engineering activities- â¢ Loop drawing design using Microsoft VISIO â¢ Logic Point building using HPM builder â¢ PU Calculation and IO Allocation â¢ HPM Database preparation â¢ Downloading of points on HPM test system â¢ Testing of simple and complex loops using standard methodology â¢ Focal point for communication with client â¢ Timely delivery of the deliverable after ensuring quality check.
â¢ Attending weekly project review meetings (telephonic) with client

Utilities and Offsites
Client: ENPPI
End Client: ETHYDCO, EGYPT

Team Lead
Process: Utilities for ETHYLENE plant.

System: Experion R410.2,
Redundant Controllers = 2Nos.
System Cabinets = 4 Nos.
Marshalling Cabinets = 10 Nos.
Redundant Servers = 1 Pair
Experion Backup Restore = 01 No
Process History Database = 01 No.
FDM Server = 01 No.
Engineering Station - DCS = 01 No.
Operating Stations - DCS = 05 No.
Job:- â¢ Planning the activities like Hardware Engineering, Software Engineering and HMI development..
â¢ Responsible for Hardware Engineering for System, Marshalling, Network, Power Distribution Cabinets etc.
â¢ Preparation of BOM â¢ Answering the queries or doubts from Client â¢ Attending weekly project status meetings with client through video/audio conference.
â¢ FAT completed, at Abu Dhabi, successfully.

Control Plant-3/ Control Plant6
Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead
Process: HVAC
System: ML200 R (PLC) + Experion R410.2 (For SCADA only)
Redundant Controllers = 26 Nos.
System/ Marshalling Cabinets = 60 Nos.
Redundant Servers = 2 Pair
FDM Server = 01 No.
Engineering Station - DCS = 02 No.
Operating Stations - DCS = 10 Nos.
Job:- â¢ Monitored the Wiring schematic preparation activity for all 30 PLC control panels (UPS + SYSTEM + MARSHALLING) â¢ Monitored the control panel manufacturing activity for all 30 PLC panels.
â¢ Monitored the internal testing activity of all 30 PLC panels.
â¢ Monitored the FDS document development activity.
â¢ Monitored the FAT document development activity.
â¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.
â¢ Delivered all the deliverables as mentioned above on time.
â¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

NORTH SIDE UTILITY TUNNEL HVAC System.
Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead â¢ Monitored the Wiring schematic preparation activity for all 28 PLC control panels (UPS + SYSTEM + MARSHALLING) â¢ Monitored the control panel manufacturing activity for all 28 PLC panels.
â¢ Monitored the internal testing activity of all 28 PLC panels.
â¢ Monitored the FDS document development activity.
â¢ Monitored the FAT document development activity.
â¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.
â¢ Delivered all the deliverables as mentioned above on time.
â¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

TRUCK MARSHALLING AREA HVAC System.

Client: JBK Controls
End Client: Qatar Foundation
Qatar.

Team Lead â¢ Monitored the Wiring schematic preparation activity for all 6 PLC control panels (UPS + SYSTEM + MARSHALLING) â¢ Monitored the control panel manufacturing activity for all 6 PLC panels.
â¢ Monitored the internal testing activity of all 6 PLC panels.
â¢ Monitored the FDS document development activity.
â¢ Monitored the FAT document development activity.
â¢ Performed the 2nd level Quality Checks for Wiring Schematics, FDS and FAT document.
â¢ Delivered all the deliverables as mentioned above on time.
â¢ Successfully completed the Pre-FAT and FAT, in presence of client from QATAR.

Graphics Development
Client: Chevron Oronite.
Singapore.

Team Lead â¢ Prepared the estimation for GRAPHICS DEVELOPMENT job using EPKS HMIWEB Display Builder.
â¢ Completed the development activity within schedule with a very proficient team of 3 engineers.
â¢ Performed the 2nd Level Quality Check for all 66 graphics.
â¢ Delivered the developed graphics as per the delivery schedule.
â¢ Very few defects / comments noticed by clients. (which were accepted and implemented)

TGI Modernization
Client: KH Engineering B.V.
End User: Shell Nederland Raffinaderji B.V.
Amsterdam

Team Lead â¢ Application engineering for Highway Gateway (HG) to EPKS migration based on CMPI database â¢ Application development for Furnace COIL BALANCING loop â¢ Flow Compensation logic development â¢ HMI testing and converting old system HMI scripts to ACE Control Modules â¢ Performed Quality Check activities by extracting logic parameters
â¢ Trainings Completed: -
company - FOX CONTROLS
description - â¢ Strategically planning and analyzing the basic requirements while setting up the technical infrastructure of the project and reviewing all the project proposals.
â¢ Accountable for PLC and SCADA based application development.
â¢ Perform engineering and commissioning of Process Plants using PLC, DRIVES and SCADA.
â¢ Carrying out thorough Documentation of Engineering details related to the project.
â¢ Organizing and managing resources while creating estimates for the project, Work Breakdown Structure, Project Plan, Contingency Plan & Schedules, preventive maintenance related to instrumentation, PLC, identifying risks within defined scope, quality, time and cost constraints â¢ Interacted with the customers\clients on their projects for providing technical advises & feedbacks, creating high-level requirements.
â¢ Schedule tracking in coordination with site to ensure timely delivery of the Project as planned.
â¢ Proficient in various documentation processes.
â¢ Expert in ensuring the effective utilization of resources; human, material, and facility. Plans and project schedules, tests etc â¢ Adopt at maintaining perfect coordination with the work team & all internal/external parties to freeze the technical parameters/ work scope to iron out any ambiguities; carrying out work measurements and providing technical validation for jobs.

description - Project - F-MAS (Frequency Monitoring and Analysis Systems - (F-MAS))

F-MAS is a project for managing network inventory, network communication, fault management & network traffic analysis. The telecommunications service providers, are used to support a range of telecommunication services. The Operations Support Systems (OSS) collectively provides support for various elements used in Public Switched Telephone Networks, for example processing an order may require information on the services the customer already has, the network they are using, and currently available resources.

Responsibilities:

- â€¢ Participated in entire lifecycle of the projects including Design, Development, and Deployment, Testing and Implementation and support.
- â€¢ Developed views and templates with Python and Django's view controller and templating language to create user-friendly website interface.
- â€¢ Implemented navigation rules for the application and page outcomes, written controllers using annotations.
- â€¢ Created this project using Django, Django REST API, MYSQL, PyMYSQL, Python, HTML5, CSS3.
- â€¢ Created CRUD methods (get, post, put, delete) to make requests to the API server and tested Restful API using Postman.
- â€¢ Created Unit test cases for unit testing.
- â€¢ Worked with JSON based REST Web services
- â€¢ Wrote Python routines to log into the websites and fetch data for selected options.
- â€¢ Used Python modules such as requests, urllib for web crawling.
- â€¢ Added the navigations and paginations and filtering columns and adding and removing the desired columns for view.
- â€¢ Created a Git repository and added the project to GitHub.
- â€¢ Utilized Agile process and JIRA issue management to track sprint cycles.
- â€¢ Worked in an agile development environment.

Environment: Python, Django, MySQL, HTML, CSS, SQLAlchemy, JSON, agile, Web Services (REST), Urllib.

company - Arsys
description - 1. Working as back end as well as front end developer
2. working on rest and restfull api's.
3. Design and develop a project in Agile scrum.
4. Git hub for code deployment
5. Working on MVT .

Training attended: 1. Successfully completed ESD program conducted by Zensar Technologies, Pune in 2017. 2. Successfully completed Employability training conducted by Barclays, Global Talent Track, and NASSCOM foundation in 2015. Achievements: 1. Treasurer in IEEE student branch at JSCOE, Pune for 2017-18. 2. Worked as team leader in college's various technical and cultural events from 2016 - 2017. 3. Project idea got selected for final prototyping round in KPIT-Sparkle 2018, Pune. 4. Participated in Avishkar 2017 conducted by Savitribai Phule Pune University. 5. Project idea submitted in Accenture Innovation 2018, Pune. 6. Brought sponsorship of Rs. 15,000 from Platinum Auto (formerly Royal Enfield) in 2017, Pune. 7. Secured 1 st Rank for college level competition of Poster presentation on Smart ambulance in 2017, Pune. 8. Organized IEEE workshop on 'Excellence in English and Public Speaking' in 2017, Pune Workshops attended: 1. Successfully completed 4 days' workshop on 'Medical IOT' conducted by IEEE standard association at VIP in 2017, Pune. 2. Successfully completed 2 days' workshop on 'Introduction to Arduino' at SCOE in 2016, Pune. 3. Successfully completed 3 days' workshop on 'Robotics for Juniors' conducted by Computer Society of India at SKNCOE in 2016, Pune. 4. Participated in various inter-college technical competitions at SCOE, PICT, and AISSMS, Pune. Education Details

description - Project - F-MAS (Frequency Monitoring and Analysis Systems - (F-MAS))

F-MAS is a project for managing network inventory, network communication, fault management & network traffic analysis. The telecommunications service providers, are used to support a range of telecommunication services. The Operations Support Systems (OSS) collectively provides support for various elements used in Public Switched Telephone Networks, for example processing an order may require information on the services the customer already has, the network they are using, and currently available resources.

Responsibilities:

- â€¢ Participated in entire lifecycle of the projects including Design, Development, and Deployment, Testing and Implementation and support.
- â€¢ Developed views and templates with Python and Django's view controller and templating language to create user-friendly website interface.
- â€¢ Implemented navigation rules for the application and page outcomes, written controllers using annotations.
- â€¢ Created this project using Django, Django REST API, MYSQL, PyMYSQL, Python, HTML5, CSS3.
- â€¢ Created CRUD methods (get, post, put, delete) to make requests to the API server and tested Restful API using Postman.
- â€¢ Created Unit test cases for unit testing.
- â€¢ Worked with JSON based REST Web services
- â€¢ Wrote Python routines to log into the websites and fetch data for selected options.
- â€¢ Used Python modules such as requests, urllib for web crawling.
- â€¢ Added the navigations and paginations and filtering columns and adding and removing the desired columns for view.
- â€¢ Created a Git repository and added the project to GitHub.
- â€¢ Utilized Agile process and JIRA issue management to track sprint cycles.
- â€¢ Worked in an agile development environment.

Environment: Python, Django, MySQL, HTML, CSS, SQLAlchemy, JSON, agile, Web Services (REST), Urllib.

company - Arsys

description - 1. Working as back end as well as front end developer
2. working on rest and restfull api's.
3. Design and develop a project in Agile scrum.

Python Developer 4. Git hub for code deployment
5. Working on MVT .

F

Training attended: 1. Successfully completed ESD program conducted by Zensar Technologies, Pune in 2017. 2. Successfully completed Employability training conducted by Barclays, Global Talent Track, and NASSCOM foundation in 2015. Achievements: 1. Treasurer in IEEE student branch at JSCOE, Pune for 2017-18. 2. Worked as team leader in college's various technical and cultural events from 2016 - 2017. 3. Project idea got selected for final prototyping round in KPIT-Sparkle 2018, Pune. 4. Participated in Avishkar 2017 conducted by Savitribai Phule Pune University. 5. Project idea submitted in Accenture Innovation 2018, Pune. 6. Brought sponsorship of Rs. 15,000 from Platinum Auto (formerly Royal Enfield) in 2017, Pune. 7. Secured 1 st Rank for college level competition of Poster presentation on Smart ambulance in 2017, Pune. 8. Organized IEEE workshop on 'Excellence in English and Public Speaking' in 2017, Pune Workshops attended: 1. Successfully completed 4 days' workshop on 'Medical IOT' conducted by IEEE standard association at VIP in 2017, Pune. 2. Successfully completed 2 days' workshop on 'Introduction to Arduino' at SCOE in 2016, Pune. 3. Successfully completed 3 days' workshop on 'Robotics for Juniors' conducted by Computer Society of India at SKNCOE in 2016, Pune. 4. Participated in various inter-college technical competitions at SCOE, PICT, and AISSMS, Pune. Education Details

description - Project - F-MAS (Frequency Monitoring and Analysis Systems - (F-MAS))

F-MAS is a project for managing network inventory, network communication, fault management & network traffic analysis. The telecommunications service providers, are used to support a range of telecommunication services. The Operations Support Systems (OSS) collectively provides support for various elements used in Public Switched Telephone Networks, for example processing an order may require information on the services the customer already has, the network they are using, and currently available resources.

Responsibilities:

- â€¢ Participated in entire lifecycle of the projects including Design, Development, and Deployment, Testing and Implementation and support.
- â€¢ Developed views and templates with Python and Django's view controller and templating language to create user-friendly website interface.
- â€¢ Implemented navigation rules for the application and page outcomes, written controllers using annotations.
- â€¢ Created this project using Django, Django REST API, MYSQL, PyMYSQL, Python, HTML5, CSS3.
- â€¢ Created CRUD methods (get, post, put, delete) to make requests to the API server and tested Restful API using Postman.
- â€¢ Created Unit test cases for unit testing.
- â€¢ Worked with JSON based REST Web services
- â€¢ Wrote Python routines to log into the websites and fetch data for selected options.
- â€¢ Used Python modules such as requests, urllib for web crawling.
- â€¢ Added the navigations and paginations and filtering columns and adding and removing the desired columns for view.
- â€¢ Created a Git repository and added the project to GitHub.
- â€¢ Utilized Agile process and JIRA issue management to track sprint cycles.
- â€¢ Worked in an agile development environment.

Environment: Python, Django, MySQL, HTML, CSS, SQLAlchemy, JSON, agile, Web Services (REST), Urllib.

company - Arsys
description - 1. Working as back end as well as front end developer
2. working on rest and restfull api's.
3. Design and develop a project in Agile scrum.
4. Git hub for code deployment
5. Working on MVT .

	<p>Training attended: 1. Successfully completed ESD program conducted by Zensar Technologies, Pune in 2017. 2. Skill Details

Cloud Computing- Experience - 48 months

Shell Scripting- Experience - 96 months

Python- Experience - 6 months

Automation- Experience - 72 months

Solution Architect- Experience - Less than 1 year months

Azure- Experience - Less than 1 year months

AWS- Experience - Less than 1 year months

Company - DevOps

Description - Type: DevOps Engineer.

Platform: AWS Cloud, Azure Cloud.

Services: AWS EC2, RDS, CloudFormation Template, Lambda, Dynamo DB, Cloud Watch, Auto-scaling, Elastic Beanstalk, Appdynamics.

Here I manage Tibco Spotfire enterprise & Cloud Product support. Being the only Ops member in India I got a chance to recruit & build entire team of 15 members. I also worked on 4 different Projects / products simultaneously and added the hired members into these products.

My responsibilities in this project include:

1. Managing Tibco Spotfire Enterprise & Cloud environment.
2. Helping India QA team with the pre-production environment for testing.
3. Coordinating production deployment & hot-fixes.
4. Leading the team and handling 4-projects.
5. Arranging workshops over new AWS services for entire Team.

Shell scripts for Automation:

↳ Wrote shell script to extract the AWS running instances and shut it down.

↳ Wrote shell script to extract free EIP and release those.

↳ Wrote Lambda function to trigger important scripts.

Company - Synechron Technologies Limited

Description - Type: Administration, automation & Monitoring.

Platform: Linux/Unix, Linux-Xen Servers,

Software: Puppet, Redhat Satellite server, my-sql database shell scripting.

My responsibilities in this project included:

1. Managing linux media servers farms and provide application support.
2. Patching Linux physical and xen boxes.
3. Creating Satellite channels on Satellite server.
4. Automation via shell scripting and mysql DB support.
5. Troubleshooting the customized applications.

Company - Tsys Limited

Description - Type: Development, automation & Monitoring.

Platform: Linux/Unix, windows

Software: mysql database, shell scripting.

Here my responsibility was to provide access to the users on RHDS, Cvs and dot project servers.

It also included providing access to users on dev/prod VDI servers. Handling mysql database and shell scripting to automate the tasks.

My responsibilities in this project included:

1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required.
2. Implementing mysql replication over linux servers.
3. Fine tuning the existing applications.
4. Testing & debugging the scripts for any errors.

Company - Patni Computer Systems Limited

Description - Project: CPI

Type: Development, automation & Monitoring.

Platform: P8 Filenet, Linux/Unix, IBM AIX

Software: Sound knowledge of HTML, shell scripting.

Client: Genworth Financial

Duration: 2 yrs 2 months.

Role: Senior System Engineer

CPI is a Maintenance Project that caters to maintenance/enhancements of different applications, which are a part of Genworth Imaging Solutions. It has

different applications that process the scanned Insurance documents sent from different Providers and stores the information in Oracle Database and images in P8 Filenet. It has multiple applications to generate reports to be sent to providers.

Administration Support:

- â¢ Providing support to the L1 engineers.
- â¢ Monitoring P8 Filenet application.
- â¢ Handling Tickets raised by the users.
- â¢ Administration of the 10 Linux Proxy servers and mysql servers.
- â¢ Implementing mysql replication.
- â¢ Checking the logs of the sites visited by the users and the data downloaded.

Mysql / Oracle / SQL Support:

- â¢ Preparing SQL queries for the client users.
- â¢ Handling Oracle database.
- â¢ Testing insert, select, update queries over servers and deploying over production.
- â¢ Handling the bugs raised by the users.
- â¢ Implementing mysql replication over linux servers.
- â¢ Taking database backup through mysql dump.

Application Support:

- â¢ To make sure that the customer applications like eProcess, Trexo are working fine.
- â¢ To make sure all the customized filenet instances are working fine.
- â¢ Writing scripts to automate few of the applications.

Shell scripts for Automation:

DevOps Engineer	<ul style="list-style-type: none">â¢ Wrote shell script to delete the logs older than five days which was successfully deployed over Production servers.Software Proficiency: â¢ Languages: Basics of C, SQL, PL/SQL,JAVA,JAVAEE,Javascript,HTML,CSS,jquery,mysql,Spring ,Hibernate. â¢ Software Tools: Xilinx, Modelsim, Matlab, Multisim. â¢ Operating Systems: Windows XP, Vista, 07, 08, Ubuntu. Project Profile: B.E. Project FPGA Implementation of Team Size: 4. Role: Programmer. AES Algorithm AES is Advanced Encryption Standard which is used in cryptography by which we can protect our data. It encrypted by a Secret Key. T.E. project Sorting Robot. Team Size: 3. Role: Mechanism designer. The TCS 230 sensor sorts the RGB color balls according to their color.Diploma Project RFID Based Student Team Size: 4. Role: Interface.Attendance System Using GSM. In this student show RFID card of his own and then message send via GSM to their parent that his ward is present.Education DetailsMay 2016 B.E. company - Nendrasys Technologies Pvt Ltd

Description - Date

Project Description:

The Scope of the project is to design & develop e-commerce product features for Sloan project. It's a basically B2B project where customer can buy all fixtures, sinks related product. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of product.

Responsibilities:

- o Detailed technical Knowledge and hands-on experience on DevOps, Automation, Build Engineering and Configuration Management.
- o Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools.
- o Developing Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files of multiple applications to various platforms.
- o Creating Repositories, branches, managing the permissions of users and maintaining GIT, Bitbucket
- o Deploying and maintaining the code and application respectively and configuring the components which increase the re-usability.
- o Working closely with Architecture, Development, Test, Security and IT Services teams.
- o Supporting Business Analysts in getting used to the newly created jobs and Release activities.
- o Communicating daily with On-Site Team
- o Analyzing the requirements and identifying gaps & tracking logs, issues.

PROJECT 2

Nendrasys Technologies Pvt Ltd.,

Project Name: Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment portal)

Company - Nendrasys Technologies Pvt Ltd

Description - Role: Devops Engineer

â€¢ Devops Engineer for a team that involved different development teams and multiple simultaneous software releases

â€¢ Participated in weekly release meetings with different teams to identify and mitigate potential risks associated with the releases.

â€¢ Responsible for Creating Repositories, branches, managing the permissions of users and maintaining GIT.

â€¢ Creating fully automated CI build and deployment infrastructure and processes for multiple projects.

â€¢ Analyze and resolve conflicts related to merging of source code for GIT

â€¢ Responsible for creating Ant and Maven scripts for build automation.

â€¢ Implemented the setup for Master slave architecture to improve the Performance of Jenkins.

â€¢ Handled end-to-end deployments and code propagation's across different environments, DEV to PROD.

â€¢ Handled the tasks of developing and maintaining the Change Tasks.

â€¢ Closely working with Developers, QA, Performance, UAT testers, IT Team.

â€¢ Created and maintained documentation of build and release processes and application configuration

â€¢ Coordinated with developers, Business Analyst and Managers to make sure that code is deployed in the Production environment.

PROJECT 1

Nendrasys Technologies Pvt Ltd.,

Project Name: Sloan Global Holdings (Sloan) (E-commerce)

Company - Nendrasys Technologies Pvt Ltd

description - Project Description:
BBL is development of an e-commerce payment portal System. As such BBL require a system which can support multiple merchants B2B/B2C e-commerce portal with various payment options via both online and offline. To achieve this BBL had made an agreement with Thai Trade, Thai Trade is one of the leading e-commerce website recognized by Thai government. In present Thai trade has a good base of users and sellers in several categories .The scope of the project is to design and develop e-commerce product features for BBLWTP project. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of electronics.

Responsibilities:

- o Plan and track activities involved for build and deployment.
- o Resolving build issues
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Collaboration with Development, QA, Product managements on build plans & schedules
- o Send daily and weekly reports to the team.
- o Involved in creating repositories, branches, merging activities, backup and restore activities in subversion servers.

**DevOps
Engineer**

F

o Maintenance of Maven, shell scripts for safe builds and deploys

description - Thunderbird program is a One-Stop-Test-Shop catering to AT&T's Enterprise-wide business critical applications. As part of this Fixed Price engagement various types of testing like System, Regression, Sanity and UAT support gets executed through Agile Methodologies on applications under Billing and Sales domain. The project has various critical applications as listed below with a team size of 80+ members.

Sales Express: An iPad & Browser based Mobile Sales application used by Sales Representatives & Service/Solution providers to sell Enterprise Products/Solutions

ESIGN: Allows customer to sign and AT&T to countersign digital version of contract document

AMPD: Enterprise billing application through which AT&T offers new and emerging billing products to the Business community

BEST: Business Solution application which performs consolidated billing and reporting for CRU Billing and Reporting Foundation Accounts

BIZCOMP: Comp Engine for business that supports the commission calculations for Enterprise Business and Small-Business sales force via Revenue and Unit based plans

FAST: Provides rate discounts to eligible Schools and Libraries

CXMT: Lets customers manage their Centrex line and feature arrangements of their services without going through the standard service-order procedure.

Key responsibilities

- â¢ Manage and lead all aspects of Transition / Pre-Transition comprising multiple vendors
- â¢ Transition Drill down sessions, Forward/Reverse Shadow phases and Reverse Presentation
- â¢ Transition Documentation & signoff of SMP & System Appreciation Document etc
- â¢ Measure & track testing metrics scorecard as part of Vendor Quality Index (VQI) initiative of AT&T
- â¢ Measure and track operating metrics like Onsite Subcon Index, Offshoring Index, Leakage Index, Utilization Index and Tail Index
- â¢ Manage, Track and Submit Project Monthly Financials & Invoicing
- â¢ Ensure 100% compliance to client / organization's quality and security processes, policies and SLAs
- â¢ Plan, manage and mitigate Risks
- â¢ Achieve Automation targets and SLAs using ConformiQ, Selenium & Oscar Tools
- â¢ Participate in proposal preparations to expand revenue and new business developments
- â¢ Manage & Track Work Allocation, Resourcing, Issue Resolution and Testing activities for the project
- â¢ Ensure Monthly Delivery / TL9K Metrics and CSL-KMs are submitted on time
- â¢ PMR, Internal Quality / Security Group, SQA, Quality Gates and external Ernst & Young / TL9K Audit
- â¢ Share weekly highlight reports, Project Health Report and regular Dashboard Reporting activities
- â¢ Prepare CSAT action plan for the team
- â¢ Prepare and implement Business Continuity Plan for the project
- â¢ Timely conduct of Business Continuity drills like Call Tree, Table Top and Project Rehearsal
- â¢ Comparative analysis, Root Cause Analysis and Defect Prevention exercises for ST, E2E and UAT
- â¢ Coordinate with Resource Management, Quality, Learning, Security, PMO and Business Unit
- â¢ Sub-Contractors and Rebadged (Ex-AT&T) staff management
- â¢ Participate in external technical interview / hiring drives for new engagements

description - Type: DevOps Engineer.

Platform: AWS Cloud, Azure Cloud.

Services: AWS EC2, RDS, CloudFormation Template, Lambda, Dynamo DB, Cloud Watch, Auto-scaling, Elastic Bean stalk, Appdynamics.

Here I manage Tibco Spotfire enterprise & Cloud Product support. Being the only Ops member in India I got a chance to recruit & build entire team of 15 members. I also worked on 4 different Projects / products simultaneously and added the hired members into these products.

My responsibilities in this project include:

1. Managing Tibco Spotfire Enterprise & Cloud environment.
2. Helping India QA team with the pre-production environment for testing.
3. Coordinating production deployment & hot-fixes.
4. Leading the team and handling 4-projects.
5. Arranging workshops over new AWS services for entire Team.

Shell scripts for Automation:

â€¢ Wrote shell script to extract the AWS running instances and shut it down.

â€¢ Wrote shell script to extract free EIP and release those.

â€¢ Wrote Lambda function to trigger important scripts.

Company - Synechron Technologies Limited

Description - Type: Administration, automation & Monitoring.

Platform: Linux/Unix, Linux-Xen Servers,

Software: Puppet, Redhat Satellite server, my-sql database shell scripting.

My responsibilities in this project included:

1. Managing linux media servers farms and provide application support.
2. Patching Linux physical and xen boxes.
3. Creating Satellite channels on Satellite server.
4. Automation via shell scripting and mysql DB support.
5. Troubleshooting the customized applications.

Company - Tsys Limited

Description - Type: Development, automation & Monitoring.

Platform: Linux/Unix, windows

Software: mysql database, shell scripting.

Here my responsibility was to provide access to the users on RHDS, Cvs and dot project servers.

It also included providing access to users on dev/prod VDI servers. Handling mysql database and shell scripting to automate the tasks.

My responsibilities in this project included:

1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required.
2. Implementing mysql replication over linux servers.
3. Fine tuning the existing applications.
4. Testing & debugging the scripts for any errors.

Company - Patni Computer Systems Limited

Description - Project: CPI

Type: Development, automation & Monitoring.

Platform: P8 Filenet, Linux/Unix, IBM AIX

Software: Sound knowledge of HTML, shell scripting.

Client: Genworth Financial

Duration: 2 yrs 2 months.

Role: Senior System Engineer

CPI is a Maintenance Project that caters to maintenance/enhancements of different applications, which are a part of Genworth Imaging Solutions. It has different applications that process the scanned Insurance documents sent from different Providers and stores the information in Oracle Database and images in P8 Filenet. It has multiple applications to generate reports to be sent to providers.

Administration Support:

â€¢ Providing support to the L1 engineers.

â€¢ Monitoring P8 Filenet application.

â€¢ Handling Tickets raised by the users.

â€¢ Administration of the 10 Linux Proxy servers and mysql servers.

â€¢ Implementing mysql replication.

â€¢ Checking the logs of the sites visited by the users and the data downloaded.

Mysql / Oracle / SQL Support:

- â€¢ Preparing SQL queries for the client users.
- â€¢ Handling Oracle database.
- â€¢ Testing insert, select, update queries over servers and deploying over production.
- â€¢ Handling the bugs raised by the users.
- â€¢ Implementing mysql replication over linux servers.
- â€¢ Taking database backup through mysql dump.

Application Support:

- â€¢ To make sure that the customer applications like eProcess, Trexo are working fine.
- â€¢ To make sure all the customized filenet instances are working fine.
- â€¢ Writing scripts to automate few of the applications.

DevOps Engineer Shell scripts for Automation:
â€¢ Wrote shell script to delete the logs older than five days which was

~~Sort out the old logs everyday. Project Based C, SQL, PL/SQL,JAVA,JAVAEE,Javascript,HTML,CSS,jquery,mysql,Spring ,Hibernate. â€¢ Software Tools: Xilinx, Modelsim, Matlab, Multisim. â€¢ Operating Systems: Windows XP, Vista, 07, 08, Ubuntu. Project Profile: B.E. Project FPGA Implementation of Team Size: 4. Role: Programmer. AES Algorithm AES is Advanced Encryption Standard which is used in cryptography by which we can protect our data. It encrypted by a Secret Key. T.E. project Sorting Robot. Team Size: 3. Role: Mechanism designer. The TCS 230 sensor sorts the RGB color balls according to their color. Diploma Project RFID Based Student Team Size: 4. Role: Interface. Attendance System Using GSM. In this student show RFID card of his own and then message send via GSM to their parent that his ward is present. Education Details May 2016 B.E. Project Description:

The Scope of the project is to design & develop e-commerce product features for Sloan project. It's a basically B2B project where customer can

buy all fixers, sinks related product. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of product.

Responsibilities:

- o Detailed technical Knowledge and hands-on experience on DevOps, Automation, Build Engineering and Configuration Management.
- o Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools.
- o Developing Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files of multiple applications to various platforms.
- o Creating Repositories, branches, managing the permissions of users and maintaining GIT, Bitbucket
- o Deploying and maintaining the code and application respectively and configuring the components which increase the re-usability.
- o Working closely with Architecture, Development, Test, Security and IT Services teams.
- o Supporting Business Analysts in getting used to the newly created jobs and Release activities.
- o Communicating daily with On-Site Team
- o Analyzing the requirements and identifying gaps & tracking logs, issues.

Cloud Operations Architect (DevOps)

Cloud Operations Architect (DevOps) - DevOps

Skill Details

Cloud Computing- Experience - 48 months

Shell Scripting- Experience - 96 months

Python- Experience - 6 months

Automation- Experience - 72 months

Solution Architect- Experience - Less than 1 year months

Azure- Experience - Less than 1 year months

AWS- Experience - Less than 1 year months

Company - DevOps

Description - Type: DevOps Engineer.

Platform: AWS Cloud, Azure Cloud.

Services: AWS EC2, RDS, CloudFormation Template, Lambda, Dynamo DB, Cloud Watch, Auto-scaling, Elastic Beanstalk, Appdynamics.

Here I manage Tibco Spotfire enterprise & Cloud Product support. Being the only Ops member in India I got a chance to recruit & build entire team of 15 members. I also worked on 4 different Projects / products simultaneously and added the hired members into these products.

My responsibilities in this project include:

1. Managing Tibco Spotfire Enterprise & Cloud environment.
2. Helping India QA team with the pre-production environment for testing.
3. Coordinating production deployment & hot-fixes.
4. Leading the team and handling 4-projects.
5. Arranging workshops over new AWS services for entire Team.

Shell scripts for Automation:

â¢ Wrote shell script to extract the AWS running instances and shut it down.

â¢ Wrote shell script to extract free EIP and release those.

â¢ Wrote Lambda function to trigger important scripts.

Company - Synechron Technologies Limited

Description - Type: Administration, automation & Monitoring.

Platform: Linux/Unix, Linux-Xen Servers,

Software: Puppet, Redhat Satellite server, my-sql database shell scripting.

My responsibilities in this project included:

1. Managing linux media servers farms and provide application support.
2. Patching Linux physical and xen boxes.
3. Creating Satellite channels on Satellite server.
4. Automation via shell scripting and mysql DB support.
5. Troubleshooting the customized applications.

Company - Tsys Limited

Description - Type: Development, automation & Monitoring.

Platform: Linux/Unix, windows

Software: mysql database, shell scripting.

Here my responsibility was to provide access to the users on RHDS, Cvs and dot project servers.

It also included providing access to users on dev/prod VDI servers. Handling mysql database and shell scripting to automate the tasks.

My responsibilities in this project included:

1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required.
2. Implementing mysql replication over linux servers.
3. Fine tuning the existing applications.
4. Testing & debugging the scripts for any errors.

company - Patni Computer Systems Limited

description - Project: CPI

Type: Development, automation & Monitoring.

Platform: P8 Filenet, Linux/Unix, IBM AIX

Software: Sound knowledge of HTML, shell scripting.

Client: Genworth Financial

Duration: 2 yrs 2 months.

Role: Senior System Engineer

CPI is a Maintenance Project that caters to maintenance/enhancements of different applications, which are a part of Genworth Imaging Solutions. It has different applications that process the scanned Insurance documents sent from different Providers and stores the information in Oracle Database and images in P8 Filenet. It has multiple applications to generate reports to be sent to providers.

Administration Support:

- â¢ Providing support to the L1 engineers.
- â¢ Monitoring P8 Filenet application.
- â¢ Handling Tickets raised by the users.
- â¢ Administration of the 10 Linux Proxy servers and mysql servers.
- â¢ Implementing mysql replication.
- â¢ Checking the logs of the sites visited by the users and the data downloaded.

Mysql / Oracle / SQL Support:

- â¢ Preparing SQL queries for the client users.
- â¢ Handling Oracle database.
- â¢ Testing insert, select, update queries over servers and deploying over production.
- â¢ Handling the bugs raised by the users.
- â¢ Implementing mysql replication over linux servers.
- â¢ Taking database backup through mysql dump.

Application Support:

- â¢ To make sure that the customer applications like eProcess, Trexo are working fine.
- â¢ To make sure all the customized filenet instances are working fine.
- â¢ Writing scripts to automate few of the applications.

Shell scripts for Automation:

- â¢ Wrote shell script to delete the logs older than five days which was successfully deployed over Production servers.

Project Description:
The Scope of the project is to design & develop e-commerce product features for sloan project. It's a basically B2B project where customer can buy all fixers, sinks related product. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of product.

Responsibilities:

- o Detailed technical Knowledge and hands-on experience on DevOps, Automation, Build Engineering and Configuration Management.
- o Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools.
- o Developing Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files of multiple applications to various platforms.
- o Creating Repositories, branches, managing the permissions of users and maintaining GIT, Bitbucket
- o Deploying and maintaining the code and application respectively and configuring the components which increase the re-usability.
- o Working closely with Architecture, Development, Test, Security and IT Services teams.
- o Supporting Business Analysts in getting used to the newly created jobs and Release activities.
- o Communicating daily with On-Site Team
- o Analyzing the requirements and identifying gaps & tracking logs, issues.

PROJECT 2

Nendrasys Technologies Pvt Ltd.,

Cloud Operations Architect (DevOps) - DevOps

Skill Details

Cloud Computing- Experience - 48 months
Shell Scripting- Experience - 96 months
Python- Experience - 6 months
Automation- Experience - 72 months
Solution Architect- Experience - Less than 1 year months
Azure- Experience - Less than 1 year months
AWS- Experience - Less than 1 year months
Company Details
company - DevOps
description - Type: DevOps Engineer.
Platform: AWS Cloud, Azure Cloud.
Services: AWS EC2, RDS, CloudFormation Template, Lambda, Dynamo DB, Cloud Watch, Auto-scaling, Elastic Beanstalk, Appdynamics.

Here I manage Tibco Spotfire enterprise & Cloud Product support. Being the only Ops member in India I got a chance to recruit & build entire team of 15 members. I also worked on 4 different Projects / products simultaneously and added the hired members into these products.

My responsibilities in this project include:

1. Managing Tibco Spotfire Enterprise & Cloud environment.
2. Helping India QA team with the pre-production environment for testing.
3. Coordinating production deployment & hot-fixes.
4. Leading the team and handling 4-projects.
5. Arranging workshops over new AWS services for entire Team.

Shell scripts for Automation:

↳ Wrote shell script to extract the AWS running instances and shut it down.
↳ Wrote shell script to extract free EIP and release those.
↳ Wrote Lambda function to trigger important scripts.
company - Synechron Technologies Limited
description - Type: Administration, automation & Monitoring.
Platform: Linux/Unix, Linux-Xen Servers,
Software: Puppet, Redhat Satellite server, my-sql database shell scripting.

My responsibilities in this project included:

1. Managing linux media servers farms and provide application support.
 2. Patching Linux physical and xen boxes.
 3. Creating Satellite channels on Satellite server.
 4. Automation via shell scripting and mysql DB support.
 5. Troubleshooting the customized applications.
- company - Tsys Limited
description - Type: Development, automation & Monitoring.
Platform: Linux/Unix, windows
Software: mysql database, shell scripting.

Here my responsibility was to provide access to the users on RHDS, Cvs and dot project servers.

It also included providing access to users on dev/prod VDI servers. Handling mysql database and shell scripting to automate the tasks.

My responsibilities in this project included:

1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required.
2. Implementing mysql replication over linux servers.
3. Fine tuning the existing applications.
4. Testing & debugging the scripts for any errors.

company - Patni Computer Systems Limited

description - Project: CPI

Type: Development, automation & Monitoring.

Platform: P8 Filenet, Linux/Unix, IBM AIX

Software: Sound knowledge of HTML, shell scripting.

Client: Genworth Financial

Duration: 2 yrs 2 months.

Role: Senior System Engineer

CPI is a Maintenance Project that caters to maintenance/enhancements of different applications, which are a part of Genworth Imaging Solutions. It has different applications that process the scanned Insurance documents sent from different Providers and stores the information in Oracle Database and images in P8 Filenet. It has multiple applications to generate reports to be sent to providers.

Administration Support:

- â¢ Providing support to the L1 engineers.
- â¢ Monitoring P8 Filenet application.
- â¢ Handling Tickets raised by the users.
- â¢ Administration of the 10 Linux Proxy servers and mysql servers.
- â¢ Implementing mysql replication.
- â¢ Checking the logs of the sites visited by the users and the data downloaded.

Mysql / Oracle / SQL Support:

- â¢ Preparing SQL queries for the client users.
- â¢ Handling Oracle database.
- â¢ Testing insert, select, update queries over servers and deploying over production.
- â¢ Handling the bugs raised by the users.
- â¢ Implementing mysql replication over linux servers.
- â¢ Taking database backup through mysql dump.

Application Support:

- â¢ To make sure that the customer applications like eProcess, Trexo are working fine.
- â¢ To make sure all the customized filenet instances are working fine.
- â¢ Writing scripts to automate few of the applications.

Shell scripts for Automation:

- DevOps Engineer
- â¢ Wrote shell script to delete the logs older than five days which was successfully deployed over Production servers.

C

Software Proficiency: Languages: Basics of C, SQL, PL/SQL, JAVA, JAVAAE, Javascript, HTML, CSS, jquery, mysql, Spring, Hibernate. Software Tools: Xilinx, Modelsim, Matlab, Multisim. Operating Systems: Windows XP, Vista, 07, 08, Ubuntu. Project Profile: B.E. Project FPGA Implementation of Team Size: 4. Role: Programmer. AES Algorithm AES is Advanced Encryption Standard which is used in cryptography by which we can protect our data. It encrypted by a Secret Key. T.E. project Sorting Robot. Team Size: 3. Role: Mechanism designer. The TCS 230 sensor sorts the RGB color balls according to their color. Diploma Project RFID Based Student Team Size: 4. Role: Interface. Attendance System Using GSM. In this student show RFID card of his own and then message send via GSM to their parent that his ward is present. Education Details May 2016 B.E. company - Nendrasys Technologies Pvt Ltd

description - Date

Project Description:

The Scope of the project is to design & develop e-commerce product features for Sloan project. It's a basically B2B project where customer can buy all fixtures, sinks related products. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of products.

Responsibilities:

- o Detailed technical knowledge and hands-on experience on DevOps, Automation, Build Engineering and Configuration Management.
- o Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools.
- o Developing Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files of multiple applications to various platforms.

- o Creating Repositories, branches, managing the permissions of users and maintaining GIT, Bitbucket
- o Deploying and maintaining the code and application respectively and configuring the components which increase the re-usability.
- o Working closely with Architecture, Development, Test, Security and IT Services teams.
- o Supporting Business Analysts in getting used to the newly created jobs and Release activities.
- o Communicating daily with On-Site Team
- o Analyzing the requirements and identifying gaps & tracking logs, issues.

PROJECT 2

Nendrasys Technologies Pvt Ltd.,
 Project Name: Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment portal)
 company - Nendrasys Technologies Pvt Ltd
 description - Role: Devops Engineer
 â¢ Devops Engineer for a team that involved different development teams and multiple simultaneous software releases
 â¢ Participated in weekly release meetings with different teams to identify and mitigate potential risks associated with the releases.
 â¢ Responsible for Creating Repositories, branches, managing the permissions of users and maintaining GIT.
 â¢ Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
 â¢ Analyze and resolve conflicts related to merging of source code for GIT
 â¢ Responsible for creating Ant and Maven scripts for build automation.
 â¢ Implemented the setup for Master slave architecture to improve the Performance of Jenkins.
 â¢ Handled end-to-end deployments and code propagation's across different environments, DEV to PROD.
 â¢ Handled the tasks of developing and maintaining the Change Tasks.
 â¢ Closely working with Developers, QA, Performance, UAT testers, IT Team.
 â¢ Created and maintained documentation of build and release processes and application configuration
 â¢ Coordinated with developers, Business Analyst and Managers to make sure that code is deployed in the Production environment.

PROJECT 1

Nendrasys Technologies Pvt Ltd.,
 Project Name: Sloan Global Holdings (Sloan) (E-commerce)
 company - Nendrasys Technologies Pvt Ltd
 description - Project Description:
 BBL is development of an e-commerce payment portal System. As such BBL require a system which can support multiple merchants B2B/B2C e-commerce portal with various payment options via both online and offline. To achieve this BBL had made an agreement with Thai Trade, Thai Trade is one of the leading e-commerce website recognized by Thai government. In present Thai trade has a good base of users and sellers in several categories .The scope of the project is to design and develop e-commerce product features for BBLWTP project. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of electronics.

Responsibilities:

- o Plan and track activities involved for build and deployment.
- o Resolving build issues
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.

- o Resolving build issues
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Collaboration with Development, QA, Product managements on build plans & schedules
- o Send daily and weekly reports to the team.
- o Involved in creating repositories, branches, merging activities, backup and restore activities in subversion servers.
- o Maintenance of Maven, shell scripts for safe builds and deploys.

Cloud Operations Architect (DevOps) - DevOps

Skill Details

Cloud Computing- Experience - 48 months

Shell Scripting- Experience - 96 months

Python- Experience - 6 months

Automation- Experience - 72 months

Solution Architect- Experience - Less than 1 year months

Azure- Experience - Less than 1 year months

AWS- Experience - Less than 1 year months

Company - DevOps

Description - Type: DevOps Engineer.

Platform: AWS Cloud, Azure Cloud.

Services: AWS EC2, RDS, CloudFormation Template, Lambda, Dynamo DB, Cloud Watch, Auto-scaling, Elastic Beanstalk, Appdynamics.

Here I manage Tibco Spotfire enterprise & Cloud Product support. Being the only Ops member in India I got a chance to recruit & build entire team of 15 members. I also worked on 4 different Projects / products simultaneously and added the hired members into these products.

My responsibilities in this project include:

1. Managing Tibco Spotfire Enterprise & Cloud environment.
2. Helping India QA team with the pre-production environment for testing.
3. Coordinating production deployment & hot-fixes.
4. Leading the team and handling 4-projects.
5. Arranging workshops over new AWS services for entire Team.

Shell scripts for Automation:

↳ Wrote shell script to extract the AWS running instances and shut it down.

↳ Wrote shell script to extract free EIP and release those.

↳ Wrote Lambda function to trigger important scripts.

Company - Synechron Technologies Limited

Description - Type: Administration, automation & Monitoring.

Platform: Linux/Unix, Linux-Xen Servers,

Software: Puppet, Redhat Satellite server, my-sql database shell scripting.

My responsibilities in this project included:

1. Managing linux media servers farms and provide application support.
2. Patching Linux physical and xen boxes.
3. Creating Satellite channels on Satellite server.
4. Automation via shell scripting and mysql DB support.
5. Troubleshooting the customized applications.

Company - Tsys Limited

Description - Type: Development, automation & Monitoring.

Platform: Linux/Unix, windows

Software: mysql database, shell scripting.

Here my responsibility was to provide access to the users on RHDS, Cvs and dot project servers.

It also included providing access to users on dev/prod VDI servers. Handling mysql database and shell scripting to automate the tasks.

My responsibilities in this project included:

1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required.
2. Implementing mysql replication over linux servers.
3. Fine tuning the existing applications.
4. Testing & debugging the scripts for any errors.

Company - Patni Computer Systems Limited

Description - Project: CPI

Type: Development, automation & Monitoring.

Platform: P8 Filenet, Linux/Unix, IBM AIX

Software: Sound knowledge of HTML, shell scripting.

Client: Genworth Financial

Duration: 2 yrs 2 months.

Role: Senior System Engineer

CPI is a Maintenance Project that caters to maintenance/enhancements of different applications, which are a part of Genworth Imaging Solutions. It has different applications that process the scanned Insurance documents sent from different Providers and stores the information in Oracle Database and images in P8 Filenet. It has multiple applications to generate reports to be sent to providers.

Administration Support:

- â€¢ Providing support to the L1 engineers.
- â€¢ Monitoring P8 Filenet application.
- â€¢ Handling Tickets raised by the users.
- â€¢ Administration of the 10 Linux Proxy servers and mysql servers.
- â€¢ Implementing mysql replication.
- â€¢ Checking the logs of the sites visited by the users and the data downloaded.

Mysql / Oracle / SQL Support:

- â€¢ Preparing SQL queries for the client users.
 - â€¢ Handling Oracle database.
 - â€¢ Testing insert, select, update queries over servers and deploying over production.
 - â€¢ Handling the bugs raised by the users.
 - â€¢ Implementing mysql replication over linux servers.
 - â€¢ Taking database backup through mysql dump.

Application Support:

- â€¢ To make sure that the customer applications like eProcess, Trexo are working fine.
 - â€¢ To make sure all the customized filenet instances are working fine.
 - â€¢ Writing scripts to automate few of the applications.

Shell scripts for Automation:

DevOps Engineer Wrote shell script to delete the logs older than five days which was successfully deployed over Production servers.

B

Software Proficiency: Languages: Basics of C, SQL, PL/SQL, JAVA, JAVAAE, Javascript, HTML, CSS, jquery, mysql, Spring ,Hibernate. Software Tools: Xillinx, Modelsim, Matlab, Multisim. Operating Systems: Windows XP, Vista, 07, 08, Ubuntu. Project Profile: B.E. Project FPGA Implementation of Team Size: 4. Role: Programmer. AES Algorithm AES is Advanced Encryption Standard which is used in cryptography by which we can protect our data. It encrypted by a Secret Key. T.E. project Sorting Robot. Team Size: 3. Role: Mechanism designer. The TCS 230 sensor sorts the RGB color balls according to their color. Diploma Project RFID Based Student Team Size: 4. Role: Interface. Attendance System Using GSM. In this student show RFID card of his own and then message send via GSM to their parent that his ward is present. Education Details May 2016 B.E. Savitribai Phule Pune, Maharashtra Pune University March 2010 S.S.C Maharashtra Board DevOps Engineer

Project Description:

The Scope of the project is to design & develop e-commerce product features for Sloan project. It's a basically B2B project where customer can buy all fixers, sinks related product. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of product.

Responsibilities:

- o Detailed technical Knowledge and hands-on experience on DevOps, Automation, Build Engineering and Configuration Management.
- o Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools.
- o Developing Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files of multiple applications to various platforms.
- o Creating Repositories, branches, managing the permissions of users and maintaining GIT, Bitbucket
- o Deploying and maintaining the code and application respectively and configuring the components which increase the re-usability.
- o Working closely with Architecture, Development, Test, Security and IT Services teams.
- o Supporting Business Analysts in getting used to the newly created jobs and Release activities.
- o Communicating daily with On-Site Team
- o Analyzing the requirements and identifying gaps & tracking logs, issues.

PROJECT 2

Nendrasys Technologies Pvt Ltd.,
Project Name: Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment portal)
company - Nendrasys Technologies Pvt Ltd
description - Role: Devops Engineer

- â€¢ Devops Engineer for a team that involved different development teams and multiple simultaneous software releases
- â€¢ Participated in weekly release meetings with different teams to identify and mitigate potential risks associated with the releases.
- â€¢ Responsible for Creating Repositories, branches, managing the permissions of users and maintaining GIT.
- â€¢ Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
- â€¢ Analyze and resolve conflicts related to merging of source code for GIT
- â€¢ Responsible for creating Ant and Maven scripts for build automation.
- â€¢ Implemented the setup for Master slave architecture to improve the Performance of Jenkins.
- â€¢ Handled end-to-end deployments and code propagation's across different environments, DEV to PROD.
- â€¢ Handled the tasks of developing and maintaining the Change Tasks.
- â€¢ Closely working with Developers, QA, Performance, UAT testers, IT Team.
- â€¢ Created and maintained documentation of build and release processes and application configuration
- â€¢ Coordinated with developers, Business Analyst and Managers to make sure that code is deployed in the Production environment.

PROJECT 1

1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required.
2. Implementing mysql replication over linux servers.
3. Fine tuning the existing applications.
4. Testing & debugging the scripts for any errors.

company - Patni Computer Systems Limited

description - Project: CPI

Type: Development, automation & Monitoring.

Platform: P8 Filenet, Linux/Unix, IBM AIX

Software: Sound knowledge of HTML, shell scripting.

Client: Genworth Financial

Duration: 2 yrs 2 months.

Role: Senior System Engineer

CPI is a Maintenance Project that caters to maintenance/enhancements of different applications, which are a part of Genworth Imaging Solutions. It has different applications that process the scanned Insurance documents sent from different Providers and stores the information in Oracle Database and images in P8 Filenet. It has multiple applications to generate reports to be sent to providers.

Administration Support:

- â€¢ Providing support to the L1 engineers.
- â€¢ Monitoring P8 Filenet application.
- â€¢ Handling Tickets raised by the users.
- â€¢ Administration of the 10 Linux Proxy servers and mysql servers.
- â€¢ Implementing mysql replication.
- â€¢ Checking the logs of the sites visited by the users and the data downloaded.

Mysql / Oracle / SQL Support:

- â€¢ Preparing SQL queries for the client users.
- â€¢ Handling Oracle database.
- â€¢ Testing insert, select, update queries over servers and deploying over production.
- â€¢ Handling the bugs raised by the users.
- â€¢ Implementing mysql replication over linux servers.
- â€¢ Taking database backup through mysql dump.

Application Support:

- â€¢ To make sure that the customer applications like eProcess, Trexo are working fine.
- â€¢ To make sure all the customized filenet instances are working fine.
- â€¢ Writing scripts to automate few of the applications.

DevOps
Engineer

Shell scripts for Automation:

- â€¢ Wrote shell script to delete the logs older than five days which was successfully deployed over Production servers.

B

Software Proficiency: Languages: Basics of C, SQL, PL/SQL, JAVA, JAVAAE, Javascript, HTML, CSS, jquery, mysql, Spring, Hibernate. Software Tools: Xilinx, Modelsim, Matlab, Multisim. Operating Systems: Windows XP, Vista, 07, 08, Ubuntu. Project Profile: B.E. Project FPGA Implementation of Team Size: 4. Role: Programmer. AES Algorithm AES is Advanced Encryption Standard which is used in cryptography by which we can protect our data. It encrypted by a Secret Key. T.E. project Sorting Robot. Team Size: 3. Role: Mechanism designer. The TCS 230 sensor sorts the RGB color balls according to their color. Diploma Project RFID Based Student Team Size: 4. Role: Interface. Attendance System Using GSM. In this student show RFID card of his own and then message send via GSM to their parent that his ward is present. Education Details May 2016 B.E. Project Description:
The Scope of the project is to design & develop e-commerce product features for Sloan project. It's a basically B2B project where customer can buy all fixtures, sinks related products. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of products.

Responsibilities:

- o Detailed technical knowledge and hands-on experience on DevOps, Automation, Build Engineering and Configuration Management.
- o Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools.
- o Developing Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files of multiple applications to various platforms.

- o Creating Repositories, branches, managing the permissions of users and maintaining GIT, Bitbucket
- o Deploying and maintaining the code and application respectively and configuring the components which increase the re-usability.
- o Working closely with Architecture, Development, Test, Security and IT Services teams.
- o Supporting Business Analysts in getting used to the newly created jobs and Release activities.
- o Communicating daily with On-Site Team
- o Analyzing the requirements and identifying gaps & tracking logs, issues.

PROJECT 2

Nendrasys Technologies Pvt Ltd.,
 Project Name: Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment portal)
 company - Nendrasys Technologies Pvt Ltd
 description - Role: Devops Engineer
 â¢ Devops Engineer for a team that involved different development teams and multiple simultaneous software releases
 â¢ Participated in weekly release meetings with different teams to identify and mitigate potential risks associated with the releases.
 â¢ Responsible for Creating Repositories, branches, managing the permissions of users and maintaining GIT.
 â¢ Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
 â¢ Analyze and resolve conflicts related to merging of source code for GIT
 â¢ Responsible for creating Ant and Maven scripts for build automation.
 â¢ Implemented the setup for Master slave architecture to improve the Performance of Jenkins.
 â¢ Handled end-to-end deployments and code propagation's across different environments, DEV to PROD.
 â¢ Handled the tasks of developing and maintaining the Change Tasks.
 â¢ Closely working with Developers, QA, Performance, UAT testers, IT Team.
 â¢ Created and maintained documentation of build and release processes and application configuration
 â¢ Coordinated with developers, Business Analyst and Managers to make sure that code is deployed in the Production environment.

PROJECT 1

Nendrasys Technologies Pvt Ltd.,
 Project Name: Sloan Global Holdings (Sloan) (E-commerce)
 company - Nendrasys Technologies Pvt Ltd
 description - Project Description:
 BBL is development of an e-commerce payment portal System. As such BBL require a system which can support multiple merchants B2B/B2C e-commerce portal with various payment options via both online and offline. To achieve this BBL had made an agreement with Thai Trade, Thai Trade is one of the leading e-commerce website recognized by Thai government. In present Thai trade has a good base of users and sellers in several categories .The scope of the project is to design and develop e-commerce product features for BBLWTP project. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of electronics.

Responsibilities:

- o Plan and track activities involved for build and deployment.
- o Resolving build issues
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Collaboration with Development, QA, Product managements on build plans & schedules
- o Send daily and weekly reports to the team.
- o Involved in creating repositories, branches, merging activities, backup and restore activities in subversion servers.

Cloud Operations Architect (DevOps)

Cloud Operations Architect (DevOps) - DevOps

Skill Details

Cloud Computing- Experience - 48 months

Shell Scripting- Experience - 96 months

Python- Experience - 6 months

Automation- Experience - 72 months

Solution Architect- Experience - Less than 1 year months

Azure- Experience - Less than 1 year months

AWS- Experience - Less than 1 year months

Company - DevOps

Description - Type: DevOps Engineer.

Platform: AWS Cloud, Azure Cloud.

Services: AWS EC2, RDS, CloudFormation Template, Lambda, Dynamo

DB, Cloud Watch, Auto-scaling, Elastic Beanstalk, Appdynamics.

Here I manage Tibco Spotfire enterprise & Cloud Product support. Being the only Ops member in India I got a chance to recruit & build entire team of 15 members. I also worked on 4 different Projects / products simultaneously and added the hired members into these products.

My responsibilities in this project include:

1. Managing Tibco Spotfire Enterprise & Cloud environment.
2. Helping India QA team with the pre-production environment for testing.
3. Coordinating production deployment & hot-fixes.
4. Leading the team and handling 4-projects.
5. Arranging workshops over new AWS services for entire Team.

Shell scripts for Automation:

â€¢ Wrote shell script to extract the AWS running instances and shut it down.

â€¢ Wrote shell script to extract free EIP and release those.

â€¢ Wrote Lambda function to trigger important scripts.

Company - Synechron Technologies Limited

Description - Type: Administration, automation & Monitoring.

Platform: Linux/Unix, Linux-Xen Servers,

Software: Puppet, Redhat Satellite server, my-sql database shell scripting.

My responsibilities in this project included:

1. Managing linux media servers farms and provide application support.
2. Patching Linux physical and xen boxes.
3. Creating Satellite channels on Satellite server.
4. Automation via shell scripting and mysql DB support.
5. Troubleshooting the customized applications.

Company - Tsys Limited

Description - Type: Development, automation & Monitoring.

Platform: Linux/Unix, windows

Software: mysql database, shell scripting.

Here my responsibility was to provide access to the users on RHDS, Cvs and dot project servers.

It also included providing access to users on dev/prod VDI servers. Handling mysql database and shell scripting to automate the tasks.

My responsibilities in this project included:

1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required.
2. Implementing mysql replication over linux servers.
3. Fine tuning the existing applications.
4. Testing & debugging the scripts for any errors.

Software: mysql database, shell scripting.

Here my responsibility was to provide access to the users on RHDS, Cvs and dot project servers.

It also included providing access to users on dev/prod VDI servers. Handling mysql database and shell scripting to automate the tasks.

My responsibilities in this project included:

1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required.
2. Implementing mysql replication over linux servers.
3. Fine tuning the existing applications.
4. Testing & debugging the scripts for any errors.

Company - Patni Computer Systems Limited

Description - Project: CPI

Type: Development, automation & Monitoring.

Platform: P8 Filenet, Linux/Unix, IBM AIX

Software: Sound knowledge of HTML, shell scripting.

Client: Genworth Financial

Duration: 2 yrs 2 months.

Role: Senior System Engineer

CPI is a Maintenance Project that caters to maintenance/enhancements of different applications, which are a part of Genworth Imaging Solutions. It has different applications that process the scanned Insurance documents sent from different Providers and stores the information in Oracle Database and images in P8 Filenet. It has multiple applications to generate reports to be sent to providers.

Administration Support:
 â€¢ Providing support to the L1 engineers.
 â€¢ Monitoring P8 Filenet application.
 â€¢ Handling Tickets raised by the users.
 â€¢ Administration of the 10 Linux Proxy servers and mysql servers.
 â€¢ Implementing mysql replication.
 â€¢ Checking the logs of the sites visited by the users and the data downloaded.

Mysql / Oracle / SQL Support:
 â€¢ Preparing SQL queries for the client users.
 â€¢ Handling Oracle database.
 â€¢ Testing insert, select, update queries over servers and deploying over production.
 â€¢ Handling the bugs raised by the users.
 â€¢ Implementing mysql replication over linux servers.
 â€¢ Taking database backup through mysql dump.

Application Support:
 â€¢ To make sure that the customer applications like eProcess, Trexo are working fine.
 â€¢ To make sure all the customized filenet instances are working fine.
 â€¢ Writing scripts to automate few of the applications.

DevOps Engineer

Shell scripts for Automation:
 â€¢ Wrote shell script to delete the logs older than five days which was successfully deployed over Production servers. E
 Software Proficiency: â€¢ Languages: Basics of C, SQL, PL/SQL, JAVA, JAVAAE, Javascript, HTML, CSS, jquery, mysql, Spring, Hibernate. â€¢ Software Tools: Xilinx, Modelsim, Matlab, Multisim. â€¢ Operating Systems: Windows XP, Vista, 07, 08, Ubuntu. Project Profile:
 B.E. Project FPGA Implementation of Team Size: 4. Role: Programmer.
 AES Algorithm AES is Advanced Encryption Standard which is used in cryptography by which we can protect our data. It encrypted by a Secret Key. T.E. project Sorting Robot. Team Size: 3. Role: Mechanism designer.
 The TCS 230 sensor sorts the RGB color balls according to their color.
 Diploma Project RFID Based Student Team Size: 4. Role: Interface.
 Attendance System Using GSM. In this student show RFID card of his own and then message send via GSM to their parent that his ward is present.

Git- Experience - 27 months

DOCUMENTATION- Experience - 26 months
CHANGE MANAGEMENT- Experience - 10 months
CONFIGURATION MANAGEMENT- Experience - 10 months

Company Details

company - Nendrasys Technologies Pvt Ltd
description - Date

Project Description:

The Scope of the project is to design & develop e-commerce product features for Sloan project. It's a basically B2B project where customer can buy all fixtures, sinks related product. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of product.

Responsibilities:

- o Detailed technical Knowledge and hands-on experience on DevOps, Automation, Build Engineering and Configuration Management.
- o Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools.
- o Developing Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files of multiple applications to various platforms.
- o Creating Repositories, branches, managing the permissions of users and maintaining GIT, Bitbucket
- o Deploying and maintaining the code and application respectively and configuring the components which increase the re-usability.
- o Working closely with Architecture, Development, Test, Security and IT Services teams.
- o Supporting Business Analysts in getting used to the newly created jobs and Release activities.
- o Communicating daily with On-Site Team
- o Analyzing the requirements and identifying gaps & tracking logs, issues.

PROJECT 2

Nendrasys Technologies Pvt Ltd.,

Project Name: Bangkok Bank Limited (BBL) Thaitrade (Commercial, E-commerce & Payment portal)

Company - Nendrasys Technologies Pvt Ltd

Description - Role: Devops Engineer

- â€¢ Devops Engineer for a team that involved different development teams and multiple simultaneous software releases
- â€¢ Participated in weekly release meetings with different teams to identify and mitigate potential risks associated with the releases.
- â€¢ Responsible for Creating Repositories, branches, managing the permissions of users and maintaining GIT.
- â€¢ Creating fully automated CI build and deployment infrastructure and processes for multiple projects.
- â€¢ Analyze and resolve conflicts related to merging of source code for GIT
- â€¢ Responsible for creating Ant and Maven scripts for build automation.
- â€¢ Implemented the setup for Master slave architecture to improve the Performance of Jenkins.
- â€¢ Handled end-to-end deployments and code propagation's across different environments, DEV to PROD.
- â€¢ Handled the tasks of developing and maintaining the Change Tasks.
- â€¢ Closely working with Developers, QA, Performance, UAT testers, IT Team.
- â€¢ Created and maintained documentation of build and release processes and application configuration
- â€¢ Coordinated with developers, Business Analyst and Managers to make sure that code is deployed in the Production environment.

PROJECT 1

Nendrasys Technologies Pvt Ltd.,

Project Name: Sloan Global Holdings (Sloan) (E-commerce)

Company - Nendrasys Technologies Pvt Ltd

Description - Project Description:

BBL is development of an e-commerce payment portal System. As such BBL require a system which can support multiple merchants B2B/B2C e-commerce portal with various payment options via both online and offline. To achieve this BBL had made an agreement with Thai Trade, Thai Trade is one of the leading e-

commerce website recognized by Thai government. In present Thai trade has a good base of users and sellers in several categories .The scope of the project is to design and develop e-commerce product features for BBLWTP project. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of electronics.

Responsibilities:

- o Plan and track activities involved for build and deployment.
- o Resolving build issues
- o Developing scripts for build, deployment, maintenance and related tasks using Jenkins.
- o Collaboration with Development, QA, Product managements on build plans & schedules
- o Send daily and weekly reports to the team.
- o Involved in creating repositories, branches, merging activities, backup and restore activities in subversion servers.

company - DevOps

description - Type: DevOps Engineer.

Platform: AWS Cloud, Azure Cloud.

Services: AWS EC2, RDS, CloudFormation Template, Lambda, Dynamo DB, Cloud Watch, Auto-scaling, Elastic Beanstalk, Appdynamics.

Here I manage Tibco Spotfire enterprise & Cloud Product support. Being the only Ops member in India I got a chance to recruit & build entire team of 15 members. I also worked on 4 different Projects / products simultaneously and added the hired members into these products.

My responsibilities in this project include:

1. Managing Tibco Spotfire Enterprise & Cloud environment.
2. Helping India QA team with the pre-production environment for testing.
3. Coordinating production deployment & hot-fixes.
4. Leading the team and handling 4-projects.
5. Arranging workshops over new AWS services for entire Team.

Shell scripts for Automation:

â€¢ Wrote shell script to extract the AWS running instances and shut it down.

â€¢ Wrote shell script to extract free EIP and release those.

â€¢ Wrote Lambda function to trigger important scripts.

company - Synechron Technologies Limited

description - Type: Administration, automation & Monitoring.

Platform: Linux/Unix, Linux-Xen Servers,

Software: Puppet, Redhat Satellite server, my-sql database shell scripting.

My responsibilities in this project included:

1. Managing linux media servers farms and provide application support.
2. Patching Linux physical and xen boxes.
3. Creating Satellite channels on Satellite server.
4. Automation via shell scripting and mysql DB support.
5. Troubleshooting the customized applications.

company - Tsys Limited

Network Security, Network Administration, Firewall and VPN Configuration, Routing and Switching.- Exprience - 24 months

Company Details

company - Karvy Innotech LTD.

description - Â Managing network of Mahindra & Mahindra Financial services limited, both internal and at PAN India level.

Â Installation, setup / configuration, troubleshooting, Tuning, diagnostics and maintenance of IT security related Equipment.

Â Maintaining all network devices such as Routers, Switches, Firewall, Wi-Fi Devices.

Â Troubleshoot performance and availability issues on security devices such as firewalls, UTM, Content Filtering solutions and Handling daily calls related to network and network security.

Â Manage and administer the VPN connectivity with organization's clients.

Â Implement Policy Changes, Configure URL filtering & security policies onÂ UTM appliances.

Â Monitor alerts received from the monitoring systems and take appropriate action based on the defined processes.

Â Follow the SLAâs and procedures already defined for security device management.

Â Co-ordinating with ISPs like TATA, Airtel, Reliance, Vodafone, Sify, Tikona & HCL Comnet for all WAN related issues.

Â Configuration and Troubleshooting of Site to Site (IPSEC) VPN between HO and Remote Branches.

Â Maintaining inventory on monthly basis of all network devices.

Â LAN Connectivity issues, Crimping, Rack Mounting.

Reporting to CISO of Mahindra Finance for all network related queries and solutions

E

Network Security Engineer

Technical Expertise: Cisco ASA, Checkpoint firewall (GAIA, Splat), Palo Alto firewalls
Firewall management tools: Cisco security management (CSM), Checkpoint Smart center, Palo Alto Panorama
F5 load balancer (LTM)
Networking Hands on Cisco Router and Cisco Switches,
Security Management & Event Management: RSAEnvision 4.1, Ticketing tools - BMC Remedy, Service-now
Other Technologies: Software languages: Python, VB Scripting

Education Details
January 2006 to January 2010 Bachelor of Engineering Information Technology Mumbai, Maharashtra Mumbai University
Senior Network security Analyst

Senior Network security Analyst - Accenture

Skill Details

FIREWALLS- Experience - 97 months

CISCO- Experience - 89 months

SECURITY- Experience - 72 months

FIREWALL- Experience - 45 months

CHECKPOINT- Experience - 44 months

Company - Accenture

Description - Install, configure, upgrades and troubleshoot Cisco ASA

firewalls (5500-X) which includes Single and multi-context firewalls

F5 LTM configuration (VIP, pools), SSL offloading, certificate renewals,

Code upgrade and troubleshoot issues

Pulse secure (Juniper) management includes creating Roles/ Realm, polices for remote access, reverse proxy and Code upgrade

PAC file configuration

Preparing design documents (HLD, LLD), IP Schema and Configuration of all network devices as per customer requirements in data center environment

Incident Management, Change management, Problem Management (ITIL process)

Key projects- Worked on resiliency project like firewall policy lockdown. Software code upgrade on all firewalls and load balancers. End to end coordination for firewall deployment

Tools: Cisco security manager 4.x

Company - Zensar Technologies

Description - Install, Upgrades Checkpoint firewalls GAIA R75, R77 and policy deployment

Troubleshoot checkpoint firewalls, Palo alto firewall and Cisco ASA's for multiple sites belongs to US, Canada and EMEA region.

Configure, upgrades, troubleshoot Cisco Routers (Cisco 29xx, 28xx, 19xx) and Cisco switches (2960, 3560) and Cisco Meraki AP in Meraki Cloud

F5 LTM configuration and troubleshooting the operational issues

Company - Infosys Technologies

Description - Responsibilities:

Install, configure, upgrade and troubleshoot checkpoint firewalls, Cisco Routers, Switches

Configure, monitor and troubleshoot issues within organization LAN, WAN and customer

Connectivity networks.

Interface with vendors and service providers ensuring that hardware or software problems were dealt with efficiently and effectively, with minimal downtime

Company - HCL-Comnet

Description - Responsibilities:

Event monitoring and administration of RSA enVision 4.1 SIEM.

Proficient in researching traffic patterns to identify false-positives and/or malicious traffic within IDS, IPS, scanners (Qualis) and firewalls.

Experience in writing correlation rules, parsers & developing UDS for unsupported device logs.

Analyze a large volume of security events while maintaining a high quality of analysis

Change Configuration Management exposure

Company - Wipro Technologies

Description - Administrator, Manage and troubleshoot multi-vendor Network Infrastructure consisting of Cisco, Juniper Platforms (Cisco Router 3845, Cisco stack-wise switches 3750E and 2960 access switch, Cisco 4500 chassis, Cisco 5550/20 ASA firewalls, Juniper SA 6500 SSL VPN)

Provisioning and troubleshooting access issues related to RSA and Entrust (2FA) User Accounts.

Taking all network and security devices configuration back up on weekly and monthly basis.

Project Routers, Switches and Server Configuration with Group Policies

Client Railwire/Railtel Corporation of India Ltd., Mumbai

Type of Project Configuration of WiFi AP of Railway Station in Maharashtra
State

Role Sr. Network Engineer

Roles & responsibilities

â€¢ Earthing, trenching for equipment.

â€¢ Making plans for preparing station to WiFi environment including cabling,
installation, commissioning, handing over etc.

â€¢ Implementing and maintaining backup schedules.

â€¢ Upgrading and backups of Cisco router configuration files.

â€¢ Installation, Configuration and Administration of Windows Servers 2008
R2, 2012 R2, 2016 Active Directory, FTP, DNS, DHCP, TFTP.

â€¢ Troubleshooting LAN & WAN infrastructure.

â€¢ Settings of the networking devices (Cisco Router, switches) co-
ordinating with the system/network administrator during implementation.

â€¢ Regular Health Checking of File Servers & Application Servers for
Security violation, Disk Spaces etc.

â€¢ Maintaining & Management, windows 7 & 10 based network.

â€¢ Installing & Configuring Network Printers.

â€¢ Assigning proper rights on shared drives.

â€¢ User & Groups management and assigning rights according to
organization requirements.

company - Asha MMPC

description - Project Routers, Switches and Server Configuration with Group
Policies

Client Asha MMPC, Bali, Pali, Rajasthan

Type of Project Configuration DPMCU, Milknet Server, EMS Server, QMS
Server etc.

Role IT Executive

Roles & responsibilities

â€¢ Implementing and maintaining backup schedules.

â€¢ Upgrading and backups of Cisco router configuration files.

â€¢ Installation, Configuration and Administration of Windows Servers 2008
R2, 2012 R2, 2016 Active Directory, FTP, DNS, DHCP, TFTP.

â€¢ Troubleshooting LAN & WAN infrastructure.

â€¢ Settings of the networking devices (Cisco Router, switches) co-
ordinating with the system/network administrator during implementation.

â€¢ Regular Health Checking of File Servers & Application Servers for
Security violation, Disk Spaces etc.

â€¢ Maintaining & Management, windows 7 & 10 based network.

â€¢ Installing & Configuring Network Printers.

â€¢ Assigning proper rights on shared drives.

â€¢ User & Groups management and assigning rights according to
organization requirements.

company - Interface Techno System

description - Project Routers, Switches and Server Configuration with Group
Policies

Client The Scindia School, Fort, Gwalior (MP)

Type of Project Configuration and Implementation

Role Network Engineer

Roles & responsibilities

â€¢ Implementing and maintaining backup schedules.

â€¢ Upgrading and backups of Cisco router configuration files.

â€¢ Installation, Configuration and Administration of Windows Servers

2000/2003, 2008 R2, 2012 R2, Active Directory, FTP, DNS, DHCP, TFTP, Linux OS.

â¢ Working on troubleshooting of complex LAN infrastructure.

â¢ Settings of the networking devices (Cisco Router, switches) co-coordinating with the system/Network administrator during implementation.

â¢ Regular Health Checking of File Servers & Application Servers for Security violation, Disk Spaces etc.

â¢ Maintaining & Management, windows 7 professional based network.

â¢ Installing & Configuring Network Printers.

â¢ Installing Server side Software's & Utilities.

â¢ Assigning proper rights on shared drives.

â¢ Managing user account

company - Interface Techno System

description - Project Network Implementation and Configuration

Client M/s Teva API India Pvt Ltd, Bhind (MP)

Type of Project Implementation and Configuration

Role Network Support Engineer

Roles & responsibilities

â¢ Implementing and maintaining backup schedules.

â¢ Upgrading and backups of Cisco router configuration files.

â¢ Installation, Configuration and Administration of Windows Servers

2000/2003, 2008 R2, 2012 R2, Active Directory, FTP, DNS, DHCP, TFTP,

Linux OS.

â¢ Working on troubleshooting of complex LAN infrastructure.

â¢ Settings of the networking devices (Cisco Router, switches) co-coordinating with the system/Network administrator during implementation.

â¢ Configuration, Maintenance, check Point Endpoint Security MI

Management Console for Laptop Users

â¢ Regular Health Checking of File Servers & Application Servers for Security violation, Disk Spaces etc.

â¢ Logging & Monitoring Calls using CA Unicenter Service Desk Manager.

â¢ Maintaining & Management, windows XP professional based network.

â¢ Installation, Configuration & troubleshooting of Microsoft Outlook.

â¢ Installing & Configuring Network Printers.

â¢ Installing Server side Software's & Utilities.

â¢ Assigning proper rights on shared drives.

â¢ Managing user account

â¢ Issue E Token for laptop user

â¢ Managing more than 350 Desktops and Laptops

â¢ Taking differential and full backups of the server through Symantec

Backup Exec 12D

â¢ Restoring the Files, which got corrupted or deleted accidentally.

â¢ Handling escalations of desktop calls from remote locations.

â¢ Monthly/Weekly Report Generations for the servers.

â¢ Preparing MIS, vendor & inventory management reports.

company - Nava Bharat Press (P) Ltd

description - Role System Engineer

Roles & responsibilities

â¢ Server Management

â¢ Backup management

â¢ Helpdesk, SLA monitoring and incident management

â¢ Hosting client meeting at scheduled interval

â¢ System Management and Troubleshooting

â¢ Hardware Troubleshooting

Additional Qualification & Certifications

â¢ Manual and Computerized accounting with Tally ERP9. Tally certification from Tally Academy.

Skill Set â€¢ Experience in Implementing, and troubleshooting network security solutions â€¢ Planning and Implementation knowledge of multi vendor firewalls (Cisco ASA, Checkpoint (Upto R.80) Juniper/Netscreen, Fortinet, FWSM) â€¢ Familiarity with the latest hardware and network security technologies â€¢ Excellent analytical and problem solving skills â€¢ Skilled in analyzing and monitoring network security solutions using a variety of Monitoring solutions (Zenoss, Solarwinds, Cisco Prime) â€¢ Work Experience on multi client data center environments. â€¢ Knowledge and Work experience on Firewall IOS Upgrade projects â€¢ Configuration of F5 load balancers, SSL certificate updates, I-Rule. F5 upgrades â€¢ Configuration of Cisco Routers (series- 1800, 1900, 2500, 2600, 2800, 3600, Nexus - 5k, 7k) â€¢ Configuration of Cisco switches (series - 2960, 3750, catalyst, 4500, 3600) â€¢ Working knowledge of Bluecoat Proxy â€¢ Knowledge of ITIL process.Education Details

Network Security Engineer

Skill Details

Network Security, Network Administration, Firewall and VPN Configuration, Routing and Switching.- Experience - 24 months

Company Details

company - Karvy Innotech LTD.

description - Managing network of Mahindra & Mahindra Financial services limited, both internal and at PAN India level.

Â Installation, setup / configuration, troubleshooting, Tuning, diagnostics and maintenance of IT security related Equipment.

Â Maintaining all network devices such as Routers, Switches, Firewall, Wi-Fi Devices.

Â Troubleshoot performance and availability issues on security devices such as firewalls, UTM, Content Filtering solutions and Handling daily calls related to network and network security.

Â Manage and administer the VPN connectivity with organization's clients.

Â Implement Policy Changes, Configure URL filtering & security policies onÂ UTM appliances.

Â Monitor alerts received from the monitoring systems and take appropriate action based on the defined processes.

Â Follow the SLAâs and procedures already defined for security device management.

Â Co-ordinating with ISPs like TATA, Airtel, Reliance, Vodafone, Sify, Tikona & HCL Comnet for all WAN related issues.

Â Configuration and Troubleshooting of Site to Site (IPSEC) VPN between HO and Remote Branches.

Â Maintaining inventory on monthly basis of all network devices.

Â LAN Connectivity issues, Crimping, Rack Mounting.

Reporting to CISO of Mahindra Finance for all network related queries and solutions

January 2006 to January 2010 Bachelor of Engineering Information Technology Mumbai, Maharashtra Mumbai University

Senior Network security Analyst

Senior Network security Analyst - Accenture

Skill Details

FIREWALLS- Experience - 97 months

CISCO- Experience - 89 months

SECURITY- Experience - 72 months

FIREWALL- Experience - 45 months

CHECKPOINT- Experience - 44 months

Company - Accenture

Description - Install, configure, upgrades and troubleshoot Cisco ASA

firewalls (5500-X) which includes Single and multi-context firewalls

F5 LTM configuration (VIP, pools), SSL offloading, certificate renewals,

Code upgrade and troubleshoot issues

Pulse secure (Juniper) management includes creating Roles/ Realm, polices for remote access, reverse proxy and Code upgrade

PAC file configuration

Preparing design documents (HLD, LLD), IP Schema and Configuration of all network devices as per customer requirements in data center environment

Incident Management, Change management, Problem Management (ITIL process)

Key projects- Worked on resiliency project like firewall policy lockdown. Software code upgrade on all firewalls and load balancers. End to end coordination for firewall deployment

Tools: Cisco security manager 4.x

Company - Zensar Technologies

Description - Install, Upgrades Checkpoint firewalls GAIA R75, R77 and policy deployment

Troubleshoot checkpoint firewalls, Palo alto firewall and Cisco ASA's for multiple sites belongs to US, Canada and EMEA region.

Configure, upgrades, troubleshoot Cisco Routers (Cisco 29xx, 28xx, 19xx) and Cisco switches (2960, 3560) and Cisco Meraki AP in Meraki Cloud

F5 LTM configuration and troubleshooting the operational issues

Company - Infosys Technologies

Description - Responsibilities:

Install, configure, upgrade and troubleshoot checkpoint firewalls, Cisco Routers, Switches

Configure, monitor and troubleshoot issues within organization LAN, WAN and customer

Connectivity networks.

Interface with vendors and service providers ensuring that hardware or software problems were dealt with efficiently and effectively, with minimal downtime

Company - HCL-Comnet

Description - Responsibilities:

Event monitoring and administration of RSA enVision 4.1 SIEM.

Proficient in researching traffic patterns to identify false-positives and/or malicious traffic within IDS, IPS, scanners (Qualis) and firewalls.

Experience in writing correlation rules, parsers & developing UDS for unsupported device logs.

Analyze a large volume of security events while maintaining a high quality of analysis

Change Configuration Management exposure

Company - Wipro Technologies

Description - Administrator, Manage and troubleshoot multi-vendor Network Infrastructure consisting of Cisco, Juniper Platforms (Cisco Router 3845, Cisco stack-wise switches 3750E and 2960 access switch, Cisco 4500 chassis, Cisco 5550/20 ASA firewalls, Juniper SA 6500 SSL VPN)

Provisioning and troubleshooting access issues related to RSA and Entrust (2FA) User Accounts.

Taking all network and security devices configuration back up on weekly and monthly basis.

Network Security Engineer

July 2012 to April 2015 Bachelor of Science INFORMATION TECHNOLOGY Mumbai, Maharashtra Akbar Peerbhoy College of Comm & Eco. (University of Mumbai)

June 2008 to April 2010 Jaunpur, Uttar Pradesh Janta Inter College Jaunpur
May 2006 to April 2008 Jaunpur, Uttar Pradesh Inter College Jaunpur
Network Security Engineer

Skill Details

Network Security, Network Administration, Firewall and VPN Configuration, Routing and Switching.- Experience - 24 months
Company Details company - Karvy Innotech LTD.

description - Managing network of Mahindra & Mahindra Financial services limited, both internal and at PAN India level.

Â Installation, setup / configuration, troubleshooting, Tuning, diagnostics and maintenance of IT security related Equipment.

Â Maintaining all network devices such as Routers, Switches, Firewall, Wi-Fi Devices.

Â Troubleshoot performance and availability issues on security devices such as firewalls, UTM, Content Filtering solutions and Handling daily calls related to network and network security.

Â Manage and administer the VPN connectivity with organization's clients.

Â Implement Policy Changes, Configure URL filtering & security policies onÂ UTM appliances.

Â Monitor alerts received from the monitoring systems and take appropriate action based on the defined processes.

Â Follow the SLAâs and procedures already defined for security device management.

Â Co-ordinating with ISPs like TATA, Airtel, Reliance, Vodafone, Sify, Tikona & HCL Comnet for all WAN related issues.

Â Configuration and Troubleshooting of Site to Site (IPSEC) VPN between HO and Remote Branches.

Â Maintaining inventory on monthly basis of all network devices.

Â LAN Connectivity issues, Crimping, Rack Mounting.

Network Security Engineer Reporting to CISO of Mahindra Finance for all network related queries and solutions

Technical Expertise: Cisco ASA, Checkpoint firewall (GAIA, Splat), Palo Alto firewalls
Firewall management tools: Cisco security management (CSM), Checkpoint Smart center, Palo Alto Panorama
F5 load balancer (LTM)
Networking Hands on Cisco Router and Cisco Switches,
Security Management & Event Management: RSAEnvision 4.1, Ticketing tools - BMC Remedy, Service-now
Other Technologies: Software languages: Python, VB Scripting
Education Details

January 2006 to January 2010 Bachelor of Engineering Information Technology Mumbai, Maharashtra Mumbai University
Senior Network security Analyst

Senior Network security Analyst - Accenture

Skill Details

FIREWALLS- Experience - 97 months

CISCO- Experience - 89 months

SECURITY- Experience - 72 months

FIREWALL- Experience - 45 months

CHECKPOINT- Experience - 44 months

Company - Accenture

Description - Install, configure, upgrades and troubleshoot Cisco ASA

firewalls (5500-X) which includes Single and multi-context firewalls

F5 LTM configuration (VIP, pools), SSL offloading, certificate renewals, Code upgrade and troubleshoot issues

Pulse secure (Juniper) management includes creating Roles/ Realm, polices for remote access, reverse proxy and Code upgrade

PAC file configuration

Preparing design documents (HLD, LLD), IP Schema and Configuration of all network devices as per customer requirements in data center environment

Incident Management, Change management, Problem Management (ITIL process)

Key projects- Worked on resiliency project like firewall policy lockdown. Software code upgrade on all firewalls and load balancers. End to end coordination for firewall deployment

Tools: Cisco security manager 4.x

Company - Zensar Technologies

Description - Install, Upgrades Checkpoint firewalls GAIA R75, R77 and policy deployment

Troubleshoot checkpoint firewalls, Palo alto firewall and Cisco ASA's for multiple sites belongs to US, Canada and EMEA region.

Configure, upgrades, troubleshoot Cisco Routers (Cisco 29xx, 28xx, 19xx) and Cisco switches (2960, 3560) and Cisco Meraki AP in Meraki Cloud

F5 LTM configuration and troubleshooting the operational issues

Company - Infosys Technologies

Description - Responsibilities:

Install, configure, upgrade and troubleshoot checkpoint firewalls, Cisco Routers, Switches

Configure, monitor and troubleshoot issues within organization LAN, WAN and customer

Connectivity networks.

Interface with vendors and service providers ensuring that hardware or software problems were dealt with efficiently and effectively, with minimal downtime

Company - HCL-Comnet

Description - Responsibilities:

Event monitoring and administration of RSA enVision 4.1 SIEM.

Proficient in researching traffic patterns to identify false-positives and/or malicious traffic within IDS, IPS, scanners (Qualis) and firewalls.

Experience in writing correlation rules, parsers & developing UDS for unsupported device logs.

Analyze a large volume of security events while maintaining a high quality of analysis

Change Configuration Management exposure

Company - Wipro Technologies

Description - Administrator, Manage and troubleshoot multi-vendor Network Infrastructure consisting of Cisco, Juniper Platforms (Cisco Router 3845, Cisco stack-wise switches 3750E and 2960 access switch, Cisco 4500 chassis, Cisco 5550/20 ASA firewalls, Juniper SA 6500 SSL VPN)

Provisioning and troubleshooting access issues related to RSA and Entrust (2FA) User Accounts.

Taking all network and security devices configuration back up on weekly and monthly basis.

Operating Systems: Windows, Linux, Ubuntu Network Technologies : Cisco Routing and Switching, InterVLAN Routing, Dynamic Protocols i.e. RIPv2, RIPng, OSPF, EIGRP. Static Routing, ACL, VTP, VLAN, EtherChannel, HSRP, STP, IPv6, Lan Troubleshooting, Structured Network Cabling, Cisco Firewall and Fortinet Firewall, RHEL 6 networks. Networking Devices : Cisco

Routers: 1800s, 1900s, 2600s, 2900s, 3600s, 3800s, 7200s etc. : Cisco
Switches: Cisco Catalyst 2900s, 3700s, 4850s etc. : HP ProLiant Servers,
Dell Server, Lenovo Servers etc. : Fortinet Firewall, Modem etc. Server
Technologies : AD, RODC, FTP, Print Server, SCCM, WDS, DHCP, Group
Policies, DHCP Server, DNS Server, RIS Server, User policies, computer
policies etc. Backup Technologies: Server 2016 backup tools, Symantec
Backup EXEC 12D etc. Virtualisation: VMWare ESXi, VMware Workstation,
Oracle VirtualBox, GNS3 Network Simulator etc. Education Details

Project Routers, Switches and Server Configuration with Group Policies

Client Railwire/Railtel Corporation of India Ltd., Mumbai

Type of Project Configuration of WiFi AP of Railway Station in Maharashtra
State

Role Sr. Network Engineer

Roles & responsibilities

- â€¢ Earthing, trenching for equipment.
- â€¢ Making plans for preparing station to WiFi environment including cabling, installation, commissioning, handing over etc.
- â€¢ Implementing and maintaining backup schedules.
- â€¢ Upgrading and backups of Cisco router configuration files.
- â€¢ Installation, Configuration and Administration of Windows Servers 2008 R2, 2012 R2, 2016 Active Directory, FTP, DNS, DHCP, TFTP.
- â€¢ Troubleshooting LAN & WAN infrastructure.
- â€¢ Settings of the networking devices (Cisco Router, switches) co-coordinating with the system/network administrator during implementation.
- â€¢ Regular Health Checking of File Servers & Application Servers for Security violation, Disk Spaces etc.
- â€¢ Maintaining & Management, windows 7 & 10 based network.
- â€¢ Installing & Configuring Network Printers.
- â€¢ Assigning proper rights on shared drives.
- â€¢ User & Groups management and assigning rights according to organization requirements.

company - Asha MMPC

description - Project Routers, Switches and Server Configuration with Group Policies

Client Asha MMPC, Bali, Pali, Rajasthan

Type of Project Configuration DPMCU, Milknet Server, EMS Server, QMS Server etc.

Role IT Executive

Roles & responsibilities

- â€¢ Implementing and maintaining backup schedules.
- â€¢ Upgrading and backups of Cisco router configuration files.
- â€¢ Installation, Configuration and Administration of Windows Servers 2008 R2, 2012 R2, 2016 Active Directory, FTP, DNS, DHCP, TFTP.
- â€¢ Troubleshooting LAN & WAN infrastructure.
- â€¢ Settings of the networking devices (Cisco Router, switches) co-coordinating with the system/network administrator during implementation.
- â€¢ Regular Health Checking of File Servers & Application Servers for Security violation, Disk Spaces etc.
- â€¢ Maintaining & Management, windows 7 & 10 based network.
- â€¢ Installing & Configuring Network Printers.
- â€¢ Assigning proper rights on shared drives.
- â€¢ User & Groups management and assigning rights according to organization requirements.

company - Interface Techno System

description - Network Security Engineer
Stormfur Technologies LLP,
August 2018-Present
â€¢ Troubleshoot firewall related incidents for customers.
â€¢ Solve technical problems relating to installing security solutions.
â€¢ Analyze security requirements of network system.
â€¢ Reviewed configuration and maintained Cisco ASA Firewalls, routers, and switches.
â€¢ Reviewed and modified access control lists (ACLs) on network switching and routing equipment as needed to maintain security standards.
â€¢ Participated in core network team to upgrade corporate network.
â€¢ Maintained network security technologies and services.
â€¢ Interacted with clients and analyzed operational requirements.
â€¢ Install and configured of IPSEC and SSL VPN.
â€¢ Reviewed and configured VLAN, Routing Protocols (RIP, OSPF, EIGRP), NAT.
â€¢ Support for client in various networking issues.

Communication Skills My writing skills in English is very good and I am certainly a clear speaker. Being comfortable speaking in front of an audience, I can easily facilitate meetings and brainstorming sessions

Interpersonal Skills As a friendly, polite person, with positive attitude I work well with others and deal with difficult situations in a careful and considerate manner. Learning Skills I have a high capacity for learning, pick up new skills and ideas quickly, and generally thrive on challenges. Enthusiasm and creativity give me an edge on difficult projects. Problem Solving Skills My analytical skills help me troubleshoot problems and uncover root causes. I am creative and tenacious.

Duration: Feb 2017 - till date

Description: Bombay Stock Exchange BSE is Asia's first & the Fastest Stock Exchange in world with the speed of 6 micro seconds and one of India's leading exchange groups provides an efficient and transparent market for trading in equity, currencies, debt instruments, derivatives, mutual funds. BSE SME is India's largest SME platform which has listed over 250 companies and continues to grow at a steady pace.

JOB ROLES & RESPONSIBILITIES

POSTGRESQL -

- â€¢ Worked on Redhat Linux OS Cluster with Postgresql for High Availability (HA) using Pacemaker.

- â€¢ Coordinated with Developers/Linux teams for database knowledge and support.

- â€¢ Participated in implementation of new releases into production.

- â€¢ Installed /Configured Postgresql from source or packages on Redhat Linux servers.

- â€¢ Performed Postgresql Server Management tasks i.e. Backup & Restore, Configuration, Roles, Blockings, Tablespace creation and Troubleshooting.
- â€¢ Worked with Storage team for Disaster Recovery DR setup built on SAN using EMC technology
- â€¢ Configured LDAP authentication & GSSAPI Authentication from Windows to Linux for Postgresql.

- â€¢ Configured logical replication for Database servers, hot standby Postgresql servers, faster database backup methods, schema and tablespace backups.

- â€¢ Configured maximum connections to database on Linux servers.

- â€¢ Installed tds_fdw from source for linked servers to connect to heterogeneous databases & other required extensions, backup configuration, PITR using base backups.

MSSQL -

- â€¢ Day-to-day administration of live SQL Servers.

- â€¢ Participated in Live Primary Recovery PR & Disaster Recovery DR activities.

- â€¢ Participated in PR & DR mocks for new releases into production.

- â€¢ Configured Linked Servers, Transactional replication, Maintenance tasks like database backup & restore, recovery, scheduled jobs, maintenance plans.

- â€¢ Installed & Configured SQL server 2014, 2017 standalone and SQL Cluster servers.

- â€¢ Maintained the security of the database by providing appropriate SQL roles, logins and permissions to the users on demand.

- â€¢ Worked with teams on application rollouts, application issues and SQL server migrations.

- â€¢ Exposure in handling production system with skills and understand client's requirement.

- â€¢ Performed SQL Server service pack upgrades and hot fixes.

- â€¢ Handled multiple SQL Instances on Windows SQL Cluster environment built on EMC SAN.

- â€¢ Worked on MSSQL DB clusters with active/active & active passive servers, Always-On Availability Groups (AAG) and HA/DR Setup.

- â€¢ Have experience on SAN and RAID levels and building and supporting SQL Cluster servers on SAN Environments.

Company Details
company - BNY Mellon International Operations (India) PVT. LTD

Description - SQL Server :

- ī Installation, configuration of database servers using slipstream and setup all the maintenance jobs as per the standard policy on standalone as well as cluster environments with latest service packs
- ī Installation of SSRS, uploading of .rdls and assigning correct data sources to reports. Grant necessary access to users & developers on reporting website. Aware of SSIS and designing packages as well.
- ī Create and manage logins, users for database applications, assigning permissions as per requests, resolving user login issues.
- ī Migration of all SQL server 2005/2008 servers to higher versions.
- ī Setup of database refresh jobs on QA, DEV and UAT environments and fixing orphaned users.
- ī Troubleshoot performance related issues.
- ī Part of multiple projects to work with developers and provide all required support for testing in QA, UAT & DEV environment.
- ī Lead the DR tests for database team.
- ī Participate in database purge and archive activities.
- ī Writing codes for automating database administration tasks.
- ī Worked on automating DR tasks to start the agent jobs on multiple servers, restore databases for log shipped databases without manual intervention for online databases post DR activities.
- ī Provide support to vendor databases, follow up with the vendor calls and timely escalate to next level when there is no update in predefined timeline.
- ī Installation and configuration of smsql on windows server. Schedule jobs for creation and deletion of clones on sql server. Maintain backups using smsql.

MongoDB Server:

- ī Installation and configuration of MongoDB server.
- ī Creation of databases and collection.
- ī Creation new user and grant access using Ops manager.
- ī Monitor database servers using Ops manager.

Oracle & Sybase Server

- ī Managing and maintaining multiple instances of Databases on Linux and windows servers.
- ī Monitoring daily jobs includes backups, refresh and maintenance jobs.

Company - Hewlett-Packard India Sales PVT. LTD. On the payroll of

Softenger India PVT. LTD

Description - ī Installation of SQL Server on standalone as well as windows cluster environments with latest service packs

- ī SQL server installation using slipstream.
- ī Installation of reporting services
- ī Creating logins and users, assigning permissions as per requests.
- ī Security audit for all logins includes maintenance of unused and orphan user logins
- ī Create & Maintain daily and weekly jobs/maintenance plans includes backup, index rebuild/reorganize , update statistics and database consistency check
- ī Create linked servers and ensure connectivity between servers
- ī Monitor disk space proactively & Space management using data and log file shrinking
- ī Monitor blocking, deadlocks, open transactions and slow running queries during performance issues and highlight costly queries to developers.
- ī Configure alerts for deadlock and blocking to maintain performance
- ī Implementing high availability technologies like log shipping, AlwaysON, mirroring and its troubleshooting, also have knowledge on replication
- ī Successfully completed migration of Databases from one server to another
- ī Performing DR drills (Online/Offline) on quarterly basis
- ī Power shell scripting to monitor, restart SQL service and get Email alert for the service status.
- ī Maintain TNS entries for oracle client as per client requests.
- ī Interacting with customers for requirements
- ī Contacting customer to update the status of handling issues and service requests at every stage of resolution

SQL Server Database Administration

company - Wipro Technologies

description - Microsoft Certified Professional with 11 years of experience in database administration on MS SQL Server 2016/2014/2012/2008 R2/ 2008.

Experience with MS SQL Server 2016/2014/2012/2008 R2/ 2008

installation, upgrade, and administration

Microsoft Azure certified.

Have understanding of Azure VM, Azure Storage, Azure network, Azure AD and Azure SQL database.Â

Incident management, change management and Problem management for SQL Server Database team.

Participating in meetings, conference calls with client, Service Delivery

Manager and Application team for System improvements.

Participated in quarterly DR activity.

Involved in creation of SIP - Service Improvement Plans

Involved in handling of high severity issues and provided RCA for the same.

Worked on Always on availability groups, database mirroring, replication, clustering and log shipping.

Have basic understanding of Oracle and Netezza.

Provided on- call support during out of office hours and weekends.

Resource & shift management of 5 SQL DBAs from offshore in multi-client environment for Data center services.

Provided KT to team members, monitor and guide trainees.

company - Wipro Technologies

description - Responsibilities: â¢ MS SQL Server 2016/2014/2012/ 2008 R2/ 2008 installation, configuration, and administration.

â¢ Worked on Always on availability groups, log shipping, database mirroring and clustering.

â¢ Participated in PCI scan report to perform installation of security hot fixes, service packs for SQL servers to remove vulnerability.

â¢ Participated in Holmes BOTS automation implementation of SQL Pack tool.

â¢ Worked on service requests, incidents and critical issues.

â¢ Involved in conference calls to provide DBA support for critical issues.

â¢ Performance tuning.

MySQL Database Administrator

2+ Years of experience in MySQL Database Administrator (MySQL DBA)

Skill Details

MySQL DBA , Centos , Backup , Restore , Replication , Query

Optimazation- Exprience - 24 months

Company Details

company - Trimax IT Infrastructure & Services Ltd

Description - MySQL Installation, maintenance and

Upgrades (Version 5.5 , 5.6)

MySQL database administration on a large scale MySQL

installation

Experience with MySQL on both Linux and Windows

MySQL processes, security management and queries

optimization.

Performed query analysis for slow and problematic queries.

Performed Structural changes to Database like creating

tables, adding columns according to business requirement

Creating and Maintaining Database Maintenance Plans.

Writing scripts to Create Jobs for Backup & Restore Plans.

Working on MYISAM to INNODB engine.

Working on Server shifting , tuning parameter , database purging

Working on Mysql master slave Replication

Handling Release management and user acceptance.

Restore using xtrabackup.

Responsibilities include monitoring daily, weekly and monthly system maintenance tasks such as database backup, replication verification, database integrity verification and indexing updates

Work in 24/7 production database support.

Company - TIETO INDIA PVT. LTD

Description - Pune From February 2015 till present

Project Profile:

Oil and Gas unit of Tieto India Pvt. Ltd. is working for Environmental Components (EC) application. Tieto is the authorized service provider in EC.

Energy Components is a complete end-to-end hydrocarbon accounting solution following the hydrocarbons from production to transport, sales and revenue recognition. Globally market-leading hydrocarbon accounting software with functionality coverage exceeding other available solutions.

Modern, flexible and scalable technology platform. Selected as the global standard and best practice by oil & gas super majors.

Responsibilities: • Oracle Database Administration 11g R2, 12c and 18c •

Supporting databases in 24x7 environments and coordinate with

Application, OS, Storage and Development Teams. Test and Production environments • Regularly monitoring the trace files and Alert log files for database related issues.

• Experience in monitoring the CPU usage, IO and memory utilization at OS level.

• Checking the Alert log file to analyze the ORA errors if any to raise SR with Oracle.

• Monitoring the log files, backups, database space usage and the use of system resources.

• Configuring Backup (RMAN) for database and restoring database.

• Installation, configuring and updating Oracle server software and related Oracle products of 11g and 12c.

• Oracle Server installation, client installation and configuration, PLSQL developer installation.

• Creating database using DBCA and manually.

• Creating of Oracle user and granting proper privileges to user as per request.

• Creating AWR, ASH and ADDM reports for database performance analysis.

• Handling space management and performance issues in Oracle databases.

• Creating remote database link.

• Renaming and resizing of data files in Oracle database if needed.

• Tablespace shrinking with regular time interval to reclaim server space.

• Expertise in Export and Import using data pump in Oracle database.

• Expertise in Configuration of Listener and Tnsnames through NETMGR and NETCA and statically also.

• Managing Oracle Listener and Oracle Network Files.

• Creating user Profiles, granting specific privileges and roles to the users in Oracle database.

• Maintaining tablespaces & data files, Control files, Online Redo log files in Oracle database.

• Worked on AWS cloud services like EC2, S3, RDS, ELB, EBS, VPC, Route53, Auto, Cloud watch, Cloud Front, IAM for installing configuring and troubleshooting on various Amazon images for server migration from

physical into cloud.

Database Administrator

Database Administrator - BNY Mellon

Skill Details

DATABASES- Experience - 24 months
ORACLE- Experience - 24 months
RMAN- Experience - 24 months
NETBACKUP- Experience - 24 months
SCOM- Experience - 24 months

Company Details
company - BNY Mellon
description - Databases: 600+
Team Size: 8
Duration: Jan 2017 - Till Date
Clients: Over 130+ investment banking organizations who are hosted with Eagle

Responsibilities: Database Management (Support and managing critical production, Pre-production, test and reporting databases in different platforms), Capacity Management Upgrades.
â€¢ Handling day to day database activities monitoring and incident management.
â€¢ Building new databases as per the requirement and prepare them for go live with the help of multiple teams.
â€¢ Working on scheduled activity of database patching (CPU, PSU) â€¢ Installing latest patch on production, Dev and Test databases as per the suggestion from Oracle support.
â€¢ Database Upgrade from 11g and to 12c.
â€¢ Adding disks to ASM disk groups.
â€¢ Building DR database using Active Data guard, Make it sync with prod and resolving issues if persists â€¢ Data Guard Management- Checking lagging status, removing lagging of archives, checking processes like RFS/MRP, Archives Management â€¢ Working on tablespace related issues
â€¢ Managing user access and profiles â€¢ Importing and exporting using datapump â€¢ Maintaining inventory of all databases in the single centralized database â€¢ Refreshing test environment from production database.
â€¢ Working with Oracle Support to resolve oracle errors.
â€¢ Schedule daily and weekly databases backup using RMAN,
Troubleshooting in RMAN issues.
â€¢ Database cloning using RMAN.
â€¢ Take part in cutover to upgrade application to higher version.
â€¢ Strictly following ITIL process in incident management and change management.
â€¢ Providing weekly report of issues in team meeting also participating and suggesting service improvement plans.
â€¢ Database Migrations from one server to another or to different platforms
â€¢ RCA and impact analysis reporting during any production outage.

Previous Organization: Brose India

Project I: Central IT Management
company -
description - Responsibilities: Managing our internal databases and servers of Brose global.
â€¢ Providing 24x7 on-call support in the rotational shifts.
â€¢ Performing day-to-day database activity â€¢ Monitoring and responding DBA group Mails for all alerts, issues and ad-hoc business user requests, etc.
â€¢ Database creation, patching â€¢ Backup of Database in frequent cycles using Data pump/RMAN.
â€¢ Database refreshes using RMAN, Datapump.
â€¢ Recovery using copy of data / RMAN â€¢ Monitoring logs and trace for resolving issues.
â€¢ Creating new VM servers and prepare it for go live, Also decommissioning as per requirements.
â€¢ Weekly patching of windows servers using SCCM and taking actions for patching if needed â€¢ Monitoring and troubleshooting of daily and weekly OS backup using Symantec Netbackup â€¢ Managing user accounts of OS users and database users â€¢ Monitoring OS level alerts using SCOM

Project II: Data Center Migration (Onsite Project)

Responsibilities: Data center migration was one of activity for migration of our datacenter from one location to another. Where our all servers and databases were moved successfully.
â€¢ Installation of Oracle 11g on Linux platforms â€¢ Worked on service requests (Incidents / Change / Request) â€¢ Creation of users, managing user privileges â€¢ Configured RMAN backup for databases â€¢ Patching of databases â€¢ Configuring physical standby database using Dataguard â€¢ Cloning of servers and migrate to another cluster

Lead Database Administrator

Lead Database Administrator - Tieto Software
Skill Details
DATABASES- Experience - 108 months
MIDDLEWARE- Experience - 96 months
RMAN- Experience - 84 months
SHELL SCRIPTS- Experience - 48 months
Company Details
company - Tieto Software
description - As a part of AO (Application Operations) team, scope in project is quite wide than typical database administration. Range of accomplishments are extended right from Data Tier to Middle Tier & Application Tier:

- Maximized availability of applications from 99.3% to 99.8%
- Raised business by presenting Proof of Concepts for 10+ cases
- Delivered upgrades of various applications time to time to keep it on supported platform
- Saved SLAs as per contract by means of handling P1, P2 issues effectively
- Produced Capacity reports comprising all layers (Data, Middleware, Web) of various applications
- Generated Work Orders as per customer need

Company - Tieto Software
description - Designed databases of various applications

- Planned RMAN backup and recovery, BCP strategies
- Executed Business Continuity Testing for various applications
- Introduced Zero Cost high availability solutions - Active-Passive Failover
- Optimized performance by means of scripting automation
- Established cloning procedures for all layers of various applications
- Delivered Infrastructure changes, like FW Openings & LoadBalancer configuration for new applications
- Eliminated downtime by troubleshoot issues for Middleware products - OIM, OAM, SOA
- Contributed to build & maintain Integration Layer- SMTP, ftp, Reverse Proxy, OCM

Company - Tieto Software
description - Provided database support to environments - PROD, UAT, TEST, DEV

- Performed Database Refresh/Cloning from production to development and support databases
- Reduced risk level by means of upgrading & patching databases time to time
- Protected databases by assigning appropriate roles and privileges as per SOD
- Generated & maintained Middleware schemas using RCU
- Exceeded scope of work by supporting & maintaining WebLogic platform - installation, patching, troubleshooting issues
- Expanded duty scope to web servers: Install & maintain- OHS, apache, tomcat

Company - HSBC Software
description - Being part of project supporting HSBC Bank France, I achieved:

- Handled incidents & service requests as Day to day database administration tasks
- Delivered basic implementation services - Database installation, patching, upgrades
- Performed capacity planning - managing tablespaces, compressions
- Contributed in maintaining quality of databases - managing instances, indexes, re-organization, performance monitoring & tuning using AWR, ADDM reports
- Maintained backups & recovery of database - logical backups (exp/imp), datapump (expdp/impdp), cold backups, hot backups, RMAN backup/restore, RMAN Duplication
- Reduced efforts by automation - Value add initiatives which includes writing shell scripts for automated housekeeping operations, scheduling backups, use crontab/at to schedule tasks
- Implemented high availability solutions - Dataguard

Oracle DBA

Oracle database administrator

Skill Details

Installation of Oracle on RH Linux & Windows. Creating/Managing user profiles and analyzing their privileges and tablespace quotas Backup of database Logical and Physical procedures. Recovery of database in case of database crash, disk/media failure, etc. Standard DBA functions like space management, Rollback segments, Extents. Database Management and Monitoring the database. Willing to learn new things. Being a constructive team member, contributing practically to the success of the team.-

Exprience - 48 months

Company Details

company - Accelya kale solutions ltd

description - Database Administrator working in 24*7 support environment maintaining Databases running on Oracle 11g, 12c.

Database Up-gradation from Oracle 11g to Oracle 12c.

Installation of Database critical patches.

Taking cold and hot backups on scheduled times and monitoring backups.

Importing the export dump to another database as per demands.

Automating most of the daily activities through cronjobs, shell scripts or schedulers.

Making Plan of Actions for Various Activities.

Raising SR with Oracle Support for different severity issues.

Handling the Userâ's request and proper client interaction.

Monitoring & managing database growth, tablespaces, adding ,resizing and renaming the datafiles.

Restoration of database using RMAN backups for backup consistency checks.

Migration of Database using export / import and RMAN backups.

Configuring & managing Physical Standby database.

Creating database links, Tablespaces, database directories.

Managing network settings through listener.ora and tnsnames.ora files.

Restoration of data using old logical backup as per client request.

Schema replication across databases through data pump tool.

Taking cold and hot backups on scheduled times and monitoring backups

Taking EXPDP of database, database objects and a particular schema

Using SCP ticketing tool in order keeping track of client requests.Â

Performing Maintenance Activities such as Index Rebuilding and stats gather.

Troubleshooting the Basic LevelÂ performance issuesÂ

Setting up a new environmentÂ from database perspective within the requested timelines

Adding/Deleting disks in ASM and monitoring the ASM diskgroups.

Creating users & privileges with appropriate roles and levels of security.Â

Database Administrator working in 24*7 support environment maintaining Databases running on Oracle 11g, 12c.

Performing database online and offline database re-organization for database enhancement.Â

Migrating database from Non-ASM to ASM file system.

Grid up-gradation from 11g to 12C.

company - Insolutions Global Ltd

description - Oracle software installation(graphical/silent),Database upgrade,Patch upgrade.

Maintaining around 80+ UAT DB servers, 40 production DB and 28 standby/DR DB.

Managing/creating DR & standby servers, DB sync.

Backup and recovery (RMAN/ Datapump).

Performing activities like switchover and failover .

Allocating system storage and planning future storage requirements for the database system

Enrolling users and maintaining system security.

Monitoring Alert log, Snap ID generation, db size, Server space, OEM reports, User validity.

Controlling and monitoring user access to the database .

Scheduling shell scripts or dbms_jobs using Crontab or

DBMS_SCHEDULER (monitoring script, listener check, backup script, AWR reports) etc.

Planning for backup and recovery of database.

Managing the production database for Oracle and SQL Server and resize the space of database/Datafiles/Tablespace/Transactional Logs.

Managing Temp and Undo tablespaces.

Creating primary database storage structures (tablespaces) after application developers have designed an application.

TECHNICAL SKILLS SQL Oracle v10, v11, v12 R programming, Python, linear regression, machine learning and statistical modelling techniques(obtained certification through Edvancer Eduventures training institute) KEY SKILLS Multitasking, working to meet client SLA in high pressure scenarios, handling sensitive clients along with improved skills at being a team player. Excellent communication skills and quick learner. Leadership qualities, team networking and courage to take up the problems proactively.Education Details

description - Redhat Linux 7.4, Postgresql 9.5, 9.6
Duration: Feb 2017 - till date
Description: Bombay Stock Exchange BSE is Asia's first & the Fastest Stock Exchange in world with the speed of 6 micro seconds and one of India's leading exchange groups provides an efficient and transparent market for trading in equity, currencies, debt instruments, derivatives, mutual funds. BSE SME is India's largest SME platform which has listed over 250 companies and continues to grow at a steady pace.

JOB ROLES & RESPONSIBILITIES

POSTGRESQL -

- â€¢ Worked on Redhat Linux OS Cluster with Postgresql for High Availability (HA) using Pacemaker.
- â€¢ Coordinated with Developers/Linux teams for database knowledge and support.
- â€¢ Participated in implementation of new releases into production.
- â€¢ Installed /Configured Postgresql from source or packages on Redhat Linux servers.
- â€¢ Performed Postgresql Server Management tasks i.e. Backup & Restore, Configuration, Roles, Blockings, Tablespace creation and Troubleshooting.
- â€¢ Worked with Storage team for Disaster Recovery DR setup built on SAN using EMC technology
 - â€¢ Configured LDAP authentication & GSSAPI Authentication from Windows to Linux for Postgresql.
- â€¢ Configured logical replication for Database servers, hot standby Postgresql servers, faster database backup methods, schema and tablespace backups.
- â€¢ Configured maximum connections to database on Linux servers.
- â€¢ Installed tds_fdw from source for linked servers to connect to heterogeneous databases & other required extensions, backup configuration, PITR using base backups.

MSSQL -

- â€¢ Day-to-day administration of live SQL Servers.
- â€¢ Participated in Live Primary Recovery PR & Disaster Recovery DR activities.
- â€¢ Participated in PR & DR mocks for new releases into production.
- â€¢ Configured Linked Servers, Transactional replication, Maintenance tasks like database backup & restore, recovery, scheduled jobs, maintenance plans.
- â€¢ Installed & Configured SQL server 2014, 2017 standalone and SQL Cluster servers.
- â€¢ Maintained the security of the database by providing appropriate SQL roles, logins and permissions to the users on demand.
- â€¢ Worked with teams on application rollouts, application issues and SQL server migrations.
- â€¢ Exposure in handling production system with skills and understand client's requirement.
- â€¢ Performed SQL Server service pack upgrades and hot fixes.
- â€¢ Handled multiple SQL Instances on Windows SQL Cluster environment built on EMC SAN.
- â€¢ Worked on MSSQL DB clusters with active/active & active passive servers, Always-On Availability Groups (AAG) and HA/DR Setup.
- â€¢ Have experience on SAN and RAID levels and building and supporting SQL Cluster servers on SAN Environments.

Database Administrator III - BNY Mellon International Operations (India)

PVT. LTD

Skill Details

Sql Dba- Exprience - Less than 1 year months Company Details

company - BNY Mellon International Operations (India) PVT. LTD

description - SQL Server :

ï Installation, configuration of database servers using slipstream and setup all the maintenance jobs as per the standard policy on standalone as well as cluster environments with latest service packs

- ī Installation of SSRS, uploading of .rdls and assigning correct data sources to reports. Grant necessary access to users & developers on reporting website. Aware of SSIS and designing packages as well.
- ī Create and manage logins, users for database applications, assigning permissions as per requests, resolving user login issues.
- ī Migration of all SQL server 2005/2008 servers to higher versions.
- ī Setup of database refresh jobs on QA, DEV and UAT environments and fixing orphaned users.
- ī Troubleshoot performance related issues.
- ī Part of multiple projects to work with developers and provide all required support for testing in QA, UAT & DEV environment.
- ī Lead the DR tests for database team.
- ī Participate in database purge and archive activities.
- ī Writing codes for automating database administration tasks.
- ī Worked on automating DR tasks to start the agent jobs on multiple servers, restore databases for log shipped databases without manual intervention for online databases post DR activities.
- ī Provide support to vendor databases, follow up with the vendor calls and timely escalate to next level when there is no update in predefined timeline.
- ī Installation and configuration of smsql on windows server. Schedule jobs for creation and deletion of clones on sql server. Maintain backups using smsql.

MongoDB Server:

- ī Installation and configuration of MongoDB server.
- ī Creation of databases and collection.
- ī Creation new user and grant access using Ops manager.
- ī Monitor database servers using Ops manager.
- Oracle & Sybase Server**
- ī Managing and maintaining multiple instances of Databases on Linux and windows servers.
- ī Monitoring daily jobs includes backups, refresh and maintenance jobs.
- company - Hewlett-Packard India Sales PVT. LTD. On the payroll of Softenger India PVT. LTD
- description - ī Installation of SQL Server on standalone as well as windows cluster environments with latest service packs
- ī SQL server installation using slipstream.
- ī Installation of reporting services
- ī Creating logins and users, assigning permissions as per requests.
- ī Security audit for all logins includes maintenance of unused and orphan user logins
- ī Create & Maintain daily and weekly jobs/maintenance plans includes backup, index rebuild/reorganize , update statistics and database consistency check
- ī Create linked servers and ensure connectivity between servers
- ī Monitor disk space proactively & Space management using data and log file shrinking
- ī Monitor blocking, deadlocks, open transactions and slow running queries during performance issues and highlight costly queries to developers.
- ī Configure alerts for deadlock and blocking to maintain performance
- ī Implementing high availability technologies like log shipping, AlwaysON, mirroring and its troubleshooting, also have knowledge on replication
- ī Successfully completed migration of Databases from one server to another
- ī Performing DR drills (Online/Offline) on quarterly basis
- ī Power shell scripting to monitor, restart SQL service and get Email alert for the service status.
- ī Maintain TNS entries for oracle client as per client requests.
- ī Interacting with customers for requirements
- ī Contacting customer to update the status of handling issues and service requests at every stage of resolution
- ī Managing proper escalation and notification matrix for all support levels

Company - TIETO INDIA PVT. LTD

Description - Pune From February 2015 till present

Project Profile:

Oil and Gas unit of Tieto India Pvt. Ltd. is working for Environmental Components (EC) application. Tieto is the authorized service provider in EC. Energy Components is a complete end-to-end hydrocarbon accounting solution following the hydrocarbons from production to transport, sales and revenue recognition. Globally market-leading hydrocarbon accounting software with functionality coverage exceeding other available solutions. Modern, flexible and scalable technology platform. Selected as the global standard and best practice by oil & gas super majors.

Responsibilities: • Oracle Database Administration 11g R2, 12c and 18c •

Supporting databases in 24x7 environments and coordinate with

Application, OS, Storage and Development Teams. Test and Production environments • Regularly monitoring the trace files and Alert log files for database related issues.

• Experience in monitoring the CPU usage, IO and memory utilization at OS level.

• Checking the Alert log file to analyze the ORA errors if any to raise SR with Oracle.

• Monitoring the log files, backups, database space usage and the use of system resources.

• Configuring Backup (RMAN) for database and restoring database.

• Installation, configuring and updating Oracle server software and related Oracle products of 11g and 12c.

• Oracle Server installation, client installation and configuration, PLSQL developer installation.

• Creating database using DBCA and manually.

• Creating of Oracle user and granting proper privileges to user as per request.

• Creating AWR, ASH and ADDM reports for database performance analysis.

• Handling space management and performance issues in Oracle databases.

• Creating remote database link.

• Renaming and resizing of data files in Oracle database if needed.

• Tablespace shrinking with regular time interval to reclaim server space.

• Expertise in Export and Import using data pump in Oracle database.

• Expertise in Configuration of Listener and Tnsnames through NETMGR and NETCA and statically also.

• Managing Oracle Listener and Oracle Network Files.

• Creating user Profiles, granting specific privileges and roles to the users in Oracle database.

• Maintaining tablespaces & data files, Control files, Online Redo log files in Oracle database.

• Worked on AWS cloud services like EC2, S3, RDS, ELB, EBS, VPC, Route53, Auto, Cloud watch, Cloud Front, IAM for installing configuring and troubleshooting on various Amazon images for server migration from physical into cloud.

Company - BNY Mellon

Description - Databases: 600+

Team Size: 8

Duration: Jan 2017 - Till Date

Clients: Over 130+ investment banking organizations who are hosted with Eagle

Responsibilities: Database Management (Support and managing critical production, Pre-production, test and reporting databases in different platforms), Capacity Management Upgrades.

Handling day to day database activities monitoring and incident management.

Building new databases as per the requirement and prepare them for go live with the help of multiple teams.

Working on scheduled activity of database patching (CPU, PSU)

Installing latest patch on production, Dev and Test databases as per the suggestion from Oracle support.

Database Upgrade from 11g and to 12c.

Adding disks to ASM disk groups.

Building DR database using Active Data guard, Make it sync with prod and resolving issues if persists

- â€¢ Data Guard Management- Checking lagging status, removing lagging of archives, checking processes like RFS/MRP, Archives Management
- â€¢ Working on tablespace related issues
- â€¢ Managing user access and profiles
- â€¢ Importing and exporting using datapump
- â€¢ Maintaining inventory of all databases in the single centralize database
- â€¢ Refreshing test environment from production database.

Working with Oracle Support to resolve oracle errors.

Schedule daily and weekly databases backup using RMAN, Troubleshooting in RMAN issues.

Database cloning using RMAN.

Take part in cutover to upgrade application to higher version.

Strictly following ITIL process in incident management and change management.

Providing weekly report of issues in team meeting also participating and suggesting service improvement plans.

Database Migrations from one server to another or to different platforms

â€¢ RCA and impact analysis reporting during any production outage.

Previous Organization: Brose India

Project I: Central IT Management

Company -

Description - Responsibilities: Managing our internal databases and servers of Brose global.

â€¢ Providing 24x7 on-call support in the rotational shifts.

â€¢ Performing day-to-day database activity

- â€¢ Monitoring and responding DBA group Mails for all alerts, issues and ad-hoc business user requests, etc.

â€¢ Database creation, patching

- â€¢ Backup of Database in frequent cycles using Data pump/RMAN.

â€¢ Database refreshes using RMAN, Datapump.

â€¢ Recovery using copy of data / RMAN

- â€¢ Monitoring logs and trace for resolving issues.

â€¢ Creating new VM servers and prepare it for go live, Also decommissioning as per requirements.

â€¢ Weekly patching of windows servers using SCCM and taking actions for patching if needed

- â€¢ Monitoring and troubleshooting of daily and weekly OS backup using Symantec Netbackup
- â€¢ Managing user accounts of OS users and database users
- â€¢ Monitoring OS level alerts using SCOM

Project II: Data Center Migration (Onsite Project)

Responsibilities: Data center migration was one of activity for migration of our datacenter from one location to another. Where our all servers and databases were moved successfully.

â€¢ Installation of Oracle 11g on Linux platforms

- â€¢ Worked on service requests (Incidents / Change / Request)
- â€¢ Creation of users, managing user privileges
- â€¢ Configured RMAN backup for databases
- â€¢ Patching of databases
- â€¢ Configuring physical standby database using Dataguard
- â€¢ Cloning of servers and migrate to another cluster

Areas of Expertise • Oracle Databases 12c, 11g, 10g • Weblogic 12c, 11g • Grid Infrastructure • RMAN • ASM • Middleware: OIM, OAM, SOA • Shell Scripts • DataGuard • Web servers - OHS, Apache • Architecture Designs • Proof of Concepts • DevOps
Education Details
January 2007 Bachelor of Engineering Information Technology Sangli, Maharashtra Walchand College
January 2004 Diploma Computer Engineering Jalgaon, Maharashtra Govt. Polytechnic
Lead Database Administrator

Lead Database Administrator - Tieto Software
Skill Details
DATABASES- Experience - 108 months
MIDDLEWARE- Experience - 96 months
RMAN- Experience - 84 months
SHELL SCRIPTS- Experience - 48 months
Company Details
company - Tieto Software
description - As a part of AO (Application Operations) team, scope in project is quite wide than typical database administration. Range of accomplishments are extended right from Data Tier to Middle Tier & Application Tier:

- Maximized availability of applications from 99.3% to 99.8%
- Raised business by presenting Proof of Concepts for 10+ cases
- Delivered upgrades of various applications time to time to keep it on supported platform
- Saved SLAs as per contract by means of handling P1, P2 issues effectively
- Produced Capacity reports comprising all layers (Data, Middleware, Web) of various applications
- Generated Work Orders as per customer need

Company - Tieto Software
description - Designed databases of various applications

- Planned RMAN backup and recovery, BCP strategies
- Executed Business Continuity Testing for various applications
- Introduced Zero Cost high availability solutions - Active-Passive Failover
- Optimized performance by means of scripting automation
- Established cloning procedures for all layers of various applications
- Delivered Infrastructure changes, like FW Openings & LoadBalancer configuration for new applications
- Eliminated downtime by troubleshoot issues for Middleware products - OIM, OAM, SOA
- Contributed to build & maintain Integration Layer- SMTP, ftp, Reverse Proxy, OCM

Company - Tieto Software
description - Provided database support to environments - PROD, UAT, TEST, DEV

- Performed Database Refresh/Cloning from production to development and support databases
- Reduced risk level by means of upgrading & patching databases time to time
- Protected databases by assigning appropriate roles and privileges as per SOD
- Generated & maintained Middleware schemas using RCU
- Exceeded scope of work by supporting & maintaining WebLogic platform - installation, patching, troubleshooting issues
- Expanded duty scope to web servers: Install & maintain- OHS, apache, tomcat

Company - HSBC Software
description - Being part of project supporting HSBC Bank France, I achieved:

- Handled incidents & service requests as Day to day database administration tasks
- Delivered basic implementation services - Database installation, patching, upgrades
- Performed capacity planning - managing tablespaces, compressions
- Contributed in maintaining quality of databases - managing instances, indexes, re-organization, performance monitoring & tuning using AWR, ADDM reports
- Maintained backups & recovery of database - logical backups (exp/imp), datapump (expdp/impdp), cold backups, hot backups, RMAN backup/restore, RMAN Duplication
- Reduced efforts by automation - Value add initiatives which includes writing shell scripts for automated housekeeping operations, scheduling backups, use crontab/at to schedule tasks
- Implemented high availability solutions - Dataguard

Education Details

May 2011 to May 2014 Bachelor of science Information technology Mumbai,
Maharashtra Mumbai university
Oracle DBA

Oracle database administrator

Skill Details

Installation of Oracle on RH Linux & Windows. Creating/Managing user profiles and analyzing their privileges and tablespace quotas Backup of database Logical and Physical procedures. Recovery of database in case of database crash, disk/media failure, etc. Standard DBA functions like space management, Rollback segments, Extents. Database Management and Monitoring the database. Willing to learn new things. Being a constructive team member, contributing practically to the success of the team.-

Exprience - 48 months

Company Details

company - Accelya kale solutions ltd

description - Database Administrator working in 24*7 support environment maintaining Databases running on Oracle 11g, 12c.

Database Up-gradation from Oracle 11g to Oracle 12c.

Installation of Database critical patches.

Taking cold and hot backups on scheduled times and monitoring backups.

Importing the export dump to another database as per demands.

Automating most of the daily activities through cronjobs, shell scripts or schedulers.

Making Plan of Actions for Various Activities.

Raising SR with Oracle Support for different severity issues.

Handling the Userâ's request and proper client interaction.

Monitoring & managing database growth, tablespaces, adding ,resizing and renaming the datafiles.

Restoration of database using RMAN backups for backup consistency checks.

Migration of Database using export / import and RMAN backups.

Configuring & managing Physical Standby database.

Creating database links, Tablespaces, database directories.

Managing network settings through listener.ora and tnsnames.ora files.

Restoration of data using old logical backup as per client request.

Schema replication across databases through data pump tool.

Taking cold and hot backups on scheduled times and monitoring backups

Taking EXPDP of database, database objects and a particular schema

Using SCP ticketing tool in order keeping track of client requests.Â

Performing Maintenance Activities such as Index Rebuilding and stats gather.

Troubleshooting the Basic LevelÂ performance issuesÂ

Setting up a new environmentÂ from database perspective within the requested timelines

Adding/Deleting disks in ASM and monitoring the ASM diskgroups.

Creating users & privileges with appropriate roles and levels of security.Â

Database Administrator working in 24*7 support environment maintaining Databases running on Oracle 11g, 12c.

Performing database online and offline database re-organization for database enhancement.Â

Migrating database from Non-ASM to ASM file system.

Grid up-gradation from 11g to 12C.

company - Insolutions Global Ltd

description - Oracle software installation(graphical/silent),Database upgrade,Patch upgrade.

Maintaining around 80+ UAT DB servers, 40 production DB and 28 standby/DR DB.

Managing/creating DR & standby servers, DB sync.

Backup and recovery (RMAN/ Datapump).

Performing activities like switchover and failover .

Allocating system storage and planning future storage requirements for the database system

Enrolling users and maintaining system security.

Monitoring Alert log, Snap ID generation, db size, Server space, OEM reports, User validity.

Controlling and monitoring user access to the database .

Scheduling shell scripts or dbms_jobs using Crontab or

DBMS_SCHEDULER (monitoring script, listener check, backup script, AWR reports) etc.

Planning for backup and recovery of database.

Managing the production database for Oracle and SQL Server and resize the space of database/Datafiles/Tablespace/Transactional Logs.

Managing Temp and Undo tablespaces.

Creating primary database storage structures (tablespaces) after application developers have designed an application.

TECHNICAL SKILLS SQL Oracle v10, v11, v12 R programming, Python, linear regression, machine learning and statistical modelling techniques(obtained certification through Edvancer Eduventures training institute) KEY SKILLS Multitasking, working to meet client SLA in high pressure scenarios, handling sensitive clients along with improved skills at being a team player. Excellent communication skills and quick learner. Leadership qualities, team networking and courage to take up the problems proactively.Education Details

June 2012 Sadvidya Pre-University College
Application Database Administrator-DBMS (Oracle)

Application Database Administrator-DBMS (Oracle) - IBM India Pvt Ltd

MACHINE LEARNING- Exprience - 30 months

ORACLE- Exprience - 30 months

SQL- Exprience - 30 months

EXCELLENT COMMUNICATION SKILLS- Exprience - 6 months

Company Details

company - IBM India Pvt Ltd

description - Client: Blue Cross Blue Shield MA: Massachusetts Health Insurance

Used Oracle SQL to store and organize data. This includes capacity planning, installation, configuration, database

design, migration, security, troubleshooting, backup and data recovery.

Worked with client databases installed on Oracle v10, v11, v12 on a Linux platform.

Proficient communication with clients across locations facilitating data elicitation.

Handling numerous business requests and solving them diligently within the given time frame and responding quickly and effectively to production issues within SLA.

Leading a team in co ordination with business to conduct weekly checkouts of the database servers and systems

IBM Certifications

Statistics 101, Applied Data Science with R, Big Data Foundations, Data Science Foundations

Business Analytics Certification (Pune)

Worked on Retail and Banking projects, to design a predictive business model using machine learning techniques in

Database R programming for an efficient business and marketing strategy. D
TECHNICAL EXPERTISE DB Languages: SQL Database Tools: SQL Server 2014/ 2017 Postgresql 9.5, 9.6, Oracle 11gR2 Operating Systems: Redhat Linux, Oracle Linux, Windows Server 2012/ 2016 OTHER TECHNICAL SKILLS ORACLE 11G R2 Proficient in Oracle Database Software Installation, Creation of Database using GUI/Silent DBCA, Architecture, File management, Space Management, User Management, Creating Roles and assigning Privileges/Roles in 11gR2 and troubleshooting them. Hands on experience Control files/Redolog/Archive/Undo Management Configuring Listener.ora/Tnsnames.ora file using Netmgr/netca Generating AWR reports, ADDM, ASH reports to diagnose the problems Database Backup, Cloning/Duplicate using hot & cold backups using RMAN. Knowledge in Flashback Technologies & Expdp/Impdp Implemented Oracle11gR2 RAC on Oracle Linux Platform and knowledge of services for troubleshooting RAC (CRSCTL, SRVCTL) Knowledge on installation and configuration of RAC. Add/Remove Nodes on RAC Configuration of physical standby database (Data guard) Successfully upgraded from 11.2.0.1 to 11.2.0.4 & PSU patching using O patch. STRENGTHS Good Communication skills. Self-confident and can adapt myself to all work environments. Enjoy responsibilities as lead and team player. Patient listener & quick learner. Capable of explaining issues & solving them.Education Details

company - DBA in Marketplace Technologies Ltd
description - Project Title: EBoss, Datafeed, MFDB, RTRMS, IndiaINX
company - Standard & Enterprise
description - Redhat Linux 7.4, Postgresql 9.5, 9.6
Duration: Feb 2017 - till date
Description: Bombay Stock Exchange BSE is Asia's first & the Fastest Stock Exchange in world with the speed of 6 micro seconds and one of India's leading exchange groups provides an efficient and transparent market for trading in equity, currencies, debt instruments, derivatives, mutual funds. BSE SME is India's largest SME platform which has listed over 250 companies and continues to grow at a steady pace.

JOB ROLES & RESPONSIBILITIES

POSTGRESQL -

- â€¢ Worked on Redhat Linux OS Cluster with Postgresql for High Availability (HA) using Pacemaker.
- â€¢ Coordinated with Developers/Linux teams for database knowledge and support.
- â€¢ Participated in implementation of new releases into production.
- â€¢ Installed /Configured Postgresql from source or packages on Redhat Linux servers.
- â€¢ Performed Postgresql Server Management tasks i.e. Backup & Restore, Configuration, Roles, Blockings, Tablespace creation and Troubleshooting.
- â€¢ Worked with Storage team for Disaster Recovery DR setup built on SAN using EMC technology
- â€¢ Configured LDAP authentication & GSSAPI Authentication from Windows to Linux for Postgresql.
- â€¢ Configured logical replication for Database servers, hot standby Postgresql servers, faster database backup methods, schema and tablespace backups.
- â€¢ Configured maximum connections to database on Linux servers.
- â€¢ Installed tds_fdw from source for linked servers to connect to heterogeneous databases & other required extensions, backup configuration, PITR using base backups.

MSSQL -

- â€¢ Day-to-day administration of live SQL Servers.
- â€¢ Participated in Live Primary Recovery PR & Disaster Recovery DR activities.
- â€¢ Participated in PR & DR mocks for new releases into production.
- â€¢ Configured Linked Servers, Transactional replication, Maintenance tasks like database backup & restore, recovery, scheduled jobs, maintenance plans.
- â€¢ Installed & Configured SQL server 2014, 2017 standalone and SQL Cluster servers.
- â€¢ Maintained the security of the database by providing appropriate SQL roles, logins and permissions to the users on demand.
- â€¢ Worked with teams on application rollouts, application issues and SQL server migrations.
- â€¢ Exposure in handling production system with skills and understand client's requirement.
- â€¢ Performed SQL Server service pack upgrades and hot fixes.
- â€¢ Handled multiple SQL Instances on Windows SQL Cluster environment built on EMC SAN.
- â€¢ Worked on MSSQL DB clusters with active/active & active passive servers, Always-On Availability Groups (AAG) and HA/DR Setup.
- â€¢ Have experience on SAN and RAID levels and building and supporting SQL Cluster servers on SAN Environments.

Database Administrator III - BNY Mellon International Operations (India)

PVT. LTD

Skill Details

Sql Dba- Experience - Less than 1 year months
Company Details

company - BNY Mellon International Operations (India) PVT. LTD

description - SQL Server :

ï Installation, configuration of database servers using slipstream and setup all the maintenance jobs as per the standard policy on standalone as well as cluster environments with latest service packs

- † Installation of SSRS, uploading of .rdls and assigning correct data sources to reports. Grant necessary access to users & developers on reporting website. Aware of SSIS and designing packages as well.
- † Create and manage logins, users for database applications, assigning permissions as per requests, resolving user login issues.
- † Migration of all SQL server 2005/2008 servers to higher versions.
- † Setup of database refresh jobs on QA, DEV and UAT environments and fixing orphaned users.
- † Troubleshoot performance related issues.
- † Part of multiple projects to work with developers and provide all required support for testing in QA, UAT & DEV environment.
- † Lead the DR tests for database team.
- † Participate in database purge and archive activities.
- † Writing codes for automating database administration tasks.
- † Worked on automating DR tasks to start the agent jobs on multiple servers, restore databases for log shipped databases without manual intervention for online databases post DR activities.
- † Provide support to vendor databases, follow up with the vendor calls and timely escalate to next level when there is no update in predefined timeline.
- † Installation and configuration of smsql on windows server. Schedule jobs for creation and deletion of clones on sql server. Maintain backups using smsql.

MongoDB Server:

- † Installation and configuration of MongoDB server.
 - † Creation of databases and collection.
 - † Creation new user and grant access using Ops manager.
 - † Monitor database servers using Ops manager.
- Oracle & Sybase Server**
- † Managing and maintaining multiple instances of Databases on Linux and windows servers.
 - † Monitoring daily jobs includes backups, refresh and maintenance jobs.
 - company - Hewlett-Packard India Sales PVT. LTD. On the payroll of Softenger India PVT. LTD
 - description - † Installation of SQL Server on standalone as well as windows cluster environments with latest service packs
 - † SQL server installation using slipstream.
 - † Installation of reporting services
 - † Creating logins and users, assigning permissions as per requests.
 - † Security audit for all logins includes maintenance of unused and orphan user logins
 - † Create & Maintain daily and weekly jobs/maintenance plans includes backup, index rebuild/reorganize , update statistics and database consistency check
 - † Create linked servers and ensure connectivity between servers
 - † Monitor disk space proactively & Space management using data and log file shrinking
 - † Monitor blocking, deadlocks, open transactions and slow running queries during performance issues and highlight costly queries to developers.
 - † Configure alerts for deadlock and blocking to maintain performance
 - † Implementing high availability technologies like log shipping, AlwaysON, mirroring and its troubleshooting, also have knowledge on replication
 - † Successfully completed migration of Databases from one server to another
 - † Performing DR drills (Online/Offline) on quarterly basis
 - † Power shell scripting to monitor, restart SQL service and get Email alert for the service status.
 - † Maintain TNS entries for oracle client as per client requests.
 - † Interacting with customers for requirements

† Contacting customer to update the status of handling issues and service requests at every stage of resolution

Company Details
company - Infiniteworx Omnichannel Pvt. Ltd
description - Pune Sept 2017 to Present

RESPONSIBILITIES:

â€¢ Creating tablespaces and planning the location of data, monitoring the tablespaces growth periodically.

â€¢ All replication setup

â€¢ Moved database Schema changes to stage.

â€¢ Dba support query resolution.

â€¢ Creating user and giving specific privileges

â€¢ Database management.

â€¢ Database recovery, moving data files to different locations.

â€¢ Planning the backup policies and Backup/ Recovery of databases based on the criticality.

â€¢ IMPORT/EXPORT.

â€¢ Design schemas

Key Result Areas:

â€¢ Providing 24 /7 support to resolve database performance issues, Job failures, Sessions & diagnose root causes

â€¢ Installation, configuring and updating Oracle server software and related Oracle products. Installation, configuraing and updating Mysql, Sql server, MariaDB, MongoDB

â€¢ Supported multiple databases and administered Oracle Databases of Large DB Sizes for production, development & test setups.

â€¢ Maintaining table spaces & data files, Control files, Online Redo log files

â€¢ Creating Users, granting Roles & Privileges to users and managing tablespaces for different users by granting quota on Default & Temporary tablespaces.

â€¢ Taking Oracle RMAN Backups (Scheduling for day wise backup)

â€¢ Implementing the incremental, cumulative and full RMAN backup for each database to have space management and effective recovery.

â€¢ Logical Backup Using Export & Import/datapump Export of important tables at regular intervals.

- â¢ Regular checking of trace, alert log file, all ORA errors
- â¢ Working on incidents like User creation/deletion incidents, backup failed incidents.
- â¢ Checking Listener Status, connectivity Troubleshooting and fixing database listener issues.
- â¢ Look for any new alert / error log entries / errors, error details in Trace files generated. Executing DDL & DML scripts as per customer requirements

- â¢ Mentoring, coaching and appraising team members with active involvement in the recruitment process
- â¢ Contributing in Project Documentation and generating daily reports
- â¢ Ensuring compliance to quality norms and taking steps for any non-conformance Spearheading complete project activities ensuring timely completion of project
- â¢ Implementing security policies on different database systems with granting and revoking privileges to the users

- â¢ Following change management processes and participated in related meetings

- â¢ Verifying all Instances/DB are running, Tablespaces are online, Monitor Background processes and status.

RAC- Experience - Less than 1 year months

GOLDEN GATE- Experience - Less than 1 year months

ASM- Experience - Less than 1 year months

DATAGUARD- Experience - Less than 1 year months

Company - TIETO INDIA PVT. LTD

Description - Pune From February 2015 till present

Project Profile:

Oil and Gas unit of Tieto India Pvt. Ltd. is working for Environmental Components (EC) application. Tieto is the authorized service provider in EC. Energy Components is a complete end-to-end hydrocarbon accounting solution following the hydrocarbons from production to transport, sales and revenue recognition. Globally market-leading hydrocarbon accounting software with functionality coverage exceeding other available solutions. Modern, flexible and scalable technology platform. Selected as the global standard and best practice by oil & gas super majors.

Responsibilities:

â€¢ Oracle Database Administration 11g R2, 12c and 18c

Supporting databases in 24x7 environments and coordinate with

Application, OS, Storage and Development Teams. Test and Production environments

â€¢ Regularly monitoring the trace files and Alert log files for database related issues.

â€¢ Experience in monitoring the CPU usage, IO and memory utilization at OS level.

â€¢ Checking the Alert log file to analyze the ORA errors if any to raise SR with Oracle.

â€¢ Monitoring the log files, backups, database space usage and the use of system resources.

â€¢ Configuring Backup (RMAN) for database and restoring database.

â€¢ Installation, configuring and updating Oracle server software and related Oracle products of 11g and 12c.

â€¢ Oracle Server installation, client installation and configuration, PLSQL developer installation.

â€¢ Creating database using DBCA and manually.

â€¢ Creating of Oracle user and granting proper privileges to user as per request.

â€¢ Creating AWR, ASH and ADDM reports for database performance analysis.

â€¢ Handling space management and performance issues in Oracle databases.

â€¢ Creating remote database link.

â€¢ Renaming and resizing of data files in Oracle database if needed.

â€¢ Tablespace shrinking with regular time interval to reclaim server space.

â€¢ Expertise in Export and Import using data pump in Oracle database.

â€¢ Expertise in Configuration of Listener and Tnsnames through NETMGR and NETCA and statically also.

â€¢ Managing Oracle Listener and Oracle Network Files.

â€¢ Creating user Profiles, granting specific privileges and roles to the users in Oracle database.

â€¢ Maintaining tablespaces & data files, Control files, Online Redo log files in Oracle database.

â€¢ Worked on AWS cloud services like EC2, S3, RDS, ELB, EBS, VPC, Route53, Auto, Cloud watch, Cloud Front, IAM for installing configuring and troubleshooting on various Amazon images for server migration from physical into cloud.

Database

B

Technical Skills Databases: Oracle RDBMS- 10g, 11g & 12c

Technology/utilities: Data Pump, RMAN, Data guard, ASM, RAC, Golden

Gate Tools: OCC, PUTTY, SQLPLUS, SQL Developer, Netbackup, SCOM,

SCCM, VMWare Vsphere Operating Systems: RHEL 6.0, RHEL 6.5, UNIX

and Microsoft Windows

Education Details

Database Administrator

Database Administrator - BNY Mellon

Skill Details

DATABASES- Experience - 24 months

ORACLE- Experience - 24 months

RMAN- Experience - 24 months

NETBACKUP- Experience - 24 months

SCOM- Experience - 24 months

Company - BNY Mellon

Description - Databases: 600+

Team Size: 8

Duration: Jan 2017 - Till Date

Clients: Over 130+ investment banking organizations who are hosted with Eagle

Responsibilities: Database Management (Support and managing critical production, Pre-production, test and reporting databases in different platforms), Capacity Management Upgrades.

Handling day to day database activities monitoring and incident management.

Building new databases as per the requirement and prepare them for go live with the help of multiple teams.

Working on scheduled activity of database patching (CPU, PSU)

Installing latest path on production, Dev and Test databases as per the suggestion from Oracle support.

Database Upgrade from 11g and to 12c.

Adding disks to ASM disk groups.

Building DR database using Active Data guard, Make it sync with prod and resolving issues if persists

- â€¢ Data Guard Management- Checking lagging status, removing lagging of archives, checking processes like RFS/MRP, Archives Management
- â€¢ Working on tablespace related issues
- â€¢ Managing user access and profiles
- â€¢ Importing and exporting using datapump
- â€¢ Maintaining inventory of all databases in the single centralize database
- â€¢ Refreshing test environment from production database.

Working with Oracle Support to resolve oracle errors.

Schedule daily and weekly databases backup using RMAN, Troubleshooting in RMAN issues.

Database cloning using RMAN.

Take part in cutover to upgrade application to higher version.

Strictly following ITIL process in incident management and change management.

Providing weekly report of issues in team meeting also participating and suggesting service improvement plans.

Database Migrations from one server to another or to different platforms

â€¢ RCA and impact analysis reporting during any production outage.

Previous Organization: Brose India

Project I: Central IT Management

Company -

Description - Responsibilities: Managing our internal databases and servers of Brose global.

â€¢ Providing 24x7 on-call support in the rotational shifts.

â€¢ Performing day-to-day database activity

- â€¢ Monitoring and responding DBA group Mails for all alerts, issues and ad-hoc business user requests, etc.

â€¢ Database creation, patching

- â€¢ Backup of Database in frequent cycles using Data pump/RMAN.

â€¢ Database refreshes using RMAN, Datapump.

â€¢ Recovery using copy of data / RMAN

- â€¢ Monitoring logs and trace for resolving issues.

â€¢ Creating new VM servers and prepare it for go live, Also decommissioning as per requirements.

â€¢ Weekly patching of windows servers using SCCM and taking actions for patching if needed

- â€¢ Monitoring and troubleshooting of daily and weekly OS backup using Symantec Netbackup
- â€¢ Managing user accounts of OS users and database users
- â€¢ Monitoring OS level alerts using SCOM

Project II: Data Center Migration (Onsite Project)

Responsibilities: Data center migration was one of activity for migration of our datacenter from one location to another. Where our all servers and databases were moved successfully.

â€¢ Installation of Oracle 11g on Linux platforms

- â€¢ Worked on service requests (Incidents / Change / Request)
- â€¢ Creation of users, managing user privileges
- â€¢ Configured RMAN backup for databases
- â€¢ Patching of databases
- â€¢ Configuring physical standby database using Dataguard
- â€¢ Cloning of servers and migrate to another cluster

ACADEMIA / PERSONAL DETAILS

- â€¢ Bachelor of Engineering (B.E.) in Computer Science and Engineering From SGBAU Amravati University,

Current Address:- Mr. Yogesh Tikhhat, C/O: Raj Ahmad, Flat# G2-702,
Dreams Aakruti, Kalepadal, Hadapsar, Pune - 411028
Highest Qualification BE (cse)

Database PAN: - AOFPT5052C

B

Software Skills: * RDBMS: MS SQL SERVER 2000/2005/2008 & 2012, 2014
* Operating Systems: WINDOWS XP/7, WINDOWS SERVER 2008, 12 *
Fundamentals: MS Office 03/07 * Tools: SSMS, Performance Monitor, Sql profiler, SQL lite speed. Company name: Barclays Technology Centre India. Team Size: 24 Role: Database Administrator Support Description: Barclays Technology is a UK based retail & invest bank and 300 years of old bank.. It has operations in over 40 countries and employs approximately 120, 000 people. Barclays is organised into four core businesses: Personal & Corporate (Personal Banking, Corporate Banking, Wealth & Investment Management), Barclaycard, Investment Banking. Responsibilities: â Attending various calls from all over the world on various database issues. â Working on Web Gui alerts and resolving incident tickets within the time lines. â Troubleshooting log shipping issues and fixing the related alerts. â Identifying and Resolving Blocking and locking related issues. â Configuration and monitoring Replication, Log shipping and mirroring setup. â Working on replication issues and Always ON issue. â Granting and revoking permissions on various account provisioning tasks. â Working on call support during the weekend and performing DR test's. and working on weekly maintenance jobs and weekend change requests. Education Details B.Sc. Maths Kakatiya University Board secured
SQL server database administrator

Database administrator

Skill Details

DATABASE- Experience - 120 months
DATABASE ADMINISTRATOR- Experience - 72 months
MAINTENANCE- Experience - 48 months
MS SQL SERVER- Experience - 48 months
REPLICATION- Experience - 48 months
Company Details
company - Barclays global services centre
description - SQL server databases implementation and maintenances

Log shipping, replication, High availability, clustering, performance tuning, database mirroring, Installation, configuration, upgradation, migration
company - Wipro Infotech Pvt Ltd
description - SQL server database administrator
company - CITI Bank
description - Worked as Database Support at Accord Fintech, Sanpada from Sep 2008 to 2013 Feb.
company -
description - 2012.
â Sound knowledge in Database Backup, Restore, Attach, and Detach and Disaster Recovery procedures.
â Developed backup and recovery strategies for production environment.
â Ensuring data consistency in the database through DBCC and DMV commands.
â Experience in query tuning and stored procedures and troubleshooting performance issues.
â Having hands on experience in DR process including log shipping and database mirroring.
â Experience in scheduling monitoring of Jobs.
â Experience in configure and troubleshooting in Always ON.
â Creating and Maintaining of Maintenance Plan.
â Expertise in planning and implementing MS SQL Server Security and Database permissions.
â Clear understanding of Implementation of Log Shipping, Replication and mirroring of databases between the servers.
â Performance Tuning (Performance Monitor, SQL Profiler Query Analyzer) â Security for server & Databases Implementing security by creating roles/users,
Added users in roles, assigning rights to roles.
â Create and maintaining the linked servers between sql Instances.
â Create and maintaining and Database mail.
â Monitor and troubleshoot database issues.
â Creating DTS packages for executing the required tasks.
â Experts in create indexes, Maintaining indexes and rebuilds and reorganizes.
â Daily Maintenance of SQL Servers included reviewing SQL error logs, Event Viewer.

Areas of Expertise Oracle Databases 12c, 11g, 10g Weblogic 12c, 11g Grid Infrastructure RMAN ASM Middleware: OIM, OAM, SOA Shell Scripts DataGuard Web servers - OHS, Apache Architecture Designs Proof of Concepts DevOps Education Details January 2007 Bachelor of Engineering Information Technology Sangli, Maharashtra Walchand College January 2004 Diploma Computer Engineering Jalgaon, Maharashtra Govt. Polytechnic Lead Database Administrator

Lead Database Administrator - Tieto Software
Skill Details
DATABASES- Experience - 108 months
MIDDLEWARE- Experience - 96 months
RMAN- Experience - 84 months
SHELL SCRIPTS- Experience - 48 months
Company Details
company - Tieto Software
description - As a part of AO (Application Operations) team, scope in project is quite wide than typical database administration. Range of accomplishments are extended right from Data Tier to Middle Tier & Application Tier:

- Maximized availability of applications from 99.3% to 99.8%
- Raised business by presenting Proof of Concepts for 10+ cases
- Delivered upgrades of various applications time to time to keep it on supported platform
- Saved SLAs as per contract by means of handling P1, P2 issues effectively
- Produced Capacity reports comprising all layers (Data, Middleware, Web) of various applications
- Generated Work Orders as per customer need

company - Tieto Software
description - Designed databases of various applications

- Planned RMAN backup and recovery, BCP strategies
- Executed Business Continuity Testing for various applications
- Introduced Zero Cost high availability solutions - Active-Passive Failover
- Optimized performance by means of scripting automation
- Established cloning procedures for all layers of various applications
- Delivered Infrastructure changes, like FW Openings & LoadBalancer configuration for new applications
- Eliminated downtime by troubleshoot issues for Middleware products - OIM, OAM, SOA
- Contributed to build & maintain Integration Layer- SMTP, ftp, Reverse Proxy, OCM

company - Tieto Software
description - Provided database support to environments - PROD, UAT, TEST, DEV

- Performed Database Refresh/Cloning from production to development and support databases
- Reduced risk level by means of upgrading & patching databases time to time
- Protected databases by assigning appropriate roles and privileges as per SOD
- Generated & maintained Middleware schemas using RCU
- Exceeded scope of work by supporting & maintaining WebLogic platform - installation, patching, troubleshooting issues
- Expanded duty scope to web servers: Install & maintain- OHS, apache, tomcat

company - HSBC Software
description - Being part of project supporting HSBC Bank France, I achieved:

- Handled incidents & service requests as Day to day database administration tasks
- Delivered basic implementation services - Database installation, patching, upgrades
- Performed capacity planning - managing tablespaces, compressions
- Contributed in maintaining quality of databases - managing instances, indexes, re-organization, performance monitoring & tuning using AWR, ADDM reports
- Maintained backups & recovery of database - logical backups (exp/imp), datapump (expdp/impdp), cold backups, hot backups, RMAN backup/restore, RMAN Duplication
- Reduced efforts by automation - Value add initiatives which includes writing shell scripts for automated housekeeping operations, scheduling backups, use crontab/at to schedule tasks
- Implemented high availability solutions - Dataguard

Education Details

May 2011 to May 2014 Bachelor of science Information technology Mumbai,
Maharashtra Mumbai university
Oracle DBA

Oracle database administrator

Skill Details

Installation of Oracle on RH Linux & Windows. Creating/Managing user profiles and analyzing their privileges and tablespace quotas Backup of database Logical and Physical procedures. Recovery of database in case of database crash, disk/media failure, etc. Standard DBA functions like space management, Rollback segments, Extents. Database Management and Monitoring the database. Willing to learn new things. Being a constructive team member, contributing practically to the success of the team.-

Exprience - 48 months

Company Details

company - Accelya kale solutions ltd

description - Database Administrator working in 24*7 support environment maintaining Databases running on Oracle 11g, 12c.

Database Up-gradation from Oracle 11g to Oracle 12c.

Installation of Database critical patches.

Taking cold and hot backups on scheduled times and monitoring backups.

Importing the export dump to another database as per demands.

Automating most of the daily activities through cronjobs, shell scripts or schedulers.

Making Plan of Actions for Various Activities.

Raising SR with Oracle Support for different severity issues.

Handling the Userâ's request and proper client interaction.

Monitoring & managing database growth, tablespaces, adding ,resizing and renaming the datafiles.

Restoration of database using RMAN backups for backup consistency checks.

Migration of Database using export / import and RMAN backups.

Configuring & managing Physical Standby database.

Creating database links, Tablespaces, database directories.

Managing network settings through listener.ora and tnsnames.ora files.

Restoration of data using old logical backup as per client request.

Schema replication across databases through data pump tool.

Taking cold and hot backups on scheduled times and monitoring backups

Taking EXPDP of database, database objects and a particular schema

Using SCP ticketing tool in order keeping track of client requests.Â

Performing Maintenance Activities such as Index Rebuilding and stats gather.

Troubleshooting the Basic LevelÂ performance issuesÂ

Setting up a new environmentÂ from database perspective within the requested timelines

Adding/Deleting disks in ASM and monitoring the ASM diskgroups.

Creating users & privileges with appropriate roles and levels of security.Â

Database Administrator working in 24*7 support environment maintaining Databases running on Oracle 11g, 12c.

Performing database online and offline database re-organization for database enhancement.Â

Migrating database from Non-ASM to ASM file system.

Grid up-gradation from 11g to 12C.

company - Insolutions Global Ltd

description - Oracle software installation(graphical/silent),Database upgrade,Patch upgrade.

Maintaining around 80+ UAT DB servers, 40 production DB and 28 standby/DR DB.

Managing/creating DR & standby servers, DB sync.

Backup and recovery (RMAN/ Datapump).

Performing activities like switchover and failover .

Allocating system storage and planning future storage requirements for the database system

Enrolling users and maintaining system security.

Monitoring Alert log, Snap ID generation, db size, Server space, OEM reports, User validity.

Controlling and monitoring user access to the database .

Scheduling shell scripts or dbms_jobs using Crontab or

DBMS_SCHEDULER (monitoring script, listener check, backup script, AWR reports) etc.

Planning for backup and recovery of database.

Managing the production database for Oracle and SQL Server and resize the space of database/Datafiles/Tablespace/Transactional Logs.

Managing Temp and Undo tablespaces.

Creating primary database storage structures (tablespaces) after application developers have designed an application.

TECHNICAL SKILLS â¢ SQL â¢ Oracle v10, v11, v12 â¢ R programming, Python, linear regression, machine learning and statistical modelling techniques(obtained certification through Edvancer Eduventures training institute) KEY SKILLS â¢ Multitasking, working to meet client SLA in high pressure scenarios, handling sensitive clients along with improved skills at being a team player. â¢ Excellent communication skills and quick learner. â¢ Leadership qualities, team networking and courage to take up the problems proactively.

Hadoop Developer

Hadoop Developer - INFOSYS

Skill Details

Company Details

company - INFOSYS

description - Project Description: The banking information had stored the data in different data warehouse systems for each department but it becomes difficult for the organization to manage the data and to perform some analytics on the past data, so it is combined them into a single global repository in Hadoop for analysis.

Responsibilities:

â¢ Analyze the banking rates data set.

â¢ Create specification document.

â¢ Provide effort estimation.

â¢ Develop SPARK Scala, SPARK SQL Programs using Eclipse IDE on Windows/Linux environment.

â¢ Create KPI's test scenarios, test cases, test result document.

â¢ Test the Scala programs in Linux Spark Standalone mode.

â¢ setup multi cluster on AWS, deploy the Spark Scala programs

â¢ Provided solution using Hadoop ecosystem - HDFS, MapReduce, Pig, Hive, HBase, and Zookeeper.

â¢ Provided solution using large scale server-side systems with distributed processing algorithms.

â¢ Created reports for the BI team using Sqoop to export data into HDFS and Hive.

â¢ Provided solution in supporting and assisting in troubleshooting and optimization of MapReduce jobs and

Pig Latin scripts.

- â€¢ Deep understanding of Hadoop design principles, cluster connectivity, security and the factors that affect system performance.
- â€¢ Worked on Importing and exporting data from different databases like Oracle, Teradata into HDFS and Hive using Sqoop, TPT and Connect Direct.
- â€¢ Import and export the data from RDBMS to HDFS/HBASE
- â€¢ Wrote script and placed it in client side so that the data moved to HDFS will be stored in temporary file and then it will start loading it in hive tables.
- â€¢ Developed the Sqoop scripts in order to make the interaction between Pig and MySQL Database.
- â€¢ Involved in developing the Hive Reports, Partitions of Hive tables.
- â€¢ Created and maintained technical documentation for launching HADOOP Clusters and for executing HIVE queries and PIG scripts.
- â€¢ Involved in running Hadoop jobs for processing millions of records of text data

Environment: Java, Hadoop, HDFS, Map-Reduce, Pig, Hive, Sqoop, Flume, Oozie, HBase, Spark, Scala, Linux, NoSQL, Storm, Tomcat, Putty, SVN, GitHub, IBM WebSphere v8.5.

Project #1: TELECOMMUNICATIONS

Hadoop Developer

Description To identify customers who are likely to churn and 360-degree view of the customer is created from different heterogeneous data sources. The data is brought into data lake (HDFS) from different sources and analyzed using different Hadoop tools like pig and hive.

Responsibilities:

- â€¢ Installed and Configured Apache Hadoop tools like Hive, Pig, HBase and Sqoop for application development and unit testing.
- â€¢ Wrote MapReduce jobs to discover trends in data usage by users.
- â€¢ Involved in database connection using SQOOP.
- â€¢ Involved in creating Hive tables, loading data and writing hive queries Using the HiveQL.
- â€¢ Involved in partitioning and joining Hive tables for Hive query optimization.
- â€¢ Experienced in SQL DB Migration to HDFS.
- â€¢ Used NoSQL(HBase) for faster performance, which maintains the data in the De-Normalized way for OLTP.
- â€¢ The data is collected from distributed sources into Avro models. Applied transformations and standardizations and loaded into HBase for further data processing.
- â€¢ Experienced in defining job flows.
- â€¢ Used Oozie to orchestrate the workflow.
- â€¢ Implemented Fair schedulers on the Job tracker to share the resources of the Cluster for the Map Reduce jobs given by the users.
- â€¢ Exported the analyzed data to the relational databases using HIVE for visualization and to generate reports for the BI team.

Environment: Hadoop, Hive, Linux, MapReduce, HDFS, Hive, Python, Pig, Sqoop, Cloudera, Shell Scripting,

Hadoop Java (JDK 1.6), Java 6, Oracle 10g, PL/SQL, SQL*PLUS

C

Skill Set: Hadoop, Map Reduce, HDFS, Hive, Sqoop, java. Duration: 2016 to 2017. Role: Hadoop Developer Rplus offers an quick, simple and powerful cloud based Solution, Demand Sense to accurately predict demand for your product in all your markets which Combines Enterprise and External Data to predict demand more accurately through Uses Social Conversation and Sentiments to derive demand and Identifies significant drivers of sale out of hordes of factors that Selects the best suited model out of multiple forecasting models for each product. Responsibilities:

- Involved in deploying the product for customers, gathering requirements and algorithm optimization at backend of the product.
- Load and transform Large Datasets of structured semi structured.
- Responsible to manage data coming from different sources and application
- Supported Map Reduce Programs those are running on the cluster
- Involved in creating Hive tables, loading with data and writing hive queries which will run internally in map reduce way.

Systems Engineer/Hadoop Developer

Systems Engineer/Hadoop Developer - Tata Consultancy Services
Skill Details
Hadoop,Spark,Sqoop,Hive,Flume,Pig- Exprience - 24 months
Company Details
company - Tata Consultancy Services
description - Roles and responsibility:

Working for a American pharmaceutical company (one of the world's premier biopharmaceutical) who develops and produces medicines and vaccines for a wide range of medical disciplines, including immunology, oncology, cardiology, endocrinology, and neurology. To handle large amount of United Healthcare data big data analytics is used. Data from all possible data sources like records of all Patients(Old and New), records of medicines, Treatment Pathways & Patient Journey for Health Outcomes, Patient Finder (or Rare Disease Patient Finder), etc being gathered, stored and processed at one place.

â€¢ Worked on cluster with specs as:
o Cluster Architecture: Fully Distributed Package Used:
CDH3
o Cluster Capacity: 20 TB
o No. of Nodes: 10 Data Nodes + 3 Masters + NFS Backup For NN

â€¢ Developed proof of concepts for enterprise adoption of Hadoop.
â€¢ Used SparkAPI over Cloudera Hadoop YARN to perform analytics on the Healthcare data in Cloudera distribution.
â€¢ Responsible for cluster maintenance, adding and removing cluster nodes, cluster monitoring and trouble-shooting, manage and review data backups, and reviewing Hadoop log files.
â€¢ Imported & exported large data sets of data into HDFS and vice-versa using sqoop.
â€¢ Involved developing the Pig scripts and Hive Reports
â€¢ Worked on Hive partition and bucketing concepts and created hive external and Internal tables with Hive partition. Monitoring Hadoop scripts which take the input from HDFS and load the data into Hive.
â€¢ Developed Spark scripts by using Scala shell commands as per the requirement and worked with both Data frames/SQL/Data sets and RDD/MapReduce in Spark. Optimizing of existing algorithms in Hadoop using SparkContext, Spark-SQL, Data Frames and RDD's.
â€¢ Collaborated with infrastructure, network, database, application and BI to ensure data, quality and availability.
â€¢ Developed reports using TABLEAU and exported data to HDFS and hive using Sqoop.
â€¢ Used ORC & Parquet file formats for serialization of data, and Snappy for the compression of the data.

Achievements

â€¢ Appreciation for showing articulate leadership qualities in doing work with the team.
â€¢ Completed the internal certification of TCS Certified Hadoop Developer.

Ongoing Learning

â€¢ Preparing and scheduled the Cloudera Certified Spark Developer CCA

Areas of expertise : Big Data Ecosystems: Hadoop-HDFS, MapReduce, Hive, Pig, Sqoop, HBase Oozie, Spark, Pyspark, HUE and having knowledge on cassandra : Programming Languages: Python, Core Java and have an idea on Scala : Databases: Oracle 10g, MySQL, Sqlserver NoSQL - HBase, Cassandra : Tools: Eclipse, Toad, FTP, Tectia, Putty, Autosys, Anaconda, Jupyter notebook and Devops - RTC, RLM. : Scripting Languages: JSP : Platforms: Windows, Unix

company - Larsen and Toubro

description - Worked as a Software Engineer in Technosoft Corporation, Chennai from Aug 2015 to sep 2016.

company - Current Project

description - Duration: September 2016 to Till date

Vendor: Citi bank

Description:

Citibank's (Citi) Anti-Money Laundering (AML) Transaction Monitoring (TM) program is a future state solution and a rules-based system for transaction monitoring of ICG-Markets business.

Roles and Responsibilities:

: Building and providing domain knowledge for Anti Money Laundering among team members.

: The layered architecture has Data Warehouse and Workspace layers which are used by Business Analysts.

: Actively involved in designing of star-schema model involving various Dimensions and Fact tables.

: Designed SCD2 for maintaining history of the DIM data.

: Developing Hive Queries for mapping data between different layers of architecture, and it's usage in Oozie Workflows.

: Integration with Data Quality and Reconciliation Module.

: Regression and Integration testing of solution for any issues in integration with other modules and effectively testing the data flow from layer-to-layer.

: Transaction monitoring system development to generate Alerts for the suspicious and fraudulent transactions based on requirements provide by BAs.

: Developing spark Jobs for various business rules.

: Learning "Machine Learning", which will be used further in the project for developing an effective model for Fraud detection for Anti Money Laundering system.

: Scheduling Jobs using Autosys tool.

: Deployment and Code Management using RTC and RLM(Release Lifecycle Management)

Hadoop Developer

Current Project: PRTS - RAN

Environment: Hadoop 2.x, HDFS, Yarn, Hive, Sqoop, HBase, Tez, Tableau, Sqlserver, Teradata

Cluster Size: 96 Node Cluster.

description - Project Description

Data warehouse division has multiple products for injecting, storing, analysing and presenting data. The Data Lake program is started to provide multi-talent, secure data hub to store application's data on Hadoop platform with strong data governance, lineage, auditing and monitoring capabilities. The object of the project is to provide necessary engineering support to analytics and application teams so that they can focus on the business logic development. In this project, the major task is to set up the Hadoop cluster and govern all the activities which are required for the smooth functioning of various Hadoop ecosystems. As the day and day data increasing so to provide stability to the ecosystem and smooth working of it, Developing and automating the various requirement specific utilities.

1. Developed proactive Health Check utility for Data Lake. The utility proactively checks the smooth functioning of all Hadoop components on the cluster and sends the result to email in HTML format. The utility is being used for daily Health Checks as well as after upgrades.
2. Getting the data in different formats and processing the data in Hadoop ecosystem after filtering the data using the appropriate techniques.
3. Developed data pipeline utility to ingest data from RDBMS database to Hive external tables using Sqoop commands. The utility also offers the data quality check like row count validation.
4. Developed and automated various cluster health check, usage, capacity related reports using Unix shell scripting.
5. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations.
6. Creating flume agents to process the data to Hadoop ecosystem side.
7. Performed benchmark testing on the Hive Queries and impala queries.
8. Involved in setting up the cluster and its components like edge node and HA implementation of the services: Hive Server2, Impala, and HDFS.
9. Filtering the required data from available data using different technologies like pig, regex Serde etc.
10. Dataiku benchmark testing on top of impala and hive in compare to Greenplum database.
11. Moving the data from Greenplum database to Hadoop side with help of Sqoop pipeline, process the data to Hadoop side and storing the data into hive tables to do the performance testing.
12. Dealing with the Hadoop ecosystem related issues in order to provide stability to WM Hadoop ecosystem.
13. Rescheduling of job from autosys job hosting to TWS job hosting for better performance.

description - Project Description

Migration of data from RDBMS database to Hive (Hadoop ecosystem) .
Hadoop platform ability with strong data governance, lineage, auditing and monitoring capabilities. The objective of this project was to speed up the data processing so that the analysis and decision making become easy. Due to RDBMS limitations to process waste amount of data at once and produce the results at the earliest, Client wanted to move the data to Hadoop ecosystem so that they can over-come from those limitations and focus on business improvement only.

Responsibility 1. Optimising the SQL queries for those data which were not required to move from RDBMS to any other platform.

2. Writing the Hive queries and logic to move the data from RDBMS to Hadoop ecosystem.

3. Writing the hive queries to analyse the required data as per the business requirements.

4. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations.

5. Writing the sqoop commands and scripts to move the data from RDBMS to Hadoop side.

company - Tata Consultancy Services

description - Project Description

Create recs and migrating static setup of reconciliations from 8.1 version to 9.1 version of the environment Intellimatch.

Responsibility 1. Have worked on extracting business requirements, analyzing and implementing them in developing Recs 2. Worked on migrating static setup of reconciliations from 8.1 version to 9.1 version of the environment Intellimatch.

3. Done the back end work where most of the things were related to writing the sql queries and provide the data for the new recs.

Hadoop Developer - PRGX India Private Limited Pune

Skill Details

Company Details

company - PRGX India Private Limited Pune

description - Team Size: 10+

Environment: Hive, Spark, Sqoop, Scala and Flume.

Project Description:

The bank wanted to help its customers to avail different products of the bank through analyzing their expenditure behavior. The customers spending ranges from online shopping, medical expenses in hospitals, cash transactions, and debit card usage etc. the behavior allows the bank to create an analytical report and based on which the bank used to display the product offers on the customer portal which was built using java. The portal allows the customers to login and see their transactions which they make on a day to day basis .the analytics also help the customers plan their budgets through the budget watch and my financial forecast applications embedded into the portal. The portal used hadoop framework to analyses the data as per the rules and regulations placed by the regulators from the respective countries. The offers and the interest rates also complied with the regulations and all these processing was done using the hadoop framework as big data analytics system.

Role & Responsibilities:

- â Import data from legacy system to hadoop using Sqoop, flume.
- â Implement the business logic to analyses the data
- â Per-process data using spark.
- â Create hive script and loading data into hive.
- â Sourcing various attributes to the data processing logic to retrieve the correct results.

Project 2

company - PRGX India Private Limited Pune

description -

company - PRGX India Private Limited Pune

description - Team Size: 11+

Environment: Hadoop, HDFS, Hive, Sqoop, MySQL, Map Reduce

Project Description:-

The Purpose of this project is to store terabytes of information from the web application and extract meaningful information out of it.the solution was based on the open source s/w hadoop. The data will be stored in hadoop file system and processed using Map/Reduce jobs. Which in turn includes getting the raw html data from the micro websites, process the html to obtain product and user information, extract various reports out of the visitor tracking information and export the information for further processing

Role & Responsibilities:

- â Move all crawl data flat files generated from various micro sites to HDFS for further processing.
- â Sqoop implementation for interaction with database
- â Write Map Reduce scripts to process the data file.
- â Create hive tables to store the processed data in tabular formats.
- â Reports creation from hive data.

Project 3

company - PRGX India Private Limited Pune

description - Team Size: 15+

Environment: Informatica 9.5, Oracle11g, UNIX

Project Description:

Pfizer Inc. is an American global pharmaceutical corporation headquartered in New York City. The main objective of the project is to build a Development Data Repository for Pfizer Inc. Because all the downstream application are like Etrack, TSP database, RTS, SADMS, GFS, GDO having their own sql request on the OLTP system directly due to which the performance of OLTP system goes slows down. For this we have created a Development Data Repository to replace the entire sql request directly on the OLTP system. DDR process extracts all clinical, pre-clinical, study, product, subject, sites related information from the upstream applications like EPECS, CDSS, RCM, PRC, E-CLINICAL, EDH and after applying some business logic put it into DDR core tables. From these snapshot and dimensional layer are created which are used for reporting application.

Role & Responsibilities:

- â To understand & analyze the requirement documents and resolve the queries.
- â To design Informatica mappings by using various basic transformations

like Filter, Router, Source qualifier, Lookup etc and advance transformations like Aggregators, Joiner, Sorters and so on.

- â Perform cross Unit and Integration testing for mappings developed within the team. Reporting bugs and bug fixing.
- â Create workflow/batches and set the session dependencies.
- â Implemented Change Data Capture using mapping parameters, SCD and SK generation.
- â Developed Mapplet, reusable transformations to populate the data into data warehouse.
- â Created Sessions & Worklets using workflow Manager to load the data into the Target Database.
- â Involved in Unit Case Testing (UTC)
- â Performing Unit Testing and UAT for SCD Type1/Type2, fact load and CDC implementation.

Hadoop Developer - INFOSYS

Skill Details

Company Details

company - INFOSYS

description - Project Description: The banking information had stored the data in different data ware house systems for each department but it becomes difficult for the organization to manage the data and to perform some analytics on the past data, so it is combined them into a single global repository in Hadoop for analysis.

Responsibilities:

- â¢ Analyze the banking rates data set.
- â¢ Create specification document.
- â¢ Provide effort estimation.
- â¢ Develop SPARK Scala, SPARK SQL Programs using Eclipse IDE on Windows/Linux environment.
- â¢ Create KPI's test scenarios, test cases, test result document.
- â¢ Test the Scala programs in Linux Spark Standalone mode.
- â¢ setup multi cluster on AWS, deploy the Spark Scala programs
- â¢ Provided solution using Hadoop ecosystem - HDFS, MapReduce, Pig, Hive, HBase, and Zookeeper.
- â¢ Provided solution using large scale server-side systems with distributed processing algorithms.
- â¢ Created reports for the BI team using Sqoop to export data into HDFS and Hive.
- â¢ Provided solution in supporting and assisting in troubleshooting and optimization of MapReduce jobs and Pig Latin scripts.
- â¢ Deep understanding of Hadoop design principles, cluster connectivity, security and the factors that affect system performance.
- â¢ Worked on Importing and exporting data from different databases like Oracle, Teradata into HDFS and Hive using Sqoop, TPT and Connect Direct.
- â¢ Import and export the data from RDBMS to HDFS/HBASE
- â¢ Wrote script and placed it in client side so that the data moved to HDFS will be stored in temporary file and then it will start loading it in hive tables.
- â¢ Developed the Sqoop scripts in order to make the interaction between Pig and MySQL Database.
- â¢ Involved in developing the Hive Reports, Partitions of Hive tables.
- â¢ Created and maintained technical documentation for launching HADOOP Clusters and for executing HIVE queries and PIG scripts.
- â¢ Involved in running Hadoop jobs for processing millions of records of text data

Environment: Java, Hadoop, HDFS, Map-Reduce, Pig, Hive, Sqoop, Flume, Oozie, HBase, Spark, Scala, Linux, NoSQL, Storm, Tomcat, Putty, SVN, GitHub, IBM WebSphere v8.5.

Project #1: TELECOMMUNICATIONS
Hadoop Developer

Description To identify customers who are likely to churn and 360-degree view of the customer is created from different heterogeneous data sources.

The data is brought into data lake (HDFS) from different sources and analyzed using different Hadoop tools like pig and hive.

Responsibilities:

- â¢ Installed and Configured Apache Hadoop tools like Hive, Pig, HBase and Sqoop for application development and unit testing.
- â¢ Wrote MapReduce jobs to discover trends in data usage by users.
- â¢ Involved in database connection using SQQOP.
- â¢ Involved in creating Hive tables, loading data and writing hive queries Using the HiveQL.
- â¢ Involved in partitioning and joining Hive tables for Hive query optimization.
- â¢ Experienced in SQL DB Migration to HDFS.
- â¢ Used NoSQL(HBase) for faster performance, which maintains the data in the De-Normalized way for OLTP.
- â¢ The data is collected from distributed sources into Avro models. Applied transformations and standardizations and loaded into HBase for further data processing.
- â¢ Experienced in defining job flows.
- â¢ Used Oozie to orchestrate the workflow.
- â¢ Implemented Fair schedulers on the Job tracker to share the resources of the Cluster for the Map Reduce jobs given by the users.
- â¢ Exported the analyzed data to the relational databases using HIVE for visualization and to generate reports for the BI team.

Hadoop

Environment: Hadoop, Hive, Linux, MapReduce, HDFS, Hive, Python, Pig, Sqoop, Cloudera, Shell Scripting,

Java (JDK 1.6), Java 6, Oracle 10g, PL/SQL, SQL*PLUS
Skill Set: Hadoop, Map Reduce, HDFS, Hive, Sqoop, Java. Duration: 2016 to 2017. Role: Hadoop Developer Rplus offers an quick, simple and powerful cloud based Solution, Demand Sense to accurately predict demand for your product in all your markets which Combines Enterprise and External Data to predict demand more accurately through Uses Social Conversation and Sentiments to derive demand and Identifies significant drivers of sale out of hordes of factors that Selects the best suited model out of multiple forecasting models for each product. Responsibilities: â¢ Involved in deploying the product for customers, gathering requirements and algorithm optimization at backend of the product. â¢ Load and transform Large Datasets of structured semi structured. â¢ Responsible to manage data coming from different sources and application â¢ Supported Map Reduce Programs those are running on the cluster â¢ Involved in creating Hive tables, loading with data and writing hive queries which will run internally in map reduce way.Education Details

Details
company - Tata Consultancy Services
description - Roles and responsibility:

Working for a American pharmaceutical company (one of the world's premier biopharmaceutical) who develops and produces medicines and vaccines for a wide range of medical disciplines, including immunology, oncology, cardiology, endocrinology, and neurology. To handle large amount of United Healthcare data big data analytics is used. Data from all possible data sources like records of all Patients(Old and New), records of medicines, Treatment Pathways & Patient Journey for Health Outcomes, Patient Finder (or Rare Disease Patient Finder), etc being gathered, stored and processed at one place.

â€¢ Worked on cluster with specs as:
o Cluster Architecture: Fully Distributed Package Used:
CDH3
o Cluster Capacity: 20 TB
o No. of Nodes: 10 Data Nodes + 3 Masters + NFS Backup For NN

â€¢ Developed proof of concepts for enterprise adoption of Hadoop.
â€¢ Used SparkAPI over Cloudera Hadoop YARN to perform analytics on the Healthcare data in Cloudera distribution.
â€¢ Responsible for cluster maintenance, adding and removing cluster nodes, cluster monitoring and trouble-shooting, manage and review data backups, and reviewing Hadoop log files.
â€¢ Imported & exported large data sets of data into HDFS and vice-versa using sqoop.
â€¢ Involved developing the Pig scripts and Hive Reports
â€¢ Worked on Hive partition and bucketing concepts and created hive external and Internal tables with Hive partition.Monitoring Hadoop scripts which take the input from HDFS and load the data into Hive.
â€¢ Developed Spark scripts by using Scala shell commands as per the requirement and worked with both Data frames/SQL/Data sets and RDD/MapReduce in Spark. Optimizing of existing algorithms in Hadoop using SparkContext, Spark-SQL, Data Frames and RDD's.
â€¢ Collaborated with infrastructure, network, database, application and BI to ensure data, quality and availability.
â€¢ Developed reports using TABLEAU and exported data to HDFS and hive using Sqoop.
â€¢ Used ORC & Parquet file formats for serialization of data, and Snappy for the compression of the data.

Achievements

â€¢ Appreciation for showing articulate leadership qualities in doing work with the team.
â€¢ Completed the internal certification of TCS Certified Hadoop Developer.

Ongoing Learning

â€¢ Preparing and scheduled the Cloudera Certified Spark Developer CCA

description - Worked as a Software Engineer in Technosoft Corporation, Chennai from Aug 2015 to sep 2016.

company - Current Project

description - Duration: September 2016 to Till date

Vendor: Citi bank

Description:

Citibank's (Citi) Anti-Money Laundering (AML) Transaction Monitoring (TM) program is a future state solution and a rules-based system for transaction monitoring of ICG-Markets business.

Roles and Responsibilities:

: Building and providing domain knowledge for Anti Money Laundering among team members.

: The layered architecture has Data Warehouse and Workspace layers which are used by Business Analysts.

: Actively involved in designing of star-schema model involving various Dimensions and Fact tables.

: Designed SCD2 for maintaining history of the DIM data.

: Developing Hive Queries for mapping data between different layers of architecture, and it's usage in Oozie Workflows.

: Integration with Data Quality and Reconciliation Module.

: Regression and Integration testing of solution for any issues in integration with other modules and effectively testing the data flow from layer-to-layer.

: Transaction monitoring system development to generate Alerts for the suspicious and fraudulent transactions based on requirements provide by BAs.

: Developing spark Jobs for various business rules.

: Learning "Machine Learning", which will be used further in the project for developing an effective model for Fraud detection for Anti Money Laundering system.

: Scheduling Jobs using Autosys tool.

: Deployment and Code Management using RTC and RLM(Release Lifecycle Management)

Hadoop Developer

description - Project Description

Data warehouse division has multiple products for injecting, storing, analysing and presenting data. The Data Lake program is started to provide multi-talent, secure data hub to store application's data on Hadoop platform with strong data governance, lineage, auditing and monitoring capabilities.

The object of the project is to provide necessary engineering support to analytics and application teams so that they can focus on the business logic development. In this project, the major task is to set up the Hadoop cluster and govern all the activities which are required for the smooth functioning of various Hadoop ecosystems. As the day and day data increasing so to provide stability to the ecosystem and smooth working of it, Developing and automating the various requirement specific utilities.

Responsibility 1. Developed proactive Health Check utility for Data Lake.

The utility proactively checks the smooth functioning of all Hadoop components on the cluster and sends the result to email in HTML format.

The utility is being used for daily Health Checks as well as after upgrades.

2. Getting the data in different formats and processing the data in Hadoop ecosystem after filtering the data using the appropriate techniques.

3. Developed data pipeline utility to ingest data from RDBMS database to Hive external tables using Sqoop commands. The utility also offers the data quality check like row count validation.

4. Developed and automated various cluster health check, usage, capacity related reports using Unix shell scripting.

5. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations.

6. Creating flume agents to process the data to Hadoop ecosystem side.

7. Performed benchmark testing on the Hive Queries and impala queries.

8. Involved in setting up the cluster and its components like edge node and HA implementation of the services: Hive Server2, Impala, and HDFS.

9. Filtering the required data from available data using different technologies like pig, regex Serde etc.

10. Dataiku benchmark testing on top of impala and hive in compare to Greenplum database.

11. Moving the data from Greenplum database to Hadoop side with help of Sqoop pipeline, process the data to Hadoop side and storing the data into hive tables to do the performance testing.

12. Dealing with the Hadoop ecosystem related issues in order to provide stability to WM Hadoop ecosystem.

13. Rescheduling of job from autosys job hosting to TWS job hosting for better performance.

- âc Provide effort estimation.
- âc Develop SPARK Scala, SPARK SQL Programs using Eclipse IDE on Windows/Linux environment.
- âc Create KPI's test scenarios, test cases, test result document.
- âc Test the Scala programs in Linux Spark Standalone mode.
- âc setup multi cluster on AWS, deploy the Spark Scala programs
- âc Provided solution using Hadoop ecosystem - HDFS, MapReduce, Pig, Hive, HBase, and Zookeeper.
- âc Provided solution using large scale server-side systems with distributed processing algorithms.
- âc Created reports for the BI team using Sqoop to export data into HDFS and Hive.
- âc Provided solution in supporting and assisting in troubleshooting and optimization of MapReduce jobs and Pig Latin scripts.
- âc Deep understanding of Hadoop design principles, cluster connectivity, security and the factors that affect system performance.
- âc Worked on Importing and exporting data from different databases like Oracle, Teradata into HDFS and Hive using Sqoop, TPT and Connect Direct.
- âc Import and export the data from RDBMS to HDFS/HBASE
- âc Wrote script and placed it in client side so that the data moved to HDFS will be stored in temporary file and then it will start loading it in hive tables.
- âc Developed the Sqoop scripts in order to make the interaction between Pig and MySQL Database.
- âc Involved in developing the Hive Reports, Partitions of Hive tables.
- âc Created and maintained technical documentation for launching HADOOP Clusters and for executing HIVE queries and PIG scripts.
- âc Involved in running Hadoop jobs for processing millions of records of text data

Environment: Java, Hadoop, HDFS, Map-Reduce, Pig, Hive, Sqoop, Flume, Oozie, HBase, Spark, Scala, Linux, NoSQL, Storm, Tomcat, Putty, SVN, GitHub, IBM WebSphere v8.5.

Project #1: TELECOMMUNICATIONS
Hadoop Developer

Description To identify customers who are likely to churn and 360-degree view of the customer is created from different heterogeneous data sources.

The data is brought into data lake (HDFS) from different sources and analyzed using different Hadoop tools like pig and hive.

Responsibilities:

- â¢ Installed and Configured Apache Hadoop tools like Hive, Pig, HBase and Sqoop for application development and unit testing.
- â¢ Wrote MapReduce jobs to discover trends in data usage by users.
- â¢ Involved in database connection using SQuoP.
- â¢ Involved in creating Hive tables, loading data and writing hive queries Using the HiveQL.
- â¢ Involved in partitioning and joining Hive tables for Hive query optimization.
- â¢ Experienced in SQL DB Migration to HDFS.
- â¢ Used NoSQL(HBase) for faster performance, which maintains the data in the De-Normalized way for OLTP.
- â¢ The data is collected from distributed sources into Avro models. Applied transformations and standardizations and loaded into HBase for further data processing.
- â¢ Experienced in defining job flows.
- â¢ Used Oozie to orchestrate the workflow.
- â¢ Implemented Fair schedulers on the Job tracker to share the resources of the Cluster for the Map Reduce jobs given by the users.
- â¢ Exported the analyzed data to the relational databases using HIVE for visualization and to generate reports for the BI team.

Environment: Hadoop, Hive, Linux, MapReduce, HDFS, Hive, Python, Pig, Sqoop, Cloudera, Shell Scripting, Java (JDK 1.6), Java 6, Oracle 10g, PL/SQL, SQL*PLUS

description - Duration: September 2016 to Till date

Vendor: Citi bank

Description:

Citibank's (Citi) Anti-Money Laundering (AML) Transaction Monitoring (TM) program is a future state solution and a rules-based system for transaction monitoring of ICG-Markets business.

Roles and Responsibilities:

: Building and providing domain knowledge for Anti Money Laundering among team members.

: The layered architecture has Data Warehouse and Workspace layers which are used by Business Analysts.

: Actively involved in designing of star-schema model involving various Dimensions and Fact tables.

: Designed SCD2 for maintaining history of the DIM data.

: Developing Hive Queries for mapping data between different layers of architecture, and it's usage in Oozie Workflows.

: Integration with Data Quality and Reconciliation Module.

: Regression and Integration testing of solution for any issues in integration with other modules and effectively testing the data flow from layer-to-layer.

: Transaction monitoring system development to generate Alerts for the suspicious and fraudulent transactions based on requirements provide by BAs.

: Developing spark Jobs for various business rules.

: Learning "Machine Learning", which will be used further in the project for developing an effective model for Fraud detection for Anti Money Laundering system.

: Scheduling Jobs using Autosys tool.

: Deployment and Code Management using RTC and RLM(Release Lifecycle Management)

Hadoop Developer

Current Project: PRTS - RAN

Environment: Hadoop 2.x, HDFS, Yarn, Hive, Sqoop, HBase, Tez, Tableau, Sqlserver, Teradata

description - Project Description

Data warehouse division has multiple products for injecting, storing, analysing and presenting data. The Data Lake program is started to provide multi-talent, secure data hub to store application's data on Hadoop platform with strong data governance, lineage, auditing and monitoring capabilities. The object of the project is to provide necessary engineering support to analytics and application teams so that they can focus on the business logic development. In this project, the major task is to set up the Hadoop cluster and govern all the activities which are required for the smooth functioning of various Hadoop ecosystems. As the day and day data increasing so to provide stability to the ecosystem and smooth working of it, Developing and automating the various requirement specific utilities.

1. Developed proactive Health Check utility for Data Lake. The utility proactively checks the smooth functioning of all Hadoop components on the cluster and sends the result to email in HTML format. The utility is being used for daily Health Checks as well as after upgrades.
2. Getting the data in different formats and processing the data in Hadoop ecosystem after filtering the data using the appropriate techniques.
3. Developed data pipeline utility to ingest data from RDBMS database to Hive external tables using Sqoop commands. The utility also offers the data quality check like row count validation.
4. Developed and automated various cluster health check, usage, capacity related reports using Unix shell scripting.
5. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations.
6. Creating flume agents to process the data to Hadoop ecosystem side.
7. Performed benchmark testing on the Hive Queries and impala queries.
8. Involved in setting up the cluster and its components like edge node and HA implementation of the services: Hive Server2, Impala, and HDFS.
9. Filtering the required data from available data using different technologies like pig, regex Serde etc.
10. Dataiku benchmark testing on top of impala and hive in compare to Greenplum database.
11. Moving the data from Greenplum database to Hadoop side with help of Sqoop pipeline, process the data to Hadoop side and storing the data into hive tables to do the performance testing.
12. Dealing with the Hadoop ecosystem related issues in order to provide stability to WM Hadoop ecosystem.
13. Rescheduling of job from autosys job hosting to TWS job hosting for better performance.

KEY PROJECTS HANDLED

Project Name ABSA- Reconciliations, UBC and WMDATALAKE COE

company - Tata Consultancy Services

description - Project Description

Migration of data from RDBMS database to Hive (Hadoop ecosystem) .
Hadoop platform ability with strong data governance, lineage, auditing and monitoring capabilities. The objective of this project was to speed up the data processing so that the analysis and decision making become easy. Due to RDBMS limitations to process waste amount of data at once and produce the results at the earliest, Client wanted to move the data to Hadoop ecosystem so that they can over-come from those limitations and focus on business improvement only.

Responsibility 1. Optimising the SQL queries for those data which were not required to move from RDBMS to any other platform.

2. Writing the Hive queries and logic to move the data from RDBMS to Hadoop ecosystem.

3. Writing the hive queries to analyse the required data as per the business requirements.

4. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations.

5. Writing the sqoop commands and scripts to move the data from RDBMS to Hadoop side.

company - Tata Consultancy Services

description - Project Description

Create recs and migrating static setup of reconciliations from 8.1 version to 9.1 version of the environment Intellimatch.

Responsibility 1. Have worked on extracting business requirements, analyzing and implementing them in developing Recs 2. Worked on migrating static setup of reconciliations from 8.1 version to 9.1 version of the environment Intellimatch.

3. Done the back end work where most of the things were related to writing the sql queries and provide the data for the new recs.

Hadoop Developer

Hadoop Developer - PRGX India Private Limited Pune
Skill Details
Company Details
company - PRGX India Private Limited Pune
description - Team Size: 10+
Environment: Hive, Spark, Sqoop, Scala and Flume.

Project Description:

The bank wanted to help its customers to avail different products of the bank through analyzing their expenditure behavior. The customers spending ranges from online shopping, medical expenses in hospitals, cash transactions, and debit card usage etc. the behavior allows the bank to create an analytical report and based on which the bank used to display the product offers on the customer portal which was built using java. The portal allows the customers to login and see their transactions which they make on a day to day basis .the analytics also help the customers plan their budgets through the budget watch and my financial forecast applications embedded into the portal. The portal used hadoop framework to analyses the data as per the rules and regulations placed by the regulators from the respective countries. The offers and the interest rates also complied with the regulations and all these processing was done using the hadoop framework as big data analytics system.

Role & Responsibilities:

- â Import data from legacy system to hadoop using Sqoop, flume.
- â Implement the business logic to analyses the data
- â Per-process data using spark.
- â Create hive script and loading data into hive.
- â Sourcing various attributes to the data processing logic to retrieve the correct results.

Project 2

company - PRGX India Private Limited Pune
description -
company - PRGX India Private Limited Pune
description - Team Size: 11+
Environment: Hadoop, HDFS, Hive, Sqoop, MySQL, Map Reduce

Project Description:-

The Purpose of this project is to store terabytes of information from the web application and extract meaningful information out of it.the solution was based on the open source s/w hadoop. The data will be stored in hadoop file system and processed using Map/Reduce jobs. Which in turn includes getting the raw html data from the micro websites, process the html to obtain product and user information, extract various reports out of the visitor tracking information and export the information for further processing

Role & Responsibilities:

- â Move all crawl data flat files generated from various micro sites to HDFS for further processing.
- â Sqoop implementation for interaction with database
- â Write Map Reduce scripts to process the data file.
- â Create hive tables to store the processed data in tabular formats.
- â Reports creation from hive data.

Project 3

company - PRGX India Private Limited Pune
description - Team Size: 15+
Environment: Informatica 9.5, Oracle11g, UNIX

Project Description:

Pfizer Inc. is an American global pharmaceutical corporation headquartered in New York City. The main objective of the project is to build a Development Data Repository for Pfizer Inc. Because all the downstream application are like Etrack, TSP database, RTS, SADMS, GFS, GDO having their own sql request on the OLTP system directly due to which the performance of OLTP system goes slows down. For this we have created a Development Data Repository to replace the entire sql request directly on the OLTP system. DDR process extracts all clinical, pre-clinical, study, product, subject, sites related information from the upstream applications like EPECS, CDSS, RCM, PRC, E-CLINICAL, EDH and after applying some business logic put it into DDR core tables. From these snapshot and dimensional layer are created which are used for reporting application.

Role & Responsibilities:

- â To understand & analyze the requirement documents and resolve the queries.

- â To design Informatica mappings by using various basic transformations like Filter, Router, Source qualifier, Lookup etc and advance transformations like Aggregators, Joiner, Sorters and so on.
- â Perform cross Unit and Integration testing for mappings developed within the team. Reporting bugs and bug fixing.
- â Create workflow/batches and set the session dependencies.
- â Implemented Change Data Capture using mapping parameters, SCD and SK generation.
- â Developed Mapplet, reusable transformations to populate the data into data warehouse.
- â Created Sessions & Worklets using workflow Manager to load the data into the Target Database.
- â Involved in Unit Case Testing (UTC)
- â Performing Unit Testing and UAT for SCD Type1/Type2, fact load and CDC implementation.

description - Project Description

Data warehouse division has multiple products for injecting, storing, analysing and presenting data. The Data Lake program is started to provide multi-talent, secure data hub to store application's data on Hadoop platform with strong data governance, lineage, auditing and monitoring capabilities. The object of the project is to provide necessary engineering support to analytics and application teams so that they can focus on the business logic development. In this project, the major task is to set up the Hadoop cluster and govern all the activities which are required for the smooth functioning of various Hadoop ecosystems. As the day and day data increasing so to provide stability to the ecosystem and smooth working of it, Developing and automating the various requirement specific utilities.

1. Developed proactive Health Check utility for Data Lake. The utility proactively checks the smooth functioning of all Hadoop components on the cluster and sends the result to email in HTML format. The utility is being used for daily Health Checks as well as after upgrades.
2. Getting the data in different formats and processing the data in Hadoop ecosystem after filtering the data using the appropriate techniques.
3. Developed data pipeline utility to ingest data from RDBMS database to Hive external tables using Sqoop commands. The utility also offers the data quality check like row count validation.
4. Developed and automated various cluster health check, usage, capacity related reports using Unix shell scripting.
5. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations.
6. Creating flume agents to process the data to Hadoop ecosystem side.
7. Performed benchmark testing on the Hive Queries and impala queries.
8. Involved in setting up the cluster and its components like edge node and HA implementation of the services: Hive Server2, Impala, and HDFS.
9. Filtering the required data from available data using different technologies like pig, regex Serde etc.
10. Dataiku benchmark testing on top of impala and hive in compare to Greenplum database.
11. Moving the data from Greenplum database to Hadoop side with help of Sqoop pipeline, process the data to Hadoop side and storing the data into hive tables to do the performance testing.
12. Dealing with the Hadoop ecosystem related issues in order to provide stability to WM Hadoop ecosystem.
13. Rescheduling of job from autosys job hosting to TWS job hosting for better performance.

description - Project Description

Migration of data from RDBMS database to Hive (Hadoop ecosystem) .
Hadoop platform ability with strong data governance, lineage, auditing and monitoring capabilities. The objective of this project was to speed up the data processing so that the analysis and decision making become easy. Due to RDBMS limitations to process waste amount of data at once and produce the results at the earliest, Client wanted to move the data to Hadoop ecosystem so that they can over-come from those limitations and focus on business improvement only.

Responsibility 1. Optimising the SQL queries for those data which were not required to move from RDBMS to any other platform.

2. Writing the Hive queries and logic to move the data from RDBMS to Hadoop ecosystem.

3. Writing the hive queries to analyse the required data as per the business requirements.

4. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations.

5. Writing the sqoop commands and scripts to move the data from RDBMS to Hadoop side.

company - Tata Consultancy Services

description - Project Description

Create recs and migrating static setup of reconciliations from 8.1 version to 9.1 version of the environment Intellimatch.

Responsibility 1. Have worked on extracting business requirements, analyzing and implementing them in developing Recs 2. Worked on migrating static setup of reconciliations from 8.1 version to 9.1 version of the environment Intellimatch.

3. Done the back end work where most of the things were related to writing the sql queries and provide the data for the new recs.

Hadoop Developer

Hadoop Developer - PRGX India Private Limited Pune

Skill Details

Company Details

company - PRGX India Private Limited Pune

description - Team Size: 10+

Environment: Hive, Spark, Sqoop, Scala and Flume.

Project Description:

The bank wanted to help its customers to avail different products of the bank through analyzing their expenditure behavior. The customers spending ranges from online shopping, medical expenses in hospitals, cash transactions, and debit card usage etc. the behavior allows the bank to create an analytical report and based on which the bank used to display the product offers on the customer portal which was built using java. The portal allows the customers to login and see their transactions which they make on a day to day basis .the analytics also help the customers plan their budgets through the budget watch and my financial forecast applications embedded into the portal. The portal used hadoop framework to analyses the data as per the rules and regulations placed by the regulators from the respective countries. The offers and the interest rates also complied with the regulations and all these processing was done using the hadoop framework as big data analytics system.

Role & Responsibilities:

- â Import data from legacy system to hadoop using Sqoop, flume.
- â Implement the business logic to analyses the data
- â Per-process data using spark.
- â Create hive script and loading data into hive.
- â Sourcing various attributes to the data processing logic to retrieve the correct results.

Project 2

company - PRGX India Private Limited Pune

description -

company - PRGX India Private Limited Pune

description - Team Size: 11+

Environment: Hadoop, HDFS, Hive, Sqoop, MySQL, Map Reduce

Project Description:-

The Purpose of this project is to store terabytes of information from the web application and extract meaningful information out of it.the solution was based on the open source s/w hadoop. The data will be stored in hadoop file system and processed using Map/Reduce jobs. Which in turn includes getting the raw html data from the micro websites, process the html to obtain product and user information, extract various reports out of the visitor tracking information and export the information for further processing

Role & Responsibilities:

- â Move all crawl data flat files generated from various micro sites to HDFS for further processing.
- â Sqoop implementation for interaction with database
- â Write Map Reduce scripts to process the data file.
- â Create hive tables to store the processed data in tabular formats.
- â Reports creation from hive data.

Project 3

company - PRGX India Private Limited Pune

description - Team Size: 15+

Environment: Informatica 9.5, Oracle11g, UNIX

Project Description:

Pfizer Inc. is an American global pharmaceutical corporation headquartered in New York City. The main objective of the project is to build a Development Data Repository for Pfizer Inc. Because all the downstream application are like Etrack, TSP database, RTS, SADMS, GFS, GDO having their own sql request on the OLTP system directly due to which the performance of OLTP system goes slows down. For this we have created a Development Data Repository to replace the entire sql request directly on the OLTP system. DDR process extracts all clinical, pre-clinical, study, product, subject, sites related information from the upstream applications like EPECS, CDSS, RCM, PRC, E-CLINICAL, EDH and after applying some business logic put it into DDR core tables. From these snapshot and dimensional layer are created which are used for reporting application.

Role & Responsibilities:

- â To understand & analyze the requirement documents and resolve the queries.
- â To design Informatica mappings by using various basic transformations

like Filter, Router, Source qualifier, Lookup etc and advance transformations like Aggregators, Joiner, Sorters and so on.

- â Perform cross Unit and Integration testing for mappings developed within the team. Reporting bugs and bug fixing.
- â Create workflow/batches and set the session dependencies.
- â Implemented Change Data Capture using mapping parameters, SCD and SK generation.
- â Developed Mapplet, reusable transformations to populate the data into data warehouse.
- â Created Sessions & Worklets using workflow Manager to load the data into the Target Database.
- â Involved in Unit Case Testing (UTC)
- â Performing Unit Testing and UAT for SCD Type1/Type2, fact load and CDC implementation.

Hadoop Developer - INFOSYS

Skill Details

Company Details

company - INFOSYS

description - Project Description: The banking information had stored the data in different data ware house systems for each department but it becomes difficult for the organization to manage the data and to perform some analytics on the past data, so it is combined them into a single global repository in Hadoop for analysis.

Responsibilities:

- â¢ Analyze the banking rates data set.
- â¢ Create specification document.
- â¢ Provide effort estimation.
- â¢ Develop SPARK Scala, SPARK SQL Programs using Eclipse IDE on Windows/Linux environment.
- â¢ Create KPI's test scenarios, test cases, test result document.
- â¢ Test the Scala programs in Linux Spark Standalone mode.
- â¢ setup multi cluster on AWS, deploy the Spark Scala programs
- â¢ Provided solution using Hadoop ecosystem - HDFS, MapReduce, Pig, Hive, HBase, and Zookeeper.
- â¢ Provided solution using large scale server-side systems with distributed processing algorithms.
- â¢ Created reports for the BI team using Sqoop to export data into HDFS and Hive.
- â¢ Provided solution in supporting and assisting in troubleshooting and optimization of MapReduce jobs and Pig Latin scripts.
- â¢ Deep understanding of Hadoop design principles, cluster connectivity, security and the factors that affect system performance.
- â¢ Worked on Importing and exporting data from different databases like Oracle, Teradata into HDFS and Hive using Sqoop, TPT and Connect Direct.
- â¢ Import and export the data from RDBMS to HDFS/HBASE
- â¢ Wrote script and placed it in client side so that the data moved to HDFS will be stored in temporary file and then it will start loading it in hive tables.
- â¢ Developed the Sqoop scripts in order to make the interaction between Pig and MySQL Database.
- â¢ Involved in developing the Hive Reports, Partitions of Hive tables.
- â¢ Created and maintained technical documentation for launching HADOOP Clusters and for executing HIVE queries and PIG scripts.
- â¢ Involved in running Hadoop jobs for processing millions of records of text data

Environment: Java, Hadoop, HDFS, Map-Reduce, Pig, Hive, Sqoop, Flume, Oozie, HBase, Spark, Scala, Linux, NoSQL, Storm, Tomcat, Putty, SVN, GitHub, IBM WebSphere v8.5.

Project #1: TELECOMMUNICATIONS
Hadoop Developer

Description To identify customers who are likely to churn and 360-degree view of the customer is created from different heterogeneous data sources. The data is brought into data lake (HDFS) from different sources and

analyzed using different Hadoop tools like pig and hive.

Responsibilities:

- â¢ Installed and Configured Apache Hadoop tools like Hive, Pig, HBase and Sqoop for application development and unit testing.
- â¢ Wrote MapReduce jobs to discover trends in data usage by users.
- â¢ Involved in database connection using SQuoP.
- â¢ Involved in creating Hive tables, loading data and writing hive queries Using the HiveQL.
- â¢ Involved in partitioning and joining Hive tables for Hive query optimization.
- â¢ Experienced in SQL DB Migration to HDFS.
- â¢ Used NoSQL(HBase) for faster performance, which maintains the data in the De-Normalized way for OLTP.
- â¢ The data is collected from distributed sources into Avro models. Applied transformations and standardizations and loaded into HBase for further data processing.
- â¢ Experienced in defining job flows.
- â¢ Used Oozie to orchestrate the workflow.
- â¢ Implemented Fair schedulers on the Job tracker to share the resources of the Cluster for the Map Reduce jobs given by the users.
- â¢ Exported the analyzed data to the relational databases using HIVE for visualization and to generate reports for the BI team.

description - Roles and responsibility:

Working for a American pharmaceutical company (one of the world's premier biopharmaceutical) who develops and produces medicines and vaccines for a wide range of medical disciplines, including immunology, oncology, cardiology, endocrinology, and neurology. To handle large amount of United Healthcare data big data analytics is used. Data from all possible data sources like records of all Patients(Old and New), records of medicines, Treatment Pathways & Patient Journey for Health Outcomes, Patient Finder (or Rare Disease Patient Finder), etc being gathered, stored and processed at one place.

â€¢ Worked on cluster with specs as:
o Cluster Architecture: Fully Distributed Package Used:
CDH3
o Cluster Capacity: 20 TB
o No. of Nodes: 10 Data Nodes + 3 Masters + NFS Backup For NN

â€¢ Developed proof of concepts for enterprise adoption of Hadoop.
â€¢ Used SparkAPI over Cloudera Hadoop YARN to perform analytics on the Healthcare data in Cloudera distribution.
â€¢ Responsible for cluster maintenance, adding and removing cluster nodes, cluster monitoring and trouble-shooting, manage and review data backups, and reviewing Hadoop log files.
â€¢ Imported & exported large data sets of data into HDFS and vice-versa using sqoop.
â€¢ Involved developing the Pig scripts and Hive Reports
â€¢ Worked on Hive partition and bucketing concepts and created hive external and Internal tables with Hive partition.Monitoring Hadoop scripts which take the input from HDFS and load the data into Hive.
â€¢ Developed Spark scripts by using Scala shell commands as per the requirement and worked with both Data frames/SQL/Data sets and RDD/MapReduce in Spark. Optimizing of existing algorithms in Hadoop using SparkContext, Spark-SQL, Data Frames and RDD's.
â€¢ Collaborated with infrastructure, network, database, application and BI to ensure data, quality and availability.
â€¢ Developed reports using TABLEAU and exported data to HDFS and hive using Sqoop.
â€¢ Used ORC & Parquet file formats for serialization of data, and Snappy for the compression of the data.

Achievements

â€¢ Appreciation for showing articulate leadership qualities in doing work with the team.
â€¢ Completed the internal certification of TCS Certified Hadoop Developer.

Ongoing Learning

â€¢ Preparing and scheduled the Cloudera Certified Spark Developer CCA

â Per-process data using spark.

â Create hive script and loading data into hive.

â Sourcing various attributes to the data processing logic to retrieve the correct results.

Project 2

company - PRGX India Private Limited Pune

description -

company - PRGX India Private Limited Pune

description - Team Size: 11+

Environment: Hadoop, HDFS, Hive, Sqoop, MySQL, Map Reduce

Project Description:-

The Purpose of this project is to store terabytes of information from the web application and extract meaningful information out of it.the solution was based on the open source s/w hadoop. The data will be stored in hadoop file system and processed using Map/Reduce jobs. Which in turn includes getting the raw html data from the micro websites, process the html to obtain product and user information, extract various reports out of the visitor tracking information and export the information for further processing

Role & Responsibilities:

â Move all crawl data flat files generated from various micro sites to HDFS for further processing.

â Sqoop implementation for interaction with database

â Write Map Reduce scripts to process the data file.

â Create hive tables to store the processed data in tabular formats.

â Reports creation from hive data.

Project 3

company - PRGX India Private Limited Pune

description - Team Size: 15+

Environment: Informatica 9.5, Oracle11g, UNIX

Project Description:

Pfizer Inc. is an American global pharmaceutical corporation headquartered in New York City. The main objective of the project is to build a Development Data Repository for Pfizer Inc. Because all the downstream application are like Etrack, TSP database, RTS, SADMS, GFS, GDO having their own sql request on the OLTP system directly due to which the performance of OLTP system goes slows down. For this we have created a Development Data Repository to replace the entire sql request directly on the OLTP system. DDR process extracts all clinical, pre-clinical, study, product, subject, sites related information from the upstream applications like EPECS, CDSS, RCM, PRC, E-CLINICAL, EDH and after applying some business logic put it into DDR core tables. From these snapshot and dimensional layer are created which are used for reporting application.

Role & Responsibilities:

â To understand & analyze the requirement documents and resolve the

- queries.
- â To design Informatica mappings by using various basic transformations like Filter, Router, Source qualifier, Lookup etc and advance transformations like Aggregators, Joiner, Sorters and so on.
- â Perform cross Unit and Integration testing for mappings developed within the team. Reporting bugs and bug fixing.
- â Create workflow/batches and set the session dependencies.
- â Implemented Change Data Capture using mapping parameters, SCD and SK generation.
- â Developed Mapplet, reusable transformations to populate the data into data warehouse.
- â Created Sessions & Worklets using workflow Manager to load the data into the Target Database.
- â Involved in Unit Case Testing (UTC)
- â Performing Unit Testing and UAT for SCD Type1/Type2, fact load and CDC implementation.

Hadoop Developer - INFOSYS

Skill Details

Company Details

company - INFOSYS

description - Project Description: The banking information had stored the data in different data ware house systems for each department but it becomes difficult for the organization to manage the data and to perform some analytics on the past data, so it is combined them into a single global repository in Hadoop for analysis.

Responsibilities:

- âc Analyze the banking rates data set.
- âc Create specification document.
- âc Provide effort estimation.
- âc Develop SPARK Scala, SPARK SQL Programs using Eclipse IDE on Windows/Linux environment.
- âc Create KPI's test scenarios, test cases, test result document.
- âc Test the Scala programs in Linux Spark Standalone mode.
- âc setup multi cluster on AWS, deploy the Spark Scala programs
- âc Provided solution using Hadoop ecosystem - HDFS, MapReduce, Pig, Hive, HBase, and Zookeeper.
- âc Provided solution using large scale server-side systems with distributed processing algorithms.
- âc Created reports for the BI team using Sqoop to export data into HDFS and Hive.
- âc Provided solution in supporting and assisting in troubleshooting and optimization of MapReduce jobs and Pig Latin scripts.
- âc Deep understanding of Hadoop design principles, cluster connectivity, security and the factors that affect system performance.
- âc Worked on Importing and exporting data from different databases like Oracle, Teradata into HDFS and Hive using Sqoop, TPT and Connect Direct.
- âc Import and export the data from RDBMS to HDFS/HBASE
- âc Wrote script and placed it in client side so that the data moved to HDFS will be stored in temporary file and then it will start loading it in hive tables.
- âc Developed the Sqoop scripts in order to make the interaction between Pig and MySQL Database.
- âc Involved in developing the Hive Reports, Partitions of Hive tables.
- âc Created and maintained technical documentation for launching HADOOP Clusters and for executing HIVE queries and PIG scripts.
- âc Involved in running Hadoop jobs for processing millions of records of text data

Environment: Java, Hadoop, HDFS, Map-Reduce, Pig, Hive, Sqoop, Flume, Oozie, HBase, Spark, Scala, Linux, NoSQL, Storm, Tomcat, Putty, SVN, GitHub, IBM WebSphere v8.5.

Project #1: TELECOMMUNICATIONS
Hadoop Developer

Description To identify customers who are likely to churn and 360-degree view of the customer is created from different heterogeneous data sources. The data is brought into data lake (HDFS) from different sources and analyzed using different Hadoop tools like pig and hive.

Responsibilities:

- â¢ Installed and Configured Apache Hadoop tools like Hive, Pig, HBase and Sqoop for application development and unit testing.
- â¢ Wrote MapReduce jobs to discover trends in data usage by users.
- â¢ Involved in database connection using SQuoP.
- â¢ Involved in creating Hive tables, loading data and writing hive queries Using the HiveQL.
- â¢ Involved in partitioning and joining Hive tables for Hive query optimization.
- â¢ Experienced in SQL DB Migration to HDFS.
- â¢ Used NoSQL(HBase) for faster performance, which maintains the data in the De-Normalized way for OLTP.
- â¢ The data is collected from distributed sources into Avro models. Applied transformations and standardizations and loaded into HBase for further data processing.
- â¢ Experienced in defining job flows.
- â¢ Used Oozie to orchestrate the workflow.
- â¢ Implemented Fair schedulers on the Job tracker to share the resources of the Cluster for the Map Reduce jobs given by the users.
- â¢ Exported the analyzed data to the relational databases using HIVE for visualization and to generate reports for the BI team.

Environment: Hadoop, Hive, Linux, MapReduce, HDFS, Hive, Python, Pig, Sqoop, Cloudera, Shell Scripting,

Hadoop Java (JDK 1.6), Java 6, Oracle 10g, PL/SQL, SQL*PLUS C
Skill Set: Hadoop, Map Reduce, HDFS, Hive, Sqoop, java. Duration: 2016 to 2017. Role: Hadoop Developer Rplus offers an quick, simple and powerful cloud based Solution, Demand Sense to accurately predict demand for your product in all your markets which Combines Enterprise and External Data to predict demand more accurately through Uses Social Conversation and Sentiments to derive demand and Identifies significant drivers of sale out of hordes of factors that Selects the best suited model out of multiple forecasting models for each product. Responsibilities: â¢ Involved in deploying the product for customers, gathering requirements and algorithm optimization at backend of the product. â¢ Load and transform Large Datasets of structured semi structured. â¢ Responsible to manage data coming from different sources and application â¢ Supported Map Reduce Programs those are running on the cluster â¢ Involved in creating Hive tables, loading with data and writing hive queries which will run internally in map reduce way.Education Details

Hadoop,Spark,Sqoop,Hive,Flume,Pig- Exprience - 24 monthsCompany
Details
company - Tata Consultancy Services
description - Roles and responsibility:

Working for a American pharmaceutical company (one of the world's premier biopharmaceutical) who develops and produces medicines and vaccines for a wide range of medical disciplines, including immunology, oncology, cardiology, endocrinology, and neurology. To handle large amount of United Healthcare data big data analytics is used. Data from all possible data sources like records of all Patients(Old and New), records of medicines, Treatment Pathways & Patient Journey for Health Outcomes, Patient Finder (or Rare Disease Patient Finder), etc being gathered, stored and processed at one place.

â€¢ Worked on cluster with specs as:
o Cluster Architecture: Fully Distributed Package Used:
CDH3
o Cluster Capacity: 20 TB
o No. of Nodes: 10 Data Nodes + 3 Masters + NFS Backup For NN

â€¢ Developed proof of concepts for enterprise adoption of Hadoop.
â€¢ Used SparkAPI over Cloudera Hadoop YARN to perform analytics on the Healthcare data in Cloudera distribution.
â€¢ Responsible for cluster maintenance, adding and removing cluster nodes, cluster monitoring and trouble-shooting, manage and review data backups, and reviewing Hadoop log files.
â€¢ Imported & exported large data sets of data into HDFS and vice-versa using sqoop.
â€¢ Involved developing the Pig scripts and Hive Reports
â€¢ Worked on Hive partition and bucketing concepts and created hive external and Internal tables with Hive partition.Monitoring Hadoop scripts which take the input from HDFS and load the data into Hive.
â€¢ Developed Spark scripts by using Scala shell commands as per the requirement and worked with both Data frames/SQL/Data sets and RDD/MapReduce in Spark. Optimizing of existing algorithms in Hadoop using SparkContext, Spark-SQL, Data Frames and RDD's.
â€¢ Collaborated with infrastructure, network, database, application and BI to ensure data, quality and availability.
â€¢ Developed reports using TABLEAU and exported data to HDFS and hive using Sqoop.
â€¢ Used ORC & Parquet file formats for serialization of data, and Snappy for the compression of the data.

Achievements

â€¢ Appreciation for showing articulate leadership qualities in doing work with the team.
â€¢ Completed the internal certification of TCS Certified Hadoop Developer.

Ongoing Learning

â€¢ Preparing and scheduled the Cloudera Certified Spark Developer CCA
175.

Areas of expertise: Big Data Ecosystems: Hadoop-HDFS, MapReduce, Hive, Pig, Sqoop, HBase Oozie, Spark, Pyspark, HUE and having knowledge on cassandra

Vendor: Citi bank

Description:

Citibank's (Citi) Anti-Money Laundering (AML) Transaction Monitoring (TM) program is a future state solution and a rules-based system for transaction monitoring of ICG-Markets business.

Roles and Responsibilities:

Building and providing domain knowledge for Anti Money Laundering among team members.

The layered architecture has Data Warehouse and Workspace layers which are used by Business Analysts.

Actively involved in designing of star-schema model involving various Dimensions and Fact tables.

Designed SCD2 for maintaining history of the DIM data.

Developing Hive Queries for mapping data between different layers of architecture, and its usage in Oozie Workflows.

Integration with Data Quality and Reconciliation Module.

Regression and Integration testing of solution for any issues in integration with other modules and effectively testing the data flow from layer-to-layer.

Transaction monitoring system development to generate Alerts for the suspicious and fraudulent transactions based on requirements provide by BAs.

Developing spark Jobs for various business rules.

Learning "Machine Learning", which will be used further in the project for developing an effective model for Fraud detection for Anti Money Laundering system.

Scheduling Jobs using Autosys tool.

Deployment and Code Management using RTC and RLM(Release Lifecycle Management)

description - Project Description

Data warehouse division has multiple products for injecting, storing, analysing and presenting data. The Data Lake program is started to provide multi-talent, secure data hub to store application's data on Hadoop platform with strong data governance, lineage, auditing and monitoring capabilities. The object of the project is to provide necessary engineering support to analytics and application teams so that they can focus on the business logic development. In this project, the major task is to set up the Hadoop cluster and govern all the activities which are required for the smooth functioning of various Hadoop ecosystems. As the day and day data increasing so to provide stability to the ecosystem and smooth working of it, Developing and automating the various requirement specific utilities.

1. Developed proactive Health Check utility for Data Lake. The utility proactively checks the smooth functioning of all Hadoop components on the cluster and sends the result to email in HTML format. The utility is being used for daily Health Checks as well as after upgrades.
2. Getting the data in different formats and processing the data in Hadoop ecosystem after filtering the data using the appropriate techniques.
3. Developed data pipeline utility to ingest data from RDBMS database to Hive external tables using Sqoop commands. The utility also offers the data quality check like row count validation.
4. Developed and automated various cluster health check, usage, capacity related reports using Unix shell scripting.
5. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations.
6. Creating flume agents to process the data to Hadoop ecosystem side.
7. Performed benchmark testing on the Hive Queries and impala queries.
8. Involved in setting up the cluster and its components like edge node and HA implementation of the services: Hive Server2, Impala, and HDFS.
9. Filtering the required data from available data using different technologies like pig, regex Serde etc.
10. Dataiku benchmark testing on top of impala and hive in compare to Greenplum database.
11. Moving the data from Greenplum database to Hadoop side with help of Sqoop pipeline, process the data to Hadoop side and storing the data into hive tables to do the performance testing.
12. Dealing with the Hadoop ecosystem related issues in order to provide stability to WM Hadoop ecosystem.
13. Rescheduling of job from autosys job hosting to TWS job hosting for better performance.

Project Name ABSA- Reconciliations, UBC and WMDATALAKE COE

company - Tata Consultancy Services

description - Project Description

Migration of data from RDBMS database to Hive (Hadoop ecosystem) .
Hadoop platform ability with strong data governance, lineage, auditing and monitoring capabilities. The objective of this project was to speed up the data processing so that the analysis and decision making become easy. Due to RDBMS limitations to process waste amount of data at once and produce the results at the earliest, Client wanted to move the data to Hadoop ecosystem so that they can over-come from those limitations and focus on business improvement only.

Responsibility 1. Optimising the SQL queries for those data which were not required to move from RDBMS to any other platform.

2. Writing the Hive queries and logic to move the data from RDBMS to Hadoop ecosystem.

3. Writing the hive queries to analyse the required data as per the business requirements.

4. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations.

5. Writing the sqoop commands and scripts to move the data from RDBMS to Hadoop side.

company - Tata Consultancy Services

description - Project Description

Create recs and migrating static setup of reconciliations from 8.1 version to 9.1 version of the environment Intellimatch.

Responsibility 1. Have worked on extracting business requirements, analyzing and implementing them in developing Recs 2. Worked on migrating static setup of reconciliations from 8.1 version to 9.1 version of the environment Intellimatch.

3. Done the back end work where most of the things were related to writing the sql queries and provide the data for the new recs.

Hadoop Developer

Hadoop Developer - PRGX India Private Limited Pune

Skill Details

Company Details

company - PRGX India Private Limited Pune

description - Team Size: 10+

Environment: Hive, Spark, Sqoop, Scala and Flume.

Project Description:

The bank wanted to help its customers to avail different products of the bank through analyzing their expenditure behavior. The customers spending ranges from online shopping, medical expenses in hospitals, cash transactions, and debit card usage etc. the behavior allows the bank to create an analytical report and based on which the bank used to display the product offers on the customer portal which was built using java. The portal allows the customers to login and see their transactions which they make on a day to day basis .the analytics also help the customers plan their budgets through the budget watch and my financial forecast applications embedded into the portal. The portal used hadoop framework to analyses the data as per the rules and regulations placed by the regulators from the respective countries. The offers and the interest rates also complied with the regulations and all these processing was done using the hadoop framework as big data analytics system.

Role & Responsibilities:

â Import data from legacy system to hadoop using Sqoop, flume.

â Implement the business logic to analyses the data

â Per-process data using spark.

â Create hive script and loading data into hive.

â Sourcing various attributes to the data processing logic to retrieve the correct results.

 Client/Project: Barclays UK London/HEXAD
 Environment: Informatica (Power Center), SQL Server, UNIX, Autosys, Intellimatch.

Project Description:

The objective is to implement a strategic technical solution to support the governance and monitoring of break standards - including enhancements to audit capabilities. As a part of this program, the required remediation of source system data feeds involves consolidation of data into standardized feeds.

These remediated data feeds will be consumed by ETL layer. The reconciliation tool is designed to source data from an ETL layer. The data from the Front and Back office systems, together with static data must therefore be delivered to ETL. Here it will be pre-processed and delivered to reconciliation tool before the reconciliation process can be performed.

Role and Responsibilities:

- â¢ Responsible for analyzing, designing and developing ETL strategies and processes,
- writing ETL specifications
- â¢ Requirement gathering
- â¢ Making functional documents and low level documents
- â¢ Developing and debugging the Informatica mappings to resolve bugs, and identify the causes of failures
- â¢ User interaction to identify the issues with the data loaded through the application
- â¢ Developed mappings using different transformations

company - Sun Trust Bank NY

description - Sun Trust Bank, NY JAN 2018 to present

Client: Sun Trust Bank NY

Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer**Project Profile:**

Sun Trust Bank is a US based multinational financial services holding company, headquarters in NY that operates the Bank in New York and other financial services investments. The company is organized as a stock corporation with four divisions: investment banking, private banking, Retail banking and a shared services group that provides Financial services and support to the other divisions.

The objective of the first module was to create a DR system for the bank with a central point of communication and storage for Listed, Cash securities, Loans, Bonds, Notes, Equities, Rates, Commodities, and FX asset classes.

Contribution / Highlights:

- â€¢ Liaising closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define Technical requirements and create project documentation.
- â€¢ Development using Infa 9.1, 11g/Oracle, UNIX.
- â€¢ Use Informatica PowerCenter for extraction, transformation and loading (ETL) of data in the Database.
- â€¢ Created and configured Sessions in Informatica workflow Manager for loading data into Data base tables from various heterogeneous database sources like Flat Files, Oracle etc.
- â€¢ Unit testing and system integration testing of the developed mappings.
- â€¢ Providing production Support of the deployed code.
- â€¢ Providing solutions to the business for the Production issues.
- â€¢ Had one to One interaction with the client throughout the project and in daily meetings.

Project #2
company - Marshall Multimedia
description - JUN 2016 to DEC 2017

Client: Marshall Multimedia
Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:
Marshall Multimedia is a US based multimedia advertisement services based organization which has head quarter in New York. EGC interface systems are advert management, Customer Management, Billing and Provisioning Systems for Consumer & Enterprise Customers. The main aim of the project was to create an enterprise data warehouse which would suffice the need of reports belonging to the following categories: Financial reports, management reports and rejection reports. The professional reports were created by Cognos and ETL work was performed by Informatica. This project is to load the advert details and magazine details coming in Relational tables into data warehouse and calculate the compensation and incentive amount monthly twice as per business rules.

Contribution / Highlights:
â€¢ Developed mappings using different sources by using Informatica transformations.
â€¢ Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files, Oracle etc.

2
â€¢ Unit testing and system integration testing of the developed mappings.
â€¢ Providing solutions to the business for the Production issues.

Role: ETL Developer

Project Profile:
Assurant, Inc. is a holding company with businesses that provide a diverse set of specialty, niche-market insurance products in the property, casualty, life and health insurance sectors. The company's four operating segments are Assurant Employee Benefits, Assurant Health, Assurant Solutions and Assurant Specialty Property.
The project aim at building State Datamart for enterprise solution. I am part of team which is responsible for ETL Design & development along with testing.

Contribution / Highlights:
â€¢ Performed small enhancement
â€¢ Daily load monitoring
â€¢ Attended to Informatica job failures by analyzing the root cause, resolving the failure using standard documented process.
â€¢ Experience in writing SQL statements.
â€¢ Strong Problem Analysis & Resolution skills and ability to work in Multi Platform Environments
â€¢ Scheduled the Informatica jobs using Informatica scheduler
â€¢ Extensively used ETL methodology for developing and supporting data extraction, transformations and loading process, in a corporate-wide-ETL Solution using Informatica.
â€¢ Involved in creating the Unit cases and uploaded in to Quality Center for Unit Testing and UTR

ETL Developer â€¢ Ensure that daily support tasks are done in accordance with the defined SLA.

ETL Developer

ETL Developer

Skill Details

informatica- Exprience - 36 months
Company Details
company - Blue Shield of California
description - Duration: (Mar 2016 - Sept 2017)

Description:

Blue Shield of California (BSC) is health plan provider. The intent of this project is to process feeds coming in and going out of BSC system related to eligibility, enrollment, and claims subject areas. All these feeds comes in different formats and are processed using Informatica 9.6.1, Oracle 11g, Facets 5.0 &Tidal.

Technical environment: ETL tool (Informatica power Center 9.6.1), Oracle 11g (SQL, PL-SQL), UNIX, Facets, Tidal, JIRA, Putty.

Role: ETL Developer

Responsibilities:

- â€¢ Responsible for analyzing the business requirement document
- â€¢ Involved in development of Informatica mappings using different transformations like source qualifier, expression, filter, router, joiner, union, aggregator, normalizer, sorter, lookup and its corresponding sessions and workflows.

- â€¢ Extensively used Informatica Debugger to figure out the problems in mapping and involved in troubleshooting the existing bugs.
- â€¢ Writing Unix Scripts & SQL's as per the business requirement.
- â€¢ Impact analysis of change requests & their development.
- â€¢ Data fabrication using Facets screens as well as SQL statements in membership domain.
- â€¢ Unit testing & trouble shooting using Informatica debugger, SQL query & preparation of Unit Test Cases.
- â€¢ Prepare documents for design, unit testing and impact analysis.

ETL Developer A
Awards & Achievements

- â€¢ Received Kudos Award at Syntel for contribution in error free work, commitment towards learning, client appreciation and outstanding display of Syntel values Received appreciation from Management for outstanding performance in complete tenure.
- â€¢ Received spot recognition for automation done in project.

description - Prepared ETL mapping Documents for every mapping and Data Migration document for smooth transfer of project from development to testing environment and then to production environment. Performed Unit testing and System testing to validate data loads in the target. Troubleshoot long running jobs and fixed the issues.

- â€¢ Expertise in creating mappings in TALEND using Big Data supporting components such as tJDBCConfiguration, tJDBCInput, tHDFSConfiguration, tS3configuration, tCacheOut, tCacheIn, tSqlRow and standard components like tFileInputDelimited, tFileOutputDelimited, tMap, tJoin, tReplicate, tParallelize, tConvertType, tAggregate, tSortRow, tFlowMeter, tLogCatcher, tRowGenerator, tJava, tJavaRow, tAggregateRow, tFilter etc.
- â€¢ Used ETL methodologies and best practices to create Talend ETL jobs.

Followed and enhanced programming and naming standards. Developed jobs, components and Joblets in Talend. Used tRunJob component to run child job from a parent job and to pass parameters from parent to child job.

Created and deployed physical objects including custom tables, custom views, stored procedures, and indexes to SQL server for Staging and Data-Warehouse environment. Involved in writing SQL Queries and used Joins to access data from MySQL.

Created and managed Source to Target mapping documents for all Facts and Dimension tables. Broad design, development and testing experience with Talend Integration Suite and knowledge in Performance Tuning of mappings.

Extensively used tMap component which does lookup & Joiner Functions. Experienced in writing expressions within tmap as per the business need. Handled insert and update Strategy using tSQLRow.

Created Implicit, local and global Context variables in the job to run Talend jobs against different environments.

Worked on Talend Administration Console (TAC) for scheduling jobs and adding users. Experienced in Building a Talend job outside of a Talend studio as well as on TAC server.

Developed mappings to load Fact and Dimension tables, SCD Type 1 and SCD Type 2 dimensions and Incremental loading and unit tested the mappings.

Developed Framework Integrated Job which schedules multiple jobs at a time and updates the last successful run time, success status, sending mail for failed jobs, maintaining the counts in SQL Database. Used tParalleize component and multi thread execution option to run subjobs in parallel which increases the performance of a job.

Created Talend jobs to copy the files from one server to another and utilized Talend FTP components. Implemented FTP operations using Talend Studio to transfer files in between network folders as well as to FTP server using components like tFileList, tS3Put, tFTPPut, tFileExist, tFTPConnection etc.

Extracted data from flat files/ databases applied business logic to load them in the staging database as well as flat files.

Successfully Loaded Data into different targets from various source systems like SQL Database, DB2, Flatfiles, XML files etc into the Staging table and then to the target database.

company - Tata Consultancy Services
description - Experience in development and design of ETL (Extract, Transform and Loading data) methodology for supporting data transformations and processing, in a corporate wide ETL Solution using TALEND Big Data Platform.

Excellent working experience in Agile methodologies.

Proficiency in gathering and understanding the client requirements and translate business needs into technical requirements.

Design and develop end-to-end ETL process from various source systems to Staging area, from staging to Data Warehouse, soliciting and documenting business, functional and data requirements, context/variable diagrams, use cases and ETL related diagrams.

Excellent oral/written communication with ability to effectively work with onsite and remote teams.

A good team player with excellent problem solving ability and time management skills having profound insight to determine priorities, schedule work and meet critical deadlines.

company - Tata Consultancy Services

ETL Developer B

â€¢ Developed mappings using different transformations
company - Tata Consultancy Services
description - Project Details
Client/Project: Barclays UK London/HEXAD
Environment: Informatica (Power Center), SQL Server, UNIX, Autosys, Intellimatch.

Project Description:

The objective is to implement a strategic technical solution to support the governance and monitoring of break standards - including enhancements to audit capabilities. As a part of this program, the required remediation of source system data feeds involves consolidation of data into standardized feeds.

These remediated data feeds will be consumed by ETL layer. The reconciliation tool is designed to source data from an ETL layer. The data from the Front and Back office systems, together with static data must therefore be delivered to ETL. Here it will be pre-processed and delivered to reconciliation tool before the reconciliation process can be performed.

Role and Responsibilities:

â€¢ Responsible for analyzing, designing and developing ETL strategies and processes,
writing ETL specifications
â€¢ Requirement gathering
â€¢ Making functional documents and low level documents
â€¢ Developing and debugging the Informatica mappings to resolve bugs, and identify the causes of failures
â€¢ User interaction to identify the issues with the data loaded through the application

ETL Developer E
â€¢ Developed mappings using different transformations

ETL Developer - Sun Trust Bank NY
Skill Details
ETL- Experience - 39 months
EXTRACT, TRANSFORM, AND LOAD- Experience - 39 months
INFORMATICA- Experience - 39 months
ORACLE- Experience - 39 months
UNIX- Experience - 39 months
Company Details
company - Sun Trust Bank NY
description - Sun Trust Bank, NY JAN 2018 to present
Client: Sun Trust Bank NY
Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:

Sun Trust Bank is a US based multinational financial services holding company, headquarters in NY that operates the Bank in New York and other financial services investments. The company is organized as a stock corporation with four divisions: investment banking, private banking, Retail banking and a shared services group that provides Financial services and support to the other divisions.

The objective of the first module was to create a DR system for the bank with a central point of communication and storage for Listed, Cash securities, Loans, Bonds, Notes, Equities, Rates, Commodities, and FX asset classes.

Contribution / Highlights:

â€¢ Liaising closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define Technical requirements and create project documentation.
â€¢ Development using Infa 9.1, 11g/Oracle, UNIX.
â€¢ Use Informatica PowerCenter for extraction, transformation and loading (ETL) of data in the Database.
â€¢ Created and configured Sessions in Informatica workflow Manager for loading data into Data base tables from various heterogeneous database sources like Flat Files, Oracle etc.

- â€¢ Unit testing and system integration testing of the developed mappings.
- â€¢ Providing production Support of the deployed code.
- â€¢ Providing solutions to the business for the Production issues.
- â€¢ Had one to One interaction with the client throughout the project and in daily meetings.

Project #2

company - Marshall Multimedia
description - JUN 2016 to DEC 2017

Client: Marshall Multimedia

Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:

Marshall Multimedia is a US based multimedia advertisement services based organization which has head quarter in New York. EGC interface systems are advert management, Customer Management, Billing and Provisioning Systems for Consumer& Enterprise Customers. The main aim of the project was to create an enterprise data warehouse which would suffice the need of reports belonging to the following categories: Financial reports, management reports and rejection reports. The professional reports were created by Cognos and ETL work was performed by Informatica. This project is to load the advert details and magazine details coming in Relational tables into data warehouse and calculate the compensation and incentive amount monthly twice as per business rules.

Contribution / Highlights:

- â€¢ Developed mappings using different sources by using Informatica transformations.
- â€¢ Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files, Oracle etc.

2

- â€¢ Unit testing and system integration testing of the developed mappings.
- â€¢ Providing solutions to the business for the Production issues.

â¢ Used ETL methodologies and best practices to create Talend ETL jobs.
Followed and enhanced programming and naming standards. Developed jobs, components and Joblets in Talend. Used tRunJob component to run child job from a parent job and to pass parameters from parent to child job.
â¢ Created and deployed physical objects including custom tables, custom views, stored procedures, and indexes to SQL server for Staging and Data-Warehouse environment. Involved in writing SQL Queries and used Joins to access data from MySQL.
â¢ Created and managed Source to Target mapping documents for all Facts and Dimension tables. Broad design, development and testing experience with Talend Integration Suite and knowledge in Performance Tuning of mappings.
â¢ Extensively used tMap component which does lookup & Joiner Functions. Experienced in writing expressions within tmap as per the business need. Handled insert and update Strategy using tSQLRow.
â¢ Created Implicit, local and global Context variables in the job to run Talend jobs against different environments.
â¢ Worked on Talend Administration Console (TAC) for scheduling jobs and adding users. Experienced in Building a Talend job outside of a Talend studio as well as on TAC server.
â¢ Developed mappings to load Fact and Dimension tables, SCD Type 1 and SCD Type 2 dimensions and Incremental loading and unit tested the mappings.
â¢ Developed Framework Integrated Job which schedules multiple jobs at a time and updates the last successful run time, success status, sending mail for failed jobs, maintaining the counts in SQL Database. Used tParalleize component and multi thread execution option to run subjobs in parallel which increases the performance of a job.
â¢ Created Talend jobs to copy the files from one server to another and utilized Talend FTP components. Implemented FTP operations using Talend Studio to transfer files in between network folders as well as to FTP server using components like tFileList, tS3Put, tFTPut, tFileExist, tFTPConnection etc.
â¢ Extracted data from flat files/ databases applied business logic to load them in the staging database as well as flat files.
â¢ Successfully Loaded Data into different targets from various source systems like SQL Database, DB2, Flatfiles, XML files etc into the Staging table and then to the target database.

company - Tata Consultancy Services
description - Experience in development and design of ETL (Extract, Transform and Loading data) methodology for supporting data transformations and processing, in a corporate wide ETL Solution using TALEND Big Data Platform.
â¢ Excellent working experience in Agile methodologies.
â¢ Proficiency in gathering and understanding the client requirements and translate business needs into technical requirements.
â¢ Design and develop end-to-end ETL process from various source systems to Staging area, from staging to Data Warehouse, soliciting and documenting business, functional and data requirements, context/variable diagrams, use cases and ETL related diagrams.
â¢ Excellent oral/written communication with ability to effectively work with onsite and remote teams.
â¢ A good team player with excellent problem solving ability and time management skills having profound insight to determine priorities, schedule work and meet critical deadlines.

company - Tata Consultancy Services
description - Prepared ETL mapping Documents for every mapping and Data Migration document for smooth transfer of project from development to testing environment and then to production environment. Performed Unit testing and System testing to validate data loads in the target. Troubleshoot long running jobs and fixed the issues.

Skill Details

ETL- Experience - 48 months
EXTRACT, TRANSFORM, AND LOAD- Experience - 48 months
INFORMATICA- Experience - 48 months
MS SQL SERVER- Experience - 48 months
RECONCILIATION- Experience - 48 months
Jira- Experience - 36 months
Company Details
company - Tata Consultancy Services
description - Project Details
Client/Project: Barclays UK London/HEXAD
Environment: Informatica (Power Center), SQL Server, UNIX, Autosys, Intellimatch.

Project Description:

The objective is to implement a strategic technical solution to support the governance and monitoring of break standards - including enhancements to audit capabilities. As a part of this program, the required remediation of source system data feeds involves consolidation of data into standardized feeds.

These remediated data feeds will be consumed by ETL layer. The reconciliation tool is designed to source data from an ETL layer. The data from the Front and Back office systems, together with static data must therefore be delivered to ETL. Here it will be pre-processed and delivered to reconciliation tool before the reconciliation process can be performed.

Role and Responsibilities:

- â¢ Responsible for analyzing, designing and developing ETL strategies and processes,
- writing ETL specifications
- â¢ Requirement gathering
- â¢ Making functional documents and low level documents
- â¢ Developing and debugging the Informatica mappings to resolve bugs, and identify the causes of failures
- â¢ User interaction to identify the issues with the data loaded through the application

â€¢ Developed mappings using different transformations

ETL Developer - Sun Trust Bank NY
Skill Details
ETL- Experience - 39 months
EXTRACT, TRANSFORM, AND LOAD- Experience - 39 months
INFORMATICA- Experience - 39 months
ORACLE- Experience - 39 months
UNIX- Experience - 39 months
Company Details
company - Sun Trust Bank NY
description - Sun Trust Bank, NY JAN 2018 to present
Client: Sun Trust Bank NY
Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:

Sun Trust Bank is a US based multinational financial services holding company, headquarters in NY that operates the Bank in New York and other financial services investments. The company is organized as a stock corporation with four divisions: investment banking, private banking, Retail banking and a shared services group that provides Financial services and support to the other divisions.

The objective of the first module was to create a DR system for the bank with a central point of communication and storage for Listed, Cash securities, Loans, Bonds, Notes, Equities, Rates, Commodities, and FX asset classes.

Contribution / Highlights:

â€¢ Liaising closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define Technical requirements and create project documentation.
â€¢ Development using Infa 9.1, 11g/Oracle, UNIX.
â€¢ Use Informatica PowerCenter for extraction, transformation and loading (ETL) of data in the Database.
â€¢ Created and configured Sessions in Informatica workflow Manager for loading data into Data base tables from various heterogeneous database sources like Flat Files, Oracle etc.

- â¢ Unit testing and system integration testing of the developed mappings.
- â¢ Providing production Support of the deployed code.
- â¢ Providing solutions to the business for the Production issues.
- â¢ Had one to One interaction with the client throughout the project and in daily meetings.

Project #2
company - Marshall Multimedia
description - JUN 2016 to DEC 2017

Client: Marshall Multimedia
Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:
Marshall Multimedia is a US based multimedia advertisement services based organization which has head quarter in New York. EGC interface systems are advert management, Customer Management, Billing and Provisioning Systems for Consumer& Enterprise Customers.
The main aim of the project was to create an enterprise data warehouse which would suffice the need of reports belonging to the following categories: Financial reports, management reports and rejection reports. The professional reports were created by Cognos and ETL work was performed by Informatica. This project is to load the advert details and magazine details coming in Relational tables into data warehouse and calculate the compensation and incentive amount monthly twice as per business rules.

Contribution / Highlights:
â¢ Developed mappings using different sources by using Informatica transformations.
â¢ Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files, Oracle etc.

2
â¢ Unit testing and system integration testing of the developed mappings.
â¢ Providing solutions to the business for the Production issues.

Project #3
company - Assurant healthcare/Insurance Miami USA
description - Assurant, USA NOV 2015 to MAY 2016

Project: ACT BI - State Datamart
Client: Assurant healthcare/Insurance Miami USA
Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:
Assurant, Inc. is a holding company with businesses that provide a diverse set of specialty, niche-market insurance products in the property, casualty, life and health insurance sectors. The company's four operating segments are Assurant Employee Benefits, Assurant Health, Assurant Solutions and Assurant Specialty Property.
The project aim at building State Datamart for enterprise solution. I am part of team which is responsible for ETL Design & development along with testing.

Contribution / Highlights:
â¢ Performed small enhancement
â¢ Daily load monitoring
â¢ Attend to Informatica job failures by analyzing the root cause, resolving the failure using standard documented process.
â¢ Experience in writing SQL statements.
â¢ Strong Problem Analysis & Resolution skills and ability to work in Multi Platform Environments
â¢ Scheduled the Informatica jobs using Informatica scheduler
â¢ Extensively used ETL methodology for developing and supporting data extraction, transformations and loading process, in a corporate-wide-ETL Solution using Informatica.
â¢ Involved in creating the Unit cases and uploaded in to Quality Center for Unit Testing and UTR

ETL Developer
â¢ Ensure that daily support tasks are done in accordance with the defined SLA.

ETL Developer
Skill Details
informatica- Exprience - 36 monthsCompany Details
company - Blue Shield of California
description - Duration: (Mar 2016 - Sept 2017)

Description:
Blue Shield of California (BSC) is health plan provider. The intent of this project is to process feeds coming in and going out of BSC system related to eligibility, enrollment, and claims subject areas. All these feeds comes in different formats and are processed using Informatica 9.6.1, Oracle 11g, Facets 5.0 &Tidal.

Technical environment: ETL tool (Informatica power Center 9.6.1), Oracle 11g (SQL, PL-SQL), UNIX, Facets, Tidal, JIRA, Putty.

Role: ETL Developer
Responsibilities: â¢ Responsible for analyzing the business requirement document
â¢ Involved in development of Informatica mappings using different transformations like source qualifier, expression, filter, router, joiner, union, aggregator, normalizer, sorter, lookup and its corresponding sessions and workflows.
â¢ Extensively used Informatica Debugger to figure out the problems in mapping and involved in troubleshooting the existing bugs.
â¢ Writing Unix Scripts & SQL's as per the business requirement.
â¢ Impact analysis of change requests & their development.
â¢ Data fabrication using Facets screens as well as SQL statements in membership domain.
â¢ Unit testing & trouble shooting using Informatica debugger, SQL query & preparation of Unit Test Cases.
â¢ Prepare documents for design, unit testing and impact analysis.

Awards & Achievements
ETL Developer
â¢ Received Kudos Award at Syntel for contribution in error free work, commitment towards learning, client appreciation and outstanding display of Syntel values Received appreciation from Management for outstanding performance in complete tenure.
â¢ Received spot recognition for automation done in project.

ETL- Experience - 48 months

EXTRACT, TRANSFORM, AND LOAD- Experience - 48 months

INFORMATICA- Experience - 48 months

MS SQL SERVER- Experience - 48 months

RECONCILIATION- Experience - 48 months

Jira- Experience - 36 months Company Details

company - Tata Consultancy Services

description - Project Details

Client/Project: Barclays UK London/HEXAD

Environment: Informatica (Power Center), SQL Server, UNIX, Autrosys, Intellimatch.

Project Description:

The objective is to implement a strategic technical solution to support the governance and monitoring of break standards - including enhancements to audit capabilities. As a part of this program, the required remediation of source system data feeds involves consolidation of data into standardized feeds.

These remediated data feeds will be consumed by ETL layer. The reconciliation tool is

designed to source data from an ETL layer. The data from the Front and Back office systems,

together with static data must therefore be delivered to ETL. Here it will be pre-processed and delivered to reconciliation tool before the reconciliation process can be performed.

Role and Responsibilities:

â¢ Responsible for analyzing, designing and developing ETL strategies and processes,

writing ETL specifications

â¢ Requirement gathering

â¢ Making functional documents and low level documents

â¢ Developing and debugging the Informatica mappings to resolve bugs, and identify the causes of failures

â¢ User interaction to identify the issues with the data loaded through the application

â€¢ Developed mappings using different transformations

ORACLE- Experience - 39 months

UNIX- Experience - 39 months

Company Details

company - Sun Trust Bank NY

description - Sun Trust Bank, NY JAN 2018 to present

Client: Sun Trust Bank NY

Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:

Sun Trust Bank is a US based multinational financial services holding company, headquarters in NY that operates the Bank in New York and other financial services investments. The company is organized as a stock corporation with four divisions: investment banking, private banking, Retail banking and a shared services group that provides Financial services and support to the other divisions.

The objective of the first module was to create a DR system for the bank with a central point of communication and storage for Listed, Cash securities, Loans, Bonds, Notes, Equities, Rates, Commodities, and FX asset classes.

Contribution / Highlights:

- â€¢ Liaising closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define Technical requirements and create project documentation.
- â€¢ Development using Infa 9.1, 11g/Oracle, UNIX.
- â€¢ Use Informatica PowerCenter for extraction, transformation and loading (ETL) of data in the Database.
- â€¢ Created and configured Sessions in Informatica workflow Manager for loading data into Data base tables from various heterogeneous database sources like Flat Files, Oracle etc.

- â¢ Unit testing and system integration testing of the developed mappings.
- â¢ Providing production Support of the deployed code.
- â¢ Providing solutions to the business for the Production issues.
- â¢ Had one to One interaction with the client throughout the project and in daily meetings.

Project #2
company - Marshall Multimedia
description - JUN 2016 to DEC 2017

Client: Marshall Multimedia
Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:
Marshall Multimedia is a US based multimedia advertisement services based organization which has head quarter in New York. EGC interface systems are advert management, Customer Management, Billing and Provisioning Systems for Consumer& Enterprise Customers.
The main aim of the project was to create an enterprise data warehouse which would suffice the need of reports belonging to the following categories: Financial reports, management reports and rejection reports. The professional reports were created by Cognos and ETL work was performed by Informatica. This project is to load the advert details and magazine details coming in Relational tables into data warehouse and calculate the compensation and incentive amount monthly twice as per business rules.

Contribution / Highlights:
â¢ Developed mappings using different sources by using Informatica transformations.
â¢ Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files, Oracle etc.

2
â¢ Unit testing and system integration testing of the developed mappings.
â¢ Providing solutions to the business for the Production issues.

Project #3
company - Assurant healthcare/Insurance Miami USA
description - Assurant, USA NOV 2015 to MAY 2016

Project: ACT BI - State Datamart
Client: Assurant healthcare/Insurance Miami USA
Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:
Assurant, Inc. is a holding company with businesses that provide a diverse set of specialty, niche-market insurance products in the property, casualty, life and health insurance sectors. The company's four operating segments are Assurant Employee Benefits, Assurant Health, Assurant Solutions and Assurant Specialty Property.
The project aim at building State Datamart for enterprise solution. I am part of team which is responsible for ETL Design & development along with testing.

Contribution / Highlights:
â¢ Performed small enhancement
â¢ Daily load monitoring
â¢ Attend to Informatica job failures by analyzing the root cause, resolving the failure using standard documented process.
â¢ Experience in writing SQL statements.
â¢ Strong Problem Analysis & Resolution skills and ability to work in Multi Platform Environments
â¢ Scheduled the Informatica jobs using Informatica scheduler
â¢ Extensively used ETL methodology for developing and supporting data extraction, transformations and loading process, in a corporate-wide-ETL Solution using Informatica.
â¢ Involved in creating the Unit cases and uploaded in to Quality Center for Unit Testing and UTR

ETL Developer
â¢ Ensure that daily support tasks are done in accordance with the defined SLA.
Education Details
January 2015 Bachelor of Engineering EXTC Mumbai, Maharashtra Mumbai University

C

ETL Developer
Skill Details
informatica- Exprience - 36 monthsCompany Details
company - Blue Shield of California
description - Duration: (Mar 2016 - Sept 2017)

Description:
Blue Shield of California (BSC) is health plan provider. The intent of this project is to process feeds coming in and going out of BSC system related to eligibility, enrollment, and claims subject areas. All these feeds comes in different formats and are processed using Informatica 9.6.1, Oracle 11g, Facets 5.0 &Tidal.

Technical environment: ETL tool (Informatica power Center 9.6.1), Oracle 11g (SQL, PL-SQL), UNIX, Facets, Tidal, JIRA, Putty.

Role: ETL Developer
Responsibilities:
â¢ Responsible for analyzing the business requirement document
â¢ Involved in development of Informatica mappings using different transformations like source qualifier, expression, filter, router, joiner, union, aggregator, normalizer, sorter, lookup and its corresponding sessions and workflows.
â¢ Extensively used Informatica Debugger to figure out the problems in mapping and involved in troubleshooting the existing bugs.
â¢ Writing Unix Scripts & SQL's as per the business requirement.
â¢ Impact analysis of change requests & their development.
â¢ Data fabrication using Facets screens as well as SQL statements in membership domain.
â¢ Unit testing & trouble shooting using Informatica debugger, SQL query & preparation of Unit Test Cases.
â¢ Prepare documents for design, unit testing and impact analysis.

Awards & Achievements
â¢ Received Kudos Award at Syntel for contribution in error free work, commitment towards learning, client appreciation and outstanding display of Syntel values Received appreciation from Management for outstanding performance in complete tenure.

ETL Developer
â¢ Received spot recognition for automation done in project.

description - Prepared ETL mapping Documents for every mapping and Data Migration document for smooth transfer of project from development to testing environment and then to production environment. Performed Unit testing and System testing to validate data loads in the target. Troubleshoot long running jobs and fixed the issues.
â¢ Expertise in creating mappings in TALEND using Big Data supporting components such as tJDBCConfiguration, tJDBCInput, tHDFSConfiguration, tS3Configuration, tCacheOut, tCacheln, tSqlRow and standard components like tFileInputDelimited, tFileOutputDelimited, tMap, tJoin, tReplicate, tParallelize, tConvertType, tAggregate, tSortRow, tFlowMeter, tLogCatcher,

tRowGenerator, tJava, tJavarow, tAggregateRow, tFilter etc.
â¢ Used ETL methodologies and best practices to create Talend ETL jobs.
Followed and enhanced programming and naming standards. Developed jobs, components and Joblets in Talend. Used tRunJob component to run child job from a parent job and to pass parameters from parent to child job.
â¢ Created and deployed physical objects including custom tables, custom views, stored procedures, and indexes to SQL server for Staging and Data-Warehouse environment. Involved in writing SQL Queries and used Joins to access data from MySQL.
â¢ Created and managed Source to Target mapping documents for all Facts and Dimension tables. Broad design, development and testing experience with Talend Integration Suite and knowledge in Performance Tuning of mappings.
â¢ Extensively used tMap component which does lookup & Joiner Functions. Experienced in writing expressions within tmap as per the business need. Handled insert and update Strategy using tSQLRow.
â¢ Created Implicit, local and global Context variables in the job to run Talend jobs against different environments.
â¢ Worked on Talend Administration Console (TAC) for scheduling jobs and adding users. Experienced in Building a Talend job outside of a Talend studio as well as on TAC server.
â¢ Developed mappings to load Fact and Dimension tables, SCD Type 1 and SCD Type 2 dimensions and Incremental loading and unit tested the mappings.
â¢ Developed Framework Integrated Job which schedules multiple jobs at a time and updates the last successful run time, success status, sending mail for failed jobs, maintaining the counts in SQL Database. Used tParalleize component and multi thread execution option to run subjobs in parallel which increases the performance of a job.
â¢ Created Talend jobs to copy the files from one server to another and utilized Talend FTP components. Implemented FTP operations using Talend Studio to transfer files in between network folders as well as to FTP server using components like tFileList, tS3Put, tFTPut, tFileExist, tFTPConnection etc.
â¢ Extracted data from flat files/ databases applied business logic to load them in the staging database as well as flat files.
â¢ Successfully Loaded Data into different targets from various source systems like SQL Database, DB2, Flatfiles, XML files etc into the Staging table and then to the target database.

company - Tata Consultancy Services
description - Experience in development and design of ETL (Extract, Transform and Loading data) methodology for supporting data transformations and processing, in a corporate wide ETL Solution using TALEND Big Data Platform.
â¢ Excellent working experience in Agile methodologies.
â¢ Proficiency in gathering and understanding the client requirements and translate business needs into technical requirements.
â¢ Design and develop end-to-end ETL process from various source systems to Staging area, from staging to Data Warehouse, soliciting and documenting business, functional and data requirements, context/variable diagrams, use cases and ETL related diagrams.
â¢ Excellent oral/written communication with ability to effectively work with onsite and remote teams.
â¢ A good team player with excellent problem solving ability and time management skills having profound insight to determine priorities, schedule work and meet critical deadlines.

These remediated data feeds will be consumed by ETL layer. The reconciliation tool is

designed to source data from an ETL layer. The data from the Front and Back office systems,

together with static data must therefore be delivered to ETL. Here it will be pre-processed and delivered to reconciliation tool before the reconciliation process can be performed.

Role and Responsibilities:

â¢ Responsible for analyzing, designing and developing ETL strategies and processes,

writing ETL specifications

â¢ Requirement gathering

â¢ Making functional documents and low level documents

â¢ Developing and debugging the Informatica mappings to resolve bugs, and identify the causes of failures

â¢ User interaction to identify the issues with the data loaded through the application

â€¢ Developed mappings using different transformations
company - Tata Consultancy Services
description - Project Details
Client/Project: Barclays UK London/HEXAD
Environment: Informatica (Power Center), SQL Server, UNIX, Autosys, Intellimatch.

Project Description:

The objective is to implement a strategic technical solution to support the governance and monitoring of break standards - including enhancements to audit capabilities. As a part of this program, the required remediation of source system data feeds involves consolidation of data into standardized feeds.

These remediated data feeds will be consumed by ETL layer. The reconciliation tool is designed to source data from an ETL layer. The data from the Front and Back office systems, together with static data must therefore be delivered to ETL. Here it will be pre-processed and delivered to reconciliation tool before the reconciliation process can be performed.

Role and Responsibilities:

â€¢ Responsible for analyzing, designing and developing ETL strategies and processes,
writing ETL specifications
â€¢ Requirement gathering
â€¢ Making functional documents and low level documents
â€¢ Developing and debugging the Informatica mappings to resolve bugs, and identify the causes of failures
â€¢ User interaction to identify the issues with the data loaded through the

ETL application
Developer â€¢ Developed mappings using different transformations C

ETL- Experience - 39 months
EXTRACT, TRANSFORM, AND LOAD- Experience - 39 months
INFORMATICA- Experience - 39 months
ORACLE- Experience - 39 months
UNIX- Experience - 39 months
Company Details
company - Sun Trust Bank NY
description - Sun Trust Bank, NY JAN 2018 to present
Client: Sun Trust Bank NY
Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:

Sun Trust Bank is a US based multinational financial services holding company, headquarters in NY that operates the Bank in New York and other financial services investments. The company is organized as a stock corporation with four divisions: investment banking, private banking, Retail banking and a shared services group that provides Financial services and support to the other divisions.

The objective of the first module was to create a DR system for the bank with a central point of communication and storage for Listed, Cash securities, Loans, Bonds, Notes, Equities, Rates, Commodities, and FX asset classes.

Contribution / Highlights:

â€¢ Liaising closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define Technical requirements and create project documentation.
â€¢ Development using Infa 9.1, 11g/Oracle, UNIX.
â€¢ Use Informatica PowerCenter for extraction, transformation and loading (ETL) of data in the Database.
â€¢ Created and configured Sessions in Informatica workflow Manager for loading data into Data base tables from various heterogeneous database sources like Flat Files, Oracle etc.

- â€¢ Unit testing and system integration testing of the developed mappings.
- â€¢ Providing production Support of the deployed code.
- â€¢ Providing solutions to the business for the Production issues.
- â€¢ Had one to One interaction with the client throughout the project and in daily meetings.

Project #2

company - Marshall Multimedia
description - JUN 2016 to DEC 2017

Client: Marshall Multimedia

Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:

Marshall Multimedia is a US based multimedia advertisement services based organization which has head quarter in New York. EGC interface systems are advert management, Customer Management, Billing and Provisioning Systems for Consumer& Enterprise Customers. The main aim of the project was to create an enterprise data warehouse which would suffice the need of reports belonging to the following categories: Financial reports, management reports and rejection reports. The professional reports were created by Cognos and ETL work was performed by Informatica. This project is to load the advert details and magazine details coming in Relational tables into data warehouse and calculate the compensation and incentive amount monthly twice as per business rules.

Contribution / Highlights:

- â€¢ Developed mappings using different sources by using Informatica transformations.
- â€¢ Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files, Oracle etc.

2

- â€¢ Unit testing and system integration testing of the developed mappings.
- â€¢ Providing solutions to the business for the Production issues.

Project #3

company - Assurant healthcare/Insurance Miami USA
description - Assurant, USA NOV 2015 to MAY 2016

Project: ACT BI - State Datamart

Client: Assurant healthcare/Insurance Miami USA

Environment: Informatica Power Center 9.1, Oracle 11g, unix.

Role: ETL Developer

Project Profile:

Assurant, Inc. is a holding company with businesses that provide a diverse set of specialty, niche-market insurance products in the property, casualty, life and health insurance sectors. The company's four operating segments are Assurant Employee Benefits, Assurant Health, Assurant Solutions and Assurant Specialty Property. The project aim at building State Datamart for enterprise solution. I am part of team which is responsible for ETL Design & development along with testing.

Contribution / Highlights:

- â€¢ Performed small enhancement
- â€¢ Daily load monitoring
- â€¢ Attend to Informatica job failures by analyzing the root cause, resolving the failure using standard documented process.
- â€¢ Experience in writing SQL statements.
- â€¢ Strong Problem Analysis & Resolution skills and ability to work in Multi Platform Environments
- â€¢ Scheduled the Informatica jobs using Informatica scheduler
- â€¢ Extensively used ETL methodology for developing and supporting data extraction, transformations and loading process, in a corporate-wide-ETL Solution using Informatica.
- â€¢ Involved in creating the Unit cases and uploaded in to Quality Center for Unit Testing and UTR

ETL Developer
Skill Details
informatica- Exprience - 36 months
Company Details
company - Blue Shield of California
description - Duration: (Mar 2016 - Sept 2017)

Description:
Blue Shield of California (BSC) is health plan provider. The intent of this project is to process feeds coming in and going out of BSC system related to eligibility, enrollment, and claims subject areas. All these feeds comes in different formats and are processed using Informatica 9.6.1, Oracle 11g, Facets 5.0 & Tidal.

Technical environment: ETL tool (Informatica power Center 9.6.1), Oracle 11g (SQL, PL-SQL), UNIX, Facets, Tidal, JIRA, Putty.

Role: ETL Developer
Responsibilities:
â¢ Responsible for analyzing the business requirement document
â¢ Involved in development of Informatica mappings using different transformations like source qualifier, expression, filter, router, joiner, union, aggregator, normalizer, sorter, lookup and its corresponding sessions and workflows.
â¢ Extensively used Informatica Debugger to figure out the problems in mapping and involved in troubleshooting the existing bugs.
â¢ Writing Unix Scripts & SQL's as per the business requirement.
â¢ Impact analysis of change requests & their development.
â¢ Data fabrication using Facets screens as well as SQL statements in membership domain.
â¢ Unit testing & trouble shooting using Informatica debugger, SQL query & preparation of Unit Test Cases.
â¢ Prepare documents for design, unit testing and impact analysis.

Awards & Achievements
â¢ Received Kudos Award at Syntel for contribution in error free work, commitment towards learning, client appreciation and outstanding display of Syntel values Received appreciation from Management for outstanding performance in complete tenure.

ETL Developer
â¢ Received spot recognition for automation done in project.

description - Prepared ETL mapping Documents for every mapping and Data Migration document for smooth transfer of project from development to testing environment and then to production environment. Performed Unit testing and System testing to validate data loads in the target. Troubleshoot long running jobs and fixed the issues.
â¢ Expertise in creating mappings in TALEND using Big Data supporting components such as tJDBCConfiguration, tJDBCInput, tHDFSConfiguration, tS3configuration, tCacheOut, tCacheln, tSqlRow and standard components like tFileInputDelimited, tFileOutputDelimited, tMap, tJoin, tReplicate, tParallelize, tConvertType, tAggregate, tSortRow, tFlowMeter, tLogCatcher,

tRowGenerator, tJava, tJavarow, tAggregateRow, tFilter etc.
â¢ Used ETL methodologies and best practices to create Talend ETL jobs.
Followed and enhanced programming and naming standards. Developed jobs, components and Joblets in Talend. Used tRunJob component to run child job from a parent job and to pass parameters from parent to child job.

â¢ Created and deployed physical objects including custom tables, custom views, stored procedures, and indexes to SQL server for Staging and Data-Warehouse environment. Involved in writing SQL Queries and used Joins to access data from MySQL.

â¢ Created and managed Source to Target mapping documents for all Facts and Dimension tables. Broad design, development and testing experience with Talend Integration Suite and knowledge in Performance Tuning of mappings.

â¢ Extensively used tMap component which does lookup & Joiner Functions. Experienced in writing expressions within tmap as per the business need. Handled insert and update Strategy using tSQLRow.

â¢ Created Implicit, local and global Context variables in the job to run Talend jobs against different environments.

â¢ Worked on Talend Administration Console (TAC) for scheduling jobs and adding users. Experienced in Building a Talend job outside of a Talend studio as well as on TAC server.

â¢ Developed mappings to load Fact and Dimension tables, SCD Type 1 and SCD Type 2 dimensions and Incremental loading and unit tested the mappings.

â¢ Developed Framework Integrated Job which schedules multiple jobs at a time and updates the last successful run time, success status, sending mail for failed jobs, maintaining the counts in SQL Database. Used tParalleize component and multi thread execution option to run subjobs in parallel which increases the performance of a job.

â¢ Created Talend jobs to copy the files from one server to another and utilized Talend FTP components. Implemented FTP operations using Talend Studio to transfer files in between network folders as well as to FTP server using components like tFileList, tS3Put, tFTPPut, tFileExist, tFTPConnection etc.

â¢ Extracted data from flat files/ databases applied business logic to load them in the staging database as well as flat files.

â¢ Successfully Loaded Data into different targets from various source systems like SQL Database, DB2, Flatfiles, XML files etc into the Staging table and then to the target database.

company - Tata Consultancy Services
description - Experience in development and design of ETL (Extract, Transform and Loading data) methodology for supporting data transformations and processing, in a corporate wide ETL Solution using TALEND Big Data Platform.

â¢ Excellent working experience in Agile methodologies.

â¢ Proficiency in gathering and understanding the client requirements and translate business needs into technical requirements.

â¢ Design and develop end-to-end ETL process from various source systems to Staging area, from staging to Data Warehouse, soliciting and documenting business, functional and data requirements, context/variable diagrams, use cases and ETL related diagrams.

â¢ Excellent oral/written communication with ability to effectively work with onsite and remote teams.

â¢ A good team player with excellent problem solving ability and time management skills having profound insight to determine priorities, schedule work and meet critical deadlines.

company - Tata Consultancy Services

Technical Skills Languages: C#, ASP .NET MVC, HTML, CSS, JavaScript, AngularJs Primary Skill: Entity Framework. Tools Used: SQL Server 14, Visual Studio 13. Project Details: 1. Project Name: Transport Management System Role: Dot Net Developer Platform Used: MVC, AngularJs, SQL Server Description: This project is about the Transport Management System. This project is used to keep all the record of the Vehicle, Customer, Employee. Reduce costs with centralized planning and execution of logistics activities. Vehicle owner can add his vehicle for rent of the specific day into the application from their location. Admin can easily access the data of Vehicle, Customer & Employee. Responsibilities: Used 3-tier architecture for presentation layer, the Business and Data Access Layers and were coded using C# as per user Requirements. Make changes in the project with discussing the group for new requirement. Work on Customer and Vehicle model. 2. Project Name: CRM Role: Dot Net Developer Platform Used: MVC, SQL Server Description: It's kind of CRM Application where a training institute can easily track their student data. where we have different user store or access and utilise to manage this data with application. Any user can easily fill the information of the leads comes in that institute also who joined or Convert that leads as a student in that institute. All information can store or easily manage this application also the good leads or the student who didn't join but their records are store in this application so this application help institute to fetch all the contacts information or those leads or student who didn't join that time. We can later contact to those leads in future. Also with the application we get to know each and every leads or student who joined Responsibilities: Used 3-tier architecture for presentation layer, the Business and Data Access Layers and were coded using C# as per user Requirements. Make changes in the project with discussing the group for new requirement. Work on Enquiry model. Key Strength: Adaptability. Hard Worker. Self Motivated. Positive Attitude. Education Details

company - The Tie Bar
description - Duration: January 2017 to Till Date

Responsibility:

- â¢ Design and coding in a .NET server-side environment, specifically utilising the Microsoft MVC framework and client side environment using Knockout JS.
- â¢ Consuming Web API and WCF Rest full services.
- â¢ Designed and coded application components in an agile environment utilizing a test driven development approach.
- â¢ Created and maintained project tasks and schedules.
- â¢ Provided programming estimates, identified potential problems and recommended alternative solutions.
- â¢ Worked in close cooperation with project managers and other functional team members to form a team effort in development.
- â¢ Utilized pair programming approach to ensure high quality code.

Projects:

Title: THE TIEBAR

Environment: Visual Studio 2015, MVC 5.0, C#, JavaScript, JSON, LINQ, HTML 5

Database: SQL Server 2015

Role: Developer

Description:

The Tie Bar is US based online shopping website; it is the one-stop destination for luxury menswear with premium dress shirts, ties, bow ties and more,

Title: Leave Management System

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery

Database: SQL Server 2008

Role: Developer

Description:

A Leave Management System is a web application having two module one is front end and second is admin module. Admin user can manage the site content in this application. The main functionality of this web application is used for maintaining the employee leave policy in a company

Title: Around Pune (CMS)

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery

Database: SQL Server 2008

Role: Developer

Description:

Around Pune is a web application. In that there are two modules one is admin module and another is client or front end. Admin module controls the site date or its cms (content management system) project. The purpose of this site is to show or provide the details of all the spots and tourists places around the Pune.

Title: Country Side

Environment: Visual Studio 2008, ASP.Net, C#.Net, JavaScript, JQuery

Database: SQL Server 2008

Role: Developer

Description:

This is cms (content management system) website controlling by admin user. In that, there is one admin module to maintain website content. This site is used to provide information about tourist places, and provide offers, Different packages for trips.

company - Hamsa Hitech Pvt. Ltd

description - Responsibility:

- â¢ Design and coding in a .NET server-side environment, specifically utilising the Asp.Net and C#.Net.

- â¢ Design and implement systems that use relational databases, specifically SQL 2008.

Project:

Title: A G JOHNSON

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery,

Database: SQL Server 2008

Role: Developer

Description:

A G JOHNSON is a global employment website. The main purpose of this application is to recruit employees for their clients in different countries like Switzerland, Norway and Sweden and it provide services like Organisational Development, Management and Leadership Support and Development, Legal Support

Title: CRM for Company
Environment: Visual Studio 2008, ASP.Net 3.0 using C#.Net, JavaScript, JQuery,
Database: SQL Server 2008
Role: Developer

Worked On: 1. Project Name: Politician Website Role: Trainee Project
Description: I developed Politician website. In this website there is Home Page, Quick Facts, Category, Biography, Gallery, and ContactUs Page. It is a totally dynamic website. Environment: Operating System: Windows 7
Development Tools: Visual Studio 2013 Database Server: SQL Server 2012
Technology: .NET Framework 4.5, ASP.Net MVC5 Presentation Layer: HTML, CSS, Jquery, Bootstrap Role and Responsibilities: • Understanding requirements, Coding and unit testing.
2. Project Name: Coaching Management System (CMS) Project Description: This software is helps to manage institute (Student, Teacher, Courses, Batches, Fees, Attendance, and Marks) . Provide easy reports like outstanding Fees, Marks, and Attendance etc. This software is specially designed for coaching institute.
Environment: Operating System: Windows 7 Database Server: SQL Server 2012 Technology: .NET Framework 4.5, ASP.Net MVC5 Presentation Layer: HTML, CSS, JavaScript, Jquery, Bootstrap Features: • Project includes the feature of testing type and the activity on the project activities. • Project includes the online management and test process. Role and Responsibilities: • Worked in Development of Back-end Like Data Collections. • Database Schema Designing, and Create Database Dictionary & Made Database Constraints. • I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. • SRS documentation and Development.
3. Project Name: Hospital Management System (HMS) Project Description: Hospital Management System is powerful, flexible, and easy to use and designed and developed to deliver real conceivable benefits to hospitals and clinics and more importantly it is backed by reliable and dependable. Hospital Management System is designed for multispecialty hospitals, to cover a wide range of hospital administration and management processes. It is an integrated end-to-end Hospital Management System that provides relevant information across the hospital to support effective decision making for patient care, hospital administration and critical financial accounting, in a seamless flow. Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery, Kendo UI Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Features: • Project includes the feature of testing type and the activity on the project activities. • Project includes the online management and test process. Role and Responsibilities: • Worked in Development of Back-end Like Data Collections. • Database Schema Designing, and Create Database Dictionary & Made Database Constraints. • I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. • SRS documentation and Development.
4. Project Name: Ticket Booking Software (BESS) Project Description: Online Ticket Booking System is a Web based application. You can directly book the ticket by this application. This application is implemented for Bus, Tour and Travel Agency. Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery, KendoUI Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Features: • Project includes the feature of testing type and the activity on the project activities.
• Project includes the online management and test process. Role and Responsibilities: • Worked in Development of Back-end Like Data Collections. • Database Schema Designing, and Create Database Dictionary & Made Database Constraints. • I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. • SRS documentation and Development.
5. Project Name: School Management System (SMS) Project Description: School Management System is complete school management software designed to automate a school's diverse operations from classes, exams to school events calendar. This school software has a powerful online community to bring parents, teachers and student on a common interactive platform. It is paperless office automation solution for today's modern schools. The School Management System provides the facility to carry out all day to day activities of the school, making them fast, easy, efficient and accurate. Environment:

Presentation Layer: HTML, CSS, JavaScript, Jquery Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012
Operating System: Windows 7 Features: Project includes the feature of testing type and the activity on the project activities. Project includes the online management and test process. Role and Responsibilities: Worked in Development of Back-end Like Data Collections. Database Schema Designing, and Create Database Dictionary & Made Database Constraints.
I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. SRS documentation and Development. 6. Project Name: CREDIT MONITORING application Using the CREDIT MONITORING application, RMs, UHs, Credit Controllers and CMUs are able to monitor and manage the following items online, update the regularization dates and add their comments as well as generate reports: - Overdrafts - Past Dues - SBLC / FG Expiry - Mortgage Expiry - Cheques Returns & Failed Direct Debit - NBF vs. CB Classification
Relationship Manager The relationship manager can only update the Regularization Date and the RM Comments. All other fields will be disabled (greyed-out) for the relationship manager. On updating the Regularization Date and the RM Comments, a successful message will be displayed to the RM and then the RM will be navigated to the Dashboard screen again.
Credit Controller (CCU) The credit controller can only update the CCU Comments, if and only if the Regularization Date and RM Comments are present. Otherwise, the CCU Comments field will be disabled (greyed-out). All other fields will also be disabled (greyed-out) for the CCU. On updating the CCU Comments, a successful message will be displayed to the CCU and then the CCU will be navigated to the Dashboard screen. CMU The CMU can only update the CMU comments, if and only if the CCU Comments are present. Otherwise, the CMU Comments field should be disabled (greyed-out). All other fields will be disabled (greyed-out) for the CMU. On updating the CMU Comments, a successful message will be displayed to the CMU and then the CMU will be navigated to the Dashboard screen. UH The UH can only update the UH comments All other fields will be disabled (greyed-out) for the UH. On updating the UH Comments, a successful message will be displayed to the UH and then the UH will be navigated to the Dashboard screen. Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Role and Responsibilities: Understanding requirements, Coding and unit testing. SRS documentation and Development.

Dot Net Developer - The Tie Bar
Skill Details
.NET- Experience - 34 months
ASP- Experience - 34 months
ASP.NET- Experience - 34 months
C#- Experience - 34 months
JAVASCRIPT- Experience - 34 months
Company Details
company - The Tie Bar
description - Duration: January 2017 to Till Date

Responsibility:
â€¢ Design and coding in a .NET server-side environment, specifically utilising the Microsoft MVC framework and client side environment using Knockout JS.
â€¢ Consuming Web API and WCF Rest full services.
â€¢ Designed and coded application components in an agile environment utilizing a test driven development approach.
â€¢ Created and maintained project tasks and schedules.
â€¢ Provided programming estimates, identified potential problems and recommended alternative solutions.
â€¢ Worked in close cooperation with project managers and other functional team members to form a team effort in development.
â€¢ Utilized pair programming approach to ensure high quality code.

Projects:
Title: THE TIEBAR
Environment: Visual Studio 2015, MVC 5.0, C#, JavaScript, JSON, LINQ, HTML 5
Database: SQL Server 2015

Role: Developer
Description:
The Tie Bar is US based online shopping website; it is the one-stop destination for luxury menswear with premium dress shirts, ties, bow ties and more,

Title: Leave Management System
Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery
Database: SQL Server 2008

Role: Developer
Description:
A Leave Management System is a web application having two module one is front end and second is admin module. Admin user can manage the site content in this application. The main functionality of this web application is used for maintaining the employee leave policy in a company

Title: Around Pune (CMS)
Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery
Database: SQL Server 2008

Role: Developer
Description:
Around Pune is a web application. In that there are two modules one is admin module and another is client or front end. Admin module controls the site date or its cms (content management system) project. The purpose of this site is to show or provide the details of all the spots and tourists places around the Pune.

Title: Country Side
Environment: Visual Studio 2008, ASP.Net, C#.Net, JavaScript, JQuery
Database: SQL Server 2008

Role: Developer
Description:
This is cms (content management system) website controlling by admin user. In that, there is one admin module to maintain website content. This site is used to provide information about tourist places, and provide offers, Different packages for trips.
company - Hamsa Hitech Pvt. Ltd
description - Responsibility:
â€¢ Design and coding in a .NET server-side environment, specifically utilising the Asp.Net and C#.Net.

â€¢ Design and implement systems that use relational databases, specifically SQL 2008.

Project:

Title: A G JOHNSON

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery,

Database: SQL Server 2008

Role: Developer

Description:

A G JOHNSON is a global employment website. The main purpose of this application is to recruit employees for their clients in different countries like Switzerland, Norway and Sweden and it provide services like Organisational Development, Management and Leadership Support and Development, Legal Support

Title: CRM for Company

Environment: Visual Studio 2008, ASP.Net 3.0 using C#.Net, JavaScript, JQuery,

Database: SQL Server 2008

Role: Developer

Description:

Customer relationship management System is a web application. Which is maintaining the relation with company? We can view the Project List, Client List, Notification List, Appointment List, Conversation List, Client Person List and Company Person.

Hospital Management System (HMS) Project Description: Hospital

Management System is powerful, flexible, and easy to use and designed and developed to deliver real conceivable benefits to hospitals and clinics and more importantly it is backed by reliable and dependable. Hospital Management System is designed for multispecialty hospitals, to cover a wide range of hospital administration and management processes. It is an integrated end-to-end Hospital Management System that provides relevant information across the hospital to support effective decision making for patient care, hospital administration and critical financial accounting, in a seamless flow. Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery, Kendo UI Business Layer: .NET Framework 4.5, ASP.Net MVC5

Database Layer: SQL Server 2012 Operating System: Windows 7 Features: â€¢ Project includes the feature of testing type and the activity on the project activities. â€¢ Project includes the online management and test process. Role and

Responsibilities: â€¢ Worked in Development of Back-end Like Data

Collections. â€¢ Database Schema Designing, and Create Database

Dictionary & Made Database Constraints. â€¢ I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. â€¢ SRS documentation and Development. 4. Project Name:

Ticket Booking Software (BESS) Project Description: Online Ticket Booking System is a Web based application. You can directly book the ticket by this application. This application is implemented for Bus, Tour and Travel

Agency. Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery,

KendoUI Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Features: â€¢ Project

includes the feature of testing type and the activity on the project activities.
Project includes the online management and test process. Role and Responsibilities: Worked in Development of Back-end Like Data Collections. Database Schema Designing, and Create Database Dictionary & Made Database Constraints. I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. SRS documentation and Development.

5. Project Name: School Management System (SMS) Project Description: School

Management System is complete school management software designed to automate a school's diverse operations from classes, exams to school events calendar. This school software has a powerful online community to bring parents, teachers and student on a common interactive platform. It is paperless office automation solution for today's modern schools. The School Management System provides the facility to carry out all day to day activities of the school, making them fast, easy, efficient and accurate. Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012

Operating System: Windows 7 Features: Project includes the feature of testing type and the activity on the project activities. Project includes the online management and test process. Role and Responsibilities: Worked in Development of Back-end Like Data Collections. Database Schema Designing, and Create Database Dictionary & Made Database Constraints. I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. SRS documentation and Development.

6. Project Name: CREDIT MONITORING application Using the CREDIT MONITORING application, RMs, UHs, Credit Controllers and CMUs are able to monitor and manage the following items online, update the regularization dates and add their comments as well as generate reports:

- Overdrafts - Past Dues - SBLC / FG Expiry - Mortgage Expiry - Cheques Returns & Failed Direct Debit - NBF vs. CB Classification

Relationship Manager The relationship manager can only update the Regularization Date and the RM Comments. All other fields will be disabled (greyed-out) for the relationship manager. On updating the Regularization Date and the RM Comments, a successful message will be displayed to the RM and then the RM will be navigated to the Dashboard screen again.

Credit Controller (CCU) The credit controller can only update the CCU Comments, if and only if the Regularization Date and RM Comments are present. Otherwise, the CCU Comments field will be disabled (greyed-out). All other fields will also be disabled (greyed-out) for the CCU. On updating the CCU Comments, a successful message will be displayed to the CCU and then the CCU will be navigated to the Dashboard screen.

CMU The CMU can only update the CMU comments, if and only if the CCU Comments are present. Otherwise, the CMU Comments field should be disabled (greyed-out). All other fields will be disabled (greyed-out) for the CMU. On updating the CMU Comments, a successful message will be displayed to the CMU and then the CMU will be navigated to the Dashboard screen.

UH The UH can only update the UH comments All other fields will be disabled (greyed-out) for the UH. On updating the UH Comments, a successful message will be displayed to the UH and then the UH will be navigated to the Dashboard screen.

Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012

Operating System: Windows 7

Role and Responsibilities: Understanding requirements, Coding and unit testing. SRS documentation and Development.

Hospital Management System (HMS) Project Description: Hospital

Management System is powerful, flexible, and easy to use and designed and developed to deliver real conceivable benefits to hospitals and clinics and more importantly it is backed by reliable and dependable. Hospital

Management System is designed for multispecialty hospitals, to cover a wide range of hospital administration and management processes. It is an integrated end-to-end Hospital Management System that provides relevant

information across the hospital to support effective decision making for patient care, hospital administration and critical financial accounting, in a seamless flow. Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery, Kendo UI Business Layer: .NET Framework 4.5, ASP.Net MVC5

Database Layer: SQL Server 2012 Operating System: Windows 7 Features:

â€¢ Project includes the feature of testing type and the activity on the project activities. â€¢ Project includes the online management and test process. Role

and Responsibilities: â€¢ Worked in Development of Back-end Like Data

Collections. â€¢ Database Schema Designing, and Create Database

Dictionary & Made Database Constraints. â€¢ I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. â€¢ SRS documentation and Development. 4. Project Name:

Ticket Booking Software (BESS) Project Description: Online Ticket Booking

System is a Web based application. You can directly book the ticket by this

application. This application is implemented for Bus, Tour and Travel

Agency. Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery,

KendoUI Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database

Layer: SQL Server 2012 Operating System: Windows 7 Features: Project includes the feature of testing type and the activity on the project activities.

Project includes the online management and test process. Role and Responsibilities: Worked in Development of Back-end Like Data Collections. Database Schema Designing, and Create Database Dictionary & Made Database Constraints. I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. SRS documentation and Development.

5. Project Name: School Management System (SMS) Project Description: School Management System is complete school management software designed to automate a school's diverse operations from classes, exams to school events calendar. This school software has a powerful online community to bring parents, teachers and student on a common interactive platform. It is paperless office automation solution for today's modern schools. The School Management System provides the facility to carry out all day to day activities of the school, making them fast, easy, efficient and accurate.

Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012

Operating System: Windows 7 Features: Project includes the feature of testing type and the activity on the project activities.

Project includes the online management and test process. Role and Responsibilities: Worked in Development of Back-end Like Data Collections. Database Schema Designing, and Create Database Dictionary & Made Database Constraints.

I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. SRS documentation and Development.

6. Project Name: CREDIT MONITORING application Using the CREDIT MONITORING application, RMs, UHs, Credit Controllers and CMUs are able to monitor and manage the following items online, update the regularization dates and add their comments as well as generate reports: - Overdrafts - Past Dues - SBLC / FG Expiry - Mortgage Expiry - Cheques Returns & Failed Direct Debit - NBF vs. CB Classification

Relationship Manager The relationship manager can only update the Regularization Date and the RM Comments. All other fields will be disabled (greyed-out) for the relationship manager. On updating the Regularization Date and the RM Comments, a successful message will be displayed to the RM and then the RM will be navigated to the Dashboard screen again.

Credit Controller (CCU) The credit controller can only update the CCU Comments, if and only if the Regularization Date and RM Comments are present. Otherwise, the CCU Comments field will be disabled (greyed-out). All other fields will also be disabled (greyed-out) for the CCU. On updating the CCU Comments, a successful message will be displayed to the CCU and then the CCU will be navigated to the Dashboard screen.

CMU The CMU can only update the CMU comments, if and only if the CCU Comments are present. Otherwise, the CMU Comments field should be disabled (greyed-out). All other fields will be disabled (greyed-out) for the CMU. On updating the CMU Comments, a successful message will be displayed to the CMU and then the CMU will be navigated to the Dashboard screen.

UH The UH can only update the UH comments All other fields will be disabled (greyed-out) for the UH. On updating the UH Comments, a successful message will be displayed to the UH and then the UH will be navigated to the Dashboard screen.

Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012

Operating System: Windows 7

Role and Responsibilities: Understanding requirements, Coding and unit testing. SRS documentation and Development.

PROJECTS WORKED ON

1. Navnirman Tech Festival

à Navnirman Tech Festival is a technical event management application that is used to scheduling and organizing event.

à Technologies: ASP.NET MVC, SQL Server, Entity Framework, AJAX,

JQuery

à Role: Involved Everywhere

2. Like Security

à The Like Security web application provides trusted services and man power as well labour management.

à Technologies: ASP.NET MVC, SQL Server, Bootstrap, AJAX, JQuery

à Role: Involved Everywhere

3. Performance Review (In House Project)

à This is an In-House Web application which is used to fill the review for particular Employee by other employees who worked with him. This application is very useful to take decision in appraisal of employee. All the submitted review can be downloaded in PDF format as per selection.

à Technologies: ASP.NET MVC, Entity Framework, SQL Server, AJAX, JQuery

à Role: Involved Everywhere

Dot Net Developer - The Tie Bar
Skill Details
.NET- Experience - 34 months
ASP- Experience - 34 months
ASP.NET- Experience - 34 months
C#- Experience - 34 months
JAVASCRIPT- Experience - 34 months
Company Details
company - The Tie Bar
description - Duration: January 2017 to Till Date

Responsibility:
â€¢ Design and coding in a .NET server-side environment, specifically utilising the Microsoft MVC framework and client side environment using Knockout JS.
â€¢ Consuming Web API and WCF Rest full services.
â€¢ Designed and coded application components in an agile environment utilizing a test driven development approach.
â€¢ Created and maintained project tasks and schedules.
â€¢ Provided programming estimates, identified potential problems and recommended alternative solutions.
â€¢ Worked in close cooperation with project managers and other functional team members to form a team effort in development.
â€¢ Utilized pair programming approach to ensure high quality code.

Projects:
Title: THE TIEBAR
Environment: Visual Studio 2015, MVC 5.0, C#, JavaScript, JSON, LINQ, HTML 5
Database: SQL Server 2015

Role: Developer
Description:
The Tie Bar is US based online shopping website; it is the one-stop destination for luxury menswear with premium dress shirts, ties, bow ties and more,

Title: Leave Management System
Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery
Database: SQL Server 2008

Role: Developer
Description:
A Leave Management System is a web application having two module one is front end and second is admin module. Admin user can manage the site content in this application. The main functionality of this web application is used for maintaining the employee leave policy in a company

Title: Around Pune (CMS)
Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery
Database: SQL Server 2008

Role: Developer
Description:
Around Pune is a web application. In that there are two modules one is admin module and another is client or front end. Admin module controls the site date or its cms (content management system) project. The purpose of this site is to show or provide the details of all the spots and tourists places around the Pune.

Title: Country Side
Environment: Visual Studio 2008, ASP.Net, C#.Net, JavaScript, JQuery
Database: SQL Server 2008

Role: Developer
Description:
This is cms (content management system) website controlling by admin user. In that, there is one admin module to maintain website content. This site is used to provide information about tourist places, and provide offers, Different packages for trips.
company - Hamsa Hitech Pvt. Ltd
description - Responsibility:
â€¢ Design and coding in a .NET server-side environment, specifically utilising the Asp.Net and C#.Net.

â€¢ Design and implement systems that use relational databases, specifically SQL 2008.

Project:

Title: A G JOHNSON

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery,

Database: SQL Server 2008

Role: Developer

Description:

A G JOHNSON is a global employment website. The main purpose of this application is to recruit employees for their clients in different countries like Switzerland, Norway and Sweden and it provide services like Organisational Development, Management and Leadership Support and Development, Legal Support

Title: CRM for Company

Environment: Visual Studio 2008, ASP.Net 3.0 using C#.Net, JavaScript,

JQuery,

Database: SQL Server 2008

Role: Developer

Description:

Customer relationship management System is a web application. Which is maintaining the relation with company? We can view the Project List, Client List, Notification List, Appointment List, Conversation List, Client Person List and Company Person.

I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. SRS documentation and Development.

6. Project Name: CREDIT MONITORING application Using the CREDIT MONITORING application, RMs, UHs, Credit Controllers and CMUs are able to monitor and manage the following items online, update the regularization dates and add their comments as well as generate reports: - Overdrafts - Past Dues - SBLC / FG Expiry - Mortgage Expiry - Cheques Returns & Failed Direct Debit - NBF vs. CB Classification

Relationship Manager The relationship manager can only update the Regularization Date and the RM Comments. All other fields will be disabled (greyed-out) for the relationship manager. On updating the Regularization Date and the RM Comments, a successful message will be displayed to the RM and then the RM will be navigated to the Dashboard screen again.

Credit Controller (CCU) The credit controller can only update the CCU Comments, if and only if the Regularization Date and RM Comments are present. Otherwise, the CCU Comments field will be disabled (greyed-out). All other fields will also be disabled (greyed-out) for the CCU. On updating the CCU Comments, a successful message will be displayed to the CCU and then the CCU will be navigated to the Dashboard screen. CMU The CMU can only update the CMU comments, if and only if the CCU Comments are present. Otherwise, the CMU Comments field should be disabled (greyed-out). All other fields will be disabled (greyed-out) for the CMU. On updating the CMU Comments, a successful message will be displayed to the CMU and then the CMU will be navigated to the Dashboard screen. UH The UH can only update the UH comments All other fields will be disabled (greyed-out) for the UH. On updating the UH Comments, a successful message will be displayed to the UH and then the UH will be navigated to the Dashboard screen. Environment: Presentation Layer: HTML, CSS, JavaScript, Jquery Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Role and Responsibilities: Understanding requirements, Coding and unit testing. SRS documentation and Development.

company - Auxledger

description - Worked with on lots of product on blockchain.

↳ Bitcoin: Build Wallet and explorer on Bitcoin

↳ Ethereum: Build Wallet and explorer on ethereum blockchain.

↳ Customize product on Ethereum: Inventory system (Build smart contract in solidity,

deployed in java byte code and on ethereum as well and I have written API in java spring on that and then build front end and called all Api)

↳ Audit Logger: I have audit logger for OTC exchange to keep all transaction record in blockchain.

↳ DOC Safe on ethereum: I have build an ethereum application to keep Documents safe on blockchain and document in encrypted form on server.

↳ And explore with Litecoin, Ripple & exchange (OTC P2P) Hyperledger Fabric ..continue ..

company -

description - Worked with a USA team on blockchain on ethereum, I have designed product on ethereum

blockchain,

↳ Setup private ethereum and bitcoin blockchain. Worked on loyalty program system and HER

System on ethereum network.

company - ERP System, CRM for Real Estate Company

description - ↳ At Lavisa Infrastructure Bangalore Sep 2015- Oct 2016

Software developer

↳ ERP System, CRM for Real Estate Company.

company - News Portal

description - ↳ On demand product development from client side requirement. Like

↳ Dynamic website: Content management system where I have designed front end with backend where content of website was manageable from admin panel.

↳ News Portal: News portal where content was in Hindi language. I have used Html, Css, JavaScript, JDBC, MySQL data base.

↳ Birthday Reminder: A small web application for birthday reminder, I have used HTMl, CSS, JavaScript, JDBC, MySQL DB.

↳ Car parking System: A web application for Management of Car Parking System, I have used

HTMl, CSS, JavaScript, JDBC, MySQL DB.

company - Company portal for employee management for Inside Company

description - ↳ At United Telecom Limited Ranchi Nov 2013-Sep 2014

Web developer

↳ Company portal for employee management for Inside Company. Onsite employee, & in different-different district. And management of all kind of government service like adhar card, Birth certificate, pan card tracker etc.

Technology skill:

Technology: Blockchain (Bitcoin, Ethereum, Ripple, Hyperledger Fabric)

Block-chain: Private setup of blockchain, Node building.

Smart Contract: Solidity Language.

Smart Contract Api: Java Spring

Blockchain Dapp Building: Node js, React js, Express js

company - Auxledger

description - Worked with on lots of product on blockchain.

↳ Bitcoin: Build Wallet and explorer on Bitcoin

↳ Ethereum: Build Wallet and explorer on ethereum blockchain.

↳ Customize product on Ethereum: Inventory system (Build smart contract in solidity,

deployed in java byte code and on ethereum as well and I have written API in java spring on that and then build front end and called all Api)

↳ Audit Logger: I have audit logger for OTC exchange to keep all transaction record in blockchain.

↳ DOC Safe on ethereum: I have build an ethereum application to keep Documents safe on blockchain and document in encrypted form on server.

↳ And explore with Litecoin, Ripple & exchange (OTC P2P) Hyperledger Fabric ..continue ..

company -

description - Worked with a USA team on blockchain on ethereum, I have designed product on ethereum blockchain,

↳ Setup private ethereum and bitcoin blockchain. Worked on loyalty program system and HER

System on ethereum network.

company - ERP System, CRM for Real Estate Company

description - ↳ At Lavisa Infrastructure Bangalore Sep 2015- Oct 2016

Software developer

↳ ERP System, CRM for Real Estate Company.

company - News Portal

description - ↳ On demand product development from client side requirement. Like

↳ Dynamic website: Content management system where I have designed front end with backend where content of website was manageable from admin panel.

↳ News Portal: News portal where content was in Hindi language. I have used Html, Css,

JavaScript, JDBC, MySQL data base.

↳ Birthday Reminder: A small web application for birthday reminder, I have used HTMl, CSS,

JavaScript, JDBC, MySQL DB.

↳ Car parking System: A web application for Management of Car Parking System, I have used

HTMl, CSS, JavaScript, JDBC, MySQL DB.

company - Company portal for employee management for Inside Company

description - ↳ At United Telecom Limited Ranchi Nov 2013-Sep 2014

Web developer

↳ Company portal for employee management for Inside Company. Onsite employee, & in different-different district. And management of all kind of government service like adhar card, Birth certificate, pan card tracker etc.

Technology skill:

Technology: Blockchain (Bitcoin, Ethereum, Ripple, Hyperledger Fabric)

Block-chain: Private setup of blockchain, Node building.

Smart Contract: Solidity Language.

Smart Contract Api: Java Spring

Dapp Building: Node js, React js, Express js

MONGODB- Exprience - 16 months
CONTRACTS- Exprience - 12 months

MYSQL- Exprience - 9 months

AWS- Exprience - 6 months

PROBLEM SOLVING- Exprience - 6 months

Company Details
company - XINFIN Orgnization

description - Xinf is a global open source Hybrid Blockchain protocol.

Rolled out multiple blockchain based pilot projects on different use cases for various clients. Eg.

Tradefinex (Supply chain Management), Land Registry (Govt of MH),
inFactor (Invoice Factoring)

Build a secure and scalable hosted wallet based on ERC 20 standards for XINFIN Network.

Working on production level blockchain use cases.

Technology: Ethereum Blockchain, Solidity, Smart Contracts, DAPPs,

Nodejs

company - ORO Wealth

description - OroWealth is a zero commision online investment platform, currently focused on direct mutual funds

Build various scalable web based products (B2B and B2C) based on MEAN stack technology and integrated with multiple finance applications/entities.
eg. Integration KYC and MF Entities.

Technology: Node.js, Angular.js, MongoDB, Express

company - YallaSpree

description - Hyderabad, Telangana

Yallaspree is a largest digital shopping directory in U.A.E with over 22K stores.

Own the responsibility to develop and maintain following modules:

- Admin and Vendor interface - Database operations
- Writing Webservices - Complete Notification system
- Events and Offers Page

Technology: CakePHP (PHP Framework), JQuery, MySql

company - RailTiffin.com

description - Mumbai, Maharashtra

RailTiffin.com is an e-commerce platform to serve food to railway passengers.

Worked on multiple roles like bug fixing, DB operations, Feature customisation and writing API endpoints.

Technology: OpenCart (Ecommerce Framework), JQuery, MySql

company - Accolite Software India Private Limited

description - Bengaluru, KA

Accolite is a global IT Services company headquartered in Dallas, USA with offices in India.

Worked on Birst Analytics Tool to develop, deploy and maintain reports

description - Department: Testing

Responsibilities:
To check ACB and VCB of Circuit Breaker.
Following test conducted of Circuit Breaker as per drawing.
1. To check breaker timing.
2. To check contact resistance using contact resistance meter (CRM) 3. To
check breaker insulation resistance (IR) 4. To check breaker rack out and
rack in properly or not.
5. To check closing and tripping operation work properly or not.
To check and following test conducted in MCC & PCC panel.
1. Insulation Resistance (IR) test.
2. Contact Resistance (CRM) test.
3. To check connection on mcc & pcc panel as per drawing.
To check and following test conducted in transformer.
1. Insulation Resistance (IR) test.
2. Transformer Ratio test.
3. Transformer Vector Group test.
4. Magnetic Balance test.
5. Magnetic Current test.
6. To check the transformer tapping remotely as well as manually 7. To
check the all alarm and tripping protection command work properly
Or not as per circuit diagram.
To check and test conducted in HV cables.
1. Hi-Pot test.
2. Insulation resistance (IR) test.
To check the LV cables using megger (IR Test) To check the relay
connections as per circuit diagram.
Create the defects list which arising during the testing and try to find the
solution to minimize the problem.

Responsibilities:
To check ACB and VCB of Circuit Breaker.
Following test conducted of Circuit Breaker as per drawing.
1. To check breaker timing.
2. To check contact resistance using contact resistance meter (CRM) 3. To
check breaker insulation resistance (IR) 4. To check breaker rack out and
rack in properly or not.
5. To check closing and tripping operation work properly or not.
To check and following test conducted in MCC & PCC panel.
1. Insulation Resistance (IR) test.
2. Contact Resistance (CRM) test.
3. To check connection on mcc & pcc panel as per drawing.
To check and following test conducted in transformer.
1. Insulation Resistance (IR) test.
2. Transformer Ratio test.
3. Transformer Vector Group test.
4. Magnetic Balance test.
5. Magnetic Current test.
6. To check the transformer tapping remotely as well as manually 7. To
check the all alarm and tripping protection command work properly
Or not as per circuit diagram.
To check and test conducted in HV cables.
1. Hi-Pot test.
2. Insulation resistance (IR) test.
To check the LV cables using megger (IR Test) To check the relay
connections as per circuit diagram.
Create the defects list which arising during the testing and try to find the
solution to minimize the problem.

description - Department: Testing

Responsibilities:
To check ACB and VCB of Circuit Breaker.
Following test conducted of Circuit Breaker as per drawing.
1. To check breaker timing.
2. To check contact resistance using contact resistance meter (CRM) 3. To
check breaker insulation resistance (IR) 4. To check breaker rack out and
rack in properly or not.
5. To check closing and tripping operation work properly or not.
To check and following test conducted in MCC & PCC panel.
1. Insulation Resistance (IR) test.
2. Contact Resistance (CRM) test.
3. To check connection on mcc & pcc panel as per drawing.
To check and following test conducted in transformer.
1. Insulation Resistance (IR) test.
2. Transformer Ratio test.
3. Transformer Vector Group test.
4. Magnetic Balance test.
5. Magnetic Current test.
6. To check the transformer tapping remotely as well as manually 7. To
check the all alarm and tripping protection command work properly
Or not as per circuit diagram.
To check and test conducted in HV cables.
1. Hi-Pot test.
2. Insulation resistance (IR) test.
To check the LV cables using megger (IR Test) To check the relay
connections as per circuit diagram.
Create the defects list which arising during the testing and try to find the
solution to minimize the problem.

Electronics Engineer - Abacus Electronics Pvt Ltd

Skill Details

Language - C, C++- Exprience - Less than 1 year months

Operating Systems- Windows 7-8/NT/XP- Exprience - Less than 1 year months

Company Details

company - Abacus Electronics Pvt Ltd

description - Duties:

â Perform electronic system testing for acceptance, compliance, warranty and other types.

â Develop test plan and procedure for electronic systems.

â Maintain complete and accurate documentations for system testing.

â Analyze and troubleshoot test defects in a timely fashion.

â Write system assembly instructions and resolve assembly issues accurately.

â Work with Supervisors to plan and coordinate test activities.

â Evaluate system performance and suggest improvements.

â Understand and interpret drawings, schematics, technical manuals and instructions.

â Also performed Hardware testing, debugging of hardware PCBs.

â Follow company policies and safety regulations.

â Work with cross-functional teams to complete assigned job duties within deadlines.

â Recommend process improvements to enhance testing efficiency.

company - Minilec India Pvt Ltd , Pirangoot.

description - i Taking responsibility for the quality of a company's product.

i Working with the departmental manager, production staff and suppliers to ensure quality, they aim to minimize the cost of reworking or waste and maximize customer satisfaction with the product.

i To establish, implement and maintain quality management system to measure and control quality in the production process.

i Work with the aim that to eliminate the causes of quality issues and reduce the risk of failure.
